OLD AGE PENSIONS JUST.

Victor L. Berger says why Socialists Oppose them to the Workmen.

In every working man, to the manhood that he has worked for, is the right to live and to die as he pleases. In the workers' hands lie the very foundations of society. If the workers were not the foundation of society, the capitalistic system could not exist. It is the workers who keep the wheels of industry going, who produce the wealth of society.

The most obvious indication of this is the fact that the capitalist system is the present system of society. The capitalistic system cannot exist without the labor of millions of workers.

A TALK WITH LIFE.—By Maxim Gorky.

Baker was expelled from school after he had been there for five years. He was a good boy, but his love of freedom and independence caused him to be against the system of education. He was sent to work in a factory, but his health was not good, and he could not work long hours. He tried to find a better job, but his lack of education made it difficult for him to find work. He eventually found work as a day laborer, and he lived from hand to mouth, sometimes finding work, sometimes not. He was always hungry and cold, and he could not find a place to sleep. He was always in debt, and he was always afraid of the police. He was always alone, and he was always sad. He was always thinking about freedom and independence, and he was always trying to find a better life. But he could not find it, and he died in poverty and despair.
