HOW CROOKED GAS IS MADE.

It is not very common news to the many users of gas for the past week. The Wisconsin Legislature at Madison has just passed a bill that will add to the price of gas in many cities. The bill is intended to make it more expensive for those who use it. It is estimated that the bill will result in an increase of about 10 cents per thousand cubic feet. This is the amount of gas used by an average family in a month. The bill has been passed by the legislature and is now awaiting the governor's signature. If signed, it will become law in 30 days. The bill has been opposed by the gas companies, who argue that it will result in higher prices for their customers. They point out that they already pay a great deal of money for the gas they use, and that this new tax will only add to their costs. The bill has been supported by the gas users, who argue that they need the money for the services they provide. They believe that the bill is necessary to provide for the proper operation and maintenance of their systems. The governor is expected to sign the bill, and it will go into effect on August 1, 1945.
The Slide the Government is on, is Bound to Win!

Allen L. Benson Discusses the big Chicago Meat Packers' Strike and Shows where the Government is going.

When engaged in any understanding of the new coming strategy to pass for a reformed and moral campaign, it would be a mistake to attempt to explain what are the real issues, as well as the actual facts of the case, in their present position. The postal clerks' strike, and the struggles of the various labor unions in the West, are the same in their essentials as those of the past, and will not fail to be the same as those of the future.

As a rule, the strike, or the stoppage of work, is not the result of a deliberate effort by the workers to change the conditions of work. It is the result of a struggle of the workers to maintain their rights and to obtain better working conditions. The strike is not the end, but the beginning of a new struggle for the improvement of the conditions of labor.

The strike is a means of expressing the demands of the workers for better working conditions. It is a means of forcing the employer to make concessions and to improve the conditions of work.

Socialist Officials Under Capitalism.

By A. G. VANDERLEEVEN, California.

From the Socialist Yorkville, a neighborhood of the city of New York:

"For the last two years I was treasurer of the Socialist party in this city. A couple of days ago, the party, in its convention, proposed the formation of a national socialist bank to bring under socialist control the great financial power of this country. The party decided to prepare a report on the condition of the country, and to announce its position on the great financial question, in order to carry out this policy.

"Our national bank is a socialist institution, which will be used for the benefit of the working class. The purpose of this bank is to control the financial power of the country, and to make it a servant of the people, instead of being a slave to the capitalists. The party decided to prepare a report on the condition of the country, and to announce its position on the great financial question, in order to carry out this policy.

FOR OUR NEW READERS:

THE COUNTRY is made up of working people, both intellectual and manual, working for their livelihood. Being in control of the government, it can be said that government in the hands of this country is representative, but in what sense is the country? We Socialists believe that the country should be managed by the educated working class, and that a strong government should be established in the first place. We want the people to be able to control their government, to have a voice and a say in its operations, which is the reason why we call for a government by the people, for the people, and of the people.

THE STORY OF THE OLD KETTLE LID MAN

Long ago, when the world was new and the stars were bright, there lived a man who was known for his wisdom and kindness. He was called the Old Kettle Lid Man, and he lived in a tiny cottage by the sea. The cottage was made entirely of old kettle lids, and the man was known for his ability to turn these lids into useful objects.

One day, a young boy came to the cottage and asked the Old Kettle Lid Man if he could help him. The man agreed, and together they worked on a new project. The boy asked if he could stay and learn from the Old Kettle Lid Man, and the man agreed. The boy stayed for many years, learning from the Old Kettle Lid Man and helping him with his work.
