COCKROACH PAVEMENTS vs. SOCIAL-DemocracY
By Victor L. Berger.

There is a general sentiment in Milwaukee, passed nine years ago, forbidding the further laying of wooden pavements in Milwaukee.

The general sentiment is based on the idea that wooden pavements are expensive to build and maintain, and that they attract cockroaches and other insects.

The city government has attempted to address this issue by the use of other materials for pavement, such as concrete.

Cockroaches are not a common problem in Milwaukee, as the city has focused on controlling other insect pests.

The use of wooden pavements has been discontinued, and the city has moved to more effective and durable methods of pavement, such as concrete.
WHAT LIFE MEANS TO ME

The last of all the troubles, sorrow, and tears are the most lasting, the most strong, the most real. The last of all the troubles, sorrow, and tears are the most lasting, the most strong, the most real.
