It is reported that August Bebel. the great leader of the German So cial-Democracy, will pay a visit to America in May next to gather an idea of the economic conditions in this country.

When the President at St. Louis referred to babies as a "stock that should be kept up" he showed how refined are his ideas concerning the human race. Most rulers look on their subjects as livestock.

Here is the modern reading of a well known scriptural quotation: "Little children suffer who come And the "me" in this case is not the representative of a child-pure heaven, but the twentieth Christian owner of a factory hell!

The capitalist party aldermen came to the rescue of the Western Union in the Milwaukee city council and voted down a resolution on the telegraphers' strike, because it said that the telegraph companies had been crippled by the strike. But what do you expect?

Next week or the week after w will print another of Comrade Mil-dred Minturn Scott's translations of Jaures' articles. The title of the article next week will be "Private Property and the Right of Inherit-ance." It will be followed by one "The French Revolution and the Right of Inheritance." Students of Socialism should not miss these articles; indeed, they cannot afford

In the closing session of the Canadian Trades and Labor Congress at Winnipeg last week, the Socialist delegates refused to sing "God Save the King." In the Pro-vincial Perliament of Vancouver last winter the Socialist members refused to stand when the representative of the king condescended This will make some anglomaniacs writhe, but sensible Americans, who have inherited some of the spirit of 1776, will certainly smile approvingly.

St. Louis Labor says Roosevell was received in St. Louis as if he was a king. Well, he is more of a king, when you come down to the actual facts, than the king of England, and if this country's official flunky to the "Court of St. James" (Whitelaw Reid) rags himselfs out in silk knee breeches and the tin-selled finery and lace of the thronefawners while in England, it shows what his kind would like to do round the American throne-if they only dared.

Tell your middle class friend, who is willing to do a little reading, to get "The Spirit of American Government," a new book by Prof. J. Allen Smith, professor of political science, University of Washington. It is an accordance to the second of the secon ton. It is an eye-opening book, written by a non-Socialist, but a man who is not afraid of facts and especially the facts of American history that have been covered up by capitalistic Fourth of July orators these many years.

We are pained to note a surpris display of ignorance on the part of a western exchange, the Enterprise, of Yuma, Ariz. It says "Borah may go to the pen," and be-fore the issue in which it says this reaches us Borah is a free man that the magazines have been exposing these past years as being owned by various corporate inter-ests, through said interests having the say politically as to who should be judge

C. W. Post, of Gripe-Nuts fame made an address this week to the facturers' Association, of which he is president, in which he again re-ferred to organized labor as a trust. But in thus trying to smear the unions with a capitalist taint he seemed to forget that'a trust is a heme for getting the control of things into the hands of a few men, whereas the labor unions can only be successful when they get as many into their ranks as possible. It is therefore mere name-calling to speak of a union as a trust.

Colliers' has been "knocking" Grape-Nuts, an alleged breakfast food turned out by Post, one of the ce moguls. Severa papers that run lucrative advertise-ments of the Post food are defend-ing the food and elaiming that if it is not good food neither are the other breakfast foods, such as rolled oats, wheat, rye, etc. But are these comparable? Rolled oats and wheat

# WE WILL STAND by the REAL AMERICAN PROLETARIAT

The American Federation of Labor was not represented at all.

·And we were represented accordingly.

Among other resolutions voted opposition to all restriction of immigration, based upon racial or national distinctions - particularly with reference to Chinese, Japanese and Hindoo coolie labor.

The Congress favored restriction only against contract labor and professional strike breakers. But, of course, this is neither here nor there, because there is no Chinese free immigration in the European sense-and because it could never be shown that Chinamen and Japanese were brought over under contract. And once over here they break the strikes before they are be-

But the worst of it is this: Morris Hillquit not only declared in fa-vor of this resolution, but also said that from now on "we, the Ameri-can proletariat" will change our methods and will obey this resolu-

The trouble with our representa-tives at the Congress in Stuttgart was that so few of them are, or ever were, in touch with the real American labor movement, or are part thereof.

Comrade Hillquit is a prominent lawyer in New York, making a lot of money and owning a lot of property. And while he is a bright fel-low-doing a great deal of legal work for clothing manufacturers and some for the trades unions-he surely is not the man to speak at a abor meeting for the American proletariat, nationally or internationally.

No Jap and Chinaman can go into competition with Hillquit, but hey can compete with any painter, cloakmaker, machinist or carpenter.

As for Algernon Lee, the editor of the New York Worker, another "Intellectual"—the most that can be said of him is that he is Hillquit's man Friday. But I am somewhat surprised that Comrade Simons, who has of late tried to get into touch with the trades union move ment, should have stood for that kind of a resolution.

To begin with, I absolutely agree with the editor of the Philadelphia Tageblatt that 95 per cent of the delegates to the Congress came from countries where the question

number is almost unlimited.

The state owned railroads of Bavaria are grappling with tubercu-losis. But with us this is a very vital problem indeed.

One answer to the Stuttgart resolution has just ben given in Bellingmons. But other members could ham, Washington, and in Vango at their own expense and get a couver, British Columbia. In Belmandate from the National Execu-lingham many Hindoos have lately tive Board. A few days later in Vancouver, a

Canadian mob of workingmen atby the Congress, they passed one in tacked 1,500 Japanese laborers and also destroyed some Chinese and apanese shops.

During the riot, Baron S. Ishii, chief of the Japanese Bureau of Foreign Commerce, was severely injured.

The trouble is that there is too much hypocrisy and cant on this question in the Socialist ranks. They do not dare to tell the truththat this is a race question and that we shall have to break with a dogma that does not work in this case When Marx wrote his "Work-

igmen of all countries unite" in 847, there was no Chinese or Japinese or Hindoo labor problem. Marx nowhere mentioned the question. And the world cannot stand still or go to the demnition bowwows because he could not forsee this or the other vital matter. We have brains of our own.

At any rate, while we are willing to help the Chinese and Japanese working men in every possible way with our ideas, with our money and even with our arms, if neces sary some day-we do not want them to come to us and drag us down to a coolie standard.

Dragging Americans down the coolie standard would not help the Chinamen or the Japs in the east, but would hurt us immeasurably. It would make Socialism im-possible in this country for many hundreds of years.

And the argument that an un imited immigration of coolies might bring about a revolution of the whites so much the faster, is simply carrying the "theory of misery" ad absurdum.

A "revolution" of that kind would not be a real revolution, but simply a series of hunger riots, These would very appropriately start with killing off the co-called Socialists who were in favor of coolieising the American proletariat

A "revolutionary" argument of that kind does not receive any serious consideration.

This proposition is also pure insanity from a political standpoint. The trades unions of this country

But if we do not stop this immifor Post, and it would seem that the recent court disclosures, it has and the expected has happened. It is not simply a question of keeping away Chinese breakers

The Frenchman who defended the resolution said that in his country they organized the Italians, Belgians and Spaniards who came to France. That is easy. In all probability that Frenchman never saw a Chinaman except in a picture book.

For the next twelve generation no one can organize Chinamen on a Caucasian basis. The Chinese civilization is at least to coo years old-er than the European (or the American civilization), And a tree like that does not yield in a generalike that does not weld in a generation or two. Chinese habits have become a matter of atavism.

Even the Japanese civilization is only European on the surface. They have been taught by German of-ficers how to bandle guns and by American exploiters how to use child labor. But scientists tell us that the anatomy of the Jap is dif- not have even that standard. -it is more simian ferent from ours-(ape-like). This may be an advantage, but we cannot change our anatomy in many generations-and we do not want to, nor do we want to get off the earth.

Today the question of Asiatic labor is only a Pacific coast ques-

America is a nation in the maklarly of the proletarians of this

We have welcomed 6,000,000 immigrants to the United States during the last six years. Most of these were Slavonians, Greeks, Italians and Russian Jews. All of them foreign to our way of think-ing and our mode of living.

We have received 1,400,000 of that kind of immigrants during the

past year.
Only a crazy man or a crook could claim that this immigration has not lowered the standard of living of the American workingman It has lowered it.

It has pushed our workingman down everywhere, in the mine, in

the mill, in the factory. Yet organized labor has stood

But all workingmen, organized and unorganized, will draw the line at the Asiatic immigration.

The United States and Canada must remain a white man's country if we are to have Socialists before many generations, say the Social-Democrats. We can teach Sicilians, Greeks and Russian Jews.

Open the doors to Chinamen Japanese and Hindoos, and we shall not have Socialism in 500 years. There has not been any perceptible change in the modes of thinking of the masses of Chinamen, Hindoos and Japanese in a thousand years.

There is also another aspect. As we said before, 1,400,000 immigrants came here last year.

wo, they will easily outnumber us. Now some may say that this is the survival of the fittest. They are simply superior, economically and physically. They can live on so much less and multiply so much faster.

That may be true. But we want there will only be peace when cap-italistic "mastership" has disap-peared and when the only master wone of that superiority and none of that fitness. We will not permit them to conquer us either by their lower standard of living or by their great fecundity.

If they want to conquer us, they will have to do it by force of arms

I know very well that the capitalist does not care what becomes of the nation, as long as he can make 50 per cent instead of five on his "investment."

And certain preachers simply want to catch souls for their church.

But the Socialist party is the political organization of civilization. It is the party that has to look out for the future.

It was easy for the delegates from Belgium and from France and even from Germany to stand for a phrase in Stuttgart. There will be any Chinese or Japanese immigration , to these countries They are mainly countries with an emigration, not an immigration. But our country has only twenty in-habitants to the square mile. There is room here for 200,000,000 Chinanen, Japanese and Hindoos.

In-stead, it puts them as far apart as possible-the "masters" on the boulevards and the mastered class off in the back streets and in the cheap abodes that are crated together into flat buildings. Perhaps the archbishop does not suspect it, but there can never be a warm current of good, kindly feeling between master and man, so long as the unlovely relation of "master" and "man" continues. And it is bound to continue while the capitalist sys-

Dr. Gasper, the city physician of Stuttgart, Germany, examined the school children of that city and found that scarcely one-third could be set down as healthy. The superintendent has issued a circular of advice to mothers rec ommending milk, butter, eggs, cereals and whole wheat bread, and advising against coffee and meat for growing children. Not long ago the British nation was rudely awakened by discovering that the larger percentage of the men sought to be made soldiers of were found lacking in stamina and physically unfit for service. To such a pass have we come. And yet, why should there be surprise? The main purpose of the capitalist system un-der which we live at present is to deplete and exhaust the working the coffers of the capitalist class and there is no concern for the broken down worker in the process, for under the competitive wage system it is easy to replace a worker who gives out with a new applicant. We know that the next system of society must be a natural outgrowth of the present system, even as the present system is an outgrowth of past systems. There is absolutely nothing un-reasonable or impossible in our philosophy, and we invite you to investigate for yourselves.

But when you begin to investigate Socialism do not get sidetracked onto other movements and theories which may at first glance bear some resemblance to Socialism,

### PRINCIPLES OF SOCIAL-DEMOCRACY.

The Principles of International Col-lectivism as set forth in the Na-tional Platform, adopted at Chicago, May 8, 1904.

We, the Socialist party, in conven-tion assembled, make our appeal to the American people as the defender and preserver of the idea of liberty and preserver of the idea of liberty and self-government, in which the nation was born; as the only political movement standing for the program and principles by which the liberty of the sudividual may become a fact; as the only political organization that is democratic, and that has for its pur-pose the democratization of the whole society.

To this idea of liberty the Republian and Democratic parties are alike false. They alike struggle for power to maintain and profit by an industrial system which can be preserved only by the complete overthrow of such the struggle for the complete overthrow of such the struggle for the struggle f liberties as we already have, and by the still further enslavement and deg-radation of labor.

Our American institutions came into the world in the name of freedom the world in the name of freedom. They have been seized upon by the capitalist class as the means of rooting out the idea of freedom from among the p-ople. Our state and national legislatures, have become the mere agents of great propertied interests. These interests control the appointments and decisions of the appointments and decisions of the judges and our courts. They have

cial-Democracy as embodied in the united thought and action of the Social-Democrats of all nations. In the industrial development already accomplished, the interests of the world workers are separated by no national boundaries. The condition of the most exploited and oppressed workers, in the most remote places of the earth, inevitably tends to drag down all the workers of the world to the same level. The tendency of the competitive wage system is to make labor's lowest condition the measure or rule of its universal condition. Industry and finance are no longer national, but international, both in organization and results. Practically everything is made or done by many men—sometimes separated by seas and continents—working together for the same end. But this cooperation in production is not for the direct use of the things made by the workers who make them, but for the profit of the owners of the tools and means of production; and to this is due the present division of society into two distinct classes; and from it has sprung all the miseries, inharmonies and contradictions of our clinization.

If, under Socialism, we are told the majority shall decree this, that or the other thing, we shall have to take our medicine. Quite possibly we shall have to live in the same style of houses, have our hair cropped in a certain fashion, and wear clothing that will make us look like two peas in a pod.

The mere fact that under existing conditions we are following one another like a flock of sheep—that we are cast in the same mold—doesn't lessen our fear of the leveling influences of Socialism—it doesn't even restrain us from hissing when a Darrow refuses to stand up with the crowd and act "loyal" like so that it wouldn't be suspected that he had any ideas of his own.

The fact that these two classes have not yet become fully conscious of their distinction from each other, the fact that the lines of division and interest may not yet be clearly drawn, does not change the fact of the class constituted.

This class struggle is due to the private ownership of the means of employment, or the tools of production. Wherever and whenever man owned his own land and tools, and by them produced only the things which he used, economic independence was possible. But production, or the making of goods, has long since ceased to be individual. The labors of scores or even thousands, enter into almost every article produced. ### A Chance to Invest Some Money! The \$12,000.00 Issue of Bonds Presents a Good

Opportunity. To Sept. 30, individuals paid in \$1,825; branches of the Social-Demo-eratic party \$150, and unions \$1,200; a total of \$3,175. By months the re-ceipts were as follows: April, \$25; May, \$075; June, \$550; July \$1,050; Aug., \$25; to September 24, \$550. Total \$3,175.

The money thus derived has been paid out as follows: cylinder press, power paper cutter, chases, etc., about \$2,500; monthly payments on Mergenthaler linotype (the typesetting machine), \$450, and monthly payments on job printing plant, \$250, or a total of \$3,200.

Exclusive of the \$3,175 paid in, \$2,825 are subscribed for, nearly all of which is merely an exchange of bonds for mortgages.

The Mergenthaler mortgage remains to be paid. This amounts to \$1,340 and interest from Dec. 31, 1907. And this has got to be settled right

With the proceeds of this \$12,000 issue of bonds all outstanding notes and mortgages are to be paid. We are now forced to a "hand to mouth" existence and seldom, if ever, have sufficient balance of cash on hand.

The sale of these bonds will leave the company a balance in cash of \$1,670 as working capital. It will be to the company's interest to sell only as many as are necessary, and so probably not more than \$11,000 will be discussed in mediately.

disposed of immediately.

The value of these bonds must not be confused with value of the stock of the Milwaukee Social-Democratic Publishing Co. This stock has never been held out as an investment. On the contrary, most, if not all of it, has been purchased just to help the HERALD and not with any idea that it would ever pay dividends. Not so with the proposed bonds. We believe we are perfectly safe in recommending them as a sound and excellent investment. They will bear 5 per cent interest, payable semi-annually. This is about 2 per cent more than banks ordinarily pay. And as for security, it is certainly every bit as good and better than that usually offered by savings banks. Banks loan money to just such concerns as ours, and accept this kind of notes as security. If, then, such security is good enough at the banks to loan deposits on, the depositors getting only 3 per cent, are not they just as safe and just as good when accepted direct from us at 5 per cent?

The actual tangible property against which the bonds are to be issued, and upon which they will be a first mortgage lien, amounts to \$16,-121.87. To this must be added more than \$1,000 of accounts due us in excess of what we owe others and \$1,670 cash, the amount left after everything is paid, making a total of about \$19,000 of assets behind these bonds.

This shows that the bonds are well and amply secured. In fact, this valuation is based on a very conservative estimate. A none too high a figure would place the value of our assets at \$25,000.

Our readers are offered these bonds, to give such as care to invest an opportunity of as good, safe, sound and substantial an investment as deposits in savings banks ordinarily offer, but with a higher rate of interest. Under these circumstances don't you think it will pay you to withdraw at least a part of your savings account, and invest some in these bonds? Or, if you have no account, take as many bonds as your means allow.

If you know of any one who has money in the bank, or who has some to invest, see him at once on this proposition. Or if you do not wish to attend to this personally send name and address to us and advise us if you want to be mentioned.

### FOR OUR NEW READERS:

THIS COUNTRY is made up principally of working people, both industrial and agricultural, but it is ruled by the capitalist class, which is numerically a very small fraction of the population. Being in control, that class runa government in its own interests and against the interests of the rest of the

We Socialists believe that the country should be managed in the interests and for the well-being of those who produce the wealth. That is what government is for in the first place. The means of existence are now privately owned by capitalists, who comprise only twelve per cent of the population. By means of this private ownership a mere ONE PER CENT of the propie OWN OVER HALE OF THE WEALTH OF THE NATION, and the concentration is going on at per mell speed.

The means of production should be owned by the collectivity, in order that the fruits of industry may go to the MANY, instead of to the FEW.

the fruits of industry may go to the MANY, instead of to the FEW.

Under the present capitalist system, the majority of mankind must sell their labor power to the capitalists owners of the marit of production and distribution, in order to live—and to live very miserably at that.

The people own the post office, and everyholy is ylad of the fact. The people osgibt also to own all the trusts, so that all may enjoy the benefits. They ought to own every in-herty as soon as it has become sufficiently concentrated and organized to permit of such common ownership.

To bring this about, the people—that is, the workers, not the shikers—must have possession of the political power. The Social Democratic party known as the Sociality party in some states, and rationally is organized to bring this shout—through the abultion of capitalism. We insert that the industrious class shall be the wealthy class, and the idle class the poor and dependent class—although Social Democracy will, in time abolish all towerty and eliminate the drones.

The Social Democratic movement is international, but will doubtless achieve success in the United States first, because the capitalist system is farthest developed here and has made greater headway in preparing the ground for the higher system of society.

Resolutions.

"WHEREAS, On the 23d day of August, 1907, in the city of Los Angeles, California, Antonio I. Villarreal, R. Flores, Magon, Modesto. Diaz and Libredio Riveras were untawfully and foreibly arrested by detectives acting without warrant and inviolation of law, and this at the instance of the tyrannical government of New Mexico; and

"WHEREAS, There is an attempt being made at the instance of the American government to have said Villarreal and Magon extradited to the state of Missouri, to be tried upon the alleged ground of libel, it being laimed that they are fugitives from instice; and
"WHEREAS. The said Villarreal

the alleged ground of libel, it being claimed that they are fugitives from instice; and

"WHEREAS, The said Villarreal and Magon have proof that they were not in Missouri at the time of the commission of said offense, and did not flee from said state, and were not fugitives from justice; and

"WHEREAS, It is well known that the matter of the extradition is a mere subterfuge and a pretense on part of the Mexican government, instigated by said Mexican government for the purpose of in some way unlawfully removing the said Villarreal and Magon to the distant state of Missouri and eventually to unlawfully transport them into the territory of Mexico, there to be arrested and probably shot without a trial: Therefore, be it

"RESOLVED, That we, the Los Angeles Central Labor Council of Los Angeles, Cal., in public meeting assembled, denounce the unlawful arrest made by said detectives on American soil, at the instigation of a foreign and tyrannical power; that we protest against the city officials of the city of Los Angeles and denounce their act in having converted the city jail into a Mexican prison.

### NO JURY COMMISSIONER!

Mr. Editor: With a sense of horror and great disgust I read in the capitalistic papers that our judges exercised in the appointment of a jury commissioner the same ap-old doctrine of: "The public be damned," although the Federated ibers for the Trades Council appealed to those e is really a judges to have, for the sake of socalled constitutional equality, one of the rank and file of organized ribed for by labor appointed as such commissioner, inasmuch as the commissioners are exclusively members of the Democratic and Republican parties that stand for capitalistic interests only, and are more wirepullers than anything else. Before I forget, I saw them some time ago in a politicians' saloon down-town, after my friend had called my attention to their presence, and I must say that they made the impression on me of being penitentiary birds

> Now, Mr. Editor, I do not condemn the judges so much as the Democratic and Republican workers that are union men all the year, except the scabbing on election day. The horses and mules have more union sense in their heads.

rather than anything else.

No wonder that our so-called servants are ignoring the rights of la-bor, and are guarding the rights of exploiting capital.

The income tax decision alone shows that one judge annulled the will of the people, and of the United States Supreme Court, which holds all laws in favor of the working people unconstitutional. That court has the largest and grandest veto-power of the world. And we have to look out for our judges and our juries. some what on half-decentjustice, A Real Union Man.

This was a reference to the Bletcher Bill, and was a hint that the chief was on the track of the men who were in favor of a square deal in the department. The square deal in the department. Last week Deguire reported another fireman to the captain for shirking his work in the barn and the man attacked him and Deguire defended himself. Clancy fired Deguire also although one of the commissioners interceded for Deguire, feeling that he was not being justly dealt with. Clancy's rule in the fire department has been a costly one for Milwaukee, as it has demoralized the department. It is simply his luck that there have been no very big fires during his administration to show the real condition of the force.

### DEFINITIONS OF SOCIALISM.

A theory that aims to secure the re-construction of society, increase of wealth, and a more equal distribution of the products of labor and capital (as distinguished from property), and the public collective management of all industries. Its motto is: "Everyone according to his deeds." (Standard Dictionary)

A science of reconstructing society on an entirely new basis, by substituting the principle of association for that of competition in every branch of human industry. (Worcester's Dictionary.)

"Housest Answers to Housest Questions." In this pamphlet the author of "Socialism Made Plain" has made a frank, compelling appeal to the average citizen who has been misted by the lies about Social-Democracy by the paid editors of capitalism. The pamphlet costs only 5 cents a copy, or twenty copies for a dollar. Ym ought to be making big use of this little book. Address this office.

The Superior BAKING QUALITIES of ACORN RANGES - America's Best Bakers -THAT Is the Real Foundation of ACORN SUCCESS!

To carry the smoke out freely with an ordinary chimney, to distribute the heat evenly over

all the oven surfaces, the Acorn Sheet Flue is carefully proportioned to the oven and to the fire-box. By preventing waste of heat, it concentrates the strength of the fire on the oven, so that besides baking excellently it bakes quickly. The hot-blast firebox may be removed in a few seconds. These ranges will burn either hard or soft coal.

It was so raw that some of the local architects felt compelled to ignore the canons of professional look-theother-way-ness. And they called attention to the crooked work that was going on almost under the very eyes of the supervising architect, H. C. Koch. One of those who protested is today the building inspector of the city. As a result some of the dishonest work was taken out possibly for appearance sake.

# LABOR GETS SLAP!

Judges Fail to Appoint Representative of Workers on Jury Commission.

NC ONE KNOWS WHAT BECAME OF TRADES COUNCIL PETITION!

## LABOR RANKS GREATLY AGITATED!

Organized labor in Milwaukee qualified in every respect, to fill this was almost stunned last Tuesday morning when it read in the news papers that the Circuit Court Judges, Ludwig, Tarrant, Halsey, Williams and Brazee, had met and had ignored the petition of the Federated Trades Council for the appointment of a representative of the labor element in the city on the jury commission. The judges had re-appointed Charles H. Anson, a well-known Republican business man, and there was no word about cided on the appointment. As the the entirely just request of labor. Indignant union men began to pour in to the labor headquarters, 318 State Street, and at the Social-Democratic headquarters on Sixth Street, and to voice their disgust at the seemingly cold turn-down. They went to the daily capitalist papers but with the exception of one paper, the Wisconsin, they practically ignored the matter by merely referring to it in a few lines in the smallest type at their command. This did not tend to improve the temper of the workers, who claimed ceived from any quarter that an ap-that the papers had been seen and pointment other than that of Anson Melms administreed to Ald. Council. But-Moor is not altogether pleased with the manner in which the jury commissioners. Charles H. Trump, Hubert Schloemer and Charles H. Anson, have carried on their work. It is their duty to secure names for juries. They make out lists of prospective jurors and examine the persons so summoned as to their qualifications. It is said to have been 1 very practice to ask a prospective juror whether he worked for wages and as to whether he he worked for wages and so to whether he he hought jury services would interfere with his employment. This latter is an innocent looking question. It looks as if they were sole licitous for the workingman's welfare.
