There is not the faintest suspicion of any principle to be found among the whole lot of candidates.

As early as ten years ago both of the old parties adopted a platform demanding public ownership of public utilities.

As late as four years ago Mr. Dave Rose declared in the West Side Turner Hall, that he would get ns an electric lighting plant if he had to steal the money.

and nothing else. Yet in Milwaukee and every big city there is a large element of that class—and Rose's candidacy has also the support of the public service corporations and other capitalists who help to buy the so-called floating voters. And he also claims to have the support of certain Polish priests and politicians.

These are the elements of his strength.

And Rose makes his campaign accordingly. His main "campaign material" is free beer, free cigars, free lunch and even free fireworks, whenever "the refreshments" alone do not succeed as a "drawing card."

Of course, he also does some "orating" suitable to these occa-sions. He accuses the Socialists of wanting to divide up. This is funny enough, because his followers do not object to dividing up with his beer, his cigars and his lunches—and most of them would not lose anything even if they divided up with David S. Rose. The Milwaukee campaign is presenting a spectacle for the gods to weep over. The primary law has forced the old party office seekers to make individual scrambles, as never before, for the nomination.

### THE REASON for SOCIALISM By H. ESELL.

"Always be ready to give an answer to any one who asks your reason for the hope that you cherish."

—Epistle of Peter.

Insects as Promoters of Socialism,

A few months ago a gentleman of influence in public life who is a fruit grower, who would feel much insulted if accused of being a Socialist, appeared before the legislature of his state to present a peti-tion to have the state take up the matter of ridding the orchards of San Jose scale and other pests that were threatening the entire fruit industry. His chief and only argument was that it was a matter that the state alone in its collective capacity could handle. He showed that it made no difference how much expense and labor one man would put upon his orchards and vineyards to destroy these enemies so long as his neighbor was allowed to keep a few infested trees standing that he cared nothing about: that the negligent and careless farmer and fruit grower was a constant menace to the fruit industry of the entire state.

In this contention he was certainly right, but he overlooked some very important truths. State lines are imaginary lines, and scale insects, fungous diseases, and parasites of all kinds have no regard for imaginary lines, and so, if even his state were to take up the matter as he desired, and the states bordering it were not to do so, with the country now so densely populated that even the farmer class can call from one residence to another, there would be very little gained. must remember that the San Jose scale was not known in the United States until 1870, when it appeared in California, and twenty-three years later, in 1893, it had spread to the Atlantic Coast, and is now threatening the fruit industry in every part of the country. So this little insect, and all of its kind, these objects of nature following nature's laws, these friends (Shall I call them friends or emenies?) of man, do not give rise to state questions, but to national questions; do not drive the human family toward individualism of the type that is past, but toward Socialism, that is inevitable; do not incite men to fight and consume each other, but to cooperate, to combine against the common evil and exterminate it.

The Mexican cotton boll weevil was found to be too large a ques tion for the individual, or for a single state, and was made a national When the yellow fever was threatening the gulf coast in 1905, two states that in the past were willing to fight and die for states rights, cried out to the national government to take charge of the

But our influential gentleman, who was socialistic enough to have the state destroy the insects, if not to grow fruit, overlooked another truth. He would have the state compel every citizen to either cut down every infested tree, or provide himself with such spraying machinery as would enable him to keep his trees in a healthy condition. He forgets that this would require an investment impossible for one having just a few trees for his own use; that those having these few trees would be taxed by the state for this service, and inspection which would mostly benefit the grower on a large scale; that the great majority of farmers do not now use as much fruit as they should because it has become almost impossible to grow it without expensive machinery of all kinds; and that the effect of all such legislation is to still further concentrate such an industry into fewer hands, which becomes more and more detrimental to the common good under capitalism, while at the same time making for Socialism, when the same situation will be of the highest benefit to all, because fruit will then be grown in abundance for use, rather than for profit to a few individuals

### Socialism and the Laws of Health.

I have referred briefly to the relation of society as a whole to the laws of health. No one may any longer deny that in this particular society is a unit. The recognition of this unity brands every one to that extent, at least, as a Socialist. However much one may advocate the principle "Every man for himself," in other matters, he has no way of escaping that law of nature which decrees that if one member of society is subjected to such conditions as to cause him to contract disease, as to render him unclean, and insanitary, every other member of society is endangered by this disease, and subjected to the same filthy

lives in a house of two rooms for which she pays six dollars per month, and is not furnished with water from the city mains. She says she has to use a great deal of water and cannot afford to pay such rent, and pay for the water too, so she washes with water drawn from an old cistern in the back yard. She says the water smells like a carrion, and if her persons here the says the water smells like a carrion, and if her patrons knew the truth about it they would not give her any more clothes to wash. As long as we are willing to so exploit labor, we must not complain when our clothing that is sent out to be cleansed, comes back to us polluted, and containing vermin that carry cutaneous and other diseases; we need not wonder, as did a certain very careful woman, where these vermin come from. We are not careful enough, we are imposing upon ourselves when we impose upon our fellow man. This is a world of compensations. Action is equal to reaction. "With what measure ye mete, it shall be measured unto you."

I was at the home of a small farmer some time ago. Like all of

his class, he was very poor, and there was small chance of his bettering his condition; because on the small scale upon which he must operate he could not afford any of the labor-saving machinery or other helps that would render his efforts more effective and enable him to build up his place, so it kept going down year after year, and his poverty became more searching. His wife and several girls were preparing some green beans for market, their clothing apparently consisted of a single garment hung from the shoulders, and was very unclean, as were their bodies. Each had in her lap the vegetable they were working with, and as I observed the process and reflected that the same scene was being enacted in thousands of such hovels, I was again impressed with the fact of the unity of the human family, and said to myself: You cannot be clean yourself if your fellow man, and those upon whom you depend for a living are prevented from being clean.

That society is recognizing these truths more and more is shown by the fact that the inspection of food products, the sanitation, and the health conditions of residence sections are no longer questions for individuals, but have become a part of the public administration. When the incentive of private gain is destroyed with the capitalist system which alone perpetuates it, and the incentive of decency, of cleanliness, of health, of happiness, and of life, ic forced to the front by the recognition of the brotherhood of man, then we will understand in full what s now only a step in our evolution from an animal existence to a higher, better, and cleaner life.

That Supreme Court put on record the Dred Scott decision. But it didn't take that same court long to find out that when the people really want something they are going to have it. And the same Supreme have it. And the same Supreme Court that stood between "popular passion" and slavery, protecting the latter, was before long busy making constitutional provisions for a government in which body slavery thereafter should be unknown.

### HYGEINE AND SOCIALISM.

By Dr. H. L. Nahin.

While there are a number of hyrienic rules which the individual is fully capable of observing, still there are innumerable rules and measures which the individual is unable to execute without the aid of the community, especially in the large modern cities, where the individual is conditioned by the needs and desires of the people; by un-scrupulous owners of tenement houses; by soulless corporations and owners of railroads, mines, shops, and factories. Hence we must divide the hygienic rules into two divisions. 1, Personal Hygiene 2, Social Hygiene.

Personal Hygiene.

To maintain the working mechanism of the individual he must consume daily a sufficient amount of water. The body of the individual is working constantly. The tomach digests; the heart propels; the lungs pump in and out air; the brain dispatches its messages through he innumerable wires, called nerves. Now, to keep up the steam power of this complicated machinery, it is essential to have a sufficient supply of water. Ustwo to three quarts of water daily, and use from 12 to 16 gallons a day for cooking, washing and bathing purposer.

Water is cheap and easily obtainable. Hence there is no reason why such quantity should not be taken, except through ignorance of its importance. Insufficiency of water predisposes the individual to many and various diseases:

The Sentinel informed its readers that "Socialists are fearfully embarrassed by the outcome of their experiments in Brest, where a third of the population was reduced to pauperism, not through the eco-nomic workings of the system, but through the corruption into which the high-principled scheme was allowed to degenerate.

"There are 71,000 inhabitants," said the Sentinel, "of whom at the end of last year 23,584, or one-third of the total population, were in receipt of poor relief, not in a state of poverty, but as recipients of corrupt indulgence on the part of the Socialist administration."

Just as false, though a little more cleverly worked, is the charge that the Socialist authorities gave "poor relief to 23,584 persons, or one-third of the total population." The facts and figures are these: In 1903, the year preceding the election of the Socialists, 18,474 persons in Brest received poor relief. In 1904, the year the Socialists were elected, 18,110 persons were given relief. In 1905, the second year of So-cialist administration, the number f persons obtaining relief was 18,-128. In 1906, the persons receiving relief were divided into two es, those receiving free medical assistance, and those receiving other aid. The former class numbered 5,989, the latter class numbered 17,595. The Anti-Socialist author 17,505. The Anti-Socialist author of the book which gave the Sentinel its "facts" simply added these two classes together and obtained a total of 23,584, an astounding jump from 18,110. From this he arrives at the conclusion, and the Sentinel willingly swallows his statement, that these persons were

DEMOCRATIC FOUNDATIONS from 138,000 francs to 193,000 rancs. But could money have been better spent?

This is a part of what the Brest Socialists did, not "under a collectivist regime," but under the present bourgeois laws of France.

To use these laws for the benefit of t the working class is all any So-cialist city in any country on earth can do under the capitalist system.

We have perhaps given too much space to this tale of how "Socialism Rulned Brest." But the American press is so fond of producing hor-rible examples of Socialist cities across the ocean, that it is time to across the ocean, that it is time to call a halt. The editors rely on their readers' ignorance of foreign affairs, and on the trouble and delay of collecting facts to disprove these bugaboo yarns. The annual report of the Milwaukee Social-Democratic Publishing Co. for the year ending Dec. 31, 1007, has just been mailed.

Like all previous reports, it marks still further progress. It shows the largest regular receipts in the history of our institution.

During the year a cylinder press, power paper cutter and much other equipment has been installed. This makes the inventory the largest on record. The assets are also the biggest.

Much of the time and energy in 1907 was spent in disposing of our bonds, and in installing new equipment. The bonds are not all sold yet, and so we still pay six and seven per cent on some notes, which ought to be retired at once. and so we still pay six and seven per cent on some notes, which ought

and so we still pay six and seven per cent on some notes, which ought to be retired at once.

Several of them are due in the very near future and must be paid. Therefore, if you have been reckoning on some of these bonds kindly purchase them now. Then you will enable us to take care of this indebtedness. Owing to the fact that \$4.725 of bonds remain unsold, little can be done toward acting on the following resolution, which was unanimously adopted at the special meeting of stockholders held April 4, 1907:

WHEREAS, The time is fast approaching—indeed, some argue it is here now—when the Social-Democratic party of Milwaukee and Wisconsin, if it desires to achieve greater results and make further progress, must be represented by an English daily newspaper, and

WHEREAS, The Milwaukee Social-Democratic. RESOLVED, That we the stockholders of the Milwaukee Social-Democratic Publishing Company, at a special meeting, held April 4, 1907, hereby authorize, direct and empower the board oi directors of the Milwaukee Social-Democratic Publishing Company to enter into a contract whereby the Milwaukee Social-Democratic Publishing Company shall secure, in consideration of a long term lease for suitable equarters at a reasonable rental, and the payment of legitimate expenses of the promotion of a realty stock company, the privilege of sharing equally with the stockholders of the said, proposed realty stock company in all profits after six per cent has been pald annually on the stock of the said proposed realty company.

Just as quick as the opportunity presents itself. Social Democrats, union men, the Social-Democratic party and the Unions will be asked to provide the movement with a snitable home.

Until such time, however, as the entire issue of \$12,000 of bonds is sold and paid for, little can be accomplishing toward securing this object. Yet this is the next big thing we are bound to tackle. Our plant is constantly growing. The party is bound to use more and more office room. Even with the increase in floor space of last June, there is now none to spare And, sooner or later, we shall be obliged to issue a daily newspaper. With such conditions, the quicker we get into a building especially planned for our use, and sufficiently large to enable us to expand, the better for the movement.

And one party lends itself as naturally and readily to the interests of the capitalist class as the other. And both naturally become corrupt, no matter what change may take place in the personnel of the office holders.

### AN OLD FALLACY.

AN OLD FALLACY.

No intelligent man longer believes in the panacea of electing so-called "good men" to office. Plenty of "good men" have been corrupted by the bad system which they have tried to patch up and regulate. All high-sounding clamor by capitalist parties about business principles, "good men," etc., is simply a dishonest bid for votes, and is dictated by capitalist class interest. Business corrupts politics. This also disposes of the shopworn issue of "business men" for the offices.

A municipal government cannot have the same end in view as a pri-

The trouble is that too many municipal government ought never to be conducted —and that is just the reason why we have had and still have graft investigations in our American cities, although all of them have "business".

THE ROOT OF THE EVIL.

The Social-Democratic party goes to the root of the evil. Socialism will some day entirely remove the causes, and they will only disappear to the extent that we introduce So-The Social-Democrats, having this

The Social-Democrats, having this goal in view, possess the new social conscience. Of the many Social-Democrats elected in Germany, France, England and Austria, hardly one has fallen by the wayside.

We can also proudly point to the record of the Social-Democrats in this city. Their scrupulous integrity is not denied even by our

a stimulous to honesty and progress.

FAILURE OF REGULATION.

The utter inefficiency of the old parties is nowhere more apparent than with reference to the problem of public utilities. It is just now shown by the miserable failure of their boasted "regulation."

The Social-Democratical and the country of the city to provide at least four raunicipal hospitals, free free week provide at least four raunicipal hospitals, free free weeks from every taint of charity, including a maternity and a tuberculosis hospitals. Also a public crematory, which shall be free to those applying.

MUST HAVE OUR RIGHTS.

In view of the charter convention, delegates to which are to be chosen this year, we demand that in the formulating of the new charter the city shall be empowered to control its own affairs and meet the needs of its

own life.

We ask for complete home rule in municipal matters, and for the initia-tive, the referendum and the right of recall under proper restrictions.

OUR PROGRAM.

In the light of the above facts, we make in this spring campaign the fol-

make in this spring campaign the fol-lowing demands:

1. That the city secure the own-ership and management of all public service enterprises as far and as fast as the state laws will allow. We de-mand that the city be given the power to take over such public industries as are now in private hands, by getting permission to raise the bond limit and by issuing bonds secured on the prop-erties; and to inaugurate such new en-terprises as the citizens, by a majority terprises as the citizens, by a majority referendum vote, may approve.

2. That the common council shall 2. That the common council shall take steps necessary to make the big corporations pay their rightful share of municipal taxes, so that the money necessary to carry out the proposed measures can be raised. The attempt of some capitalist politicians to make an issue of the question of taxation is simply hypocritical pretense. There are millions of dollars' worth of property in the city that escape taxation year after year and nothing is said or done about it by the parties in power. done about it by the parties in power. The Social-Democrats will, in the future as in the past, fight to compel every corporation and millionaire to pay a just share of the common burden.

3. The city shall establish and maintain a public works department, which shall perform the necessary work of the city—its building, plumbing, grading, paving, etc., directly at an eight-hour workday and at the current union wage. It shall abolish the contract system as far as possible in all publics work.

Whenever contract work is unavoidable, all, contract shall contain a clause requiring the contractor to employ labor at an eight-hour work-day and to pay union wages.

4. The ety shall provide work for its unemployed citizens. Besides the improvement of the streets, the city should push every possible municipal enterprise and afford work to as many of the unemployed as possible. The city to establish a municipal wood and coal yard—slso a municipal wood and coal yard—slso a municipal ice plant; and shall sell wood, coal and ice to citizens at cost price.

The Social-Democratic party is the American expression of the international movement of modern wage-workers for better food, better houses, sufficient sleep, more leisure, more education, and more culture.

Under present conditions the wage-worker is always dependent upon the man with means for an opportunity to work for a livelihood, and, therefore, is not free.

Political liberty alone has become inadequate; we must have both political and economic liberty. To secure this by the collective ownership of the means of production and distribution is the aim of the Social-Democratic party.

OUR PRESENT EXPERIENCE And our present experience serves again to emphasize the need of a better social adjustment—a higher civilization.

The shadow of a financial crisis is again upon our land. Industries are intended to make the process of the city.

The city shall also establish and operate a municipal lodging house.

9. That free textbooks and adequate facilities shall be provided in the public schools. At least one warm meal per day shall be provided for the children free of cost, to be paid for by the city, wherever found neces-

sary.

Principals shall be required to devote one-half of their time to instruction. The salaries of assistant teachers to be raised first, before those of highly paid principals. A retirement fund for the teachers shall be sus-tained by the city for all teachers who shall have been in the service more than twenty years. The large hall in each school building shall be available to residents of the district for public meetings of every nature. All new school buildings to include fa-cilities for social centers.

This is the "endless chain," and it keeps at work all day and hundreds of fraudulent votes are thus surely lanued in the ballot box. Since voting machines have been installed in some cities, the "endless chain' can only be worked at the pri-maries, and it has not yet developed what scheme has been hatched to beat the voting machine

### WHAT OF THE FUTURE! "Without free elections, how can

there be free government?" asks Mr. Russell, after narrating all the facts he has gathered. It is a hard question. In Chicago, where deal-ing invotes is almost as much amatter of fact as dealing in butter, he says, it is especially notable that the real crooks behind the scenes are the big business men. So the cry of electing business men to office or getting "better citizens" in control of government amounts to so much

And then there is the warning from history. Froude's "Ceasar" is cited, where it is related how the Roman Republic went to the bowwows by treading the path that our 'respectable citizens" are treading.

### To the City Councils of the United States.

There are thousands of men ters. Painters and Electricians had been notified that beginning March 23, the Carpenters, Painters and Electricians employed at the State University would receive a cut in their labor. in your city out of work with no one to employ them because their previous masters cannot see an op-portunity to make a profit out of wages and have the working day.

These men are short of food at breakfast, they are hungry after lengthened from eight to nine hours per day. The entire matter was referred to Weber and Brockdinner time, and they go to sleep or walk the streets at night with the pangs of hunger still gnawing at their vitals.

Their days are made gloomy by the tear-stained face of a worrying wife, their slumber is disturbed by her sacrificing sighs, and they are awakened by the hunger dreams murmured from the frail form of an underfed childhood in yonder

the Declaration of Independence to promote our lives, to secure our liberties and insure our happiness by giving these men, not charity not a speck of it, nor a taint of it, but an opportunity to work and nake an honest living.

Will you apply this Declaration n its fullest meaning? Will you abide by this Declara-

tion of our forefathers, or will you declare that the Declaration of Independence is also unconstitutional? Have you got the courage to use

the machinery of government to stem the tide of human suffering? Will you appropriate half the nount now spent to punish crime, to in some degree relieve the suffering conditions of your citizens that they need not commit crime

Will you sacrifice a little of the graft money to enable these men and women to buy bread, and but-ter, and coal for their starving and shivering little ones this winter?

Is the interest of the propertied classes more to you than the feelings of the shivering many?

Are you going to be influenced more by the suffering childhood of your city than by the welfare of the logs of its aristocracy?

Bernard Shaw said, and he told the truth, that a country that permits poverty is guilty of a crime.

A city council that will not raise

hand to relieve the distressed and impoverished condition of its citizens is a criminal body.

## FROM OUR READERS.

To the Editor: "Ba. Ba. Black Sheep, have you any wool?" sir, yes, sir, three bags full." And so Maher wants to be "Jedge" and he will give you boys a square deal-that is, he will draw the wool over your eyes and you won't see what he will do for the other fellows. Wake up, you fellows, aren't you on to the game yet? "People's Advocate" Quarles; "Reformer" Neacy; "Open Shop Falk—are for Turner—a Duke's Mixture of Stalwarts, Half-breeds and Democrats -non-partisans, of course. "Barrel" Pfister, "Red Light" Rose, and 'Citizen" (?) Bruce, are for Maher. Stop your kidding, for here goes my vote for Huebschmann

To the Editor, I see ex-Mayor Rose has promulgated the fact that the Socialists have brought on a panie, that has thrown thousands out of employment. Well, it's use-less, also wicked, to ridicule Rose. All the politiciaffs of his calibre are liable to make such breaks, only say what they are told to say. But no self-respecting laborer who has made a living for his family, would make such fool assertions: course, these are some stupid burns make his own living when given an who will look wise and repeat Rose's folly. E. H. Hernady.

H. C. Campbell Answers T. J. Neacy. H. C. Campbell Answers T. J. Neacy.

To the Editor: I notice that
Thomas Neacy is indignant because
some plain, ordinary citizens, including myself, have acted within their unquestionable right, taken steps to promote the safety of children, among
them their own, who are attending
school in the Eighteenth Ward. Mr.
Neacy takes occasion to single me out
for attack.

Mr. Neacy is a captain of industry and a literateur as well. In both lines he is equally distinguished. In both he is equally strenuous. For all day long he drives his men and all night long he drives his pen. The output of his literary workshop is as great as that of his foundry—and it is just about as polished. The only difference is one of demand for the

product.

Mr. Neacy mentions that I resigned from the school board because of disagreement over the rules. I resigned because the school board had become a partisan and personal machine. I had served about five years and had been reappointed three different times. Mr. Neacy served one term of two years. He never resigned and he never withdrew. He was not reap-nointed.

Mr. Neacy errs in stating that I

Mr. Neacy errs in stating that I have right along attacked the present school board. It is for the most part good board, especially in view of the manner of its appointment, and I have frequently said so. A marked improvement was coincident with Mr. Neacy's involuntary retirement. Mr. Neacy blames me because, while I was a member of the board, I did not see to it that school buildings were provided with fire escapes. Now, during the entire period of my service, except the last two or three months, the board had neither the power nor the money to provide fire escapes. The common council was in full charge. And on Jan. 5, 1904, more than four years ago, I introduced a resolution in the board, which adopted it, urging the council to put up fire escapes and to put in fire alarm boxes at each school and diup fire escapes and to put in fire alarm boxes at each school and directing the superintendent to pay particular attention to fire drills. The action, which was all that the old board could do, was taken without any prodding from the outside and it has resulted in some good.

board could do, was taken without any prodding from the outside and it has resulted in some good.

How about Mr. Neacy? During the term of his service, every day of it, the board had full power over school buildings and was permitted to levy a half-of-a-mill tax for keeping the buildings safe and in good repair. This tax yielded a fund of almost \$100,000 a year, more than twice what the old board could obtain, even if the council consented—which it did not always do—to raise all of the insignificant fourth-of-a-mill tax to which the board was limited by law. The increase of \$50,000 a year provided by the half-of-a-mill tax was sufficient to erect in a single year two fire escapes for each of the twenty-two three-story buildings that were and are ungent appeals by the state factory inspite of a formal warning from the attorney-general of the state, in spite of a resolution introduced by Director Arnold, all coming to Mr. Neacy's knowledge late in 1905, Mr. Neacy and his committee did nothing during that period of two years to provide a single fire escape on a single school house. The school board proceedings convict Mr. Neacy of shameful neglect of duty. No wonder he is trying to divert public attention from himself.

I do not possess Mr. Neacy's insatiable hunger for notoriety, and had

is trying to divert partitions in the himself.

I do not possess Mr. Neacy's insatiable hunger for notoriety, and had he not untruthfully charged me with neglect of duty, I should have paid no attention to his utterances.

By the way, why does not Mr. Neacy, while he is in the business of enjoining everything and everybody, get an injunction against himself? That would make a hit. It would almost make him popular.

Seidel has been having some magnificent noon-day meetings, though you would hardly guess it from the daily papers. But when the capitalist candidates get a frost they call it a big affair.

# White Maple Kitchen Cabinets

The most practical and convenient piece of furni ture ever designed for the kitchen: It is a Cupboard, Table and Flour-Bin all combined in one-particularly useful for the storing of kitchen utensils.

This elegant Kitchen Cabinet, special for next week

The height of this cabinet is 66 inches, and the width 52 inches. The general cabinet work is of the best. The flour

bins are all smoothly sanded; the doors have the most improved patent latches to be had; all the hardware used on these cabinets (such as drawer-pulls, knobs and hinges) are cast brass; the lumber used in building them is the finest selected white maple stock to be had.

Government by Commission!

"I am thankful that traction af-fairs in the city of Milwaukee have gotten into the hands of the rail-road commission of Wisconsin, an intelligent and efficient body of men, free from local prejudices.

"It is the best thing that ever happened to the Milwaukee Elec-tric Railway and Light Company.

"The examination was satisfactory to us and should be to the people, as it certainly was ably conducted by their city altorney."—John I. Beggs in a Thanksgiving interview in the Milwaukee Free Press, Nov. 24, 1907.

right on, in spite of the efforts of one set of capitalists on the one at the Milwaukee Academy, which side to embarass it by gang is a silk stocking school on the East methods, and the efforts of another Side, for the education of the sons set to thwart it on the other side by of Milwaukee's codfish aristocracy, who would be contaminated by mingling with common children at the public schools. The vote showed preferences for all the capitalistic party aspirants for mayor-a sort of exploiters' verdict. The papers ure of it. As soon as the railway gladly published the result.

A straw vote was also taken the people had to put up with worse other night in Milwaukee at the car service than ever. Everybody might school in one of the Eighth Ward public schools, attended largely by sons of the working people and the school in one of the Eighth Ward public schools, attended largely by sons of the working people and the school in one of the Eighth Ward public schools attended largely by sons of the working people and the school in one of the Eighth Ward public schools attended largely by sons of the working people and the school in one of the Eighth Ward public schools attended largely by sons of the working people and the school in one of the Eighth Ward public schools attended largely by sons of the working people and the school in one of the Eighth Ward public schools attended largely by sons of the working people and the school in one of the Eighth Ward public schools attended largely by sons of the working people and the school in one of the Eighth Ward public schools. Ald Seidel's resolution that passed the council Monday, Jan. 18, instructed the city attorney to demand of the railway commission that a three-cent fare be exacted of the Beggs company—which would of course, merely start the matter rolling, for Beggs will unquestion—the fight into the courts. the Social-Democratic candidate for mayor and the old party candidates were way in the rear. And the newspapers did not print it!

Fear Confusion

On the Democratic ballets are two Hoyts. The one is Melvin A. Hoyt, editor of the Daily News, and the other is Frank M. Hoyt, the lawyer and corporation attorney. The name of the last is tenth on the list of the Democratic nominations, and Melvin A. Hoyt is the eleventh on the list. As the Democrats are entitled to 11 candidates there is a fear that the voters will be confused between the two names, especially since the so-called "civic" cliques headed by the Merchants and Manufacturers' Association have endorsed the corporation lawyer.

Each party nominates its own delegates to the charter convention on the basis of the last state election.
