SOCIALISTS WILL NOT SWALLOW SLOW STAGNATING DANTY!

The Socialist Party is Not Ready to Accept Any Premature Peace. We Have Big Work Before Us. If You Really Want Peace—Vote for the Trust

Henry Stanley Fople

The following was written by an unknown but able Socialist correspondent who has just turned in his resignation to the International Labor Publishing Company of Chicago. The draft contains the outlines of a labor program that has been discussed at length by the Socialist circles of the United States for the past year. The writer is a member of the Socialist Party and has been active in the labor movement for a number of years. He is well known for his ability to express himself clearly and concisely.

There is no sense in the idea that the Socialist Party is not ready to accept any premature peace. The party has always been opposed to war and to the measures that lead to war. The writer points out that the Socialist Party is the only one that has the strength to carry out a program of peace. He believes that the party should not accept any compromise with the trusts, which he calls "dantsies," because they are responsible for the economic conditions that lead to war. The writer concludes by saying that the Socialist Party is the only one that can carry out a program of peace and that it should not accept any compromise with the trusts.

The writer's position is similar to that of the Socialists in the United States. The Socialists have always been opposed to war and to the measures that lead to war. They believe that the party should not accept any compromise with the trusts, which they call "dantsies," because they are responsible for the economic conditions that lead to war. The Socialists believe that the party should carry out a program of peace and that it should not accept any compromise with the trusts.

The National Socialist Platform—Continued

The platform is not a series of specific proposals, but rather an outline of fundamental principles and goals. It serves as a guide for the action and decisions of the party, rather than a detailed program of specific policies or actions. It is not a blanket of principles, but a framework within which the party can work and act.

The platform is not a set of rigid rules, but rather a set of guidelines and principles that can be adapted to changing circumstances and new challenges. It is not a static document, but rather a dynamic one that can be changed and modified as the party and the world it operates in evolve.

The platform is the foundation upon which the party is built, and it is constantly being reviewed and revised to ensure that it remains relevant and effective.

The platform is the party's blueprint for action, and it is the party's compass that guides it through the complexities of the modern world.
