ABOUT THE GOOD OLD PARTIES AND THE BAD SOCIAL-DEMOCRATS

By Victor L. Berger

A T the recent municipal elections of the city of Milwaukee, the good old parties, as always, were beaten and their supporters were sorely disappointed. The candidates of both of these parties entered the contest with more or less enthusiasm, but they did not show the same degree of confidence that their opponents did. The good old parties were unable to carry even a single precinct in the city, and their vote was only a fraction of what it had been in previous elections.

Our correspondent, who is a well-known political writer, has given an account of the election. He says:

"As we expected, the good old parties were completely defeated. The Social-Democrats were victorious, and their candidate for mayor was elected. The Democratic candidate for the city council was also successful. It is a great credit to the Social-Democrats that they were able to carry so many wards without the support of any other party.

The good old parties are in the minority, and it is probable that they will not be able to influence the course of public affairs for some time to come. The Social-Democrats have a majority in the city council, and they will be able to carry on the work of the government without interference from the other parties."
SENATOR GAYLORD’S SPEECH ON COUNTY OPTION

Mr. President, I come, indeed, to ask the support of the Senate, if you will permit me, of that great mass of American people who are not politicians, to make a brief statement of the position of the Socialist Democracy party. It is a position which I think you will regard as the position of the vast majority of the American people — that it is a position which has been developed in the history of the country and in the life of the people itself. It is a position which is not a matter of party politics, but of the fundamental principles upon which the country was founded.
