Gompers at Paris

B Ecause Samuel Gompers, who has been president of the American Federation of Labor, is now in France, the American labor movement has an opportunity to study the situation in what is perhaps the most important labor country in the world. The French labor movement is of a different character and is not so well organized as that of the United States. It is, however, making rapid progress, and its leaders are now taking an active part in the international labor movement. The labor movement in France is divided into two sections, one of which is the socialist and the other the anarchist. The socialist section is the more important, and is the one which Gompers is most likely to find sympathetic. He has always been a strong believer in the socialist principle, and his visit to France is therefore likely to be of great interest to the labor movement in the United States. The French labor movement is now in a very strong position, and is likely to make rapid progress in the future.
