The onward march of Social-Demogracy is steady, and the enemy receives one staggering blow after another. The latest victory is in Brandenberg. At Frankfortlebus the Socialists won their ninth additional seat in the reichstag this year, and now their total representation in that body is 52. And this in spite of 2 body is 52. And this in spite of a shameful condition of gerrymandering and other voting impediments upon the common voters. Capitalism is fast losing hope.

Stick the other fellow, is capitalism's rule for success. Dow in Illi-nois the coal barons goaded their employes to the breaking point and a big strike resulted in an effort to wrest decent living conditions from these masters of the jobs. Seventy thousand men were on strike.

When they returned to work they got a raise of three cents a ton, but it is said that the coal barons during the strike not only cleaned up and sold at a good price all the waste coal and slack about the mines, but the settlement of the strike was followed by a raise of from 50 to 75 cents a ton on the coal, and it is claimed that all talk about the operators losing by the strike is gam-

Both the old parties are tarred with the same stick. The activity of business men in politics is usually a BUSI-NESS proposition. A street railway president in New York city has just testified that in a single campaign ist elected to the legislature will support the Republicans and \$17,000 to the Democrats.

As the contributions were made on the sly, to have paid the money over in checks would have been to invite detection on the part of the public.

the capitalist parties and the party of the people, of the working class.

When Social-Democrats need campaign funds they get them in small donations from party members and sympathizers. And they print the lists of donations for the inspection of all concerned. When our people are elected to office they are beholden to no interests save the interests of the people themselves.

Daszynski, the Polish Socialist member of the Austrian parliament, now in this country, says that in spite of the progress which Socialism has made in Europe, however, it is America that is the logical place for Secalism to be ushered in fifts. The reason for this he says, is that America had not the people and which are

It kills the people by keeping the work-ingmen poor. When the Social-Democrats got into the Wisconsin legislature they found that it was utterly impossible to pay railroadyfare back and forth, pay the prevailing hotel rates, and support themselves during the ses-sions, let alone supporting their families at home during their absence on the pay which the state gave them for their services. And their party associates had to help them out, and gladly did so.

MILWAUKEE, WIS., U.S. A., OCT. 15, 1910

HE old German-American, John Dietz, has surrendered at last. His farm was surrounded and besieged. Dietz and his grown-up son were wounded. To save his wife and his little children, Dietz surrender ed.

Now his further fate depends upon his neighbors, who will figure as witnesses in the approaching trial. And it is not yet certain whether they will pronounce him guilty.

Dietz has requested our Mayor Seidel to secure as his counsel the

famous lawyer, Clarence Darrow, and Seidel immediately complied with his request. It is announced that Mr. Darrow has agreed to defend John

Besides there are many people in Milwaukee-Socialists as well as others-who have pledged themselves to support the brave old fighter financially, as did the workingmen in the case of Moyer and Haywood.

Of course, Dietz is a law breaker. He dared to resist the power of the law-gun in hand.

But on the boundary of civilization, and in the northern part of our state Wisconsin, things are done otherwise than in the "effete" East.. If Dietz had depended on the law, the lumber trust would have secured a free route through his property, would have furnished a bond and dragged out the case for half a century in the courts.

As it was, Dietz remained in possession of his property. And if it had not been for the unfortunate mix-up with the schooldirector, in which Dietz forfeited the sympathles of his neighbors, he probably would still be holding the fort.

The man who risks his life for the "right" or that which he conceives to be the "right," will always excite sympathy. But there he must stop. In a Republic where judges and prosecuting attorneys are elected by the people, and where the citizen has the right to serve on juries, legal protection is secured, at least theoretically, and armed self defense loses its justifica-

However, the machinery of the courts, as Roosevelt himself admits, has suffered such a loss of prestige, through the corrupting influence of capitalism, that it can be derided and defied at pleasure

But the reaction has set in. The spirit of justice is beginning to stir among the people and capitalism cannot ride rough shod over the masses much longer. Legislative restraints are being applied, and many laws and legal proceedings are now employed against it. Little may come of this, but at any rate it is something that the trust kings can no longer have their way in every thing.

The sense of justice is growing among the people and is crystalizing in the form of laws. Whenever the conviction gains ground among the masses that this or the other institution is unjust, this conviction finds expression in the legislative bodies and leads to the abolition of that in-

Injustice exists only through the patience of the masses. If all the people would stand for their rights as energetically so Dietr stood for his, conditions would change very quickly.

For this guns are not needed. Ballots will do it—and do it better.

If the Social-Democratic party have had a stronger representation in the legislature of the state of Wisconsin in 1907, when we introduced a bill for the purpose of appointing a committee to investigate the Dietz claim, the matter would have been settled satisfactorily a long time ago.

Therefore I say again: The way to resist this trust rule is not for a lone farmer in the backwoods to defy the power of the entire state with a shot gun. That method can not win. The way to resist is by rolling up 200,000 votes for the Social-Demo-

cratic ticket this fall. That will settle the despotism of the lumber trust and of a icw other trusts in this state at . The L. Burger the despotism of the lumber trust and

From thirteen different states men of eminence f the better element of the Repub lican party, came into Wisconsin and spoke for La Follette,-at their own charge. Because they believed that he and what he stands for in that party, were fighting for their lives. Roosevelt speaks across the border, on the South, and on the West. He does not come into Wisconsin. One blast upon his bugle-horn was worth a thousand men. That blast was never blown, and the men who won the La Follette fight can see no difference between Roosevelt and Taft, except that Taft came out into the open.

What an opportunity for the So-cial-Democrats! Let the Milwaukee comrades put Berger and Gaylord in-to the congress,—and the beaten curs there (I use the word in a political sense only) who have heretofore licked the hand of the system, and will now fawn upon the new master -the people will pass the Social-Democratic bills as fast as the roll can be called.

Suppose our first great measure, an act to take over at once—the rail-roads and the telegraph, is put into the next congress, and pressed for passage by Berger and Gaylord. Whatever they think, or do not think -about it-the working majority of the congress, now that they have had the fear of the people driven into them—will make the bill a law. They will never wait to hear the roar from the farmers-or the railroad employor the labor unions. Every man of them will have but one rule of action to get right with the people, and to do it now.

Campaign Literature That Will Make Socialists and Socialist Votes

Many of you are looking for books and pamphlets to give to

"Socialism Made Plain," by Allen Benson, is by all odds the best book to put in the hands of the man you are trying to land. This book is written in everyday language by a newspaper man. It should be circulated extensively between now and election. Single copies, 15 cents; 25 copies, \$2.75; 30 copies, \$5; 100 copies, \$9.

"The Constructive Program of Socialism," by Carl D. Thompson, is another book which will work wonders in removing prejudice. It shows what Socialists in European countries and Wisconsin have accomplished and planned for improving the conditions of the workers while in the minority in the city councils and state and national legislatures. If you have a doubting Thomas in your circle who is inclined to be an impossibilist, just get him to read the Constructive Program of Socialism and watch the results. Single copies, 15 cents; 25 copies, \$2.75; 50 copies, \$5; 100 copies, \$3.

The very best leaflet to hand around between now and election

"My Objections to Socialism," by a leading business man. It takes the enemy of Socialism off his guard and gets in its work so effectively before he rea-

lines it that he seldom recovers.

In one big Milwaukee industrial plant a superintendent gave a Socialist permission to pass the leaflet around to the men, saying: "That's what we want—something to show up the fallacies of Socialism." It did its work before the superinter dent realized what had happened. One hundred copies by mail, 17 cents; 1.000 copies by express, 75 cents, express charges extra.

"What The Republicans and Demografs Have Done for The Working Men," Their full record on that score put in the smallest possible space. None so dumb but what they can understand it. No one but will read every word in it. One hundred copies, 25 cents; 1,000 copies, \$2. Don't fail to get a lot of these to hand around.

"The Grisis," by Robert Hunter. Just published, is the most important pamphlet from a labor union and Socialist point of view that has appeared for years. It deals with the asurpation of power by the courts in the United States. After you have read the book you can come to no other conclusion but that the workers of America, union men included, must choose between working class political action and judicial despotism controlled by a plutocratic oligarchy. Price, 10 cents.

"Mayor Seidel's Inauguration Speech," is unequaled as a propaganda document to be used where there is a municipal contest on. It points the only way to municipal solvation from the corruption which now exists in all our cities, whether railed by Democrats or Republicans. Price, 20 cents per 100; 500 for \$1; 1,000 for \$1.75

Workingmen Have Brains

The popular misconception regarding the aristocracy of brains was born out of the monopoly of privilege. It is a false notion that the working-man is not possessed of the same amount of mental capacity as the capitalist. It is also a false notion that the cultured rich are alway superior in mental power to the hard-

working poor,

The foregoing conclusions are ar rived at from the point of view of science, and it is the writer's purpose to prove, if anything that the indus-trious poor have better claims to meatal distinction than the exploiting rich. I further say, without fear of contradiction, that the best thinking and the greatest and noblest achievements of the present day, and of centuries past may be credited to the working class and those who have viewed life from the point of view of the proletariat.

Deserved Sarcastic Thrust

Finley P. Dunne in his "Mr. Doo-ley" expresses a popular belief of the workingman's mental worth of himself when he says:

"Wor-r-kers av th' Wor-r-uld, yez ar-r-e a a fr-r-ight. Yez hov nawthin' t' luze but yer brains-and yez hav-

en't any."

But Mr. Dooley's sarcastic version of the personation of the "Commun-ist Manifesto" is not true. Scientific investigation demonstrates that the children of the most highly civilized parents if deprived of advantages for mental development would degenerate in the jungle to helpless savages. And if the off-spring of illiterate working people were provided with proper educational advantages in a culture environment—such a would develop high mental

classes of society are the intellectual equals of the upper classes will prob-ably shock most minds. At least it will be rejected almost unanimously as altogether false. Yet, I do not hesitate to maintain and defend it as an abstract proposition. But of course we must understand what is meant by intellectual equality. I have taken some pains to show that the differ-ence in the intelligence of the two classes is immense. What I insist upon is that this difference in intelligence is NOT DUE TO ANY DIF-FERENCE IN INTELLECT. It is due entirely to DIFFERENCE IN MENTAL EQUIPMENT. It is chiefly due to difference in knowledge, if we include in knowledge a familiarity with the tools of the mind and acquired ability to utilize the products of human achievement

Environment Does It
ENVIRONMENT TRANSFORMS
THE ANIMAL WHILE MAN
TRANSFORMS THE ENVIRON-MENT, but in the transformed en-vironment the mind of man, rich and poor, develops to a point of equal equipment, with the advantage on the side of the man who is not hampered

by poverty or riches.
So it is clear to students of socio logy and political economy that the capitalist, the wealthy and the aristo-crats have no valid claims to the distinction-of superior brains, and it is a grievous error for the workingman to foster the belief that he is inferior in brain capacity, or was born with a

deficient mentality.

Knowledge Not Inherited
Further proof of the error of the popular misconception regarding brains is shown by Dr. Ward, when he says: "Social heredity is not a process of ofganic transmission; no part of the Social germ-plasm passes from one individual to another, but ALL KNOWLEDGE MUST BE SEPARATELY ACQUIRED BY EVERY INDIVIDUAL. The social organization must be such as to in-fuse it into the members of society as fast as they are capable of re-ceiving it. This infusion of it is social transmission and unless it is infused it is not transmitted. The only way in which products of past achievement have been preserved has been through such a degree of social organization as is sufficient to infuse them into a certain number of the members of society."

Provide Education for Others Right here I want to say that my father, who was a brick molder, never had an opportunity to go to school day in his life, and my mother could scarcely write her own name. My parents were born in an environment of wage slavery and social injustice, and were brutally deprived of even the elementary advantages the world afforded in their days of early exist-ence. My father made bricks for universities, but never saw the inside of a ward school. He had brains though and when his work-racked body was laid away in a little cemetery in Illinois, it is my firm conviction that undeveloped genius was buried be-neath the sod. As proof of this statement I'll record the words he said to me when he sent me to college to en-

joy the luxury of higher education: "My boy, never forget when you are in that university that it was built by the hands of workingmen. Also remember that the working class provides the professors and students with food and clothing, and the same class also prints and binds the books from also prints and binds the books from which you will improve your educa-tion. Also remember that your fa-ther made bricks together with thou-sands of other workers for the build-ing of universities which none of us ever even got a chance to look at."

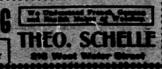

Tragedy of Labor
There is an illustration of the tragedy of the working class. Millions upon millions of the industrious PROVIDE ALL THE MEANS of higher education and see deprived of even elementary instruction.

burying more and more of it every day. And if permitted to live such a life as the Socialist state would in-sure they unquestionably would have enriched the earth far beyond our enriched the earth far beyond our dreams. And when my father said to me that perhaps I would be able to learn in a university why the great mass of workers were intellectually disinherited, by the sentence of a vicious system, he was wrong. I didn't learn the remedy there. The economic nonsense taught there I had to discard. I learned of the cause of

the wind blows in Los Angeles. First straw—the establishment of a municipal farm where tramps, the unem ployed, drunks, etc., will be dealt with as people instead of as criminals Second straw—an innovation, namely a female policeman—the only mu-nicipally-paid officer of the feminine persuasion in the United States.

Estelle Linsey, keenly alive to ev ery indication of progress, in a Rec-ord, editorial, describes Mrs. Alice Stebbins Wells, Los Angeles first police woman:
"When I went up to the police sta-

tion to get a glimpse of her, I ex-pected to find a large woman with a determined jaw, prepared for any emergency, from the closing of a dance hall to the clubbing of a masher. 1 found a quiet little lady, who talks in choice English, who has been a minister of the gospel and a public lecturer. The determination is there but it is only manifested through the ves and the set of her lips."

Whether we approve or disapprov of votes for women, the fact is that women are beginning to take a lively interest in political affairs. They are coming to see the relation of the home and the welfare of the child to municipal and national affairs. They are beginning to be weary of obeying laws they have had no part in fram-ing, and submitting to institutions they had no share in establishing.

Minnesota Notes By John A. Keyes

Dr. O. S. Watkins, Socialist candi Dr. O. S. Watkins, Socialist candidate for congress in the Eighth congressional district, is going to cover the district pretty well. His apponents are Alfred Jacques (Democrat), of Duluth, and Clarence Miller (Republican), Duluth. Miller is now in congress and distinguished himself by defeating T. Adam Bede two years ago on the Cannon issue and then ducking under the Cannon tent when he get to Washington. He showed he got to Washington. He showed that the old party lash was too much for his thin shins, when it was ap-plied by the Washington bunch. Dr. Watkins will make a good run and is bound to surprise the mossbacks of

Minnesota is going to show good gains at the coming election.

Comrade Nash writes that he overheard a conversation at the conservation congress, where a delegate servation congress, where a delegate from Milwaukee was telling a crowd how he spent money to defeat Mayor Seidel, because he thought his election would hurt Milwaukee. But now he said he would work just as hard to have him re-elected because he has made good in the position.

Comrade Barnett, candidate for governor, is on a speaking tour under the directions of the state secretary.

WILL mention two citics Mrs. Wells said; on being asked in in these states that are what way the presence of a woman on the police force will help most:

"I expect to introduce into munic ipal affairs the woman's point of view which, added to the man's, makes the perfect point of view. If the world needed but one point of view, why were the minds of men and women made so radically different? Here-tofore we have had things run as they must necessarily be from a one-sided outlook. You know how. We shall never have a satisfactory government until we have both the masculine and feminine minds represented."

If this experiment is a success a woman's squad is a possibility. Matters which relate to health of mind or ody, inspection of places of amuse ment are affairs which well might be given into the hands of women. The presence of well-poised, intelligent sympathetic women, keen-sighted in human affairs—in dance halls would save countless hundreds of our bes and brightest young women from the nevitable fate that is theirs

In the dance halls of our cities houses of prostitution largely gain their recruits. Too long has the work of saving our womanhood been left to the Salvation army and the church It is time we cease to defend wholly on sporadic and random efforts of few good individuals. The city saves its garbage -- let it save its girls How? To begin with, by appointing a squad of noble-minded understand ing women of fellow feeling, women who know the passions and failings of humanity and who are wise enoug to see the distinction between nat ural good and unnatural bad-women like Alice Stebbins Wells, "to intro duce into municipal affairs the wo man's point of view." Relate amuse-ments to school and home. Establish municipal centers of entertainment. Divorce amusement absolutely from the purveyors of vice and the profit mongers.

Wisconsin's Disgrace

Speaking of the Dietz affair the editor of the Sheboygan Daily Press says:

"Sawyer county has been in rominence for years, through the graft that has run wild among her officials; crime has been winked at by the knowing ones, but of all the blots, this shooting of the Dietz children who have stood by their father is the worst. If the readers of The Press knew Sawyer county as the writer does, if they had as the whier does, it they had seen the graft and corruption that has been fostered and sanctioned by the county officials, they would understand why a lumber trust can get officials to do their bidding."

On Sixth street the Milwaukee-Northern Railway company also operates the Sheboygan in-terurban line. This line connects with the Chicago-Milwaukee electric line. Traffic on the latter is very heavy, and it is reported that their heavy interurbans, consisting often of three or more cars, will soon be run through to Chicago every thirty minutes. This company now runs about forty trains a day to Chicago. The Milwaukee Street Car company contemplates running interurban cars on Chestnut street to Oconomowoc and

Watertown soon. In addition to all this, the site is situated only two blocks from the proposed metropolitan civic center This center is to contain all of Mil waukee's public buildings and will occupy a space of about ten city blocks! The moment this idea is carried into effect it will no doubt nearly double-the value of our lot at once. The building being erected is to

contain four stories and basement and it is being built of concrete and brick. It is modern and fire-proof. Such a building is estimated to cost about \$50,000 to \$55,000. With the price of the lot it will bring the cost of the total improvement up to about \$65,000. Considering that the Milwaukee Socialist movement is entirely proletarian in character and that we no rich men connected with it, this project is a mighty big one. It is by all odds the most gigantic ever tackled.

TO THE EDITOR I I read with much interest the statements by Rabbi Hirshberg defending his position that Socialism can not solve the question of preserving "IN-DIVIDUAL LIBERTY AND INDI-VIDUAL INITIATIVE."

This is perhaps the most persistent bjection brought against Socialism today. In a few words, I believe I can clear up this important problem. Rabbi Hirshberg and the thousands

of other well-meaning people urge this objection against Socialism o not take into account this fact: Collective effort in almost every case produces enough better results to more than compensate whatever

loss the individual sustains as an in Let me illustrate. I have just re from a 7.000-mile pleasure Without collective effort, and trip. with each individual working in his individual sphere only, such a trip would have been impossible. Thou sands of workers contributed their

So it is in every relation of life. As individuals we enjoy certain pleasures.

Some of these we must forego in the larger sphere of social pleasures. The marriage relation also well illustrates this idea. The young man foregoes his many bachelor pleasures for the deeper satisfaction of a home and so with the woman of his choice. She gives up many of her life-long In fact, they both lose in various mutually changed relations.

Let us say there are five men on an island. They have space in which to island. They have space in which to be very individualistic. The Builders' Column

By A. W. Mance.

The Principal Reason Why

I wish each Herald reader could spend a couple of days with the editor of the Builders' column and read the letters which are coming from north, south, east and west. They are from all kinds of people in every station of life, but they all breathe the same spirit of inquiry, aggressiveness and hope.

They want the Social-Democratic Herald, and give the reason why.
They "WANT TO WATCH THE PROGRESS OF THE FIRST
CITY IN AMERICA UNDER SOCIALIST CONTROL."

Best Source of Information

The Social-Democratic Herald from week to week gives a vivid word picture of all that is done and planned. It is being asked for by hundreds of librarians throughout the country. Scholars, writers and teachers, who are not Socialists but have open minds, are sending in their subscriptions to get an intelligent view of what is being done and planned by the Socialist administration in Milwaukee. But Comrade Brown is not coming home for a rest. He will keep right on working, and the fact is that he will continue the Ethical Hall lectures at 558 Jefferson street, under the auspices of the Christian Socialist Fellowship. He speaks on the subject of "The White Cross" and the Red Flag" on the evening of Sunday, Oct. 16, at 8 o'clock.

shortly replaced by larger units of much greater capacity and more modern design. So rapid was the development of the art in this particular, that certain types of power plant apparatus became obsolete almost before they were ready for operation.

Difficulties in Milwaukee

Besides these mechanical problems, other difficul ties were encountered.

Labor skilled in the construction and operation of electric railways was scarce and difficult to obtain. The cost of maintaining tracks, cars and power plants was very great. Operation of the cars was at best uncertain. Passengers had no assurance of reaching their destination on anything like schedule time.

The financial problems of early electric railway con struction were fully as great as the mechanical problems. The cost of the construction and equipment of electric railways was from five to ten times more than horse railways. Because of the difficulties met with and the uncertainty as to the results it was hard to interest capital in their development.

The investment in the horse-car lines was sacrificed when electricity was adopted. Owing to the construction and equipment of electric lines in their first stages of development being inadequate, it became necessary to reconstruct and re-equip them in order to provide reliable and adequate service.

Capital was obliged to carry the burden of at least two and in some cases three investments in one electric railway property. Operating revenues were found to be inadequate to provide for operating expenses, reconstruction expenditures and depreciation.

These conditions deprived capital of return on its

Growth and Progress of Trades Unions

(Contined from last week.) International Hod Carriers and Building Laborers
The International Hod Carriers and

Building Laborers' union of America has increased 108 local unions since January, 1909. The average increase in membership is nearly 7,000 members. During the spring of 1910 a great many of the local unions were out on strike for an increase in wages and came out victorious in every in-stance. The increase in wages has been from 25 to 62 cents per hour and they have not a single member who is working more than eight hours a day. The state of Rhode Island is good example of the way in which his organization has grown. A year ago they had but thirty-four members in good standing in that state, while at the present time they have just

The spring mened with good business, the men ong hours and when forced to strike so with great effect, the strike lasting eleven weeks. At the end of that time the men had assurances that they would not be asked to work more than eight hours per day and were granted a 5 per cent increase inwages. This increase covered at least 5,000 men and was obtained at a time when the capitalists were arranging

International Union of Elevator Constructors

Elevator constructors have been greatly benefited by banding them-selves together and forming labor unions. Prior to nine years ago only six unions of this craft were organdefending labor's apart. In 1901 representatives from these unions met at Pittsburg and formed a national union. They then found that the majority of their members were working sixty hours per week at an average wage of \$16 per week, and time and one-quarter and time and one-half for overtime. As time rolled past, each year showed an increase of unions, and demands were made for increased rates of wages and shorter working hours with other im-proved conditions. And now as an international union, they have organized locals in the United States and Canada numbering twenty-nine unions. Their progress has been sure and steady, and they can now say that their trade is a 90 per cent union. with an average increased rate of wages of \$8 per Week, and working hours reduced from to and 54 hours per week to 44 and 48 hours with double time and time and one-half for all overtime, and six legal holistical average the state of the s lays and Labor day. C.—The Typographical union recently succeeded in ne-gotiating new contracts with the cuployers whereby the men are bene-fited by a substantial increase in wages. The new agreement, which has been signed for three years, dates back to July 1, and called for a dol-lar increase over the scale of \$21 per week at that time, on Oct. 1st another dollar was added to the scale, and on Jan. 1, 1911, a flat scale of \$24 per week will go into effect. All overtime will be time and one-half, and all holidays double time.

The agreement also provides for a minimum of 33 cents per hour crease of 3 cents) to run to May 31, 1911, and 36 cents per hour from June 1, 1911, to May 31, 1912. Men receiving a higher rate will not suffer by the agreement; fifty hours to constitute a week's work, and Saturday afternoon off. The outside carpenters have gained an increase in wages 45 to 50 cents per hour after a short fight as w have the closed shop. Hamburg, Germany-An agreement

has been reached between the em-ployers and the shipbuilders, who have been on strike for two months, thus averting the threatened lockout of the metal workers. The shipbuilders will get an increase in wages equivalent to 4 or 5 cents a day and a reduction in working hours to fiftyfive hours a week in Hamburg and fifty-six in other towns. The agreement will go into effect Jan. 1, 1911. Mew York, N. Y .- When the Guitar and Mandolin workers threatened to strike recently the bosses ignored the threat, but immediately after the strike was called five manufacturers signed the agreement with the union and forty-three men returned to work victorious. The men will get an increase in wages of 20 per cent, recognition of the uvion, and a ten-hour day, with a half hour for lunth. There are still sixtyseven men out on strike, but the union officers are confident that these men will soon return to work, as the 110 men who work in the trade are all organized, and scabs are not to be had.

Halifax, Nova Scotia-The children of the union coal miners of Spring-hill, whose fathers have been out on strike for fourteen months, left the strike for fourteen months, left the schoolroom in a body on the open-ing day because they were asked to sit beside strikebreakers' children. The teachers were helpless, for the union miners' children were in the large majority, and could not be per-suaded to come back. Gives the suaded to come back. Given choice between teaching a handful of strikers' children or telling them to stay at home and let the old scholars fill the empty seats, the teachers gave in and the Springhill school is now union shop.

AT THE THEATERS

DAVIDSON-":Mid-Channel"

In the play that has given her the biggest opportunity of her career and has resulted in a brilliant triumph, Charles Frohman presents Ethel Barrymore at the Davidson theater for three nights, beginning Monday, Oct, tr, in "Mid-Channel." It is a big, serious work in four acts and is as servere as anything Pinero has done since "His House in Order." The engagement is limited to three nights, with no Wednesday matinee. Following will be "The Third Degree," which comes Thursday night for three nights and Saturday matinee.

BIJOU—"The Thief"

Would you steal to make yourself In the play that has given her the

Would you strat to make yourself pretty in the eyes of your husband: That's the question which is asked in "The Thief," that powerful suc-cess which comes to the Bijou next week, commencing matinee tomorrow It's a new idea, and it has a distinct dramatic value, for it is both thrillag to women and flattering to men Usually it is man who takes this risk to satisfy the indulgences of his wife or his sweetheart, but in the case of "The Thief" the tables are reversed d a woman is the central figure.
"The Little Girl That He Forgot" will be at the Bijon Oct. 23.

Commencing Monday something entirely out of the usual line of vaude-ville will be offered at the Crystal

the Marius Bohemian Quintette of grand opera stars, who will render selections from the various operas. Alsace and Lorraine in a novelty musical act present for the first time to Milwaukee audiences. Halligan and Ward, singing and talking comedians, in their skit, 'The Freshman and the Sophomore.' A comedy sketch, Sophomore." A comedy ske "Christmas on the Comstock," Glendover and Mannion

ALHAMBRA-"Madam X"

Milwaukee theatergoers will be afforded an unusual treat at the Albam bra theater Sunday night and all week when Henry W. Savage will offer "Madaine X," the reigning dramatic sensation of Europe and America, and supremely triumphant drama of mother love, presented by a notable cast of metropolitan players. There will be matinee performances on Wednesday and Saturday.

MAJESTIC--Vaudeville

Herbert Kelsey and Effie Shannon two of the most popular dramatic stars today, will headline the bill at the Majestic theater for the week starting Monday afternoon when they will appear here for the first time it their new one-act comedy, "Bearding the Lion." Other features will be Smith and Campbell, in an original skit from an incident in life called "Camping Out." Nine acts on an excellent bill, with new motion pic-

Mrs. Rorer says: "There is no reason why you should

not cook with gas the year round."

The world's greatest cook says:

"If your kitchen is not heated by your furnace or boiler you can make it livable by the use of a coke attachment on a gas range. At the same time you can use the most convenient fuel obtainable—gas.

"The kitchen heater attached to the gas range above will burn any kind of cheap coal, wood, coke, sweepings, rubbish, paper and even garbage.

"It furnishes the cheapest heat obtainable. In emergencies the two holes on top can be used for cooking, or heating water. "The combination of this heater with a gas range gives you an ideal

heating and cooking outfit for the year around-winter as well as summer. "This combination will take up much less room, is much more economical and convenient and much cleaner than a coal range. It can be attached to

any gas range." We will be giad to show you how these heaters work at our salesroom, at the Gas Office, 182 Wisconsin Street.

Let Mr. McGee Answer These Plain Questions

1. Why did the district attorney's office give the allegations in the Rucker case to the papers for days before the case came to court?

2. Is it not a fact that The Sentinel and Germania had the case in cold type for days before it came into court? 3. Is it not a fact that Mr. Wuerster, of the district attorney's office,

boasted to some visitors beforehand that they were going to "pull off something in a few days that will put a crimp in the Social-Democratic

4. Is it not a fact that Catherine Heisdorf is a notorious woman? 5. Is it not a fact that she has a police record, and that her companion was fined \$22.50?

6. Is it not a fact that she h. s accused half-a-dozen prominent men of this town of bastardy? 7. Is it not a fact that she went to innumerable physicians this year

and asked them to commit abortion? 8. Is it note fact that she spent two months in the insane asylum, and

is regarded as a nymphomaniac or sexual degenerate? 9. Why did not the district attorney's office take up in this public way

any of the other 300 bastardy cases this year? 10. Why was the Rucker case never brought to trial?

II. Is it not a fact that the story of the abortion is a fake, and that all of the physicians present at that examination (Dr. Beffel included) agreed that there was no tangible evidence of pregnancy? 12. Is not the story that Dr. Rucker offered money or marriage a lie?

13. Did not Mr. McGee say to Victor L. Berger that he would give \$1,000 not to have touched the case?

14. Can Mr. McGee give an instance of any other case in this country where such a contemptible pack of lies was read into the record when a case was dismissed? And is this procedure legal?

Is any decent man or woman safe in Milwaukee as long as a blackguard and character assassin like McGee is district ttorney?

16. Can any decent man say after all this that McGee is the proper
