TAXATION, ITS HISTORY

By Victor L. Berger

The idea of taxation has undergone a change during the last fifty years. In 1850, no one had heard of a government.
IT HAPPENED IN MILWAUKEE

Fears Tax Probe!
The non-partisan investigation committee, appointed by the chairmen of Mr. and Mrs. Sadler and Mr. W. F. Schick, began its work Tuesday night, when the members were sworn in and with promises to conduct themselves so as not to obstruct the proceedings. As a result, this was announced:

"It is clear," thundered Daniel W. Scobie, the attorney for the investigation committee, "that the committee is ready to begin its work. The non-partisan investigation committee will conduct itself in an impartial manner, and will not be influenced by any outside influences."

Mr. Scobie went on to state that the committee would be fair and impartial in its investigations, and that it would do its best to uncover any wrongdoing.

City Loans Mullen
Superintendent of Street Cars, Mullen, has signed a deal at 2 a.m. on Friday night, according to reports from the Department of Public Works.

Mr. Mullen's signature on the contract was witnessed by Mr. Tom Mullen, who acted as Mr. Mullen's agent.

The contract was for the purchase of a streetcar, and was signed in the presence of witnesses. Mr. Mullen said that the streetcar would be used for the benefit of the city's citizens.

Mr. Mullen also stated that the streetcar would be used to transport goods and people, and that it would be a great asset to the city.

The contract was signed in the presence of witnesses, and was witnessed by Mr. Tom Mullen, who acted as Mr. Mullen's agent.
The Sentimental A truists

By John M. Work

SOMETHING of the history of our times in relation to the social question comes up in a clear and striking light these days when we reflect upon the development of the socialist movement, the rise of the labor movement, and the growing influence of the working class in all countries of the world. The idea of socialism has become a profound and popular one, and its principles are widely accepted as the true and just solution of the problems of society.

The socialist movement is based upon the principles of democracy, equality, and justice. It seeks to establish a society in which all the people shall have an equal voice in the government and the management of the affairs of the nation. It aims to eradicate poverty and exploitation, to create conditions of life in which every individual shall have the opportunity to develop his full potential, and to assure to all the rights of freedom and equality.

The socialist movement has made great progress in recent years, both in theory and in practice. It has won many victories, and in some countries socialism has become a powerful force in the life of the nation. But the struggle is far from over, and the goal of a truly democratic and just society is still a distant one. The socialist movement must continue to fight for its ideals, and to work for a better world for all people.
Militarism and Prostitution

The story of the Cornish Rovers—

When Their Terms Expire

The American government's decision to send military aid to India under the terms of the four-year agreement with that country has been greeted with a mixture of enthusiasm and skepticism. While some see it as a necessary measure to bolster India's defense, others express concern about the potential for militarization and its consequences. This article discusses the implications of the agreement and the broader context of militarism and prostitution.

Latest Game to Stop Socialism

Business

Socialism grows in the North Dakota town of Bismarck. The local railroad company, which owns the majority of the town's industries, has been implementing policies that critics argue promote socialism. The mayor, John P. Matthews, has been accused of favoring socialist ideologies and policies. The article examines the impact of these developments on the town and the surrounding region.

The Builders' Column

1911 Shows Great Record

Now for Bigger Things for 1912

The year 1911 brought significant achievements in the construction industry. The article highlights the accomplishments of the past year and sets the stage for even greater projects in 1912. It discusses the importance of collaboration and innovation in realizing these ambitious goals.

Tall Tales of Workingmen

Special Officers and Labor Movement

By Robert Hunter

Some time ago in a police court of New York county a magistrate was asked to sign an order of arrest. 'There are no special officers at this court,' he said. 'You must wait until Monday.'

The arrested man was an employee of the American Tobacco Company. He had been charged with embezzlement.

The magistrate said: 'I suppose I can't do anything about it, but just to show you how the system works, I will order that you be held in jail.'

The employee was taken to the police station and held over night. The next day he was brought before the magistrate and released on $2,000 bail.

This is not an unusual story in the labor movement. The special officers have been known to make arrests in cases where there is no sworn warrant.

These officers are usually appointed by the company under the terms of the union agreement. They are not subject to any of the laws that govern the police department.

They are free to act at will, and they have been known to make arrests even when there is no probable cause for doing so.

The employee in the above case was later acquitted of the charge of embezzlement.

What Phanny Jaw Does to the Workers

The following is a true story of what happens when a woman gets a job in an industry that requires a lot of physical labor.

Phanny Jaw, a woman who worked in a textile mill, was known for her low wages and harsh treatment of her workers.

The mill owner, Mr. Johnson, was very pleased with Phanny Jaw's performance. He thought she was a great asset to the company.

However, the workers were not so happy. They complained about her rough treatment and her low wages.

One day, a worker approached Mr. Johnson and said: 'Mr. Johnson, I have a complaint. Phanny Jaw is treating us unfairly. She is not paying us what we are owed.'

Mr. Johnson replied: 'I know what you mean, but I can't do anything about it. Phanny Jaw is a valuable employee and I can't afford to lose her.'

The worker said: 'But Mr. Johnson, she is treating us unfairly. We need to do something.'

Mr. Johnson thought for a moment and then said: 'I have an idea. Why don't you all go on strike and see what happens?'

The workers agreed and went on strike. Mr. Johnson was forced to negotiate with them and raise their wages.

The lesson is clear. The workers were able to get a better deal because they stood together and fought for their rights.

Dives and Lazars

One of the most common criticisms of capitalism is that it creates a class of wealthy people and a class of poor people.

It is said that the rich get richer and the poor get poorer. This is often true, but it is not always the case.

There are many examples of people who have managed to rise from poverty to great wealth. These people often use their wealth to help others.

For example, Bill Gates, the founder of Microsoft, is one of the richest men in the world. However, he has used much of his wealth to support education and health care initiatives.

This shows that even people who are rich can make a positive impact on society and help to reduce the gap between the rich and the poor.

The History of the Builders

The builders have been at the forefront of the development of the city. They have built the railroad, the factories, and the homes of the working class.

The history of the builders is one of struggle and triumph. They have fought for better working conditions and higher wages.

The builders have also been involved in political movements, such as the labor movement and the socialist movement.

Today, the builders are still at work, creating new buildings and improving existing ones.

Their legacy is one of progress and innovation. The builders have helped to shape the city into what it is today.
