Victor Berger’s View of the “Progressives”

“Victor L. Berger was in Milwaukee last week attending an arbitration conference called by the workers who were fired by the radiating tube company. The meeting lasted two days and was attended by people from the labor field. The issue was whether the workers who were fired should be reemployed. A decision was reached in favor of the workers.”

Of Pressing Importance

“The most significant aspect of the current situation in the United States is the problem of the growth of the working class. This has been brought about by the rise of the working class and the decline of the middle class.”

TEN REASONS WHY I AM A SOCIALIST

“First, I am a socialist because I am not a materialist. The law of evolution has brought the world to the threshold of a new era of life and progress. We cannot go to the level of our previous idealism and simple methods of our grandparents’ position. We are now in a new era of imagination, identity, and machinery. We must find an industrial system that will fit the new order of civilization and lead to the development of the human mind and social progress.”

The Hecuba Truth

“Comment on Passing Events by Freda W. Treece, Socialist. In the present era of social evolution, the hucuba truth is that the masses rule the world. This is the truth of the socialist system and the truth of the worker as the new man. The hucuba truth is that the masses are the masters of the world.”

The power of government has been used for other interests than the popular and executive. It is the government that has been used in this way. The government has been used for the purpose of serving the interests of the powerful and the influential, and the people have been used as the means of achieving these ends. What Every Farmer Ought to Know

The Back-to-the-Soil Swindle

By Oscar Ameringer

If one could live in hollow logs, nests or holes in the ground, if they could eat bugs, roots or grass, and if they could liven on a mere scrap of food during the winter, then it would be easy to go back to the past. But not, alas, and not, alas, for these and many other things, these are some of the things that one must consider when one thinks of going back to the past.
