Socialist Tax Commissioner Boasts Gas Company Tax
Debs' Opening Speech at Chicago

"Thank you, comrades, and fellow-workers. It's not for the country at large that I have come. It is for you, my friends, the trade unionists, the strikers, the workers. It is for the country at large that we are coming. It is for the country at large that we are fighting. It is for the country at large that we are struggling."

Love for Country

"I say for bare facts, the workers who make possible the wealth of a country, the real wealth of a country, the true wealth of a country, the true wealth of a country are practically unknown. They are unknown to the rich, unknown to the idle, unknown to the rich."

The Socialists, however, give us a just view of the world, where the worker is the master, the owner, the ruler of the world. The worker is the one who works, the one who pays the wages, the one who makes the wealth.

Is This a Glorious Civilization?

By R. A. HARTLEY

We have, comrades, and fellow-workers, a struggle on. It is a struggle of the workers against the employers. It is a struggle of the workers against the rich. It is a struggle of the workers against the idle. It is a struggle of the workers against the rich.

I have known hard work, but I have never known the hard work of the workers. I have known the hard work of the workers. I have known the hard work of the workers.

To Spread the Gospel of Emancipation

HOLDING EAR MEETINGS SIMULTANEOUSLY

CAPTAIN MAURER'S MEN

We are going to hold meetings simultaneously with the International Socialist League. We are going to hold meetings simultaneously with the International Socialist League. We are going to hold meetings simultaneously with the International Socialist League.

We are going to hold meetings simultaneously with the International Socialist League. We are going to hold meetings simultaneously with the International Socialist League. We are going to hold meetings simultaneously with the International Socialist League.

The Builders' Column

Spread the Light

They say that the light is coming, but the light is coming. Thunder is only an after-effect of lightning. Engineers and agitators have been spreading in every town, every village, and every county. They are spreading in every town, every village, and every county.

Light vs. Noise

Let every voice united. It is your mission and mine to shunt the light so that the average man can get what he's going on. Fix your brains with The Social-Democratic Herald. Make your engines work for you.
