What Morgan Did For Society

The career of J. Pierpont Morgan was contemporaneous with the creation of a social order in the making of which we are figures.

The roll may be called of the great trusts and the name of Morgan will be found identified with nearly all of them. Many of the largest trusts were organized by him. In the period of the fusion of industry a new word was coined from Morgan's name. Where an industry was organized, it was "Morganized." Morgan recognized the advantage of cooperation after industry had reached the stage of development where the struggle for survival passed into direct rivalry. He performed an industry of the kind which the Social Democracy performed in the municipal government of Milwaukee, when they brought in several departments into harmony and welded them into a workable whole where formerly they had been independent. The result was the transformation of one another's competition and took all in all, the story of Morgan's life is a story of cooperation.

The power that Morgan and his associates had was tremendous. They distributed organized industry. They controlled the nation's resources. The railways were under their direction. The government, in fact, was under their control.

But the end of the story is not written.

San Diego "Free Speech" Fight—Facts at Last

BY RALPH B. ROSSMILLER

W. T. Haywood, the head of the San Diego team of the International Workers of the World, who is now in San Francisco, was a prominent figure in the recent strike there, and his name was well known in the labor movement.

Haywood was one of the leaders of the strike, and his presence was a great asset to the cause. He was not only a skilled organizer, but also a good speaker.

A BAD SPECTACLE

The strike was characterized by violence and bitterness, and the police were called in to put down the disturbance. Haywood was arrested and sent to prison, where he remained for several weeks.

The strike was settled without further bloodshed, and the workers were able to make some gains.

Catholic Socialist Answers the Criticism of a Western Catholic Publication

A writer in a Catholic Socialist paper has asked me to answer an article which appeared in its pages.

The Catholic paper is one of the many newspapers published in the United States today. It is notable for its conservative views on questions of social and political importance.

The writer of the article criticized my views on the subject of labor.

My position is that the working class should demand better wages and working conditions, and that the state should intervene to protect the interests of the workers.

The Catholic paper is not interested in these matters. They consider them to be matters of private concern, and the state should not interfere.

In conclusion, I would say that the Catholic paper is not a reliable source of information on questions of social and political importance. The Catholic paper is not interested in these matters, and they should be considered to be matters of private concern, and the state should not interfere.
