THE SCIENTIFIC SPIRIT OF MODERN SOCIALISM.

BY WM. SCHOLL, MCLURE.

"The scientific spirit," says Mr. Gladstone, "is one of the most remarkable features of the modern period. It is the key to the modern world. The modern world is the world of science. The modern world is the world of the scientific spirit." This is a definition that has been accepted by all modern philosophers.

The scientific spirit is the spirit of the age. It is the spirit of the age because it is the spirit of the age. It is the spirit of the age because it is the spirit of the age. SOCIOLOGY AND SOCIALISM.

BY ISADORE LADOFF.

I. SOCIETY AS A SUBJECT OF STUDY.

Our investigations show that society is at present in a state of crisis. The social problem is at the moment the most important and profound of all. The social order, as we now know it, is not only a necessary condition of human life, but it is a condition of human welfare and happiness. The social problem is therefore a problem of utmost importance, and one which requires the most careful consideration.

The social order is a system of social organizations which is based upon social relations. It is a system of social institutions which are designed to regulate the social relations of the members of society. The social order is a system of social norms which are designed to govern the social behavior of the members of society. The social order is a system of social values which are designed to determine the social goals of the members of society.

WHY AREN'T THERE MORE CHOICES?

ITALY IN 1851 AND IN 1899.

THE ELECTORAL REFORM

Election of a new legislature for Italy is due in a few weeks, and the troubles of the country will be settled, in large part, by the results of the election. The political parties are divided into two groups: the Liberals and the Conservatives. The Liberals believe in a strong central government and a free press, while the Conservatives favor a weaker central government and a limited press.

The Catholic Church is an important force in Italian politics. The Pope has the right to appoint the Prime Minister and the Cabinet. However, the Pope is not allowed to interfere in the affairs of the state.

The economy of Italy is dominated by agriculture and industry. The country produces a large amount of wheat and olive oil, and has a strong manufacturing sector. However, Italy also faces challenges related to regional inequality and immigration.

THE GREAT WALL OF CHINA

The Great Wall of China was built to prevent the invasion of the country by the Huns and other nomadic tribes. It was completed in 214 BC and is said to have been 6,000 miles long. The wall was made of stone, brick, and earth and was reinforced with towers and watchtowers.

The Great Wall served as a border between China and the nomadic tribes, and it also served as a trade route. Today, the Great Wall is a popular tourist destination and is listed as a UNESCO World Heritage Site.
