CIVILIZATION THAT IS
HEADED BY LABOR DAY

The civilization of which Labor Day is the symbol is a civilization that has produced the slaves of the earth and the victims of war.

The horrors of Camp Whisk, Camp Wikoff, Camp Waltz, and other camps are the products of our war-making civilization. Is it a civilization that we should be proud of? Is it a civilization that we should be allowed to continue? Is it a civilization that we should be allowed to continue?

The nation stands pale with rage; the President, like the White House, the White House, like the President, are pale with rage. The nation faces a crisis, the President faces a crisis. Is it a crisis that we should be proud of? Is it a crisis that we should be allowed to continue?

The nation is at war, the President is at war. Is it a war that we should be proud of? Is it a war that we should be allowed to continue?

SOCIABLE DEMOCRATIC WAG WARRIORS.

Nebraska City, Neb., Sept. 15.
No domestic work was done today, although the waggoners were said to be engaged in the field, as they are employed for the entire week for that purpose. The waggoners are being paid $1.50 per day for their services, and this is considerably higher than the wages paid in other parts of the state where the same work is done. The waggoners are said to be satisfied with their employment, and are looking forward to a bright future in the field. The waggoners are also said to be enjoying the current crop of tomatoes, which are said to be of excellent quality and very tasty.

A MAN'S FOOD FOR A YEAR IN A HUSK BUSHEL BASKET.

The announcement that in thirty- seven years there were more people than the earth could support, and, hence, the human race on this globe with its limited land and water surfaces, would not continue to exist unless the food supply was increased, was made by William Crookes of London, a scientist of eminence.

It is a well-known fact that Dr. Crookes, who is constantly before the public, would not have made such a statement as this unless it was backed up by some conclusion that would bear the test of a careful investigation.

There is, of course, the possibility that the opinion of Dr. Crookes is a mere exaggeration to make the earth appear as a very large country and to appeal to the patriotism of some for some years. But even then it can only be applied with the utmost caution to a small country like America, where millions of people are living.

The fact that the earth has been deeply impressed by Dr. Crookes' announcement, and his name is constantly being mentioned in the newspapers, is the result of a careful investigation.

It has been determined that in thirty- seven years the earth would be able to support only one man in a husk bushel basket.

By the most careful calculation it is estimated that in thirty- seven years the earth cannot support more than two hundred and fifty thousand men, or one man in a husk bushel basket.

Scientists have always been able to live in comfort and health on a poor diet. It is well known that the diet of the laboring classes in the United States is poor, and yet they live comfortably.

The earth is capable of producing an abundance of food for the entire world. There is no necessity for any one to fear that the earth cannot support the present population.
