Wake Up, Oppressed People!

By Jim Hawkins

Wake up, you oppressed masses of people, unite your strength, unite your class, from here to the ends of the earth, from the top of every mountain to the bottom of every valley, from the North to the South, from the West to the East. This is the only way to overcome the forces of the capitalist system. We must stand together and fight against the power of the rich and the powerful. This is the only way to achieve true freedom and equality.

In addition, we have made a great step forward in the struggle against the capitalist system. We have taken control of the means of production and are now taking control of the government. The time has come to fight for our rights and for the rights of all the oppressed people.

The Reds Say...

By Jim Allen

No longer do we have to live in a world controlled by the rich and powerful. We have taken control of the government and are now taking control of the economy. We have made great strides in the struggle against the capitalist system.

The Elections

The Hoover administration was overwhelmingly rejected in last Tuesday's election. The Democrats took control of both houses of Congress, which will give them more power to implement their program of change.
