Runs from Farm to Escape Starvation — Same in Mines

Do Workers in U.S.S.R. Starve?

Do they let their hacks at the machines, or on the scrap heap in the back yard, or in some way by their own hands make the bread and wine of life?

In a large electric power plant in Moscow, a worker dies of starvation.

In a cotton mill in Sumatra, a woman is found dead from starvation.

In a steel mill in Sheffield, England, a man is found dead from starvation.

The workers are not only starving, but they are being starved by the capitalists, who control the means of production and distribution.

The Poor Farmer Bears the Burden

Cotton is selling at 5 and 6 cents a pound. According to the United States Bureau of Labor, the average cost of living in the ten great cities during the last five years has been 17 cents a pound. Cotton is said to be selling at a price below that of the entire farm crop in many Southern states is not enough to pay state taxes, which are the basis of the burden that the landowner is forced to bear.

The landowner bears the burden of the taxes on his land. Most of the tenants and sharecroppers turn their entire labor over to the money lenders who take what they can get and charge high rates of interest. The low price of the crop does not pay all the debt of the tenants. The result is that the tenant is forced to work on the land at a lower rate than the slave was paid.

For the small farmer and the back tenantry, the situation is hardly any better. The landlords charge the highest rates of interest on the money they advance to the farmers. The farmers are required to pay the interest on the loan out of the profits of the crop. The result is that the farmer cannot keep his family out of debt.

The strike would have been won long ago had the 4,000,000 working farmers of the South and other parts of the country who are being forced to work for low wages, not been able to do so. The strike would have been won long ago had the 600,000 men, women, and children of the South and the land that they own, not been able to do so.
