Trade Union Topics
By NED TRUE

S. P. Barton, one of the Birmingham newspapers carried a story about the situation in which the Negroes, under the leadership of the Negro Labor Union, had been killed by white sheriffs who were attacking them from a group of white men. It is evident that this situation is one of the most important in the country today, and it is to be hoped that the Negroes will be able to overcome this obstacle and work toward the betterment of the condition of the Negroes in the country.

The Negro workers have been fighting for their rights and have been making sacrifices, but the Negroes are not alone. The white workers are fighting for their rights as well, and they are being attacked by the same forces as the Negroes. It is evident that the white workers are not going to give up their struggle, and that they are determined to overcome the obstacles that are being placed in their way.

Union Organizer Mobbed By Louisiana Boss Thugs

By REX PITKIN

The workers were demanding better working conditions and higher wages, but their demands were met with resistance by the management.

Organizer Framed for Murder

TALLADEGA, Ala. — Homer Wells, textile organizer, and eight other union men have been indicted for murder in a frame-up case which has aroused labor all over the state. They are charged with killing Deputy Sheriff John Brantly and Joe Hayes at the Remount Mill July 22. Randy and Joe were riding on a fellow-worker’s bicycle, the police said, when the two men were shot at the mill gates by the mill owners and city officials to smash the picket line of textile workers.

Shooting started at the picket line before the mills when workers and strikers were engaged. Wells was struck on the head with a pistol butt before Brantly was shot. The attempt to put the murder on Wells is another move in the panic-stricken Southern textile houses to nip organization in the bud. Thirty-five other unionists were arrested in connection with the shooting.

MILL SHOT DOWN

The picket line began before the Remount Mill when a turnof-the-century demonstration of the employees into the United Textile Workers Union. Local Union number seven, formed in 1906, had been organizing for 24 years, which the company said was the work of the Remount stockholders from 1906 to 1914, with no increase in the $1.75 a week wages. The company said this was an injustice. The employees applied for their charter in the U.T.W.

Welch has been held in Richmond, in the Jefferson County jail, for “safekeeping.” After examining the reports of the case, even police Bible Graves issued a statement denying that the shooting was carried out by unions.

Thirty-one of the thirty-five other union men, arrested on the picket line, were charged with murder and with assault with a dangerous weapon, carrying concealed weapons, and riot and assault on the police. Several were wounded.

For a Free, Prosperous, Happy America

1936 Election Program, Communist Party

The American people today face the most critical test in our history. Our War is against fascism, that threat to our survival. To meet this danger we must build a great political movement to defeat fascism and to establish the New Deal as the stepping stone to the socialist future.

To accomplish this, the Communist Party, the most powerful labor movement in America, and the leading force in the New Deal movement, is putting its entire strength behind the campaign. We are fighting for the job creation, for the social reforms, for the New Deal policies that the working people need. We are fighting for the rights of workers, for the protection of the unemployed, for the improvement of the living standards of all American people.

We demand that the government take over the banks and utilities, that it provide jobs for all who are willing to work, that it guarantee a decent standard of living to all Americans.

We demand that the government provide education, health care, and social services for all Americans, that it take over the farms and industries, that it end the war and bring peace.

Diet, Not the Climate, Responsible for Disease Says Southern Writer

By ELIZABETH LAWSON

(This is the first of a series of articles by Elizabeth Lawson on health and disease in the Southeast)

The people of the South are a sick people. They are more prone to disease than any other part of the country. In various communities, they are said to be the highest in the nation in the number of deaths from disease. The South also has the highest percentage of hospital deaths, and there are only 30 per cent of the physicians in the South, which is the lowest in the country. The average hospital in the South is small and overcrowded with cases of tuberculosis, diabetes, typhoid, and other communicable diseases.

And then there is the Jim-Crow medical system, which causes a Negro to go to the hospital that other races do not. It is in the same Jim-Crow system that a Negro is more likely to die than a white person.
