ROSEMARY,
That's for Remembrance. A few things that the Working Class Should Remember Always, Especially on Election Day.

D A V I D M A R X, March 29th—It is all too

true that the Working Class has little or no

influence in American politics.

The Working Class, sealed up in their

little group, is a closed world. The

labor unions exist only for the benefit

of the Laboring American, and are

not intended to spread their influence

beyond the bounds of the Trade Unions.

The Working Class is not aware of

the fact that their votes are being used

against them. They are told by

their leaders that their votes are for

the benefit of the Laboring American,

but they are not told that their votes

are being used to the advantage of

the rich capitalist class.

Striking instances.

CAPITALIST DIRECTLY IN "ORGANIZED RAGE!"

CANNON, M. April 16.—I give two instances of attempts to introduce a capitalist into this city who cannot be insulated on the subject.

We have not been able to secure the names of those very few instances which, in the City of New York, have been successful in preventing the capital from being used in this city.
