WHY THE WORKINGMEN OF AMERICA SHOULD VOTE FOR MALLOWNEY AND REMMEL, Candidates of the Socialist Labor Party for President and Vice President.

As an Analysis of the Classes and Political Parties in the United States—The Republican Party—The Democratic Party—The Socialist Labor Party—A Vote for McKinley and Roosevelt is a Vote for Capitalism, and a Vote for Bryan and Stevenson is a Vote for the Abolition of Capitalism and the Organization of the Socialist Republic, a Republic in Which Those Who Wish To Live By Their Own Labor Shall Have Abundant Opportunity, While Those Who Wish To Live On the Labor of Others (As the Capitalists and Their Parasites Live at Present) Will Be Accorded the Same Option the Capitalists Give the Workers Today: the Option To Go To Work or Starve.

From all of which it does not, however, necessarily follow that a candidate in Capitalism is any form for any program. On the contrary, he who actually votes for a vote in Capitalism, or who actually votes for the taking of the government, by whomsoever it may be, does not take the effect for the cause, would have no basis for such an action. The Socialist Labor Party is not a rival political party, but a revolutionary political party, which seeks to change the current system of society and government by the action of the people, and which seeks the ultimate destruction of all vested interests, and the establishment of a society in which all men shall have an equal right to life, liberty, and the pursuit of happiness.

The Socialist Labor Party, not only in its own localities, but in every part of the world, is working for the abolition of Capitalism and the establishment of a Socialist Republic, in which the workingmen and the employed shall have the right to govern themselves, and shall have the power to control the means of production, distribution, and exchange, and shall have the power to control the results of their labor, and to determine the measure of their work and the conditions of their employment.

IX—THE MIDDLE CLASS.

By this term, "the Middle Class," is meant the class of middle-sized industrial and commercial enterprises, which, small in area, control the labor of the industrial and commercial classes, and control the labor of the working classes. It is the middle-sized industrial and commercial enterprises, which, small in area, control the labor of the industrial and commercial classes, and control the labor of the working classes.

In the class of middle-sized industrial and commercial enterprises, there are a large number of workers who are employed as journeymen, and who are paid a low wage, and who have no opportunity for advancement, and who have no opportunity for advancement.
