MEN RESUME WORK PRACTICALLY THE SAME AS WHEN THEY LEFT OFF.

Black-guardism of the Militia-Labor Fakir Mahen Ran Away-A Bank **President Cotonel Becomes Acquainted** With the Daily People - Gompers Sheets off His Mouth as Usual.

The strike of the street railroad men at Albany was ended last Saturday. The strike was lost. The demand for 20 cents an hour was granted.

But when the other things are conidered that the men were compelled to accept, the significance of the one on vanishes very considerably. Non-union labor is recognized by the union, and the agreement contains proas that are insulting, not only, but foreshadow the victimizing of a good many of the employes. Exhausted in funds, the men ratified the agreement by

Tunn, the men ratined the agreement by a virtually unanimous rote. On April 13 the Directors of the com-pany sat down to consider a list of 12 demands made by the operators (these demands will be found in parallel col-umns with the final agreement elsewhere on this page). The answer of the company was given in writing to President F. A. Van Allen, of Division No. 132, and to James D. Sheehan, president of

Ind to James D. Sneenan, president of Division No. 148. In its answer the company refused to grant all but the eighth, ninth and twelfth demands. After a lot of parleying back and forth the company refused to recede from its position, and the men

recede from its position, and the men oted to strike. On Tuesday, May 15, the militis of the county was ordered under arms. The id of Brooklyn, composed of brokers ad bankers' clerks also left for the one of the trouble next morning. With the regiment were eighty men om Brooklyn who went with the de-berate intent to take the places of the rikers.

At the same time Mahon the Inter-national President of the Amalgamated Association of Street Railway Employes of America exposed the dastardly char-acter of the Organized Scabbery by leaving the town. He pleaded other important business. Gompers on the same day shot off his mouth at Washing-ton but kept away from the scene of

trouble. On Thursday three peaceful citizens--business men of the city were shot down in cold blood by a detatchment of the 23d regiment. Public indignation which had been aroused by the wantonness of the militia was fanned into flame by these murderers and the Mayor was called upon to take measures to end the

As the reporter left he said in an anxous manner: "I suppose you will give nie hell te-morrow. "War is hell, Colonel, and we shall

see that at 'east one rule of warfare an.o.1; men, supposed to be civilized, will be observed," was the emphatic reply. The Assistant Adjutant, after some objections, reluctantly gave the pass. To give in detail the outrages commit-

ted by the militia, from looting stores to committing murder would fill the pages of this paper.

The militia and the strike breakersagainst both of which feeling was exback way when the strike was declared of. When the cars started running, the staid burgenis of Albany, whose business had been badly interfered with for tea or twoive days, rang bells, shot off fir-works and cheered the appearance of the cars.

The men went back to work very much dissatisfied. They regard clause six of the agreement with particular disfavor as under its provisions the men who conducted the strike will undoubtedly be discharged. They are highly incensed at the conduct of the international officers of Leir organization and their faith in pure and simpledom is all but shattered.

STRIKE AFTERMATH.

Robert A. Pinkerton, of the detective agency, denies that Pinkerton men were employed as gnards to protect non-union men in the recent difficulties between the United Traction Co. at Al-bany and its employes. In a communication Mr. Pinkerton says his agency has not had employes as guards in the Albany troubles. He asks that a correction be made of a report from Al-bany to the effect that his men acted as guards. He does not deny that they acted as spics and "scabs."

In regard to the employment of Pinkerton detectives during the strike just ended at Albauy, whether as guards or conductors and motormen on spies cars, there is apparently a wide discrepancy of testimony. A report from Albany contains the following:

streetcar strikers and their "The friends were dumbfounded to-night when they discovered how badly they had been fooled by the United Traction Co. on Wednesday last. The company placed eight Pinkerton men in their beadquarters and meeting places without their knowing it, and as a result of a ruse the company is in possession of the names of all the strikers who were planning before the strike was declared

off to injure them. "Of the sixty supposed motormen and conductors brought to Albany that day, forty were Pinkerton men in the employ of the traction company. While the trucks carrying the men were being driven through Broadway and State street they were mobbed by friends of the strikers. Bricks, stones and clubs were thrown, and when the missiles were coming thickest eight of the strangers jumped from the trucks and rushed into the welcoming arms of the strikers, who seemed to regard them as converts

They were taken to the strike headquarters, where they have been pam-pered and petted ever since. "When the strike was declared off this morning one of the detectives, who become friendly with his host. hnd frankly told him he was a Pinkerton man in the employ of the company, and that jumping form the truck during the fusilade was part of a carefuly laid plan. The detective expressed gratifica-tion because he had not been compelled

to carry the deception further. To-night ways, etc. the strikers declare that the detectives could not have learned anything important, as they had conducted everything in

PHILADELPHIA, Pa., May 19.-The "anti-tramp" convention of Pennsylvania Mayors, Burgesses and other municipal officeers held in this city last Wednesday believes it has solved the "tramp" problem.

WAR ON THE "TRAMP."

A concerted movement is to be inaugurated throughout the State "to drive every 'tramp' beyond its borders."

The argument advanced is that there is an abundance of employment for everybody, and the man who is wandering about now begging his meals from door to door is not willing to work. While some advocated the enforcement of existing laws to abate the "nuisance," hereby made. it was thought this would not be enough, and besides arrest and imprisonment were too costly, what should be done away with. ton, a working class district. In spite of the coolness of the evening a large crowd of working people gathered and remained to the close of the meeting. Comrades Siedel, Clark and myself addressed the meeting and were gratified at the interest displayed. The only opposition came from a muchly-soaked individual who insisted on swearing aloud at "high taxes" and asking "wots the matter with Henry George?" 'Clark told him, and, incidentally, used him as a background on which to throw a picture of tax and other reformers. The fellow evidently did not like to be made useful so he eloped. Section Philadelphia will continue the open air meetings as long as the weather peanuts.

The First of May I addressed a crowd of about six hundred in Baltimore. The affair was arranged by Section Baltimore and, if attendance counts for any-thing, was a great success. It was like seeing a token of civilization in a land of savages to march up to the labor ly-ceum and look at the front of the building decorated with red flags, with the Arm and Hammer banner of the So-cialist Labor Party in its rightful place; the center. There was a fine programme of songs, music, tableaux, .etc There were speeches in English and German and a grand ball to close with. May 2nd found me at Quakertown,

The next meeting was at Easton and was held in an immeuse hall. Easton is a recently organized section, and they were very much encouraged when six workingmen applied for ad-mission at the conclusion of the lecture. Scranton was the next stop, and it seemed that Jupiter Pluvius was wroth with the S. L. P., as it rained the first three nights we tried to hold street meetings. Sunday afternoon, May 12, at the park, I got the first chance to speak. Since then I have held four street meetings, and challenged the leaders of the pure and simple unions to defend in public their actions and the principles on which their counterfeit mions are built.

But these gentlemen know their little book too well to give us such a chance for unmasking them. The strike at Al-bany has furnished, a good theme. It is the old -lesson of capitalist ownership and use of the government against the workers and not only the impotence but the criminality of the Organized Scabbery in leading the poor dupes against the bayonets which the fakirs have caused the workers to put in the hands of the enemies of the working class. As the event is still fresh, the crowd naturally flocks around to hear what the speaker has to say about the strike in Albany. From every indication Albany will not be alone this year in furnishing rifle diet to workmen. WM. S. DALTON.

MANIFESTO. Fellow citizens and fellow workingmen reliew citizens and fellow workingmen of the City of Roanoke: Having submit-ied to you for you earnest consideration our municipal ticket and demands, we desire to draw your attention to this fact, that hitherto you have been the greatest enemy of yourselynes and to your class enemy of yourselves and to your class The Democratic and Republican parties, which now deem their control over your lives and destinies a fixture, are carefully laying a trap to deprive you of your franchise as a citizen. Hence comes this call for a constitutional convenion, the aims of which we will forthwith proceed to analyze.

Why and for what purpose is this con-vention called? Ostensibly, if we may believe the promoters of it, to disfranchise the negro vote. But it goes deeper than that, as you will find to your cost before they get through with you. The cry of distrauchisement of the colored man is but the thin end of the wedge which will eventually wrench from your hands the only weapon left you to peace-fully right your own wrongs with the

But why should the capitalist and property-owning class wish to deprive us of our blood-bought right? The au to deprive wer is easy to a student of sociology. In infancy of the capitalist system the enfrauchisement of the working class was a necessity, in order that their masters, the capitalists, could capture and turn the power of the State to their own advantage. In England, the cap-italists used the ballots of their wage-

slaves to wrench the government from the hands of the lauded aristocrats. In the United States the northern capital ists used the ballots of their wage-slaves to hoist into power that formidable Republican party which, through many sanguinary battles, and by political chicanery, broke up the chattel-slave owning aristocracy of the South, and opened up the hitherto closed Southern States to the development of capitalistic exploitation.

Yet why does the Republican party sit quietly by and see the Southern States, one after another, take away from the colored man those rights of franchise which they conferred on him after the war? Why does President Mc-Kinley who, on the 4th of March last, took an oath to uphold the constitution of the United States, now witness, without protest, the violation of the fifteenth amendment? Simply because the negro, as a political factor, is no longer ne by the Republican capitalists. Nay, it will be more to their advantage if he is altogether eliminated from southern politics. He has played his part and now must retire from the political arena, and following close upon his heels will trot his fellow wage-slave, the propertiless

white voter. Let us consider the case of the negw first. After the war the vote of the negro was used by the northern capital-ists as a means to elect and hold in office a crowd of northern carpet-baggers, the paid spies and agents of those capitalists. As soon, however, as the Southerners obtained their former standing as citi-zens of the United States, they imme-diately took steps to oust the carpet-baggers, and to hold in check the newly enfranchised colored man. This they succeeded in doing by

This they succeeded in doing by methods similar to those brazenly stated by Senator Tillman from South Carolina in the United States Senate, viz., that the people of South Carolina had become tired of cheating and shooting the negro of that State out of his vote.

and so thought it best to disfranchise him altogether. But why should the Southern Democrats be so anxious to distranchise the negro at this late day, when he is no longer a menace to the State government? The answer to that is twofold. because the Southern negros for the most part, propertiless, and cousequently non-taxpaying, and by reason of certain State laws and their impoverished condition, the Southern negros have to be educated, and, to some extent at

least, supported by the State. Our agricultural, manufacturing and profits. nercantile industries of the South, are as yet carried on largely by small capitalists, who see their business dwindle down through their inability to compete successfully with the cheap product of great trusts. They also feel the burden of State and municipal taxes cutting deeply into their already crippled reve-nues. For this reason they have conceived the idea of disfranchising the colored man, hoping by that means to rid themselves of taxation from that quarter at least, by rolling the whole burden of the negro education and sup-port upon their own race. A silly delu-sion, indeed! The negro is too substausion, indeed! The negro is too substan-tian to vanish at a mere legal say-so. They are here, and if the State refus is to educate or feed them when hungry, they will resort to crime, and will have to be boarded and guarded in some of our State penal institutions: so there it has been and in the source of the in the face. will be little relief from taxation after The second point is that the Southern Democrats find that there is very little hope of help for them from the Northern Democrats of the Croker-Bel-Northern Democrats of the Croker-Bel-mont stripe (and who without a doubt knifed W. J. Bryan in the last two elec-tions); and also by the two crushing defeats administered to them by the Republican party in the last two pres dential campaigus, have at last had this fact forced into their gray matter, that the Democratic party of old is no longer considered a factor in national politics. That fact may have led them to hug to their bosom that false delusion that, at any rate, they could rule at home in Democratic peace and harmony in the's different localities, if that disturbing ele-

conservative Democracy in our State governments. Hence we find them laying bertainents. Hence we had them a jung their lines for the upbuilding, in the South, of a strong white Republican party. It can not be accomplished so long as the negro remains a factor in South and the second sec Southern politics. Hence McKinley site by while the Southern quietly State violate the constitution of the United States. Hence his great tour of the Southern States after the Spanish American War. Hence pointment of Fitz Lee, Hence his ap-tz Lee, Wheeler, and other prominent Southerners to military and political offices. Hence his appointment, a few weeks ago, to office of U. S. District Attorney the State of South Carolina of a life-long Democrat. Hence, also the gold-bug Democrats of the South who voted for Palmer and Buckner in '96, and secretly for Mc-Kinley in 1900, and would have done so

openly, if not for the negro and social ostracism. For some years past the tone of the press, and the sentiment of the capitalists of the Southern industrial centres have been strongly in favor of the polic pursued by the Republican party, which stands pledged to the interests of all large capitalistic concerns. Therefore,

eliminate the negro from the politics of the South, and in his place there will arise a powerful white Republican or ganization which, undeterred by the old oon smash into smithereens that old Democratic bogy-man, the negro, with wormeaten Democratic hulk, which has been a useless direlect on the "political ocean.

Yes, poor little middle class Democrat with your little antiquated machinery of production and distribution hanging round your neck like a millstone, by fai too small to compete with the billion dol lar trust, yet large enough to pay cut-throat State and city taxes upon, you are on a bad row of stumps. The large capitalists are here to stay, and they will eventually crush you out of exist ence as a class, and along with you the Democratic party which stands for your picayune interests. Yes, out, ou they will yank you to take your place in the ranks of the ever increasing army of

inemployed workmen. With these pleasant and truthful thoughts we will leave you to dream of your future happiness, when you have disfranchised the negro voter, and have to deal with a white Republican whom you dare not attempt to cheat out of his

Now we will return to the bosom of our own family, the wealth producing work ing class, and proceed to show how it will be to the interests of the capitalist class to disfranchise the white working class voter also. As already stated, the ousting of the negro from politics in the South would enable the Republican party eventually to capture the governments of various States. The Republican party enthroned in power in the South, the ultra capitalists whom they represent could then the more easily unfold thmeselves. and the sooner have the entire United States under the domination of those large coporate bodies, the giant trusts. Trusts were never formed for the pur pose of providing labor for the entire working class. They only promise em-ployment to those who are actually nec-essary to their business. Their prime object is to curtail and cut off all un-

necessary expenses ,so as to cheapen the cost of production. But you might ask why the trusts at all, why not do business like our own daddies, in a small way, with free individual competition a la W. J. Bryan and other demagogues? Why, because in our day it is impossible and for this reason: Of all the wealth annually produced in the United States the working class share in wages is only one fifth of the whole, leaving in the hands of the capitalist class the balance four-fifths. As the working class can purchase of that product only what their wages are alent to-one-fifth-the four-fifths equiv remains in the hands of the capitalist class, and must be sold somewhere out-side of our own home markets, in order that our capitalists may accumulate their

That economic condition necessitated the cheapening of the cost of production of manufacture, so that capitalists might enter the world's market and success-fully compete against all the cheap foreign producers, Japan for instance, with its 25 cents per diem working class. It must be quite plain to you that some-

ment to make inquiries about this dis-crimination. The fact is that all those countries, whose markets we have in-vaded and destroyed by our own product, will, sooner or later, have to shut out of their home markets our cheap American product, or reckon with their own Working Class, driven to mad despair by ger. If on the other hand, those foreign ountries do not use the tariff against us, they will assuredly fight us with our own weapons-the giant trust. Even now England is moving rapidly in that direction. Trusts are being formed hand over fist. In either case, cither by a tariff on our product, or by the formation of gigantic trusts, the effect upon our home industries will be very disastrous indeed. Should those foreigners refuse to adopt any of the above methods against us, and conclude to let their home industries go abegging. we could not very long continue to make profit out of those foreigners, because where we sell in the English, French or German market, those foreigners cannot sell because unable to compete with us.

Therefore their trade would be at a standstill, their employes on a vacation without pay, no money in the pockets of the Working Class of those countries means no sale for our goods, no matter how cheap they may be. Therefore, you see that, looked at from any standpoin boasted prosperity of even our giant capitalists can not last for ever, but will recoil on us sooner or later. In the meantime in the United State capitalists driven frantic in their efforts

to stave off the inevitable end, will con entrate with ever increasing energy and intenseness. Thousands more of the small fry will be frozen out of business; milons more of the Working Class will be thrown out on the streets, becoming ever more degraded; crime rapidly on the in-crease; less facilities for having their children educated: what little property hey may have had gone into the maw of the real estate shark. But out of th nidst of that chaotic confusion will, with increased momentum and firm determination tion, rise into clear view the now solid phalanx of the Fighting Socialist Labor Party, emblazoued on the warm folds of their bright banner those immortal words of Marx: WORKINGMEN OF THE WORLD UNITE. YOU HAVE NOTHING TO LOSE BUT YOUR HAINS, AND A WORLD TO GAIN. Fellow Workers, the above is a correct picture of economic conditions. For those reasons, the lackeys of the capitalist

lass (one of whom you nominated in our city Democratic primary) will deavor to deprive you of your vote, if not now, certainly later, because th more propertyless the capitalists make the workers, the more illiterate they ecome, and illiteracy, if not also ick of property, will disfranchise ou. Besides, with that large and lack of

you. ever increasing army of the un-employed to reckon with, and the undeterred and uncompromising work of the Socialist Labor Party, calling con tinually upon the working class to vote themselves into power and take what rightfully belongs to them, the machinery of production and distribution, using it for themselves and not for the benefit of few idle capitalsts, yea, with the progress of our work among our class, i great terror has failen upon the hearts of the capitalist class lest their wage slaves eventually heed the advice we give them, and march to the ballot box and overthrow this capitalist system of crime and degradation.

Therefore, in self defence, they will take your ballot from you if you let

It is not for naught that a Chauncey M. Depew warns his class to beware, o a Mark Hanna cries out like the wail of lost soul, when he said to his colleagues "My friends, there is no further danger from the Democratic party. The future battles will be between the Republican party and the dangerous Socialists.'

Fellow workingmen, we have submitted to you what seems a rather lorg man festo; yet we considered that the conditions which at present surround and overshadow our class justified us. And now having shown up those conditions

in the clearest light possible in our limited space, we have done our and it is up to you. If you doubt any of those statements which we have in regard to the final end of capitalism, we will gladly meet any one you may name and debate them in public. If on the other hand, you are satisfied that our statements are correct and irrething had to be done, otherwise that four-fifths surplus wealth would remain 23d of May for the S. L. P. candidates for delegates to the constitutional convention, who are pledged to fight for the rights of their class, and to maintain inviolate in their hands that weapon, with which they will, when clothed and in their right mind, smash in the head of this present capitalistic system of de grading wage slavery, and rear on its ruins the glorious Socialist Republic, wherein the Working Class having regained their tools, will at last be master of the situation. On to the Socialist Republic.

CASH REGISTER COMPANY SPREADS.

Seven Corporations Follow Its Example To Remain Idle Until the Labor Question Is Settled and "Settled Right," the Employers Say-Thous-Tands of Wage Workers Already Destitute.

DAYTON, O., May 13 .- The lockout that began in the National Cash Register Company's plant-the model factory of the world-has spread like a plague. The entire industrial life of the city is affected.

Inousands of workmen are without means of buying food. They cannot make the payments on their homes to the company's building associations. Unless they surrender they must soon lose their homes and be reduced to destitution. It is evident that the capitalists are in for a fight to the death. Some are preparing to go abroad with their families, leaving their former employees to their fate.

These corporations and firms have announced that they are practically out of business and that their machinery will remain idle until the labor question is settled-and "settled right" they say grimly, which means as the capitalists desire it "settled:" the National Cash Register Company, employing 2,400 men women and girls; the John Rouser Company, the Requarth Compny, the Dayton Lumber Company, the Gebhardt Lumber Company, the Globe Planing Mill Company, Houck & Ely, Kurtz & Johnson and every contracting carpen ter mason and builder in the city. The greatest interest centres in the ituation at the cash register plant, situation at the cash register where the trouble had its origin.

The National Cash Register Com pany has had much trouble with its employees of late. This is the famou nodel plant that has been visited by students of social matters and by manu facturers from nearly all parts of the world. It is built almost entirely of teel and glass and is operated by electricity. The employees have large and airy workshops, luncheon-rooms, bathrooms, libraries, rest-rooms, lectures playgrounds, musical entertainments and many other "educational and enter taining" conveniences which were devised to extract from them the greatest amount of labor at least expense. President Patterson was known familiarly 'John." and the reported feeling between employer and worker was for years a subject of wonder and comment There have been several strikes in this

'Utopia" of late. President Patterson alleges that things had come to such a pass that there was not a day when he was WAS not visited by some committee or walking delegate and annoyed with petty complaints. The latest trouble was more than he could bear, he says. Four men were discharged from the

moulding department. They complained to the union. A committee appeared for them. The head of the moulding depart ment said the four men were trouble breeders, agitators and a menace to the velfare of the works. They had been discharged, and that was all there was to it. The committee demurred to the charges and demanded that the four men be reinstated. The company refused to this. Then the committee declined further consideration of the matter and ordered out all of the moulders. The metal polishers struck in sympathy.

It was seen that there was to be a gen-eral strike, so the company closed down. The cash register plant has been chosen by writers on social economics as a type ically. A large majority of the operato represent the so-called order of things industrial. In its operations the theory of profitable mutual interest had been practised with the results mentioned. The factory was surrounded by a lawn, around which were flowers and shrubs. The workrooms were enlarged, better sanitation and light were secured, and uniformed janitors looked after rooms and grounds. Medicines were supplied free of charge. Bathrooms for both sexes were estabished.

## A "PROTESTERS" MEETING That Was Enlivened With Cheers for the

S. L. P.

Last night the Building Trades Council paraded to Cooper Union where a mass meeting was held to protest against the decision of the Court of Appeals, which adjudged unconstitutional the Prevailing Wage and Stone Dressing laws. The secretary of the council had announced that 15,000 men would be in line. At 9 o'clock there were about 300 people in the hall when the paraders marched in. They all got in and the hall was then about three quarters full.

Joh nSwinton who acted as chairman started the ball rolling by stating that the committee had handed him a list of speakers on which there was a number of "Hons."

The list started with "Hon." John Swinton and followed with "Hon" John Ford the Senator, "Hon" John Brocks Levett, the reform lawyer, "Hon" Hen-George, whose occupation is the son of his father; then followed the "Rev-erends" Rev. Madison C. Peters and

Rev. W. D. P. Q. Bliss. Swinton said that he protested against the list and finally succeeded in hav-ing them put down to the bottom and members of the Council to speak first. Swinton said the "Hons." and "Revs." were no good at a workingmen's meet He said: "This meeting was called to give notice to Paddy O'Brien at Albany that the Building at Albany that the Building Trades Council was not asleep and that

would make its protest felt." The first speaker was George Reed of the Council, who in speaking of the Em-ployers' Liability Bill, said: "I thank God that we have a Governor who is looking out for the interest of the employes as he did when he returned the hill

Next appeared Joseph A. Lord of the Council, who began with "Well, boys, we will attend meetings like this until we agitate the grey matter in our brains and vote good men into office, who will stand for your interests. Then we will meet to protest, but to divide good things we make. Some may think I am a Socialist, but I'm not. (A Voice: Vote for the Socialist Labor Party ticket.) Great applause. "No we will not: I didn't come here to say anything, ticket.) and I will not say anything."

The chairman then came forward and said: "The 7th Regiment is under arms and will be sent here to keep the peace." (Great laughter as the chairman took his seat).

Henry George then ambled forward He said: "Shall we elect better men to office, is not the question. The question to decide is to change the system." Then he rung in the old "taxation at the bottom of it all" twaddle. The crowd soon wearied of him, and amid jeer and laughter he sat down.

"Hon" Ford was not to be found when called. Rev. Alphabet Bliss had also decamped. But Rev. Mad. Peters re decamped." But Key, Mad. Feters re-mained. He gave forth this brilliant epigram: "I don't think we ought to criticize the judge, but the decision." The crowd had been dwindling right along and when Reformer Brooks got a

hearing he said: "The decision is called class legislation; I say it is a class de No one applauded. The chairman when presenting the

resolutions was interrupted by cries: "Let us hear something about Social-ism." "I will after the resolutions have been presented." After the resolutions were adopted, the chairman of the committee usurped the position of the chair man of the meeting and announced ad journment. As the remainder of the au-dience filed out there were cheers for the S. L. P.

### Labor Fakirs Scent a New Field.

Delegates from Southern "labor un-ions" who visited Fall River recently gave a different version of the possibil-ities of unionism among textile operatives in the South than that commonly accepted in the North. All that is nee ed, they said, to create a strong "trade union" sentiment in Southern mill towns is that the operatives there should learn as much as the delegates had about the conditions in Northern cotton mill towns, brought about largely, they believed, through the strength of "labor" organizations and the consequent effect polit-

uusold in the hands of our capitalist class. The result is overproduction, fac-tories shut down, the workers and their families thrown on the street, and that gaunt spectre, the periodical panic, with all its disastrous results would stare them

The panic of 1893 taught our capitalists a severe lesson. They found that it was impossible to do a successful business in a small way, and from that time dates the commencement of our present mammoth trust.

As a result of the rapid trustification which has gone on since that time in the United States, we are now masters

of the industrial world. But at what cost! As a result of that great method of concentration in industry, aided by the introduction into our factories the very highest improved mechanical machinery, millions of working people, consisting of mechanics, clerical force, foremen, superintendents, agents and small manufacturers and many more have been thrown out into the ranks of the unemployed, the number of which has been variously estimated at from 5,000,000 to 7,000,000. Truly, we have had prosperity but only for the capital ist members of the giant trusts. Let us consider what the effect has been on the industries of those foreign countries whose markets we invaded and captured by the cheap product of our trusts. In England the iron, shoe,

weaving and spinning industries are to-tally paralyzed. In the English papers we read a continual wail of gloomy dis-pair, accompanied by the cry of an almost bankrupt government. In France most bankrupt government. In France and Germany we hear the same execra-tion against the American product. What can be the result of all this? Russia sounds the keynote by placing a tariff on the American product. England refuses any longer to buy canned goods for her soldiers from American firms. Secretary Hay has been instructed by our govern-

### Another Utopia Gone-

Another Utopia has gone. This was the Shalem Colony in New Mexico, founded by John B. Newbrough, and conducted by one Audrew M. Howland of New Bedford, Mass. The experiment was inspired in 1882 by Mr. Newbrough, who published a book called "Oahspe," containing a new religious doctrine. In the following year a community was or ganized at a convention held in this city. Its objects were the care of foundlings, orphans, and unprotected children, provision of homes for them, rearing them upon strictly vegetable diet, and allow-ing but two meals a day, this, according to one of the rules, being "to raise a more spiritually minded people." Mr Mr Howland supplied money enough to establish a home near Dona Ana, N. M., expending about \$500,000 on the experiment. Government was by dictates of the spirits, as conveyed through the lead-er, and while Mr. Newbrough lived the colony was fairly prosperous and con-tent. But Mr. Howland, his successor, was not a good medium for spiritualistic communications, the report says, and one by one the colonists deserted Shalem for the flesh-pots, until there were not enough left to continue the experiment.

Two recesses were given each day. Social meetings were instituted. For the men there were a library and

two large lecture rooms, one at the factory and one in Dayton, where they were addressed by "eminent" speakers. The march of "improvement" did no did not

The dilapidated village of "Slidertown," where the workers were "Slidertown," where the workers were colonized, was renamed "South Park;" prizes were offered for the most attractive back yards, for the best effects in window-boxes, and for vine planting; and two acres of ground was set apart as a

tives in many Southern districts cannot read, and they are content with their conditions of long hours and small wage paid in store orders, the delegates said only because they do not know that they have it in their power to better these conditions. These assurances greatly en-couraged the Fall River labor fakirs. They predict that a great textile "un-ion" movement will sweep over the South

within the next two years, thus "equalizing" conditions as between the mills in Massachusetts and those in the Carolinas and relieving both mill owners and millworkers in the North from the "unequal competition" of which they now complain.

#### Can't Sell Himself Into Slavery.

CHARLESTON, S. C., May S .- Alexander Williams, a negro who was arrested for having violated a "slavery" contract in Anderson county, where the recent system of convict slavery was broken up by the courts, has been released by a magistrate because the court ruled that a

man can no longer sell himself as a slave. Williams was indebted to J. S. Fowler, who formerly operated a stockade, for \$150. He was "leased" by a man for whom he was to work a year to settle

the account. Under the contract the negro agreed to be shackled, to be locked up in a stockade

at night, and to accept whippings when the owners deemed it necessary. After working for a time the negro broke the rules and left. He was arrested. The prosecution endeavored to have him sent to jail, but the court held that such contracts were null and cold and opposed to public decency. An appeal has been

aken to a higher court. Four citizens of Anderson and about score of guards are now under indictment for having operated a system of slavery under which negroes were held as bondmen for years and severely punished.

'A discussion having started between Ward H. Mills of Dallas, Tex., and W. B. Farmer, editor of "The Farmers Review" of Bonham, Tex., on the matter of a controversy, which, the former states, once occurred between THE **PEOPLE** and W. E. Farmer, several ondents from Texas have written to inquire on the subject.

The clippings sent us on the discussion tween the two gentlemen are both taken from the issue of "The Farmers Review" of April 25, 1901.

The statement made by Ward H. Mills runs as follows: "If Bro. Farmer will reproduce in

"The Review' a controversy that occurred between Mr. De Leon and himself, ished at a time when he was not so far advanced in his studies of social tions, I believe he ,in common with questions, I believe he in common with "The Review's' readers, will understand that the literary duel of that time was a thing so one-sided as to be smiled at in the light of to-day. And I give Comrade Farmer credit for a mind too broad to allow that intellectual tilt to rankle and prejudice him in his policy affecting the interests of the working class."

W. E. Farmer's answer to this is: "There is one statement especially, in Comrade Mills communication to which I desire to call attention; that is, his statement concerning a controversy between myself and Mr. Daniel De Leon. ditor of THE PEOPLE, published in New York. Now, if I had any controrst with the above named gentleman last year I have no knowledge of the matter. I did on one occasion state my objections to some of the tactics of the S. L. P. in a comment on a letter from a comrade of Colorado, Texas. I quoted nent made in the natonal convenon (if I am not mistaken) of the S. L. solution, but if THE PEOPLE ever riticised my position I never saw the riticism. I have never received THE PEOPLE as an exchange, and doubt so something may have appeared in its lumns that never came to my notice." In answer to our Texas correspondents. We reproduce below, from the files of THE PEOPLE, an article published in the issue of November 20, 1898, under the caption "Political and Economic." The article covers the full ground of inuiry. Here it is:

[THE PEOPLE, Sunday Nov. 20, 1898.] The San Antonio, Texas "Socialist commist" [W. E. Farmer, Editor and repristor] furnishes the occasion not y to restate certain matters that, by light of the recent elections, need re-tement, but to elucidate the "gentle-" of THE PEOPLE'S critics, the indue severity" of THE PEOPLE to-ard those whom it criticizes, and the arracteristics of most of the adversarof the uncompromising tactics of the

No Socialist paper would fall into the trap of Altgeldism. The "Social Economist" is not a So-cialist paper to-day. We trust, however,

that it may have an honest foundation, and that it may be gifted with sufficient manliness to take this criticism in good part, and hasten to correct its errors.

II. On the 27th of last month there was issued from Austin, Texas, the prospectus of a new organization-The Co-operative Commonwealth of America-that is, to establish peace on earth and good will toward men.

Before one has read very far, the ques ion begins to gather shape in one's mi HOW? As one proceeds reading, the question grows in size, in definiteness and in numbers; until one reaches the end then one huge, clear, distinct "HOW?" sticks out over the whole thing. The prospectus, or platform, and form of organization, give no cue to the answer, while the Socialistic character of its specific demands only serves to incite curiosity all the more on that pregnant

question-HOW? It may be safely set down as an deniable fact that the impossibility of the continuance of the Capitalist System is generally recognized, and that likewise is recognized the logical sequence of the So-cialist System. But a like stage being arrived at on any issue, there is en-countered a still more critical stage, the stage embodied in the question of "How?" A stage so critical that, unless safely weathered, all previous progress goes for naught.

History's pages are full of illustrations on the point that the "How?" is the determining facor in all issues.

"Freedom" was the issue that incar-nated itself in our Civil War. No soberminded man will to-day deny that "Free-dom" was as much the ideal of Jefferson Davis as it was of Lincoln. The goal seemed one-"Freedom"-and yet, how different did it turn out in fact; how differently was it not molded by the "How?" of each! Again; "Farmer," the Tory phampleteer, who

during our Revolutionary days tackled Hamilton, had "Freedom" for his motto, and so had Hamilton. The goal seemed one-"Freedom"-and yet how differently was it not molded by the "How?" of each! Again;

The Cavaliers of Charles I. and the Roundheads of Cromwell both quoted from the identical Scripture: "Religion" was on the lips of both, and in many a bloody encounter the same Biblical passage happened to be the battle slogan of the nappened to be the barrie slogan of the one and of the other. And yet, how dif-ficulty did not the "How?" of each set mold its "religious" gonl! These examples will suffice. To-day a

mau tells us nothing, even if he tells us he wants the "Co-operative Common-wealth." Unless he tells us "How" he wants it, he leaves us wholly in the dark. The identical mineral and other ele-

ments, go up into; the identical climate surrounds; the identical air, water, sun-shine, is absorbed by the crab apple

tree and the contiguous Bartlet pear tree; yet, owing to the different structure of the cells of each of these trees, the identical sap that courses and is filter ed through their veins, in the end reap pears transmuted into a crab apple, on the one, into a Bartlet pear on the other. The cells of each answer the question "How?"

The Twenty-third regiment of Brook lyn which was ordered to Albany Tuesday night to "quell rioting strikers," is one of those regiments, which, when there was perhaps a plausible excuse to justify its existence and a need for its services, refused to respond to the

call for duty. That was three years ago at the outbreak of the Spanish-American war. They have gone to Albany, we are told. "to redeem the fair name of their

regiment from the 'mistake' of three yars ago." The Twenty-third regiment is made up of bankers' clerks, brokers' clerks and kindred parasite elements of present day society. Many of them are clerks

in Wall street. A "whole raft" of them work for Cornelius Bliss, a member of McKinley's first cabinet, and yesterday, when they applied for leave of they were enthusiastically

absence, they were entrustantically told: "Certainly, certainly; go and do your duty." The orders for the regiment to report to General Robert Shaw Oliver at Albany were sent to General McLeer at his home, No. 473 Halsey street, Brook-

"At once," the order read; there was to be no delay. The captains with the rosters of their companies before them, dispatched their

own messengers and messages for the soldiers under their immediate command. But more general measures were taken to gather the 740 men of the regiment.

To every theatre in Brooklyn the telephore message was sent: "Please announce from the stage that the Twenty-third regiment is ordered to proceed to Albany at once. If any

Twenty-third man is in your house tell him to report at the armory at once The announcement was made at the first opportunity, and Ia nearly all the theatres hearing it, two. three, half a dozen men arose and hurried out.

Some of these men were in evening dress, for the Twenty-third is the Seventh Regiment of Brooklyn, and some had young women with them at the theatres.

The same message was sent to the Long Island College Hospital, where commencement exercises were being held

The men, hurriedly summoned, came rushing in from theatres, clubs and their homes. Cabs came rattling up from all directions, bringing men their evening dress, and women in handevening gowns accompanying some

them By 11.45 p. m., 250 men had heard the summons and were at the armory. Some of them fhought at first the matter was a joke, but when they learned the truth, tried to go home. A sentry at the door, however, stopped them with a gun and turned them back. The universal opinion was volced by

a sergeant when he said: "Boys, we're ordered up there because we don't know those fellows in Albany and they don't know 'us. So they know what to expect, and so do we.'

Col. Brady said: "We don't know what is expected of us, but you can be very sure, though, that whatever is expected of us will be done just as well as every man knows how. The men ar ready and willing to do anything that's wanted of them."

Some of the men showed such joy at the chance to shoot strikers with immun ity, that they raised ear-splitting yells. As some of them put it, not since 1895, had they had such a chance.

The Twenty-third regiment is a "strike" regiment. During the switch-men's strike at Buffalo in 1892-a

That Show Worse Than European "Pauper" Wages - A Dollar a Day a High Figure Now. While President McKinley, the erst-

while advance agent of prosperity is traveling in regal state through the country, announcing that prosperity is here, and incidentally launching battle ships with which to secure more markets, the working class, despite his repeated assertion that they are "sharing fully in the unprecedented prosperity" finds its wages steadily going down.

Not only in this city, but throughout the country, wages under prosperity are getting below the European "pauper" level.

The following instances support this statement.

Men employed in the saw mill of the Knoxville Furniture Co. at Clinton. Tenn., went on a strike to have their wages increased from 80 cents to \$1 a day.

The Philadelphia North American tells the story of a man who committed suicide because he could not obtain work. and he had only ten cents left for food for his wife and four children. When at work he usually earned \$6 a week. One brother (also with a wife and four children) is clerking in a shoe store. Having been in the business for ten years he gets \$7 a week. Another brother (with three children) earns \$5 a week. They were not able to give much assistance. The suicide with his family lived in two rooms.

At the Tuscaloosa, Ala., rope factory a man and his two daughters of nine and ten years get 60 cents a day for twelve hours' labor, the children getting but ten cents aplece.

The woodworkers employed at the factories in Owosso and Corunna. Mich. get an average of 75 cents a day. The best paid workmen get \$7 a week.

One of the factories at Corunna was given a bonus of \$7,000 by the townto locate there. The little business men believing it a good business investment, as it would give them a chance to get a little of the hide of the workmen brought to the town.

A pure and simple union was organized which resulted in the discharge of all that joined it. As the "union" could not flourish without the high dues it soon went to pieces. The small business men stood by the capitalists by refusing credit to the men locked out.

In Renovo, Pa., which is described as a progressive manufacturing town where labor is largely employed," la-bor is considered "well paid" that gets a dollar a day. In Indiana a dollar a day is big wages.

The West Muncie Strawboard Company employs 50 men, its weekly pay roll is \$100 a week. At the Collins Car Iron Slatting Company near Muncie there are 50 men with a weekly pay roll of \$150. to run out a car. Three hundred and fifty other men in factories in the vicinity of Muncie get from

\$3 to \$4 per week, boys get much less, There is a glass factory where 200 men and boys earn \$600 per week. The av-erage small factory in Indiana employs about 50 men with a pay roll of about per week.

At Danbury, Conn., 65 young women weavers employed at Allings' mills struck recently against a twenty-five per cent reduction in their already scant wages.

In Cincinnati, Ohio, the cloakmakers recently struck against the introduction other regiments of the First and Sec-ond brigades, were used as capitalist employed in other cities \$3 or \$4 a week

Thomas O'Neil, vice president of Al-bany Division, No. 148, Amalgamated Association of Street Railway Em-ployes, is reported as saying: "Of the men who came here to take the places 200 1 of the men on strike several say they were brought here under a misappre-00 hension. This may be true, but I do not understand how it can be the case. The 200 newspapers have given the strike wide publicity. How a man can come here and say he did not know there was a strike is, to say the least, strange." 00 200 There is nothing strange about anything when you understand it. It has developed in recent years that 20.

besides having the Organized Scabbery in their service the capitalists have sup-plemented them with an organized band 00 of professional strike breakers. 200

The revelations in yesterday's PEOPLE by an honest workngman, who was kidnapped and taken to Scran-200 ton, Pa., to take the place of strikers at the D. L. and W. machine shops, 200 proves this. He refused to stay despite threats and intimidation brought to bear. 200 He said:

'Few of the men who went from New 200 York with me are skilled mechanics. Most of them are professional strikebreakers.'

"The 'square fellows' would all leave but they are threatened by the com-pany officers. They are told that the strikers will assault them and no pro-tection will be given." 200 200

As he was leaving the yard an officer 000 tired his revolver several times to frighten him

Ø Despite the discouraging prospect faced man who goes to Albany to work 000 on the street railway, there is a great rush of men who want to go. They are mostly men who have been discharged 200 or who have resigned from the Brooklyn Rapid - Transit service, having done 200 like strike duty on that line.

As a rule the company has no use for 00 them once the strike is over. It is significant that Brooklyn is supplying near 200 ly all the men being sent to Albany to break the strike. The significance lies in the fact that Anthony R. Brady -- ho 000 is the dominant factor in the Albany strike is a member of the voting trust 200 of the Brooklyn Rapid Transit Company. This voting trust is composed of threa men, in whom is lodged the power of 000 voting the stocks of the company for a 200 period of five years, no matter who the stockholders are that may come or go. Brady is also a director of the United 200 Traction Company of Albany. He and Col. Barnes of the 23d Regiment of 200 Brooklyn are directors of the Corn Ex-change Bank of this city. 200

If "organized labor" was what it pretends to be, Mr. O'Neil would be aware of such facts as these, and instead of wondering and thinkug things strange, he would be cognizant of every move of capital and able to cope with it intelligently.

200

200 The professional strike breakers are thugs on a par with Pinkerton men. The strike is their harvest time

They are taken to Albany free, they get board and lodging and three to five dollars a day during the strike whether or not they leave the car barns.

The labor agent in Brooklyn, who refuses to give his name, does not urge any man to go to Albany. He states the situation with brutal frankness to every applicant.

'You're liable to get your skull crushed by a brick as soon as you get off the train," he tells the applicant, "or may be you won't get smashed until you try

ber that we have a mission to perform in the United States and that, after we have established our class is the places of power in America, after we have taken hold of that weapon, the government, and finished wielding it over the head of the Pig, then there will be time to frame an international platform and give warning to all people that the affairs of the American working class are now the affairs of the world and we are ready to attend to that. But until that time, let us take care of our own problem first.

Delegate Kinneally assigned his time to Delegate Simpson.

Delegate SIMPSON. I consider it very unkind and ungracious on the part of Conrades Daiton and De Leon to say that I at any time mentioned that the founders of this Republic aimed at the oppression of the working people. That was a word and a phrase that I never was as ungracious was on the part of De Leon to say that such opinions as I have expressed here on this platform ultimately lead to Kangaroolsm. If I were inclined to argue in the same line I could much more readily prove that such things as he has expressed here lead to Debsism, much more readily so, for he has stated practically here that we have got to trim ourselves to the general opinions af the people who are not yet, with us. If we adopt a platform for political effect-Delegate DALTON. Mr. Chairman, I rise to a point of order. The delegate has stated that Comrades Dalton and De Leon have put words into his mouth which he has not uttered. The utterance of the delegate is on record. I would like to have the record looked into and see he made any such statements, and, if so, now is the time to retract them. We will know what point of departure we have in this debate. Delegate SIMPSON. I am perfectly willing to have the record looked Into.

That this opinion is not hypercritical, and how important a clear understanda ready and willing at any time to capsize, the following passage from the leading editorial of the "Social Econ-omist" of the 5th inst, will bring out dy and willing at any time to rong. The passage is this: "John P. Altgeld is the best friend

The "Cooperative Commonwealth of America," started in Austin, Tex., leaves the public in the dark. We shall be glad to give the new organization space to satisfy the just curiosity on its "How?" To the above criticisms the "Social Economist" of last August 26th, makes

"Some of our friends attach too much importance to Prof. De Leon's criticism of the 'Social Economist.' Feel no uneasiness. The professor's faugs were drawn long ago by those excellent So-

cialist propaganda papers, the 'Appeal to Reason' and the 'Coming Nation.' When a man has earned a reputation when a man has earlied a reputation as a class-conscious liar and capitalist pimp, the 'Social Economist' can afford to laugh at his pompous arrogance, while it forges right ahead as an Evangel of Socialism."

Thus, one after another, these "evangels of Socialism" pillory themselves,-and we shall help them along in their valuable work. They proceed upon the fisherman's theory that "'tis good fish-ing in troubled waters." The troubled social waters of our generation are used by them archively to fish in With up. by them exclusively to fish in. With

conscionable recklessness they sail in; sublimely ignorant, they dash ahead; the holy cause that is up they approach and

workmen sheets, gave glorified accounts of the departure of the regiment. It was reported that enthusiastic crowds cheered the regiment's progress,

while the fact was, that few people saw or knew of the departure until reading of it in the papers yesterday. The men cheered but it was cheers from craven hearts. It is notorious that even in strike "duty" they are pol-

THEY HAULED THEM JUST THE SAME.

It was a noticeable fact that on the way to the Grand Central station many of the railroad employes of the city who came in contact with the Twentythird, were not at all kindly disposed toward the men in uniform. While some of the men on the cars on the Brooklyn side of the river only grumbled, some of those in Manhattan were bolder. On one of the cars of the Third avenue elevated a guard blocked the platform so that one of the men could not get by without squeezing him. When the Twenty-third men were marching along Forty-second street a motorman of one of the cross-fown cars should an insulting remark, but the men for whom it was intended did not hear it. or if

they did, paid no attention, and did not so much as look in the direction of the trolley car where the motorman rode. ish ermy.

The cloakmakers, themselves, earn \$15 a week in the busy season of three or

South Dakota, where it now noursness, During the last year companies have been organized under the South Dakota law representing capital of nearly \$2,000, 000,000. The South Dakota law is the most liberal of all in the United States. The total expense of incorporating a com-pany is a \$10 charter fee, and the amount of capital makes no difference. There is no franchise tax, no assessment on divi dends and no personal liability on paid-up stock. The only tax is on property in the State.

### Sultan's Strike Methods.

CONSTANTINOPLE, May 7.-The sultan has just settled, in his own way, a unique strike. A number of young military doctors, about to leave the Imperial School for a year's service in the military hospitals, struck because they had received no pay for six months. They addressed a strong letter to the sultan, saying that they were dying of hunger, and had de cided to apply for the scraps from the imperial table. The sultan flew into a great rage when he read the letter. He forthwith ordered the strikers to be sent to the Yemen garrison in Arabia, one of most undesirable berths in the Turk-

the agreement the applicant must sign but he allowed a reporter to read the closing clause, which reads as follows: "In making this agreement I fully and clearly understand that there is trouble on the property of my employer and that in going to Albany I go to take the place of a striking employe." The other part of the agreement re-

lates to the wages to be paid and to other conditions. This is no guarantee that the wages will be maintained after the strike is over and the applicant has no promise of a permanent position. The agent said he had positive in-structions from the railroad officials in Albany not to, let newspaper men see the form of contract.

That these men know what they are doing is shown by the statement of one of them interviewed in Albany. He said his name is George Osborne

He is one of the men who made that wild ride from the New York Central Station in Albauy out to the Quail

"We expected trouble, knew it was coming," he said, "and it was about the only thing we talked about on our way up from New York.

"But we had no idea that within ten minutes after our arrival in Albany we should be stoned, even with cavalry all around us. Of course, we take our lives n our hands now, but we are here to do what we are paid to do.

"But don't make any mistake, th cars are going to be run someh other.

Some of the wounded strike-breaker in response to queries as to their i juries, made such responses as: "Oh, this is nothing. We've through the St. Louis strike," or We've been

went through the Brooklyn strike." Others said: "Oh, we had a taste of it m Chicago." But one and all solemnly declared that they had never experienced such a reception in any place where they had been before, as was accorded them in Albany,

Delegate CURRAN. Comrade Dalton makes a point of order that is entirely out of order. As to what delegates have said in quoting other delegates, the making of a point of order is entirely improper. For the same reason it might be applied to every one here and to no one more than Comrade Dalton. It is absurd. The CHAIRMAN. Comrade Simpson will proceed, and if there is

any thing wrong it can be rectified at the close of the debate. Delegate SIMPSON. I say, Mr. Chairman, that at no time did I say that the founders of the Republic aimed consciously at the oppression of the working people. That was not aimed at any time by any revolutionary class. Every revolutionary class-and the founders of this Republic were revolutionary-always maintained that they stood up for the rights of the whole people, just as we to-day say the same thing, the only difference being that while we stand for the whole people, the working people, those people never stood for the working peo-ple. The founders of this Republic-If you go through the list, you will see were great land-owners or great financiers or a combination of both. That is the fact recorded by history. These men naturally had to act according to their class instincts, and knowingly or unknowingly, consciously or unconsciously, worked for the capitalist class. I never said that their purpose, as De Leon put it, was to oppress the

### THE ALBANY TRAGEDY.

With workingmen-"Union men" and "pon-Unionmen"-bleeding from wounds. en at the Albany strike of conductors motormen, the first thought naturally is one of indignation at the Murphys, Barneses, the Roes-capitalist cians and officers in the militiawho, holding controlling positions in the rations of the State, step up before ingmen's constituencies, sing to them the song of the fraternity between and Capital, hold themselves and pet candidates as the particular is of the workingman, and thus wheedle him into placing his fleecers in tions from which they can give the signal so as to enforce, at the point of et, the tyranny of the capitalist is in the shop. As a matter of course, the first thought of indignation is shot at the capitalist. But a second thought as the capitalist back in degree of ality, and raises to the front a minal of a different stamp,-the Labor stenants of the capitalist class, the nized Scabbery of the land, in short officers and perpetrators of "pure and simple Unionism" upon the working class. It is then that the Albany tragedy stands out in full glare of the light. and that its painful significance is cht home.

The conductors and motormen of the ny, together with their friends, are enraged at the "scabs" who took their places. Seeing that the scab does not fall from the skies; seeing that the scab workingman displaced by the privately owned machinery of production; that, these "Union" conductors and motormen, together with the scabs taught by the Organized Scabbery of the land, the Gomperses, for short, to support the social system of Capitalism, which, by displacing workingmen, gives birth to the potential scab, and throws amen" (hungry workers) against non-Union men (stil hungrier work, -seeing that, one should think the any tragedy to be instinct with all the iv. But the

and then scab-fighting motormen "Union men"? Are the "non-Union" men the

only scabs? As the curtain falls, with the stage strewn with the corpses of the workers, who, fettered by the ignorance of pure and simpledom, reut one another to pieces and were promiscuously riddled with the bullets of the militia, hurled upon the combatants by another set of equally blind workers;-when the curtain falls upon that gruesome tangle, the rapor that rises takes the shape of a group, in which Gompersism and the Red Harlot of Capitalism are seen in close embrace, gathering volume from the sighs-laden field below, and hover-

ing over the scene of Labor's carnage,as the Genius of the Tragedy.

### THE GOVERNOR SAYS SO, HIM. SELF.

Readers of THE PEOPLE are aware that the late session of the Legislature at Albany passed an "Eemployers' Liability" bill; they are also aware of the fraudulency of the bill's title: so far from being what its name suggested, a bill to protect employees against the neg-

ligence of the employer, it was a bill to free the hand of the employer still more : to enable him, even more so than present laws and Court decisions do, to sacrifice the safety of his employees to his class' interests for profits, ever bigger profits. All this is known to readers of THE. PEOPLE. It now remains to call their attention to a feature that marks the whole "employers' liability" scheme. That feature was brought out by the

memorandum attached to the Governor's veto of the bill. 3.8.5

The Governor says: "It is unfortunate that the bill has had inserted in it a provision which in-terferes with the rights of those who are not employees, and whose mode of pro-cedure in bringing actions against corporations for damages sustained would be very materially curtailed."

In other words, a bill to materially. curtail the mode of procedure of employees only, in bringing actions against corporations for damages sustained would threat will be made to institute a nabe proper; the insertion of such a provision or provisions would not be "unfortunate"; what vitiates the bill in question is that, besides "interfering with the rights" of those who are employees, the bill extends the disability to those who are not employees. This is the rub." Among the popular superstitions of the day there ranks high the superstition that "Employers' Liability" laws are conquests by Labor, on the one hand, and This:

concessions by Humanity, on the other. Nothing of the sort; just the reverse is the truth. Beginning with the first "Employers' Liability" Act, and closing with the one just vetoed by the Governor, the history of Employers' Liability Acts, so far from being the history of the effort to safeguard the Working Class, or of a

of Inhumanity. man that he shall use his property only in such manner as not to injure his fellow-man. The Principle is imbedded in legislation; it is, accordingly, not a pietistic inhibition merely to be sung about in churches. That Principle is ample to hold every employer for the negligence that causes injury ; that Prin- and humiliating them. ciple is ample to protect every employce; and that Principle antedates capitalism

two continents, but many millionaires as well. As an illustration. During the day one set of millionaires had another gaug in their debt \$64,000,000, a condition beyond the possibility of the mind to grasp. As a result of such a paulc, the business world would have been paralyzed, business and savings bauks made insolvent, with endless ruin, misery and suffering to the people. Fortunately the blame could not be

dodged by the plutocrats. To them and their deeds, the eye of the public is directed, and the public must now, as never before, realize the power of capitalism rampant.

In 1896, when the country was simply threatened by the ghost of a middle class attempt at reform through the free coinage of silver, this same gang of capitalists used this same power to scare the voters of the country, principally the working class, to the support of the candidates of the large capitalists and plutocracy, saving that any other outcome at the polls would have disastrous results. Had Bryan been elected, they would have made their prediction good. A financial panic would have devastated

the globe. We now, by the light of the events connected with this recent panic, can clearly perceive the power of this class of multi-millionaires, five members of which, Rockefeller, Morgan, Gould, Vanderbilt and Harriman can, without a moment's notice, plunge the country into a financial panic with all its attendant results.

The threat made in 1896 still holds good, and that notice served upon the population of the United States signed the death warrant of reform. When the Working Class makes a real demand upon the Capitalist, the answer will be the same given by President Pruyn to the strikers of the United Traction Co. in Troy, N. Y .: "Negotia-

tions are at an end. We will operate if it costs two million dollars," and General Manager McNamara: "War to the bitter end." In the National struggle, Mr. Capitalist will say: "War to the bitter end, if it costs us billions of dollars." The

tional lockout and starve the Working Class into submission. Where then will be "reform," where the "brotherhood" of capitalist and workingman, where the "industrial peace?" It will be the clearest exempli-

fication of all of the horrors of the class struggle, ... class, . against . class, . master against slave, capitalist against worker. What must the answer of the working class be?

"Mr. Capitalist, we understand that the private ownership of the tools of production gives you your power; we know that under capitalism, you can make your threats good, and understanding this, your threat will be met with a counter one, and that is: The day after you decide to lock out the workers, humane tendency, marks the gradual in-roads made by capitalist law upon the tory, every railroad, every inch of land safety of Labor; it marks the progress public property and enter into and take possession of it. If you want to settle

Old and time-honored is the order to this question outside of Congress, we are ready for you!" This is what the working class must have the intelligence and manhood to

do. Until it has, the capitalist, using the same power he is now destroying the middle class with, will whip the working class into submission, euslaving and

"HIS WORKERS LOVED TO CALL

"Union men"? Are the scab-producing ruining not only the middle class of model business man, and others were told to go and do likewise.

Lately there has been a rift in the lute, but the rift has made the music sound devoted workers dearly love to call him," like another Michael, has driven 2,400 offending men, women,' and children, mostly women and children, from Paradise. Instead of the old talk. Patterson now insists that he will stand no "dictation." And what may be the dictation that he will not stand? Why, simply dictation as to the amount of profits that he will squeeze from his 2,400 men. women, and children, mostly women and

children. He gave them baths once a week, and he gave them cheap food once a day, but he did not give them wages enough,

evidently, to buy the baths and food for themselves. He gave them lessons in agriculture, and he taught them to build streets, and make gardens. Then he sold them house-lots, and what was once a waste, now blooms from the work, not of Mr. Patterson, "whom his devoted workers dearly love to call John." but from the energy expended, after hours, by those workers. And as a result of the lockout, hundreds of "happy little homes" will be lost forever, not to "John," but to the men to whom he sold them "on easy terms."

So the whole scheme of the National Cash Register Company turns out to have been but an advanced method applied to the great art of making profits. The capitalist of to-day "sacrifices to the graces," that is, instead of using a club to smash profits out of his workers, he uses the skilful, easy, method of "betterment." He can do it with largen returns, and with less comment from others. He

can increase his profits, because by coddling his help a little, he can get them to work faster. But even coddling does not hide the fact that you are being drained, and when the employes of the National Cash Register Company realized it, they naturally protested. "John"

gather head. He instantly locked out the whole force, and announced his intention of running his business to suit himself.

The loc'out is opportune, as it nails forever the lie that there can be any peace or any friendship between the working class and the capitalist class. It also demonstrates inat no matter what may be the avowals and protestations on the part of the capitalist, he always is bent on increasing his profits, and to increase them he must decrease the wages of those who work for him.

There is a soapmakers' Union in Des Moines, Iowa, which, with the consent of the Des Moines Central Labor Union and the American Federation of Labor is sending out broadcast over the country a lithograph portrait of a soap manufacturer of that town with startling announcement that he is the only union made soap manufacturer in the country, and every "good union man" should buy none other than his soap In an accompanying printed letter it is set forth that said manufacturer had at one time absolutely refused to put the union label on his soap, but a committee had finally proven to him that the use of the label would benefit his business and upon those grounds he had con sented to the use of the label, hence all the more reason why a true union man should patronize none other! ! ! !

The Butte Miners' Union has been persuaded by its corrupt officers to invest money in Amalgamated Copper stock. It is to spend \$50,000 of the money squeezed out of the members for dues and assessments, and this money is to go into the treasury of the very company that it has been fighting for years. With a treasury that is drained, and with "an interest in the firm," it will be a simple matter for the company to "keep the men in line." If they go on strike, the cry will be raised that such action is injurious to the "union,", be-cause, having money "invested," there will be a loss if the mines are tied up. It will work further injury to the men, because it gives the fakirs an additional chance for graft. As stock holders, they will be brought into contact with the directors more frequently. It is at such times as this that the fakir has his best opportunity to work his points. That he will work them is evident from the fact that this new scheme was hatch-ed by the officers and not by the rank and file. There is another side to it that is equally disastrous to the men. The company is given a greater power, through its largely increased funds, to crush them down were they to strike. Whichever way the affair works it-self out, it is sure to be to the detriment of the working class.

which counts murder "good service," shares in its criminal mindedness, and shares in its exultation over the death of innocent workingmen. The cowardly and deceitful attitude of the "Journal. familiar. Mr. Patterson, "John as his its protestations of love for the working class, its so-called "defense" of the "right to organize," were but soft words to entrap the unwary. It is capitalist of the capitalist, ready at all times sanction violence against the working class, and ready also to praise those who are guilty of that violence. Organized Scabbery in praising such a sheet, gives its hands, already amply reddened with the blood of the working class, a deeper purple dye.

> The "labor papers" of the land have, during the past year, overflowed with praises for the goodness and greatness of the National Cash Register Company. They even went so far as to publish advertisements of the register. and as it is "an article of necessity used in every well regulated workingman's family, the business of the com-pany prospered. Chief among the papers which it placed its advertisement s the "American Federationist," was the edited by Samuel Gompers, of several kinds of fame. Despite the assertion to the contrary, of the Eastern Manager of the concern, it is not at all probable that these advertisements-they were not write-ups of the plant-were insimply serted without an adequate "recognition" of the "claims of organized labor." Neither is it probable that what the company sought for, immunity until it had matured its auti-union plans, was not obtained from the fakirs. Then there were labor papers which simply lauded this company, and which told about the heaven on earth in Dayton. What will their attitude be now, now that the company has dropped its mask and locked out 2,300 of them? Without exception they praised; will they now retract what they said concerning the "friendship of capital and labor," in general, of that company in particular? THE PEOPLE was the poils name

The fact is that periodically the O'Connells need ducs, or revenue. The fact is that the machinists, the same as all the other workingmen are experiencing harder and ever harder

conditions. The fact is the O'Connell Or ganized Scabbery is ever ready to exploit the wretched condition of the rank and file: hence every few months or so they burst upon the public with threats of "great demands," and great promises to the rank and file of "great success." The fact is that both the "great demands" and the "great promises of success" are baits; the unthinking and hard-worked rank and file among the machinists are

Tragic enough should be the spectacle of the ranks of the Working Class, united on election day under the whip of "Pure and Simple Unionism," plumping their vote in favor of Capitalism, by supporting the Rep-Dem or Dem-Rep party, and diately thereupon dividing into two the men with jobs and those without jobs-tearing each other to s as the result of their combined folly in upholding Capitalism. But there is worse. Born of Gompersism, the Working Class is fractured into more than two fragments. Besides the fragment of the hungry ones with miserable jobs, such as the jobs of conductors and motormen, and the still hungrier ones without any job whatever, and hungry gh to fight for even that dry-bone, there is a third fragment, the fragment he "skilled" men with jobs in some er trade, like locomotive engineering, ete: The Albany tragedy, accordingly, does not present a conflict between two saries only-"Union men" and "non-Union men";--it present a fight tween three adversaries: one on one side, two on the other: "Union men" on the one hand (in this instance the conrs and motormen), and, on the ther hand, the non-Union would-be conductors and motormen, backed by the "Union" locomotive engineers, firemen, en, etc., who took the trainlead of Brooklyn militiamen to Albany, there to shoot down the "Union" conductors and on strike! ### THE DEATH WARRANT OF "RE FORM."

While the working class need shed no tears over the downfall of small capitalists as the result of the panic of last week, there is a valuable lesson for them in the significance of some of the events.

At eleven o'clock in the morning two contending cliques of multi-millionaires had Wall street, the money centre of the New World, bankrupt. Had the

The capitalist tlid not care how much his employes flaunted their poverty and wretchedness in the face of the world. Were they not "free American citizens" who had exercised their right of contract? Had they not exchanged their labor for poor food, and

#### Buffalo Brewery Wage Slaves.

To THE PEOPLE .- Allow me to give you a picture of the brewery wage slaves' condition, here. I have never report from Buffalo in THE PEOPLE. I therefore consider it my duty to shed a little light on the doings of the labor fakirs here for the good of the misled rank and file here and else where.

Since I have been in Buffalo, and that is about ten weeks. I became a memer of the Beer Bottler's and Driver's Union. The experience I have made puts many of the leaders in a bad light. The beer bottlers, in spite of their umerically strong organization, receiv ed last winter the comfortable salary of \$7.50 a week-certainly a fine speci men of the noble work that Organized

Scabbery is doing for us. Men, who only a year ago earned \$10 to \$11 after the signing of the contract had to be content with \$7.50.

To THE PEOPLE -1 send enclosed a copy of the new schedule for the two departments mentioned on the New Jer-The contract seemingly stands for a little more, but the men had to lay off two or three half days each week, on sey Central. This arrangement surely will aid the S. T. & L. A. movement account of a larger number of apprennow on foot. I hope the new class conscious organization will be launched

Such a contract is a direct insult to any man with a little intelligence. Think of the Organized Scabbery signng us away like cattle, to slave for two more years! I enclose a copy of contract, which, however deceptive it appears, when carefully examined that the union, the mighty weapon it is, is in the hands of the enemy and used for our oppression. Here are the facts in the case: "The caucus of the Democratic party

was held on November 28, 1838, and nominated Eruest W. Timson for councilmun from Ward 5. The Social Den ocratic party held their caucus on Dec ember 2, five days after the Democrat ad nominated Ernest Timson.' The chairman then took the stand and

said: "Is it not a fact that this man wh is rsking these questions works in Cass and Daley's in Salem, which is under control of the Tobin and Eaton Union? And is it not a fact that the Boot an shoe Workers' Union scabbed it on the Knights of Labor Cutters when they went out on strike in Douovan's in Lynn?"

The chairman then introduced Charles Wentworth who said: 'We have challenged the Social Dem-

But Mr. Paige had to catch a train (although he lives in Lynn), and had dis appeared. This man Paige is a queer specimen of a man. He has a stupid and ignor-

### May-Day Celebration In S'. Louis.

To THE PEOPLE-Again the Inter national Labor Day has passed, and the result of our May Day celebration was grand success. Although an indoor meeting, it was well attended, and this proves that our announcements did not go unnoticed

amongst the working class. The members of the pire and simple unions were led by the fakirs to the picnic grounds, through dirty streets, re-gardless of the heat, displaying themselves for the inspection of capitalist politicians. When they arrived at the crounds they were confronted by corporation lawyers, professors, and rever end politicians, addressing them on the subjects of "Fraternity," "Economy," "Brotherhood of Capital and Labor," etc. But for the members of Section St. Louis, it was a day of joy, and a day of jubilation for the class-conscio workers. A neat program was arranged, com posed of songs, monologues etc., followed by discourses from several of our speak ers, who went over all obstacles, heed ing not the cry of conquered Labor Fakirs, or sneaking Social Debsocrats. Comrade H. J. Poelling spoke on the subject of "Slavery Past and Present" E. C. Dickman, "The Educated Prole tariat"; Wm. Billsbarrow, "History of the S. L. P."; L. C. Fry, "New and Old Trades Unionism." After the last speaker concluded, several questions were asked, which were answered satisfac E. J. B. St. Louis, May 12.

and the working class alone. The Soever, as the "Times" is a Democratic paper, and Democracy being "on the as it were, these papers must necessarily look out for new issues to

swear by. The State Committee is now out of debt, and the Sections, with the excep-tion of Fulton, have responded nobly to the call for the Pepin Circuit fund, \$30 having been raised so far for that purpose.

The local S. T. & L. A., has also been reorganized and several new mem-bers added to the list, and also a special committee elected to begin a systematic warfare on the old fakirated pure and simple union, beginning with the cigarmakers.

The two cronies of the local labor movement McGill and Cronk are reaping a rich harvest by advertising capitalist candidates in their respective papers as "Labor's Friends." One of them even went so far as to denounce every union man who was so bold as to criticize "Carnegie's" philanthropy.

#### Conditions in Two Harbors.

To THE PEOPLE .- The situation at Two Harbors is of interest. This town is thirty miles from Duluth, and is situated on the north shore of Lake Michi It is the great iron shipping point gan. of the Minnesota Iron Ranges. About one-half of all the iron mined on the Mesaba and Vermillion ranges is shipped through this point.

There are about a dozen ore docks, the D. I. & R. car shops, employing about 2,500 men. During the summer Section Duluth sent speakers up every fortnight, for open air meetings, good results. This fertile field, with its 2,500 wage-slaves, soon showed the budding fruit of the good S. L. P. seed. The vote grew most encouragingly, as also did the Socialist sentiment. But like other towns, where the "free American workingman" stands with quaking knees, in fear of the bread-master, it was impossible to find the required ten for an S. L. P. Section. This was not because Socialism was undesired, but be-cause fear of being "fired" held them back. Of course sufficient men could have been found to form a wishy-washy-hit me-with-a-feather debating club. something similar, but that is not what we wanted. Menageries or recruiting quarters for insane asylums are not to be found under the S. L. P. banner. A crowd of quitters and whiters of

"reformer" type was not what were after; so we waited, hoping the growth of the revolutionary sentiment would bring on courage to the weak. Better that, than an organization know ing not why it lives, and doing all starts

of freaky things in the name of Labor We wanted men who knew for what they organized, and how to get it. wanted men who could plant their We feet.squarely on the rock bed of the class struggle, and with brain cleared by that wonderful medicine, fight, and have for their motto "The working class, first, last and always. Things or men against us, must be smashed. The emancipation of our class must be ac complished by our class. No fusion No compromise. No quarter to the enemy. Capitalism, with its wage slavery, must go, and in its place come the Workers' Republic, when we shall get all we produce.

To achieve that aspiration of the class conscious working class there is only one road, and that is via the unshakable Socialist Labor Party.

At first our agitation met with the time-worn objection "It will never come: you are too slow," but as the days rolled on, and the uncompromising tactics of the glorious Socialist Labor Party made themselves clear, the clouds began to break. The vote of 1900 confirmed it. The rout of the Democratic party showed anew the force of growth. Now, lo and behold! the springing-up-in-a-nightparty, the Social Democracy, has appeared with a starter of "fifty-eight members with "a 150 by June 1." And as our stalwart comrade, Konezuy, of

Two Harbors says: "The town is full of Social Democrats, who appear to have been made in a night, but who also appear to have been made something else at the same time." As usual, any Tom, Dick, or Harry

can join if he says "I am a Socialist. Politicians, labor crooks, any old thing

would ask Mr. Dolin to make a few w. J. Dolin said: "Every clerk should

join the body; it is a great elong to it; everything is trust now. and the only thing for the clerks to do was to join the biggest trust in the country-the labor trust. cut by the people from the country; why the people from the country came into the cities to get some of the shorter ours and more pay of the labor organ izations, for they are getting shorted nours and more pay all over country.'

The attitude of this member of the Or ganized .Scabbery, J. A. Sullivan, to-wards the Socialist Labor Party can be een in the Central Labor Union, where he was a staunch supporter of the reso lutions which were passed to boycot the DAILY PEOPLE; that he is ignorant besides being fakir goes without saying. Just think of it! Labor leaders getting the president of the Hartford Business Men's Association to organize labor unions, so they will have to pay more wages with less hours of work! W. J. Dolin is ex-secretary of Cigarmakers' Union No. 42, of Hartford, and at present is one of the leading salary getters of the New England Labor League. There was about one hundred and fifty persons in the hall when the meeting opened. By the time W. J. Dolin had finished his display of ignorance of the labor question and economics, more than half of the audience had left the hall. Several local pure and simplers nan. Several local pure and simplers then made a few remarks; then the meeting was livened up by a male quartette, who sang a song entitled: "The Monk."

The writer saw about fifteen clerks hand in applications when the meeting adjourned. D. N. The more freely they indulge in that sort of thing the more completely will they strangle themselves. Don't you know it takes 2 lies to prop up 1; 4 to mrop up those 2: 8 to prop up the 4? The process of self-strangulation thus goes on sure and swift. If, you have any doubts about the soundness of this theory, just hunt up a Party enemy. One is this: He was a member of the Party some seven years ago. One day, (about seven years ago) be came to THE PEOPLE's office with a story of hard luck and persecution by the fakirs in No. 6 "or account of being a Socialist," and how he was so "strapped" that he had to live in Staten Island. elected to the National Executive. But, apy as he may, he could find nothing to betray, and withdrew from the Party. His let-ter of resignation, bristling with mean in-sinuations, that gave the measure of the man, was sent to the Party.—AND IT AP-PEARED SIMULTANEOUSLY IN THE CAPITALIST PRESS. There is a third incident that is typical of the man, and supplements the above two: Mr. Frederick Emannel Martin joined the Kangaroo Social Democrats.

J. T. BROOK.../N. N.Y.—"Pollexphen" is an assumed name. It is not the name of the writer of the "Law and Labor" articles, in the Monday DAILY PEOPLE. But the name is not a "manufactured" one. Established as is bis reputation for shameless lying, es-pecially when his job is in danger. It is quite likely that in this case he did not, mean to lie. You must remember that he is a very narrow, stupid fellow, ignoran, above all, of how things are done in this country, in short a genuise Timbooctooer. It is, therefore, quite likely that he under-stands the present stage of the madamus proceedings, the way he puts it. But what he "understands" don't change facts. The facts are the case has now to be tried to establish the facts, and when so established, he will, as he and his Timbooctooers harg all along, come out at the little end of the horm. S. L. F. W. BROOKLYN, N. Y.--None of these "beautiful sentences" by the Rev. Herron has anything to do with the case. The sentences are all right, as far as they go. But they don't go far enough. Your whole argument shows you are wise enough to know that, in such cases, "sentences" are not all that one looks for. You are not trying to defend the sentences: that's not your object; that's only a means to your end; what you are trying to do is to justify the man by the sentences. Now, then, sentences uttered may serve as fractional justify the man by the sentences. Now, then, sentences uttered may serve as fractional argument: they are not enough: a man's conduct is the most important fraction. It is the determining fraction. Are you satis-fied with the Rev. Herron's conduct? Leare aside his private conduct, what about his recent political action in Chicago? In the late municipal campaign in that city, there were three political parties that he would ceall Socialist.--the S. L. P., the Social Democracy, and the Kangaroo wing of the Social Democracy that split off and called call bemocracy, and the Kangaroo wing of the Social Democracy that split off and called itself. To THE PEOPLE .- A meeting of the retail clerks was called on the 2d of this month at Putnam Phalanx Hall, espe-cially in behalf of the lady clerks. The great I-am, Sullivan, state organizer of the clerks opened the meeting. He said in part: "This is the only way the clerks

can better their condition, to join the Clerks' Association, as this is an organization where they don't have "any merchants or politics;" there was a time when the merchants were opposed to

such unions, but things have changed; now they are in favor of them, for the merchants see where we are benefiting them, at the same time benefiting ourselves; there is a SPECIAL INDUCE-MENT FOR TO-DAY ONLY; the regular initiation fee for men is \$2, but to-night it will only be \$1: the regular in-

J. M., EVERETT, MASS.—The Labor News Co. is the property of the S. L. P. It is the Party's literary bureau. It was started by the N. E. C. in the Eighties, and has always been a subject of the N.E. C's report to the National Conventions. The Constitution never made mention of it, probably as all mention would be super." fluous.

fluous. B. H. J., BROOKLYN, N. Y.—The work-ing class does not "pay" the taxes. It is a distinctive feature of the process of "pay-ing." that if one abstains from paying, he keeps in pocket the moneys he would have expended, had he paid. If the working-man "paid" the taxes, then the amount of money he would have, left to himself, in cases of tax reduction, would be larger than what he would have in case the tax remain-ed. But it is not so. The Law of Values, applied to the market price of Labor is what determines the worker's wages. The work-ers' share of the product of their labor, their wages, and determined by taxes. It is de-termined by the exploitation in the shop. Taxes are wealth. All wealth is produced by Labor. Consequently, the taxes are taken from the product of Labor. But they are not taken from the wages of the worker, as they would have to be, if he paid them; they are taken from that portion of the product of Labor that Labor is, anyway, robbed of in the shop. Jis for this reason that the capitalist class, although it never has read Marx; has sense enough to fight against taxes:

It is for this reason that the capitalist class, although it never has read Marx, has sense enough to fight against taxes; and it is by reason of the complication of the subject that the Kangaroos, who are in capable of understanding Marx, get mixed upon the subject, and also talk "taxation."

E. S., NOKOMIS, ILL.—Guess you are as little informed on the Rev. Herron and the attitude of the S. L. P. toward the gentleman as it turned out you were in-formed on Texas. For the rest, the S. L. P spurns that puky morality that spells "mental inhecility." The S. L. P. is not "moral" enough to cause it to forget its own experience and the warnings of history: nor does it live with its even shut. The path behind us is strewn with Herrons.

N. T., NORWALK, CT.—The 21d Regi-ment is recruited mainly out of chapples of the "first families of Brooklyn." They are Democrats and Republicans, and are brought up with the idea that the working class is cattle. Their conduct in Albany is not, however, merely the result of such bringing up. Their families are, of course, stock and bond holders. So the "boys" are "giving a lesson" to the class that is con-sidered to be there for the only and express purpose of furnishing dividends and inter-est upon which the idle capitalist is to live in luxurious idleness.

P. W., SO. NORWALK. «CT.—Come. don't lash yourself into an ill humor that will prevent you from thinking. In the first place, it is not true that the expression "Herron threw his whiskers to the breaze" appeared in an editorial in this paper, it appeared in a report. In the second place, if that expression is calculated to give just cause for offence to "all men who wear beards." then every time the expression "rolled his eyes wildly around" appears in literature, all men with eyes must feel personally affronted; and every time the ex-pression appears in literature: "he gesticu-ated forcely with his arms." all men, and women, too, harny in the possession of two arms must gather indigmation. According to yoo, Envire." Hudibras," should be burg. arms must gather indiguation. According to you, Butler's "Hudibras" should be bura-ed. at West Superior, Wisconsin. Section Rockville, Conn., reported the expulsion of Emil Kohlhaase and William Schmidt for treasonable conduct. A motion was carried to the effect that sections, when reporting expulsions, should be more explicit in stating the reasons for the action taken.

Communications were at hand from Denver, Colo., both from the organizer Section's Grievance Committee, con-taining the information that the Sec-tion had temporarily removed two of the members of the Grievance Commit-tee in order to prevent them from trying a certain case. The members of the Grievance Committee held that the Section had no right to remove a membe of a standing committee without chargduly made and tried, as provided Art. XI., Sec. 2 of the party constitution, the less so since said action in removing these two members was taken at a special meeting called for an altogether different purpose. The Section on the other hand, held that the removwas only temporary, did not cast any rsions upon the two men and that no charges had been brought, there be-ing no reason for such. The N. E. C. ed that the Section had been guilty of a violation of Art. XI., Sec. 2: the con tention that no charges were brought against the two men and that none were ught necessary does not mitigate, but rather emphasizes the violation. The case itself is so clear that there is no need of entering upon the special meet-

ing feature at all. The Colorado State Committee reported the formation of a new section at Colorado Springs and that it is intended to soon send an organizer through the State.

The California State Committee set copy of by-laws for the State organization for approval; with some slight changes they were approved. The committee also sent communication relative to the disturbances at San Francisco and from Section San Francisco itself a communication was at hand with a batch of expulsions. In view of the fact that the action of the N. E. C. relative to the by-laws of that section and its illegal General Committee could not have been known when the matters now r ported transpired, it was resolved to postpone action for one week, but not to publish any one of the so-called ex-pulsions reported, the whole transac-tion smacking strongly after star chamber proceedings.

It appears that the judge did not care to establish a precedent by giving a decision, prefer-ing to have such come from a higher tribunal. (The question now arises, tribunal. (The question now arises, whether we would have to go on the ballot by petition, and we won, for as it appears to us, the matter would in-volve another law suit, so until defin-itely stated, we shall take no action. No doubt we will have to circulate petitions again.)

As soon as the constitution is ap-proved by the N. E. C. copies of the same will be forwarded to each sec-tion of the State. Through the efforts of Comrade Harrington, a new Section has been organized in Kern County, while the section in San Joaquin Coun-ty has been obliged to disband on ac-count of the active members being forced ty has be
