BERRY-HILQUIT DEBATE.

HELD AT SPRINGFIELD, MASS.

Joseph McIlvaine, the speaker for Mr. Berry, assumed that each speaker would have one hour and five minutes in which to present his views. The time limit was fixed in order to give all the interested parties an equal opportunity to express their opinions. The debate was marked by a high degree of oratory, and was conducted with great vigor and spirit. The arguments of the speakers were well supported by facts and figures, and the audience was thoroughly interested throughout.

BERRY

Mr. Chairman, I wish to emphasize the importance of the present crisis in the working class. The working class is the backbone of society, and its economic condition directly affects the prosperity of the country. The workers are the ones who produce the wealth, and yet they are often denied a fair share of it. The greased wheels of the capitalist system grind the workers, and they are forced to toil for long hours to earn a miserable living.

The workers are not only exploited for labor, but also for their ideas. The intellectual workers are often looked down upon as being mere 'intellectuals,' and their contributions to society are not given the recognition they deserve. The workers are the creators of culture, and their ideas are the foundation of our society. It is time that we recognized their worth and gave them the respect they deserve.

HILQUIT

Mr. Chairman, I wish to challenge the arguments of Mr. Berry. The working class is not the backbone of society, but rather the exploited class. The workers are the ones who suffer the consequences of the capitalist system, and yet they are denied a voice in its operations.

The workers are not only exploited for labor, but also for their ideas. The intellectual workers are often looked down upon as being mere 'intellectuals,' and their contributions to society are not given the recognition they deserve. The workers are the creators of culture, and their ideas are the foundation of our society. It is time that we recognized their worth and gave them the respect they deserve.

CORRESPONDENCE.

Dow's theory in San Francisco.

"Do you believe in Dow's theory?" asked the Examiner. "I am a Dowist," replied the correspondent.

The Examiner: "Well, then, what effect has it had on your stock market operations?"

The correspondent: "I have been buying and selling according to the Dow theory and have made a killing.

The Examiner: "What is the Dow theory anyway?"

The correspondent: "It is a theory that explains the movements of the stock market by analyzing the economic conditions of the country and the world."
Although the official report of the continuing financial condition of the International Congress of Labour, held in Paris in 1903, has not yet been published, the People’s Weekly, a leading publication in the field of labor, has provided an estimate of the financial status of the congress. According to the report, the congress has a deficit of approximately $35,000. The congress, which was attended by representatives from over 100 countries, was unable to raise sufficient funds to cover its expenses, primarily due to the high costs associated with travel and accommodations. The congress organizers are currently seeking additional funding to cover the remaining costs and ensure the continued operation of the organization. The People’s Weekly calls on the labor movement worldwide to support this important endeavor in order to maintain the momentum towards the full realization of the workers’ rights and interests.
