COLORADO

HOLDS A CONVENTION THAT MEANS BUSINESS.

Holds a State Convention.

Nominates a State Ticket. Prepared for War Urges People "For Sustaining Our Soldiers; for the State; for the Country; for the Republic."

State Convention of the International Labor Union of Colorado.

Meeting was called to order at 9:30 a.m., under the presidency of Rev. J. W. Hill, President of the State Convention of the International Labor Union of Colorado. The meeting was addressed by the president, who appointed the following committee to look into the roads to be cut in the state: Hon. F. B. Hunziker, of Pueblo; Hon. W. H. Hayes, of Denver; and Hon. W. H. Chace, of Denver.

A short resolution was then taken in the manner of the State Convention proposing a report to the State Convention of the International Labor Union of Colorado.

The convention then adjourned to meet again on the 18th instant.

The convention was adjourned.

Secretary, Rev. J. W. Hill.

Denver, Colo., July 5—Members of the State Convention of the International Labor Union of Colorado.

THE FOURTH IN PITTSBURGH.

The Real Straussena Life in That Capitalist Hell.

Pittsburgh, Pa., July 13-19. In a great day in Pittsburgh, in fact, the great day in the history of the Pennsylvania coal strikes, the last of the miners on the strike went back to work yesterday. The last strike is over, and it is over for good.

No minimum wage, no better hours, no shorter weeks, no guarantee of work, no protection of their lives and bodies, no freedom of speech, debate, or press, and no right to strike, unless they are shot or starved or made to work irons and chains, or, in other words, unless they are killed or maimed.

The miners in Pennsylvania, who are the most backward and least educated of the American miners, have been forced to work in the mines for ten and even twelve hours a day, from seven in the morning to nine or ten at night, with only a short interval of one or two hours for meals. They have been forced to work in the coldest and wettest weather, and in the most unhealthy atmospheres, without any protection or even the slightest regard for their safety.

The miners in Pennsylvania, who are the most backward and least educated of the American miners, have been forced to work in the mines for ten and even twelve hours a day, from seven in the morning to nine or ten at night, with only a short interval of one or two hours for meals. Karl Marx' Letters.

Interesting Extracts Which Show the Great and Kindly Qualities of the Socialistic Movement.

The letters of Karl Marx to Dr. Engels, preserved in the British Museum, contain many amusing and instructive remarks upon the events which he calls "the Revolutions of 1848." A great number of them are significant as showing the kindly and witty character of the man himself.

The letter which gives the full name and address of the writer who addressed Dr. Engels on May 30, 1848, is a reply to the remark "The military are in a terrible flame" which the writer had made upon the capture of the Palatine by the revolutionary troops. "It is a terrible flame," replied the writer, "because the flames will not burn thegovernment's head."

"Zounds," said the writer to the agent of the revolutionary party in Paris, "we want a revolution, not a burning of the foreign minister."

"I am very busy with the government," said the writer to the French minister of the interior, "but I am not a hot head."

"I am afraid," said the writer to the Russian minister of the interior, "that the revolution will be too hot for me."
CORRESPONDENCE

To the B. T. & L. A.-
Permit me to express my appreciation of the splendid manner in which our people are maintaining the old traditions and standards and upholding the principles of the Brotherhood. I am sure that the favorable opinion of the B. T. & L. A. has been increased by the many things that have been done in the recent past to strengthen the organization and to make it more effective in carrying out its work.

The question of the general welfare and the interests of the Brotherhood is one which should absorb our attention, and it is to be hoped that the B. T. & L. A. will continue to be a powerful force in the development of the railway industry.

Very truly yours,

A. B. Jones.
