Railroad Accidents

APPELLING FIGURES OF THOSE KILLED AND INJURED IN THEM.

Employees Ears Largest. Percentages. The Operation of the Blackstone System has been seriously behind the limit of Endurance.

Washington, Feb. 3. The recent accident at Yellow Springs, Ohio, in which fifteen employees were killed and one hundred and fifty injured, is a serious incident in the history of the Blackstone System. The number of employees killed was twenty-six, while the number of employees injured was one hundred and fifty. The accident occurred on the evening of January 29, when a train, consisting of ten cars, was running at a speed of forty miles per hour, and collided with a locomotive, of the same speed, which was running in the opposite direction. The impact was so violent that the engine and two of the cars were thrown off the track, and the remaining eight cars were completely destroyed. The accident was caused by the failure of the crew to heed the warning signals, and by the driver of the engine, who was careless and reckless. The company is seriously considering the possibility of introducing an automatic control system in its locomotives, to prevent similar accidents in the future.

Tobin Hires Counsel.

Funds of the Union Used by Bosses to Get Injunction.

Burlington, Feb. 3. The Court of Common Pleas has issued an injunction restraining the Burlington Railroad from operating its line until a settlement is reached in the dispute between the Burlington Railroad Company and the Burlington Railway Company. The Burlington Railroad Company has filed a suit against the Burlington Railway Company, alleging that the latter has been operating its line without obtaining the permission of the Burlington Railroad Company, and that the latter has been using the funds of the Burlington Railroad Company to pay the wages of its employees. The Burlington Railway Company has filed a cross-petition, alleging that the Burlington Railroad Company has no right to operate its line, and that it has been using the funds of the Burlington Railroad Company to pay the wages of its employees.

Pittsburgh, Feb. 3. The strike at the steel works of the Lyne Company has been settled, and the employees have returned to work. The strike had been going on for three weeks, and had caused serious injury to the company. The employees had been demanding a higher wage, and the company had refused to grant their demand. The strike had been conducted by a number of radical elements, and had caused a good deal of rioting and violence. The company had been forced to close down its works, and had suffered a great deal of loss.

JI: I'm not sure what the manufacturer means by "endurance." I am not sure if the company is trying to prevent the accident by the driver of the engine, who was careless and reckless. The company is seriously considering the possibility of introducing an automatic control system in its locomotives, to prevent similar accidents in the future.

In 1920...: 6,000,000
In 1932...: 16,000,000

THE "AVERAGE" DOGGEREL

On the same day, almost at the same hour, those two events took place—one in Philadelphia, the other in New York. So near together the one event was to become fragments of one of the most famous articles of the day. The first was titled "The Average..."

ENGINEER DAVID SCAPERDADE

David Scaperdade, a member of the Philadelphia Socialist Labor Party, had been a student of the Anarchist Commission. The statement he made on the street corner, connecting the two events, was made the same evening as the socialist doggerel was printed. The Socialist Labor Party received 10,000 votes.

OUTLINING THE WORLWIDE CRISIS

At a recent general meeting of the Amalgamated Society of Railway Servants in England, there was a discussion on the question of the crisis of capitalism. It was admitted at that meeting that the situation was serious, that the crisis was a worldwide crisis, and that the situation was very serious.

The decisions were described as serious. The capitalist system could not be saved unless a trade union could be formed, unless the whole mass of the working class engaged in a bold and open strike. The strike would be more successful if the strike was led by the strikers. Strike action was necessary for the preservation of the strike and the strike would be more successful if it was led by the strikers. Strike action was necessary for the preservation of the strike and the strike would be more successful if it was led by the strikers.

WASHINGTON, D.C.: There is a new swing in the tide of labor. The New York Times reports that the capitalists have finally decided to take measures to prevent the workers from organizing. The capitalists are said to be prepared to use all means necessary to prevent the formation of unions.

New York: The Socialist Labor Party has filed its candidates for the municipal election. The party is expected to make a strong showing in the city.

M. Z. J. STRATTON, N. Y.: The New York Times is in favor of the Socialist Labor Party. The party is expected to make a strong showing in the city.

R. B. LOVELL, S. D.: The New York Times is in favor of the Socialist Labor Party. The party is expected to make a strong showing in the city.

CORRESPONDENCE

How Mark Hanna Uses the "Labor" Party

To The Daily and Weekly People:

The People's National Journal (September 20th, 1890) was given the "Civic Civic" title at the last session of the U.S. Congress. It was a timely subject for the occasion, as the country was about to take a vote on the Fusion of the Two Parties, the People's Party, and the Republican Party. The People's National Journal was a radical publication, and it was seen as a threat to the existing political order. The article, "How Mark Hanna Uses the "Labor" Party," was written by the editor, John B. Altgeld, to expose the tactics of the People's Party and their leader, Mark Hanna.

The article begins by stating that the People's Party was a direct response to the crisis in the nation's economic and political life. The People's Party was a reaction to the failures of the Republican Party, and it was seen as a way to bring about social and economic change. The article then goes on to detail the tactics used by Mark Hanna to manipulate the People's Party and its members.

Hanna was a master of political manipulation, and he used his position as a powerful leader to control the People's Party. He used his influence to get support for his candidates and to control the party's platforms. He also used his position to influence legislation and to get what he wanted for his supporters.

The article ends with a warning to the people of the nation. It states that the People's Party was a danger to the nation, and that if they did not take action to stop it, they would be in for a difficult time. It is a call to action to the people of the nation to stand up against the forces of reaction and to fight for the causes that they believe in.

This article is a classic example of the kind of political writing that was done in the late 19th century. It is a testament to the power of political writing, and the ability of writers to use it to influence people and to change the course of history.
