2. That the employees of the company be given a raise of 25%.

Mr. Who Lettis, in his address, said:

"The situation of the company is serious, and we must take steps to increase our profits. The company cannot afford to lose money, and we must do everything in our power to secure a profit.

"The employees of the company are the backbone of the company. They are the ones who are responsible for the success of the company. Therefore, we must give the employees a raise, and we must give them a raise of 25%.

The Socialistic Labor Party has been formed with the object of demonstrating to the American people the unfitness of the present condition of our society, and of showing that the present political and social life of the country is but an artificial structure, built up on the base of aolithic and feudalism.

The Socialistic Labor Party is in every respect a radical movement, and it is the duty of all workers to support it, in order to bring about a social revolution.

WHERE ARE WE AT? (Continued from page 1)

The growth of the Socialist movement continues to be the subject of criticism and concern among socialists across the country. Many are of the opinion that the movement is not gaining the support it needs from the rank and file of the membership. One key issue that is frequently discussed is the need for greater unity among the various Socialist organizations. There are those who argue that the movement is fragmented and lacks the necessary cohesion to effectively advance its goals.

The debate continues on whether to establish a national convention or to continue with regional conferences. Some argue that a national convention would provide a stronger platform for the movement, while others believe that regional conferences are more effective in reaching out to a broader audience. There is also a discussion on the role of the Socialist Party in relation to other political parties. Some question whether the Socialist Party should continue to operate independently or merge with other parties to gain greater influence.

On the question of strategy, there is a divided opinion. Some favor a more radical approach, while others believe that a more moderate stance is required to win over a wider segment of the population.

The question of finances is also a point of contention. There is a need to raise funds to support the movement, but there is a concern that focusing on money might detract from the ideological goals of the movement.

In conclusion, it is clear that there are no easy solutions to the challenges facing the Socialist movement. It requires a concerted effort to build a stronger base and to find ways to effectively communicate its message to the public.
