

Laber Pronounced "Greedy of Graft" Because Unwilling to Yield Larger Profits to Fleecers-To Be Dieted Into Submission by Shut-Downs and Soup-Houses.

Senator Marcus A. Hanna in conversation about two weeks ago at his home in Cleveland, with a representative of one of the most prominent corporation law firms in this city, said:

"Labor is going to suffer this winter for its unjust demands on capital's millions that would be spent in the erection of buildings, bridges and in railroad construction, contracts for which have been cancelled because the capitalists could not pay the wages sought for and make any

"I shiver when I think of what the laboring classes are to suffer from before this winter is over. Soup houses will in my opinion be erected in every large city in the country, and all be-cause labor has foolishly tried to prevent a just share of its product revert-

ing to the employers. "Why, only a few days ago Marshall Field told me that he had given up the idea of erecting a big office building in the city of Chicago on account of the higher cost of labor and building ma-

"This is no obsolete case, but quite prevalent during the last three or four onths, and is not confined to any one section of the country.

"I repeat the workingmen of the country are going to have a hard road to during the next six months-and all due to what I might term their 'greed of graft.'"

CLEVELAND BUSY.

Propogating the Doctrines of Class-Con-

scious Socialism. Cleveland, Oct. 25.-Cleveland Socialists are busy. We are not resting on our cars by any means. Last Sunday afterm at about 3 o'clock, at the corner of Ontario and Champlain streets, Com-rade Frank Wilke, of Milwaukee, Wis., held forth. He spoke from the regular S. L. P. platform, with its banner, upon which was pictured the "Arm and Ham-mer," unfurled to the breeze. Quite a large crowd gathered and much S. L. P. literature was sold.

Wilke had not been speaking long when rious freak, who had a "permit" from the city government, got up on a soap box in the immediate vicinity and inied to draw the crowd away from Comade Wilke, but in this he miserably hiled. He was chagrined to see that Wilke had the larger crowd, while he had to content himself with a baker's dozen for suditors.

Comrade Wilke among other things told of a railroad employee who broke his arm because the company had failed to comply with the law which required au-tomatic couplings. He sued the company, and it was carried from court to ourt until it reached the United States Supreme Court, the court of final resort Here Chief Justice (?) Fuller decided that the victim of the railroad company's anarchy (or defiance of law) had no case,

didate for Governor of Massachusetts.

Salem, Mass., Oct. 19 .--- To the members of the Socialist Labor Party of Massachusetts:

It is no idle boast to state that I keenly appreciate the honor of choosing me as your standard bearer in this coming election. I wish to express my gratitude for the same.

While I am not likely to receive the support of the majority of wage earners on election day, owing to the lack of proper training on class lines, I, as a Socialist and wage worker, realize the necessity of furnishing to the thinking portion of the working class the means to express their discontent with existing conditions.

As a wage worker I am fully aware of the numberless injustices our class is enduring, degradation and starvation being the lot of the only useful class in society, while on the other hand the capitalist class, a useless, parasite class, wallows in luxuries created by the brain and brawn of the working class.

As a Socialist I am aware of the fact that economic inequalities will exist so long as warring classes will exist. Each class strives to maintain its power and protect its interests, strives to attain the control of the government. The working class must do likewise. In order that any permanent improvement may accrue to them, the wage workers must first capture the powers of government.

I, therefore, pledge myself to work unis the cause of the working class of the world.

Comrades of the Bay State! Spread the light of Socialism whenever and wherever possible; let no proletarian despair; agitate and educate the working class to their interest; expose the labor fakir, politician, sentimental freaks, religious cranks and crooks, and help to bring about the Socialist Republic where omic classes will no longer exist and true civilization will be a reality.

Thos. F. Brennan. PENNSYLVANIA'S TICKET.

Socialist Labor Party Nominees and How They Are to Be Voted.

Pittsburg, Oct. 22.-The Socialist Labor Party has placed this ticket in the field for the elections to be held November 3, 1903. Members and sympathizers of the So-

cialist Labor Party are called upon to write the names of the candidates given below in the blank column of the ballot

on Election Day. State Ticket. Auditor General, L. K. CHRISTOFF. State Treasurer, A. A. GRANT. Judges of the Superior Court, E. R. MARKLEY, I. F. COLBURN. Allegheny County Ticket. In Sheriff. S. R. RAGER. Prothonotary, P. C. TESSON. District Attorney, G. A. BROWN. Jury Commissioner, A. CLEVER. Director of the Poor, WM. I. MARSHALL. Notwithstanding the S. L. P.'s vote greatly increased at the last election, the aws of the State prevent the party from appearing in this campaign on the official ballot under its own name. This compels us to adopt the above method for registering our vote for Socialism. Although hampered thereby we shall not flinch in our duty.

man-a Socialist-bow in reverence to institutions that rob him of all he produces, except a pittance that he receives City and County of New York 55. in the form of wages? Why should the Socialist respect institutions wherein the T. M. Nordlinger, one of the subscribidle parasite-the capitalist-alone has freedom! Yet the Socialist is a patriot;

but not the kind of a patriot that hates and despises every other race or nation but his own. It is to the interest of the capitalist class to foster that kind of patriotism that sets one nation against nother. The capitalist politicians will raise T. M. Nordlinger.

the cry of "America for Americans," and, at the same time, send his agents abroad to lure the workingmen of Europe to this country, though he points to them as a menace to "our free institutions," yet the capitalist is only too glad to employ them, because they work cheaper and will not readily resist capitalist exploita-

> tion. Capitalist patriotism is a sham and a hypocrisy, a means to divide the workngmen, to set them one against anther, and while the workers are fightng between themselves the capitalist an pluck them more easily.

The Socialist knows that capitalism is universal. Everywhere the workingnen are victims of capitalism.

"The American workingmen will never

be Socialists. They are too patriotic for

here, while discussing the question with

that," so spoke an editor of a local paper

The Socialist of this country holds ut his hand to the workers the world over and in fraternal greetings he reoudiates the sham patriotism of the capialist class.

The Socialist points to the rascality i the capitalist class of all countries, when, in the name of patriotism, the imerican capitalist reduces the wages of he American workingmen to overcome the competition of the "pauper labor of Europe," and the European capitalist, iso in name of patriotism, reduces the wages of his workmen to meet the cometition of America.

In both countries the workers are Kangaroo obbed in the name of patriotism for he benefit of the same capitalist class. The intelligent workingman, the Socialst, knows all this, and is not carried way by the cheap rhetoric of capitalist orators. What is more, the Socialist knows that the capitalist class is a riminal, a cowardly, class. The capialist will preach patriotism to the working class, but, should the country be in langer, do these capitalists who accuse he Socialists of lack of patriotism, do hey enlist and show their "loyalty to a time the rumor grew that the sandwich the flag?"

man was employed by the proprietors of The following, taken from a capitalist the store, to serve as a standing adverpaper, during the Spanish-American war, gives an insight into the real nature of green trading stamps. Another story capitalist patriotism: COAL DEALERS AS

for he had no business to go to work for the company when he discovered that they had neglected to provide automatic couplings. So, you see, according to Chief Justice Fuller, he had no rights except the right to starve-in case he refused to work for the railroad company. Such is capitalist law and capitalist justice. "Let us have a little labor law and labor justice for a change," said Comrade Wilke

Wilke gave a straight Socialist lecture, in the course of which he gave a descrip-tion of the horrors of the Buil Pen. Quite a few copies of the "Bull Pen" were sold as a result of his talk.

Comrade Kircher followed Wilke, and among other things he said that some persons had asked him that, if he were persons had asked him that, it as which obliged to choose between the Democratic and Republican tickets in Ohio, which would he prefer. He stated that he told them that if he were traveling along the highway, and two men ap proached him for the purpose of rob ry, and one of them was a great, ugly te and the other one a meak, smiling fellow, with a Bible under his arm, and then some one should ask him which he would prefer to have rob him, he should certainly say neither. And so, with politics, he did not wish to be robbed of fourths of the product of his labor by either Uncle Tom, the smiling states-man, or Uncle Mark, the brutal one. Comrade Kircher held the crowd well. He gave way to Comrade John D. Goerke, our candidate for Governor. Comrade Goerke gave a fine discourse on the cause and cure for panies.

At the same time that these spee were being made, Comrades Paul Dinger and Frank Wilke talked Socialism to the sold. wds about the Public Square. The ather was cold, and the audience, for

up its standard in the State of New York. It did so because by that time it had become clear to a sufficient number of citizens that the Republican and the Democratic parties were the political right and left arms of the labor-fleecing capitalist class. Whether the government was Democratic or Republican, its presidents, governors, legislatures, judiciaries, down to mayors and aldermen uniformly threw the weight of their of fices on the scale of the idle capitalist class, and against the scale of the working class. The "rifle diet," administered through the army, the militia, the policenten's clubs and the judges' "Gatling guns on paper," at the order of Democratic and Republican officials, dyed the country red with the blood of the workers, and threw suffering into their homes

The Socialist Labor Party perceived this fact; it also perceived the fact that, with siight reliefs now and then, the tendency was to aggravate the evil-the annual earnings of the workers declined and had to decline; finally, the Socialist Labor Party also perceived and stated the cause of the evil. It pointed out that the private ownership of the land, needed to work on, and of the machinery, needed to work with, enabled the holders of these to live in idle luxury, and compelled the workers to yield to the capitalist the wealth they needed to live in idleness, while the workers themselves had to starve on a pittance. Grounded upon these facts, the Socialist Labor Party called upon the working class and all other decent citizens to join it at the hallot box so as to overthrow the capitalist system by overthrowing the capitalist politicians, and to set up the Socialist Republic by the election of men

Humpy" Hannover's saloon in the Sixteenth Assembly District, and turning to some S. L P men, krown to be working hard for the S. L. P. ticket, said:

"If your candidate for the Assembly in this district polls a bigger vote than he did last year, we will next year take up some Socialist with a large following, and gather enough signatures to enable him to run as an opposition to your candidate."

This conversation appeared in print in The People of January 22, 1859, with no

Social Democratic party yet in sight. The Socialist Labor Party poll in the Sixteenth Assembly District of New York rose over 400 votes in that year (1898). The rising waters threatened to

drown the rats of the capitalist politicians, and they hastened to work to save their necks. The very next year, during the campaign, stands sprang up on the corners of the streets in New York City, especially in the Sixteenth Assembly District, from which speakers, styling themselves Socialist, called upon the workingmen, "in the name of Social

On July 10, 1899, a set of men, called together by the "New Yorker Volks-zeitung," the private corporation that owns the "Worker," of that day, met on the Bowery. Without any warrant of

right, they styled themselves the General Committee of Section New York; proceeded to "depose" all the officers of the Socialist Labor Party,-national, State and local--; and decreed into their own hands the Party property :- the Party's name, emblem, and English organ, THE PEOPLE

This little mob then armed itself with clubs, and sought to invade the Party's premises, and take possession. They were expected, and were kicked down and out.

They then proceeded to invoke the aid of the capitalist courts to carry out their plan of taking possession. By an uninterrupted series of final victories in court, the Socialist Labor Party repelled the assailants, and maintained its rights, Its name, its emblem and its press remained in its hands.

TRAITORS TO THEIR LAND?

'Philadelphians May Be Prosecuted for Selling Fuel to the Spanish Government.

(By Telegraph to the Evening Telegram.) "Philadelphia, Friday.--A local paper

says this morning: "United States District Attorney James M. Beck and Chief McManus, of the Secret Service Bureau, are busily engaged in conducting an investigation which they believe will result in sending

several prominent coal dealers in this section of the State to jail.

"'The officials are in possession of valuable information regarding the sale of large quantities of coal to the Spanish Government by dealers in this city, and the District Attorney, it is said, is simply waiting for certain other developnents before taking action. Chief Mc Manus has made several important discoveries in connection with the searching investigation which was begun last Monlay. He held what was reported to have been an important conference with Assistant District Attorney Kane.

"'All the officials are reticent. Assistant District Attorney Kane refused to make any statement, but admitted that a nost rigid investigations is being conducted.

"The Secret Service officials learned that since the war has been in progress

hundreds of tons of coal have shipped by brokers in this locality to the Spanish agents."" When it will be remembered how the

Chas. Zolot.

roes that the boycott was really called by one of the "centers," but has been forgotten in the "central disturbances" that have taken place of late. However this may be, it looks now as if the sandwich man would die with his secret all untold, if indeed he knows anything to tell, which does not seem very probable.

Visit Factories Not to Solicit Votes-

Working Class (Before Election).

Oh, No!-But to Show Their Respect

for Toiler-How They Do Love the

San Francisco, Cal., Oct. 19 .- The po-

litical dance in San Francisco is unus

ually lively this year and becomes more

and more animated as the election ap-

proaches. For once the three big parties

seem to be standing on their own plat-forms, neither endorsing or being en-

dorsed; but, as the poet remarks,

"things are not always what they seem."

parts of the city, and the candidates for

mayor are said to address an almost in-

credible number of these assemblies

every night; and, strange enough, each

is received, at all times and places, by

large and enthusiastic audiences of work-

The two labor (?) candidates, Schmitz

of the U. L. P. and Lane of the Demo-

cratic party, content themselves with

promising great things to "labor" and

calling each other names in the good old-

fashioned way. But Henry J. Crocken the millionaire Republican standard

bearer, is not so commonplace. This

"strenaous" candidate, who is said to

greatly resemble Roosevelt, is uttering surprising sentiments. He wants it

understood that he in no sense represents

a class, and his speakers warn the U. L.

P. that their "party of class" has in it "elements of discord." He knows he will

receive the vote of the workingmen of

San Francisco, because he is devoted to

the welfare of this great city, which is

now "preparing to claim its share of the

great wave of industrial prosperity which the Republican party has brought

workingmen, with true, though misplaced, patriotism in their hearts, were poisoned by the embalmed beef that was furnished to them while they were fighting for what they thought, and to this day think, their country, the "patriotism" of the capitalist may be fully realized.

This country is to-day in the hands of the capitalist class. The wealth and

the free institutions accrue to the capitalist class. It is the object of the Socialist Labor Party to wrest this country from the usurpers and place it where it belongs-in the hands of the working class, as a collective body.

The patriotism of the Socialist Labor Party is that to the working class of whatever race, nation or creed, shall belong the result of their labor. The patriotism of the Socialist Labor Party goes beyond national boundaries. Much as we may love the country of our birth,

we extend to the workers the world over our fraternal greeting. Not the jingoism and sham patriotism of "America for Americans" is the patriotism of the So-

ialist Labor Party, but the workers of the world against the capitalist exploiters of the world.

This patriotism appeals to ever more American workingmen, the local editor notwithstanding.

Peekskill, N. Y.

(Continued from page 1.)

fields that the above-named little mob had chosen to fight on-the field of physi-On November 23, the Marior cal encounter on the night of July 10, and subsequently the capitalist courts--, these "Volkszeitung" gentlemen felt cold and lonesome, and, together with their kin in other parts of the country, they rushed to conceal their smallness in the "Social Democratic," which has since adopted the name of the "Socialist,"

The series of steps taken by the leaders of the Social Democratic, alias "Socialist" party in setting up a party in opposition to the Socialist Labor Party, ere taken to the tune of "Tyranny!" "Freedom!" What was the "Tyranny!" that these

gentlemen were fleeing from, and what the "Freedom" that they were fleeing to ! The following record of their feats an-

swers the thrilling question: In 1900, the Social Democrat, John C. Smith, ran in the Worcester, Mass., district on both the Democratic and the Social Democratic party tickets, with the knowledge, consent and approval of his Social Democratic organization.

In that same year, G. A. Hoehn of St. Louis, since a member of the National Executive Committee of the Social Democratic, alias "Socialist" party, joined the deputy sheriffs of his city during the St. Louis street car strike. In the same year the Social Democrats

in the municipal government of Brock-ton, Mass., voted franchises to private corporations, free, gratis and for n In the spring of 1901, the Social Demo erat, Morris Eichmann, ran for office in West Hoboken, N. J., on the Republican, the Democratic, the Citizens and the So cial Demoratic tickets, with the knowledge, consent and approval of his Social Democratic organization.

In the fall of 1901, the Social Democrat, Andrew Holmes, a political jobholder, as street commissioner, by the grace of the Democratic party, ran for office on the Social Democratic ticket in Peekskill, N. Y.

In the fall of 1901, the Social Demo erat, Edward Straub, ran for office in Syracuse on the Social Democratic ticket, and simultaneously figured on the official Democratic primary ballot, and as a delegate to the Democratic ward convention In Peekskill, N. Y., Seth Tabor figures as a Social Democrat and is a political job-holder by the grace of the Republican

party. In San Francisco, Cal., two Social mocrats, Everett and King, applied to the Democratic mayor for political jobs in 1900, got them and kept them, with the approval of their Social Democratic

In Troy, N. Y., John Foley, a notorious ward heeler for the Democratic ex-Sen-stor Murphy, ran in 1901 on the Social Democratic ticket for president of Common Council, while openly declaring he vote the Democratic ticket would straight.

In 1901, a New York City Social Democrat, Albert F. Hoeltzer, appeared as vice-president on an official call for a man Tammany Hall" meeting on the West Side, without even provoking the censure of his Social Democratic organ-imtion.

In Haverhill, Mass., James A. Carey, Social Democrat, alias "Socialist" party man, voted a \$15,000 appropriation for an armory, declares he would do it again and his conduct passes even unchallenged by his Social Democratic organization. In New York City the "Volkszeitung," German organ of the Social Democracy, notoriously took money to advertise capi-talist political candidates.

At the election held in Webster, Mass., on April 7, 1902, John E. Carty appeared expel him for accepting the nomination candidate for town clerk on the "Socialist" (Social Democratic) party official ticket and also on the regular Democratic party official ticket. At the same election held in the same place, James Farrell appeared as the can-didate for warden on the regular Demo-cratic party official ticket and also on the Social Democratic or "Socialist" party official ticket.

On November 23, the Marion, Ind., local of the so-called Socialist party was eorganized by the State Committee with one John W. Kelly, who, elected to the City Council on the "Socialist" ticket, voted franchises to private corporations. He "had broken no rules" was the argument for Kelly. This Kelly is a capitalist. He is a stockholder in the Marion Heat & Light Company of labor fleecers. In Belleville, Ill., John Wachter, or

ganizer of the so-called Socialist party, is a worker for the Democratic party. At the November, 1902, election in Harris County, Texas, E. H. Vasner ran for county judge on the "Socialist" ticket, and simultaneously on the Republican, Independent Democratic and Pop-

ulist tickets. At the spring election of 1903 in Schuylkill County, Pa., the so-called "Socialist," alias Social Democratic party, fused with the Republican party in the Kline township, and with the Democratic party in Rahn township.

In April, 1903, W. J. Johnson, candidate for alderman on the Bogus Socialist ticket in Chicago, received the endorse-ment of the Municipal Voters' League, a capitalist organization, and appeared among the list of the League's "approved" candidates published in the Chiago Record-Herald, Tribune and Daily News.

At Hartford, Conn., in the municipal election in April, 1903, among the candidates of the so-called Socialist party no less than four-Martin J. Riga, John Rubenbauer, August Hartsman and Albert L. Miller, for Councilmen in the Seventh, First, Fifth and Ninth wards, respectively-are enrolled on the caucus list of the Republican party; and not less than five of its candidates-John J. Fitzgibbons, Henry F. Bamman, Joseph R. Branigan, Alfred T. Tivey and John R. Riley, for Councilmen in the First, Third and Fifth wards, for Aldermen in the Seventh ward, and for High School Commissioner, respectively-are simultaneously enrolled on the caucus list of

the Democratic party. In 1902, at the New Orleans convention of A. F. of L., the so-called "Socialist," alias Social Democratic delegates, voted for the re-election of Gompers (official report, page 199), despite the man's uniform hostility to ocialism and his endorsement of capitalist politicians, and despite his slanders' against Socialism and Marx at the convention itself; and they initiated and supported bills to raise his salary (official report, page 110). One of them, Max Hayes, received the immediate reward for his corruption by being elected to the junketing trip of "Fraternal Delegate" to England at the expense of the hard worked members.

In February of this year, under the lash of the exposures by the Socialist Labor Party of the corrupt alliances by the so-called Socialist, alias made Social Democratic party with the Republican and Democratic politicians, the National Committee of that so-called Socialist party adopted at St. Louis an anti-fusion resolution. The resolution hindered their schemes. Two months later they repealed it with a vote of Fusion was restored, and the so-called Socialist, alias Social Democratic party has since returned to its corrupt practices with renewed vigor, as

follows: This year, 1903, C. K. Hershey, member of the Mansfield, O., so-called Socialist, alias Social Democratic party, s a candidate for Representative on the of a capitalist party. This year, 1903, at Waltham, Mass., the so-called Socialist, alias Social Demcratic party, nominated a politician John F. Williams, for Representative being lieutenant of Company F." This year, 1903, in New York city he Social Democrats, A. L. Boudjianof alias Boudir, and Simon O. Pollock, the former of whom is this year again or the Social Democratic ticket, nided, alawyer and notary public, an employe Harris A. Rothman, maker of ladies waists, to obtain an injunction against ais employes, the Ladics' Waistmakers

Thus, twice roundly beaten on the very , Ward, Grand Junction, ran for Senate | it has no power to expel a member from any of the corporations that own its press. The one thing-its pressthat the party can place immediately in the hands of its members if it were truly democratic and Socialist, it allows to remain in private hands, like any other capitalist concern. Thus its press runs and absolutely bosses that party, not that party its press, which is run for business, the party's vote being used as a tender by which to make boodle from advertisements from capitalist concerns against whom workingmen are on strike, and incidentally from capitalist candidates for office also.

These are but a few of the undeniable facts in the official and unsavory record of the Social Democratic, alias "Socialist," party on the political side. Its record on the industrial side of the Labor Movement cut an equally broad swath

of treason to the working class. There is no act of infamy committed by the Labor Lieutenants of the Hannas against the welfare of the working class but the Social Democratic, alias "Socialist," party either shuts its eyes to or applauds. Whether it is the furnishing of deputy marshals to the cigar manufacturers of Tampa, in order to lower the wages of the "Spanish workers;" or whether it is the helping of the employers of machinists to deceive these into believing that they have won a victory; or whether it is the bleeding of the workers for money under the false pretence

of keeping up a strike, when the real reason is to support a lot of scamps as 'pickets" and "strike committees" long after the strike is known to be hopelessly lost, as in the great cigarmakers' strike in New York City in 1930; or whether it is the base surrender of the miners strike at the hour of victory by John Mitchell, or whether it was the action of the Fakir Tobin of the Boot and Shoe Workers' Union in furnishing jail birds and Canadian laborers to break the strike of the Knights of Labor cutters at Lynn, Mass. ;- whatever the infamy may be that these Labor Lieutenants of the Hannas have in hand, the Social Democratic, alias "Socialist," party and its press stand by them, praise their conduct as a "noble waging of the class

struggle," and spew its calumnies at the Socialist Labor Party for fearlessly opposing that scabby pack of Labor Lieutenants of the capitalist class. Is there any doubt what the "Tyranny!" is that the "Socialist," alias Social Democratic, party condemns in the So-

cialist Labor Party ? Is there any doubt what the "Freedom!" is that that bogus Socialist concern is after? Like a veritable criminal the Social

Democratic party traveled over the country under a number of aliases. In some States it called itself "Socialist party." In Massachusetts its official designation was long "Democratic Social party" until it changed that into "Socialist" party. In Pennsylvania its style was "Public Ownership party." In New York it sails as "Social Democratic party." Of course. everywhere it pretends to be a Socialist party, and, aided by the Republican-Democratic capitalist press, it raises confusion everywhere. True enough, no-where can its defamations of the Socialist Labor Party gain credence. But it is equally true that nowhere are the masses ufficiently posted to see through the fraud; the impression carried away by most people is the absurd one that "the Socialists are divided ;" discouragement is thus created, and the masses that would otherwise be moving toward and centering within the Socialist Labor Party are scattered to the four winds-

Democratic party licket, with the knowledge and approval of his so-called Socialist organization, which refused to expel him for accepting the nomination bery," breathes freer. The present condition of the public nind, created by this move of the Deno eratic-Republican politicians, proves their istuteness. But their astuteness can John F. Williams, for Representation continues to mark the Williams, according to the Walthan: "Evening News" of Sept. 24, 1903, "is utilize mind. This fact points to the arrning needs of the present. Sound in arrning needs of the present. Sound in to ve play-room only so long as lack of sound information continues to mark the ormation must be scattered so plenti ully that none but the hopelessly stall ble can be misled. Then none need ask What is the difference between the ocialist Jaber Farty and the Social lemocratic party?" Wheever hasemocratic party?" Whoever ha-rains to think for himself will then by hle to pick his own way out of th

BUSINESS DEPARTMENT NO. ES

Last week has been another record-breaking week in the getting of subscriptions for The Weekly People. Four hundred and sixteen were secured,

as against four hundred the preceding week. The comrades all over the country are beginning to realize the great amount of good that can be done for the movement by having a large circulation for the party press, and how important it is that each one of them should take a hand in the work. Accordingly, more and more of them are falling into line every day to help the comparatively few who have always done the bulk of this work to run up the circulation of The Weekly People to that point where it will have such an influence, because of its sound teachings, that intelligent workingmen will have nothing else.

Comrade Friesema orders another \$50 worth of prepaid blanks for Section Detroit. 100000

Section Detroit has taken \$100 worth of blanks so far, and is in the lead. Boston comes second, with \$75 worth.

Comrade Sullivan orders a block for Section Watervliet, N. Y., and hopes that they will get rid of them quickly so that they can order more. Sections Salt Lake, Utah, and Somerville, Mass., each take one block. The 11th and 13th, 34th and 35th A. D.'s, in New York, and the 5th and 7th A. D.'s, of Brooklyn, take one block each.

Comrade Muhlberg, of San Pedro, Cal. and Comrade Kern, of New Orleans, La., also take a block each. Six blanks were sold at the Cooper Union meeting, making a total of \$101.50 worth sold for the week.

In addition to the prepaid blanks, we have prepared prepaid postal cards to be used for yearly subscriptions only. They will be sold in lots of ten for \$5. There has been considerable demand for postal cards, and, as they can be dropped n the letter box by any one buying them, they will be very convenient.

The following members and sympa thizers have sent in five or more sub scriptions during the week: For the Weekly-Jos. Hand, city, 11; 35th A. D., city, 13; 34th A. D., city, 9; C. Schmidt, New Haven, Conn., 9; H. Warlett, Scheneetady, N. Y., 7; Chas. E. Hager, St. Louis, Mo., 12; Ben Hilbert Jr., Hamilton, O., 6; Philip Veal, Telluride, Colo. 6; F. Bohmbach, Boston, Mass., 7; G. H. Campbell, Winona, Minn., 6; C. M. Carlson, Tacoma, Wash., 10; J. H. Ecklund, Cambridge, Minn., 6; P. Friesema Jr., Detroit, Mich., 5; S. Fischman, Yonkers N. Y., 8; M. Meyer, Detroit, Mich., 9; John Laepple, Allentown, Pa., 20. For the Monthly-E. Kuelmar, St. Paul, Minn., 10; Ben Hilbert Jr., Hamilton, O., 20; H. Peterson, Eureka, Cal., 6; A. H. Lamps, Salida, Colo., 10; Henry Watson, Fall River, Mass., 6; Chas. E. Hager, St. Louis, Mo., 5; total, 111.

MEETINGS IN PHILADELPHIA. Friday, Oct. 30, Twenty-third and Coavenue. Campbell, Alexander lumbia and Woodly. Chairman, Mullen. Saturday, Oct. 31, Lancaster and For-

tieth street. Pahder, Campbell and Woodly, Chairman, Mullen. Broad street and Fairmount avenue. Seidel and Alexander. Chairman, Durner.

WAGEWORKERS

Fellowworkmen-With the election ap- | in want and misery because too much proaching it is again for you to decide has been produced. which of the parties deserves your vote.

By the majority of workmen the act of voting is considered lightly. They will us sum up, and find out the remedy for argue as long as they fare fairly, well | this anarchistic chaotic state of affairs. what difference does it make which party is successful at the polls? This is a grave mistake. Your material welfare is beyond doubt affected by the political party in control, and no more important question for you exists than the question, Which of the parties deserves my vote and support?

IHE

The Socialist Labor Party is composed of and controlled by workingmen; it stands for workingmen's interest, and no other. It asks you as a workingman to

vote for it and join it, because it represents your class and stands for the interest of the working class,' which no other party does.

Production is now carried on socially. No one man can claim that this or that product is produced by himself alone. A finished article has passed through numerous hands. To carry on this production machinery is necessary. The machine with the ready agency of steam and electricity has taken the place of the old-time tool, which every individual could own. The machine is operated by the working class, and owned by the capitalist class, who demand profit for its use.

There are two classes in society: the apitalist class, which ownes the tools of production, distribution and land, on one hand, and the working class, owning practically nothing else but their labor power on the other. This labor power the working class is forced to sell in order to live, to the owner of the machine, and the price of this labor power is regulated the same as the price of any other merchandise, which is handled for profit, i. e., by the laws of supply and demand.

ing class, is dependent on the capitalist class for a living. The capitalist is of no benefit to human society. He lives on that portion of the wealth which the working class produces and is robbed of, called profit, while the workingman drudges along in poverty on a mere pittance allowed him under the capitalist system, called wages. Under the capitalist economic system production is carried on not for consumption but to sell. Machinery is constantly improved upon and more and more is produced. To get rid of this product the capitalist scurries

main markets only a short time, for in a short time, they, too, start to manufacture in an up-to-date manner, and those places instead of their being ready markets become competitors in the struggle for, existence,

himself bound hand and foot. He only produces for profit and to sell; if he cannot get rid of his goods he closes up his place and you are forced to suffer

PASSAIC COUNTY

A crisis of this kind is approaching

WORKINGMEN

Having looked over the situation let

We have seen that the capitalist class owns the machine and the means whereby we live, but does no work beneficial to society. We have also seen that the working class produces all wealth, but is dependent on the capitalists because the capitalists own the means whereby a living can be made. The practical solu-

tion then is collective ownership. The machinery of production and distribution and land must be transferred to the class who produces all wealth, and the capitalist class be given the same option given the working class now--cither to starve or to work. Or in other words, an economic system where the more there is produced the more will there be to

consume, and the working class be transformed from merchandise into human beings. This is the program of the Socialist

Labor Party and it alone.' It, of all the parties, stands for Socialism, that is, collective ownership in interests of the working class; while all the other parties, Democratic, "Socialist" and Republican, stand for capitalism, that is, private ownership, the interests of the capitalist class. You will therefore see that the way you vote is of more than passing interest to you, for if you vote for any of the parties of capitalism you vote to continue working class robbery; whereas, if you vote for the S. L. P. you vote to end it, together with the sale of yourself as merchandise. Your material interests de mand that you vote for Socialism.

Cast your vote then for the following tickets : JERSEY CITY TICKET. For Mayor-George P. Herrschaft. For Street and Water Commissioner-

PART II.

WOMAN IN THE PRESENT -- Continued.

In order to determine this, an administration is requisite that shall embrace all the fields of social activity. Our municipalities constitute an effective basis thereto: if they are too large to allow a ready super-rision, they can be divided into wards. As in primitive society, all ers of the community who are of age participate in the elections, without distinction of sex, and have a voice in the choice of the persons who are to be entrusted with the administration. At the head of all the local administrations stands the central administration-as will be noted, not a Government, with power to rule, but an executive college of administrative functions. Whether the central administration shall chosen directly by popular vote or appointed by the local administration is immaterial. These questions will not then have the importance they have today: the question is then no longer one of filling posts that bestow special honor, or that vest the incumbent with greater power and influence, or that yield larger incomes: it is then a question of filling positions of trust, for which the fittest, whether male or female, are taken; and these may be recalled or re-elected as circumstances may lemand, or the electors may deem preferable. All posts are for given terms. The incumbents are, accordingly, clothed with no special "official qualities"; the feature of continuity of office is absent, likewise a hierarchical order of promotion. Hence it is also immaterial to us whether there shall be middle stages, say provincial administrations, between the central and the local administrations. If they are deemed necessary, they are set up; if they are not deemed necessary, they are left slope. All such matters are decided by actual exigencies, as ascertained in practice. If the progress of society has rendered any old organization superfluous, it is abolished without further ado and dispute, there ming no longer any personal interest in conflict; and new ones are simiestablished. Obviously, such an administration, resting upon the arly broadest democratic foundation, differs radically from what we have to-Soy. What a battle of newspapers, what a war of tongues in our parents, what mountains of public documents in our bureaux, if but a wial change is made in the administration or the Government!

"The principal thing to ascertain is the number and the nature of the rees that are available, the quantity and nature of the means of proloction,-the factories, workshops, means of transportation and comdumication, land-and also their productivity. The next thing to ascermin is the quantity of the supplies that are on hand and the extent to tailch these can satisfy the wants of society. As to-day the State and wh several municipalities yearly cast up their budgets, the thing will then be done with an eye to all the wants of society, without thereby theluding changes that increased or new wants may demand. Statistics exe play the chief role: they become the most important subsidiary e of the new order: they furnish the measure for all social activi-

distatistics are extensively used to-day for similar purposes. The Imsal. State and municipal budgets are based upon a large amount of stical reports, made yearly by the several administrative branches. experience and a certain degree of stability in the running wants litate their gathering. Every operator of a large factory, every a rehant is, under normal conditions, able to determine accurately what he will need during the next three months, and how he should regulate ais production and purchases. Unless excessive changes set ih, his calsulations will be found safe.

The experience that crises are caused by blind, anarchic production, 1. e., that production is carried on without a knowledge of the volume of supply, of sales and of demand of and for the several goods in the s market, has, as indicated in previous passages, caused large manufacturers in several branches of industry to join in Trusts and rings, partly with the view of steadying prices, partly also for the purme of regulating production by the light of previous experience and of the orders received. According to the capability of each establishment and to the probable demand, the output of each is determined for the vext few months. Infractions are punished with heavy conventional mulcts, and even expulsion. The capitalists do not conclude these agreements for the benefit of the public, but to its injury and to their own profit. Their purpose is to utilize the power of combination in order to scure the greatest advantages to themselves. This regulation of prom has for its object to enable the capitalist to demand from the public prices that could not be got if the competitive struggle was on etween the several capitalists. These enrich themselves at the exe of the consumers who are forced to pay whatever price is ded for the goods they need. As the consumer, so is the workingman injured by the Trusts. The artificial regulation of production throws a part of the working class out of work, and, in order that these may live, they underbid their fellows at work. Thus the employer de-rives a double advantage: he receives higher prices, and he pays lower regres. Such a regulation of production by combinations of capitalists is exactly the reverse of that which will be practiced in Socialist society. While to-day the interests of the capitalists is the determining factor, the interests of all will then be the guide. Production will then be carried on for the satisfaction of human wants, and not in order to obtain, through high prices, large profits for private individuals. Nevertheless, best planned combination in capitalist society can not take in and control all the factors needed in the calculation: competition and specu-lation run wild despite all combinations: finally the discovery is made that the calculation had a leak, and the scheme breaks down. The same as production on a large scale, commerce also has extensive statistics. Every week the larger centers of commerce and the ports publish reports on the supply of petroleum, coffee, cotton, sugar, grain, etc. These statistics are frequently inaccurate, seeing that the owners of the goods frequently have a personal interest in concealing the truth. On the whole, however, the statistics are pretty safe and furnish to interested, information on the condition of the market. But here also speculation steps in, upsets all calculations, and often renders all te business impossible. Seeing how impossible is a general reguion of production in capitalist society, due to the existence of many of private producers with conflicting interests, it will be abvious why the speculative nature of commerce, the number of mermants and their conflicting interests render equally impossible the regustion of distribution. Nevertheless, what is done in these directions indicates what could be done so soon as private interest were to drop not and the interests of all were alone dominant. A proof of this is fured by the statistics of crops, that are yearly issued by the leading stries of civilization, and that enable certain general conclusions to be drawn upon the size of the crops, the extent that they will supply the d, and the probable price. In a socialized society matters are fully regulated; society is held fraternal bonds. Everything is done in order; there, it is an easy matter to gauge demand. With a little experience, the thing is easy as day. If, for instance, the demand is statistically established for bread, shoes, linen, etc., and, on the other hand, the productivity of the plants is equally known, the average daily amount of socially labor is thereby ascertained. The figures would, furthermore, chero more plants for the production of a certain article may add, or where such may be discontinued as superflucus, or turned to other purpos

furnish the several powers with the opportunity to apply themselves at the right places will be the principal task of these functionaries. In the measure that the several forces are broken in, the wheels will move with greater smoothness. The several branches and divisions of labor choose their foremen, who superintend the work. These are no slave-drivers, like most foremen of to-day; they are fellow workers, who, instead of a productive, exercise an administrative function entrusted to them. The idea is by no means excluded that, with the attainment of higher perfection, both in point of organization and of individuals, these functions should alternate so that, within a certain time, and in certain order, they are filled by all regardless of sex.

A system of labor, organized upon a plan of such absolute liberty and democratic equality, where each stands for all, and all stand for each, and where the sense of solidarity reigns supreme,-such a system would generate a spirit of industry and of emulation nowhere to be found in the modern economic system. Nor could such a spirit of industry fail to react both upon the productivity of labor and the quality of labor's product.

Furthermore-seeing that all are mutually active-the interest becomes general in the best and most complete, as well as in the quickest possible production of goods, with the object of saving labor, and of gaining time for the production of further wealth, looking to the gratification of higher wants. Such a common interest spurs all to bend their thoughts towards simplifying and quickening the process of labor. The ambition to invent and discover is stimulated to the highest pitch: each will seek to outdo the other in propositions and ideas.1

Just the reverse will, accordingly, happen of which the adversaries of Socialism claim. How many are not the inventors and discoverers who go to pieces in the capitalist world! How many has it not exploited and then cast aside! If talent and intellect, instead of property, stood at the head of bourgeois society, the larger part of the employers would have to make room for their workingmen, master mechanics, technical overseers, engineers, chemists, etc. These are the men, who, in ninetynine cases out of a hundred, make the inventions, discoveries and improvements, which the man with the money-bag exploits. How many thousands of discoverers and inventors have gone to pieces unable to find the man of means ready to provide the wherewithal for the execution of their thoughts; how many germs of inventions and discoveries have been and continue to be nipped by the social stress for bare existence, is a matter that eludes all calculation. Not the men of head and brain, but those of large wealth are to-day the masters of the world,-which, however, does not exclude the occasional and exceptional phenomenon of brains and wealth being united in one person. The exception only proves the rule.

Everyone in practical life knows with what suspicion the workingman to-day regards every improvement, every invention introduced in the shop. And he is right. He rarely derives any advantage therefrom; it all accrues to the employer. The workingman is assailed with the fear lest the new machine, the new improvement cast him off to-morrow as superfluous. Instead of gladsome applause for an invention that does honor to man and is fraught with benefit for the race, he only has a malediction on his lips. We also know, from personal experience, how many an improvement perceived by the workingman, is not introduced: the workingman keeps silent, fearing to derive no benefit but only harm from it. Such are the natural consequences of an antagonism of interests."

This entagonism of interests is removed in Socialist society. Each unfolds his faculties in his own interest, and, by so doing, simultaneously benefits the commonweal. To-day personal gratification is generally antagonistic to the common weal; the two exclude each other. In the new Order, the antagonisms are removed: The gratification of the ego and the promotion of the common weal harmonize, they supplement each other."

The marvelous effect of such a mental and moral condition is obvious. The productivity of labor will rise mightily, and such increased productivity makes possible the satisfaction of higher wants. Especially will the productivity of labor rise through the discontinuance of the present and enormous disintegration of labor, in hundreds of thousands, even millions of petty establishments, conducted with imperfect tools. According to the industrial census of the German Empire for the year 1882, there were 3,005,457 leading establishments, exclusive of commerce, transportation, hotels and inns, in which 6,396,405 persons were occupied. Of these leading establishments, 61.1 per cent. employed less than 5 persons, and 16.8 per cent. employed from 6 to 50 persons. The former are small concerns, the latter middle class ones. Through the concentration of the small and middle class establishments into large ones, equipped with all the advantages of modern technique, an enormous waste in power, time, material (light, heat, etc.) space, now incuared, would be avoided, and the productivity of labor would gain proportionally. What difference there is in the productivity of small, middle class and large establishments, even where modern technique is applied, may be illustrated by the census of manufactories of the State of Massachusetts for 1890. The establishments in ten leading industries were divided into three classes. Those that produced less than \$40,000 worth of goods were placed in the lowest class; those that produced from \$40,000 to \$150,000 were placed in the middle class; and those that produced over \$150,000 worth of goods were placed in the upper class.

	Number of Estab-	Percentage of All	Produc- tivity of	Percentage of Total
Classes.	lishments.	Establishments.	Each Class.	Productivity.
Lower		55.2	51,660,617	9.4
Middle		26.2	106,868,635	19.5
Upper		18.6	390,817,300	71.1
	3.698	100.0	549,346,552	100.0

The more than twice as large number of small establishments turned out only 9.4 per cent. of the total product. But even the large establishments could, with hardly any exception, be conducted far more rationally than now, so that, under a system of collective production,

and strong enough to last 50 years, to each family. The result was that, for 'agricultural, building, the production of flour, sugar, coal, iron, machinery, clothing and chemicals, only 615,000 workingmen were needed, at work the whole year and at the present average hours of daily labor. These 615,000 workingmen are, however, only 12.3 per cent. of the population of Austria, capable to work, exclusive of all the women as well as the males under 16 and over 50 years of age. If all the 5,000,000 men, and not merely the above figure of 615,000, were engaged, then, each of them would need to work only 36.9 days-six weeks in round figures-in order to produce the necessaries of life for 22 million people. Assuming 300 work days in the year, instead of 37, and 11 as the present daily hours of work, it follows that, under this new organization of labor, only 1% hours a day would be needed to cover the most pressing needs of all.

Hertzka further computes the articles of luxury that the better situated demand, and he finds that the production of the same for 22 million people would require an additional 315,000 workingmen. Altogether, according to Hertzka, and making allowance for some industries that are not properly represented in Austria, one million in round figures, equal to 20 per cent. of the male population able to work, exclusive of those under 16 and above 50 years of age, would suffice to cover all the needs of the population in 60 days. If, again, the whole male population able to work is made the basis of the computation, these would need to furnish but two and a half hours work a day."

This computation will surprise none who take a comprehensive view of things. Considering, then, that, at such moderate hours, even the men 50 years old-all the sick and invalid excepted-are able to work: furthermore, that also youths under 16 years of age could be partially active, as well as a large number of women, in so far as these are not otherwise engaged in the education of children, the preparation of food, etc. ;--considering all that, it follows that even these hours could be considerably lowered, or the demand for wealth could be considerably increased. None will venture to claim that no more and unforeseen progress, and considerable progress, at that, is possible in the process of production, thus furnishing still greater advantages. But the issue now is to satisfy a mass of wants felt by all that to-day are satisfied only by a minority. With higher culture ever newer wants arise, and these too should be met. We repeat it: the new Social order is not to live in proletarian style; it lives as a highly developed people demand to live, and it makes the demand in all its members from the first to the last. But such a people can not rest content with satisfying merely its material wants. All its members are to be allowed fullest leisure for their development in the arts and sciences, as well as for their recreation.

Also in other important respects will Socialist society differ from the bourgeois individualist system. The motto: "Cheap and bad"-which is and must be standard for a large portion of bourgeois production, seeing that the larger part of the customers can buy only cheap goods, that quickly wear out-likewise drops out. Only the best will be produced; it will last longer and will need replacing at only wider intervals. The follies and insanities of fashion, promoted by wastefulness and tastelessness, also cease. People will probably cloth themselves more properly and sightfully than to-day, when, be it said in passing, the fashions of the last hundred years, especially as to men, distinguish themselves by their utter tastelessness. No longer will a new fashion be introduced every three months, an act of folly that stands in intimate relation with the competitive struggle of women among themselves, with the ostentatiousness and vanity of society, and with the necessity for the display of wealth. To-day a mass of establishments and people live upon this folly of fashion, and are compelled by their own interests to stimulate and force it. Together with the folly of fashion in dress, falls the folly of fashion in the style of architecture. Eccentricity reaches here its worst expression. Styles of architecture that required centuries for their development and that/sprang up among different peoples-we are no longer satisfied with European styles, we go to the Japanese, Indians and Chinese-are used up in a few decades and laid aside. Our poor professional artist no longer knows whither and whereto they should turn with and for their samples and models. Hardly have they assorted themselves with one style, and expect to recover with case the outlays they have made, when a new style breaks in upon them, and demands new sacrifices of time and money, of mental and physical powers. The nervousness of the age is best reflected in the rush from one fashion to the other, from one style to the other. No one will dare to claim any sense for such hurrying and scurrying, or the merit of its being a symptom of social health.

Socialism alone will re-introduce a greater stability in the habits of life. It will make repose and enjoyment possible; it will be a liberator from hurry and excessive exertion. Nervousness, that scourge of our age, will disappear.

But labor is also to be made pleasant. To that end practical and tastefully contrived workshops are required; the utmost precautions against danger; the removal of disagreeable odors, gases and smoke,in short, of all sources of injury or discomfort to health. At the start, the new social system will carry on production with the old means, inherited from the old. But these are utterly inadequate. Numerous and unsuitable workshops, disintegrated in all directions; imperfect tools and machinery, running through all the stages of usefulness;-this heap is insufficient both for the number of the workers and for their demands of comfort and of pleasure. The establishment of a large number of spacious, light, airy, fully equipped and ornamented workshops is a pressing need. Art, technique, skill of head and hand immediately find a wide field of activity. All departments in the building of machinery, in the fashioning of tools, in architecture and in the branches of work connected with the internal equipment of houses have the amplest opportunity. Whatever human genius can invent with re-gard to comfortable and pleasant homes, proper ventilation, lighting and heating, mechanical and technical provisions and cleanliness is brought into application. The saving of motor power, heating, lighting, time, as well as the promotion of all that tends to render work and life agreeable, demand a suitable concentration of the fields of labor on cerspots Habitations are separated from places of work and are freed from the disagreeable features of industrial and other manual work. These disagreeable features are, in their turn, reduced the lowest measure possible by means of suitable arrangements and provisions of all sorts, until wholly removed. The present state of technique has now means enough at command to wholly free from danger the most dangerous occupations, such as mining and the preparation of chemicals, etc. But these means can not be applied in capitalist society because they are expensive, and there is no obligation to do more than what is absolutely necessary for the workingman. The discomforts attached to mining can be removed by means of a different sort of draining, of extensive ventilation, of electric lighting, of a material reduction of hours of work, and of frequent shifts. Nor does it require any particular cleverness to find such protective means as would render building accidents almost impossible, and transform work in that line into the most exhilarating of all. Ample protections against sun and rain are possible in the construction of the largest edifices. Furthermore, in a society with ample labor-power at its disposal, such as Socialist society would be, frequent shifts and the concentration of certain work upon certain seasons of the year and certain hours of day would be an easy matter. The problem of removing dust, smoke, soot and odors could likewise be completely solved by modern chemistry and technique; it is solved only partially or not at all, simply because the private employers care not make the necessary sacrifice of funds. The work-places of the future, wherever located, whether above or under ground, will, accordingly, distinguish themselves most favorably from those of to-day. Many contrivances are, under the existing system of private enterprise, first of all, a question of money: can the business bear the expenditure? Will it pay? If the answer is in the negative, then let the workingmen go to eces. Capital does not operate where there is no profit. Humanity not an "issue" on the Exchange."

Whatever is beneficent to these and protects them must be introduced; whatever injures them must stop. None is forced to join in a daugerous game. If matters are undertaken that have dangers in prospect, volunteers will be numerous, all the more so seeing that the object can never be to the injury, but only to the promotion of civilization.

3

The amplest application of motor powers and of the best machinery and implements, the utmost subdivision of labor, and the most efficient combinations of labor-power will, accordingly, carry production to such pitch that the hours of work can be materially reduced in the production of the necessaries of life. The capitalist lengthens the hours of labor, whenever he can, especially during crises, when the worker's power of resistance is broken, and by squeezing more surplus values out of him, prices may be lowered. In Socialist society, an increase of production accrues to the benefit of all: The share of each rises with the productivity of labor and increased productivity again makes possible the reduction of the hours of work, socially determined as necessary.

Among the motor powers that are coming into application, electricity will, according to all appearances, take a decisive place.' Capitalist cociety is now everywhere engaged in harnessing it to its service. The more extensively this is done the better. The revolutionizing effect of this mightiest of all the powers of Nature will but all the sooner snap the bouds of bourgeois society, and open the doors to Socialism. But only in Socialist society will electricity attain its fullest and most widespread application. If the prospects now opened for its application are even but partially realized-and on that head there can be no doubtelectricity, as a motor power as well as a source of light and heat, will contribute immeasurably towards the improvement of the conditions of life. Electricity distinguishes itself from all other motor power in that, above all, its supply in Nature is abundant. Our water courses, the ebb and tide of the sea, the winds, the sun-light-all furnish innumerable horse-powers, the moment we know how to utilize them in full. Through the invention of the accumulators it has been proved that large volumes of power, which can be appropriated only periodically, from the ebbs and tides, the winds and mountain streams, can be stored up and kept for use at any given place and any given time. All these inventions and discoveries are still in embryo: their full development may be surmised, but can not be forecast in detail.

The progress expected from the application of electricity sounds like a fairy tale. Mr. Meems of Baltimore has planned an electric wagon able to travel 300 kilometers an hour-actually race with the wind. Nor does Mr. Meems stand alone. Prof. Elihu Thomson of Lynn, Mass., also believes it possible to construct electromotors of a velocity of 161 kilometers, and, with suitable strengthening of the rolling stock and improvement of the signal system, of a velocity of 260 kilometers; and he has given a plausible explanation of his system. The same scientist holds, and in this Werner Siemens, who expressed similar views at the Berlin Convention of Naturalists in 1887, agrees with him, that it is possible by means of electricity to transform the chemical elements directly into food-a revolution that would hoist capitalist society off its hinges. While in 1887 Werner Siemens was of the opinion that it were possible, though only in the remote future, to produce artificially a hydrate of carbon such as grape sugar and later the therewith closely related starch, whereby "bread could be made out of stone," the chemist Dr. B. Meyer claims that ligneous fibre could eventually be turned into a source of human food. Obviously, we are moving towards ever newer chemical and technical revolutions. In the meantime, the physiologist E. Eiseler has actually produced grape sugar artificially, and thus made a discovery that, in 1887, Werner Siemens considered possible only in the "remote future." In the spring of 1894, the French ex-Minister of Public Worship, Prof. Berthelot, delivered an address in Paris at the banquet of the Association of Chemical Manufacturers upon the significance of chemistry in the future. The address is interesting in more respects than one. Prof. Berthelot sketched the probable state of chemistry at about the year 2000. While his sketch contains many a droll exaggeration, it does contain so much that is serious and sound that we shall present it in extract. After describing the achievements of chemistry during the last few decades, Prof. Berthelot went on to say :--

"The manufacture of sulphuric acids and of soda, bleaching and coloring, beet sugar, therapeutic alkaloides, gas, gilding and silvering, etc.; then came electro-chemistry, whereby metallurgy was radically revolutionized; thermo-chemistry and the chemistry of explosives, whereby fresh energy was imparted to mining and to war; the wonders of organic chemistry in the production of colors, of flavors, of therapeutic and antiseptic means, etc. But all that is only a start: soon much more important problems are to be solved. About the year 2000 there will be no more agriculture and no more farmers: chemistry will have done away with the former cultivation of the soil. There will be no more coalshafts, consequently, neither will there be any more miners' strikes. Fuel is produced by chemical and physical processes. Tariffs and wars are abolished aerial navigation, that helped itself to chemicals as motor power, pronounced the sentence of death upon those obsolete habits. The whole problem of industry then consists in discovering sources of power, that are inexhaustible and restorable with little labor. Until now we have produced steam through the chemical energy of burning mineral coal. But mineral coal is hard to get and its supply decreases daily. Attention must be turned towards utilizing the heat of the sun and of the earth's crust. The hope is justified that both sources will be drawn upon without limit. The boring of a shaft 3,000 to 4,000 meters deep does not exceed the power of modern, less yet it will exceed that of future engineers. The source of all that and of all industry would be thus thrown open. Add water to that, and all imaginable machinery may be put in perpetual operation on earth: the source of this power would experience hardly any diminution in hundreds of years.

"With the aid of the earth's heat, numerous chemical problems will become solvable, among these the greatest of all-the chemical production of food. In principle, the problem is solved now. The synthesis of fats and oils has been long known; likewise are sugar and hydrates of carbon known; nor will it be long before the secret of compounding azote is out. The food problem is a purely chemical one. The day when the corresponding cheap power shall have been obtained; food of all sort will be producable with carbon out of carbon oxides, and with hydrogen and acids out of water, and with nitrogen out of the atmosphere. What until now vegetation has done, industry will thenceforth perform, and more perfectly than Nature itself. The time will come when everyone will carry about him a little box of chemicals wherewith to provide his food supply of albumen, fat and hydrates of carbon, regardless of the hour of the day or the season of the year, regardless of rain or drought, of frost or hail, or insects. A revolution will then set in of which no conception is so far possible. Fields bearing fruit, wine-bearing mountain slopes and pastures for cattle will have vanished. Man will have gained in gentleness and morality seeing he no longer lives on the murder and destruction of living beings. Then also will the difference drop away between fertile and barren districts; perchance deserts may then become the favorite homes of man being healthier than the damp vallevs and the swamp-infected plains. Then also will Art, together with all the beauties of human life reach full development. No longer will the face of earth be marred, so to speak, with geometrical figures, now entailed by agriculture: it will become a garden in which, at will, grass or flowers, bush or woods, can be allowed to grow, and in which the human race will live in plenty, in a Golden Age. Nor will man thereby sink into indolence and corruption. Work is requisite to happiness, and man will work as much as ever, because he will be working for himself aiming at the highest development of his mental, moral and esthetical powers.'

Everyone decides the pursuit he chooses: the large number of different like of activity caters to the tastes of all. If on one field there is a urplus and on another a dearth of labor-power, the administration at-ings to the equalization of forces. To organize production, and to

aided by the most highly perfected technical process, an infinitely larger demand could be supplied.

Upon the subject of the saving of time, possible under a system of production planted on a rational basis, Th. Hertzka of Vienna has made ome interesting calculations." He investigated the amount of laborpower and time requisite for the satisfaction of the wants of the 22. nillion inhabitants of Austria by means of production on a large scale. To this end Hertzka gathered information upon the capacity of large establishments in several fields, and he based his calculations upon the data thus ascertained. In Hertzka's calculation are included 10,500,000 hectares of agricultural and 3,000,000 hectares of pasture lands, that should suffice for the production of agricultural products and of meat for the said population. Hertzka also included in his computation the building of houses on the basis of a house of 150 square meters, 5 rooms

¹ "The power of emulation, in exciting to the most strenuous exertions for the sake of the approbation and admiration of others, is borne witness to by experience in every situation in which human beings publicly compete with one another, even if it be in things frivolous, or from which the public derives no benefit. A contest, who can do most for the common good, is not the kind of competition which Socialists repudiate."-John Stuart Mill's "Principles of Political Economy." Every union, every association of people, who pursue equal alims, likewise furnishes numerous examples of greater effort with no material, bat only an ideal, reward in view. The emulators are moved by the ambition to distinguish themselves, by the desire to serve the common cause. But this sort of ambition is no vice; it is a virtue; it is put forth in the interest of all; and the individual finds his satisfaction in that along with all others. Ambition is harmful and objectionable only when it is put forth to the injury of the whole, and at the expense of others. "Yong Thuenen says in his "Der isolite Stat": "The reason why the

with all others. Ampliton is harmful and objectionable only when it is put forth to the injury of the whole, and at the expense of others. ³ Von Thuenen says in his "Der isolirte Staat": "The reason why the proletarians, on the one hand, and property classes, on the other, face each other permanently as enemies lies in the antagonism of their interests ; and they will remain unreconciled so long as this dictions of interests is not removed. Not only the well-being of his wage-giver but--through discoveries in industry, the pavement of streets and building of railroads, the forming of new business connections--the revenues of the Nation also may increase. Under our present social order, however, the workingman is touched by none of these is in condition remains what it was, and the chole increase of revenues accrues to the employers, the capitalists and the landlords." This last sen-tence is an almost literal anticlpation of the works of falastone in the English Parliament, when he declared in 1864 "this intoricating increase of incomes and power" that England had experienced in the course of the previous of the workingman from his product." Morelly declares in als "Principles of Legislation": "Property divides us into two classes--Bich and Poor. The forme love their property and care not to defend the State; the latter can not possibly love the Fatherland, see-ing that it bestows upon them maught but misery. Under the system of Communism, however, all love the Fatherland, seeing that all receive from it life and happiness."

life and happiness." "
"In weighing the advantages and the disadvantages of Communism, John Stnart Mill says in his "Principles of Political Economy": "No soil could be more favorable to the growth of such a feeling, than a Communist association, since all the ambition, and the bodily and mental activity, which are now ex-erted in the pursuit of separate and soil-regarding interests, would require another sphere of employment, and would maturally find it in the pursuit of the general benefit of the community."
""Die Gesetze der sezialen Entwickelung."

The question of "profit" has exhausted its role in Socialist society: in Socialist society the only consideration is the welfare of its members.

⁶ What does Herr Eugene Richter say to this calculation? In his "Irr-lehren" (False Doctrines) he makes merry over the enormous shortening of the hours of work that we have held out in this work as the result that would follow upon the obligation of all to work and upon the higher technical organization of the process of production. He seeks to minimize as much as possible the productivity of production on a large scale, and to enhance the importance of production on a small scale. He does so in order that he might claim that the expected increased production was not practicable. In order to make Socialism seem impossible, these defenders of the existing "order" are forced to discredit the merits of their own social system.

⁶ "Capital is said by a Quarterly Reviewer to fly turbulence and strife, and be timid, which is very true; but this is very incompletely stating the ques-on. Capital eschews no profit, or very small profit, just as Nature was for-erly said to abhor a varuum. With adequate profit, capital is very bold.

A certain 10 per cent. will ensure its employment anywhere: 20 per cent. certain will produce cagerness; 50 per cent. positive audacity; 100 per cent. will made it ready to trample on all human laws; 300 per cent. and there is not a crime at which it will scruple, nor a risk it will not run, even to the chance of its owner being hanged. If turbulence and strife will bring a profit, it will freely encourage both. Smuggling and the slave-trade have amply proved all that is here stated." (P. J. Dunning, i. c., p. 25.) Cited by Karl Marx in "Capital," p. 786, edition Swan-Sonnenscheim & Co., Lon-don. 1896. don, 1896.

⁵ A competitor with electricity, applied to lighting purposes, has recently arisen in the shape of the so-called acetylene gas, which was discovered in the United States, by means of an electrolytic process, similar to that used in the preparation of aluminum. A compound is made of calcium and car-bon, called calcium-carbide, which, in touch with water, produces the acetylene gas. Its lighting power is fifteen times that of the ordinary illuminating gas, besides being much cheaper.

To be Continued.

The publication of "Woman Under Socialism" began on Sunday, May 24, in The Sunday People, and in The Weekly People of May 30. It will appear in serial form in The Sunday and Weekly until completed, when it will be published in book form.

WEEKLY PEOPLE

3, 4 and 6 New Reade St., New York. O. Box 1576. Tel. 129 Franklin.

Published every Saturday by the Socialist Labor Party.

Bundle rates; Less than 100 copies, 1 ent a copy; 100 to 500 copies, 34 cent copy; 500 or more, 1/2 cent a copy

Entered as second-class matter at the New York postoffice, July 18, 1900.

As far as possible, rejected communica-tions will be returned, if so desired, and stamps are enclosed.

SOCIALIST VOTE IN THE UNITED STATES.

ELIJAH III.

While New York, the modern Babylon, is making merry over John Alexander Dowie, a city rose near Chicago, conjured into existence by his wand, and at this very moment a farmer, Aman Schwert, living near Valparaiso, Ind., sells his farm, valued at \$20,000, and turns the proceeds to the "Restorer." These seem contradictory faits. New York, the city with largest opportunities for intelligence, sneers; while other people look on with admiration and self-sacrificing ecstasy; and yet others, animated with equal admiration, though not so self-sacrificing, fall into line in Dowie's industrial army, and rear under his command a manufacturing town in which they earn a living and lead decent, pure lives. Is New York right? or are these others right? Can both be right? They are. Most contradictory are the forerunning events of great social upheavals. As at the hunt, the bloodhound starts both game and birds of all descriptions, and is himself but the forerunner of the hunter, so with social upheavals.

The starting point to understand the Elijah III. episode, that we are traversing, together with the manifold phenomena produced by the "Restorer's" advent, is man. Man is a complex being. Material needs ally him to the animal; intellectual powers raise him to the spheres. The former quality is the basis of the first: the second quality, however, like the sails of a ship, has its driving effect upon the former. Man's acts are the result of these combined agencies: according as the one or the other predominates the individual acts. Social distress is working upon the people. The capitalist system of production has reached a point where all its prophesies of weal are belied. Our people, in ever increasing numbers are, like game at the hunt, being started by the bloodhound of the capitalist hunter. They are driven from the lairs of their former confidence. Their conduct serves as an exact barometer of the degree of solidity of their intellects.

Those whose minds are a blank readily fall into two main categories: those with whom the animal predominates, and those with whom it does not. The latter, see visions beyond earth. Their earthly havings cease to be of value to

in which, not the cynic's material, "humbugged and humbuggable men," but the Socialists' material, intelligent and selfrespecting human beings, shall constitute the corner-stone and structure-the

Socialist Republic. A NEW APPLICATION OF "GRAFT." The Hon. Marcus A. Hanna has just enriched the literature of the social ques

tion with a new term, at least a new application of the term "graft." Elsewhere in this issue will be found the report of a conversation recently held by him in Cleveland with a representative of one of the most prominent corporation law firms in this city. Justly taking a gloomy view of the industrial outlook, Mr. Hanna foretells that within a year soup-houses will be seen in all the large cities of the country. The cause of that he declares to be the determination of the capitalist to stop construction and production. And as the cause

of this determination he assigns the attitude of Labor in "foolishly trying to prevent a just share of its product reverting to the employer," and this attitude of Labor Mr. Hanna terms "Labor's greed of graft."

Let's turn to the census figures of 1900. Fifteen groups of industries are there quoted. Mr. Hanna's multitudinous lines of industry appear in a number of them. According to these figures, the gross value of the products was \$13,-000,149,159. Who shared in this colos sal product, and in what proportion? The census figures answer the question. tho' not in full yet clear enough for all practical purposes. Of that total \$8,-367,997,844 are given as "net," that is to say, as profits gone to the capitalist, and \$2.320.938.168 as wages gone to Labor. In other words, deducting the wear and tear of machinery, the price of raw material (excepting Labor), etc., etc., amounting in all to \$2.311.213.147, there remained the sum of \$10,688,936,012. Of this total Labor's "greed of graft" received \$2.320,938,168, while the "anti-greed of graft" capitalist class took \$8,367,997,-844, or MORE THAN THREE TIMES,

nearly four times, as much! But not even that tells the tale in full. Where do the \$2,311,213,147, which are deducted from the profits, 'go? It is not all "wear and tear" of machinery; it is not all the value of the raw product. A big chunk thereof goes to "etc., etc." What do these "etc., etc." comprise? They comprise "rent," "interest," and such items. And to whom are these "rents" and "interests" paid ? Why to the capitalist class. On the same principle that the "good government" Police Commissioner of this city, stands convicted of having bought and sold from and to HIMSELF, the capitalist class, in many cases the individual capitalists themselves, pay "rent" and "interest" to THEMSELVES. Making a low estimate of the "rents" and "interest" items thus deducted from the gross values, it is unquestionable that the "anti-greed of graft" capitalist class modestly and meekly pockets MORE THAN FOUR TIMES the share of the product that "greedy of graft" Labor receives.

Thus the Labor factor in production the producer, in fact, of at least \$8,367, 997.844 of new values, and who receives barely one fourth of the product of its toil, is pronounced "greedy of graft," a rafter; while the idle capitalist class that produces nota pin-head's worth of value, and yet grabs about three-fourths of the wealth produced poses like Abnegation on a monument! Thus the wealthproducers plundered to the extent that a few months of shut-downs throw them upon soup-houses, have insult added to injury-to injury of being plundered, by the Hanna class of plunderers, they are spoken of by these as plunderers or would-be plunderers; to the injury of being grafted upon by the grafter capitalist class, the insult is added of being designated as "greedy of graft"! Whether the issue be "municipal," "State" or "national," it is one. It is the issue of outraged, plundered, and grafted-upon Labor against the criminal, plundering and grafter capitalist class. Between these two the line is sharp. On the one side stand the embattled political forces of the Grafter, under various colors, that all blend in one and represent the buccaneer's black flag; on the other stands the unbendable and unbreakable standard of the Socialist Labor Party, summoning Labor to crack the Grafter class over the head with the ballot of Labor-the uplifted Arm and Hammer of Emancipation.

dolph Hearst is the logical candidate of the Democratic party for President. A foot-note supplements the last article of the series, adding the word "Socialist" to "Democratic," and explaining that there are two sorts of Socialism-on "that consents to orderly methods and is capable of charity" and one that does and is the other thing. The series is remark able; still more remarkable is the closing article; and most remarkable of all is

the foot-note, which may be said to crown the whole. It is true, Mr. Hearst is the logical candidate of the elements named and

referred to. To all the elements-and their num ers are legion-who see in the Trust an

octopus, that must be destroyed, and who fail to realize that the only thing that is the matter with the Trust is that the capitalist class, who stole it, owns it and not the working class,-to all such elements William Randolph Hearst is the logical candidate.

To all the elements-and their num bers are legion-who imagine the Trust can be smashed, who, in other words, are sufficiently visionary to believe that civilization can be thrown on its haunches,to all such elements William Randolph Hearst is the logical candidate. To all the elements-and their num

bers are legion-who are gullible into violent rage against "tariff protected Trusts," and into bending their backs for railroad, mining, street car, California ranches and other such self protecting

Trusts of the Hearst stamp to walk over and become still more oppressive,-to all such elements William Randolph Hearst is the logical candidate. To all the elements-and they are not few-whose Socialism is of the "charit-

able" kind practised by the Social Democrats, Boudijanoff and Pollock, who, having charity for the employer, help him to injunctions against his employees-to all such elements William Randolph Hearst is the logical candidate.

To all the elements-and there is quite some of them-whose Socialism is of the "orderly method" of fusing with Republican and Democratic politicians, as practiced by the Social Democratic, alias "Socialist" party-to all such elements Wil-

liam Randolph Hearst is the logical candidate. To all the elements-and who can count

them !-- who have not character enough to stand alone and want to be in a crowd. however wrong, provided it is heels over head,-to all such elements William Randolph Hearst is the logical candidate.

To the increasing number of demoralized voters-demoralized by the capitalist class, among whom Hearst is a member of "Senatorial rank"-and who, like the demoralized Roman plebs, or the demoralized slums of the days of Tweed, will eagerly cluster around the standard of him who treats them to circus, or fireworks, shows, and scatters pennies among them .- to all such William Randolph Hearst is the logical candidate, and his

that the bulk of the funds proceed to the houses of ill fame. "Dust thou art to dust returnest" is a motto that the capitalist class paraphrases and applies into "From prostitution you draw your essence, return your essence to it"-and thither it travels both in point of their marrow and in point of their cash.

And yet in the midst of this campaign, what is it that these two representatives of the Republican and Democratic parties are vying with one another ini It is in outdoing one another in promises

WEEKLY PEOPLE, SATURDAY, OCTOBER 31, 1903.

to suppress, and uproot and abolish-the "Red Light" !!!

A social pariah of capitalist society, the wretched prostitute is now being used as a pretext for mutual defamation by the capitalist candidates. Jointly, they, as capitalists, exist by virtue of the institution of prostitution; separately, they seek to undo one another by kicking her, and each seeks to mount into power by clambering over her prostrate, kicked-down body.

A vote for either is a vote of sanction for prostitution; is a vote of encouragement for capitalist hypocrisy. A vote for the Socialist Labor Party, a cross under the Uplifted Arm and Hammer of Labor, is a crack over the head of capitalist crime, indecency, hypocrisy and cruelty.

PARTIAL TRUTH, ROUGHEST FALSEHOOD.

A strike is imminent on the "L" roads of this city. The issue is the examination of the motormen demanded by the company: the motormen must be able to distinguish a letter three-eighths of an inch long at a distance of thirty feet. alternately with one eye, and then with | Colorado division of Parry's Manufacturthe other. This is the way the company | ers' Association (the same Parry against presents the issue, and the motormen, hampered by the pure and simple education they have been blighted with, allow themselves to be placed before the public in the false light of so partial a truth, which, looked into, is in fact a rough falsehood.

A motorman should have a good sight. His sight can be none too good. Upon him depend at every trip hundreds of lives, on some trins thousands. Nor can it be said that the test demanded of them is excessive. Yet they object. Is it that they are a reckless set, caring

nothing for the lives of others? Is it that they are so reckless that they make light of their own lives, and care not to have that protected? Surely not. Their lives are as sweet to them as the life of any passenger can be to himself. It is unquestionable that the motormen desire the greatest safeguards possible for themselves and their fellow beings, the passengers whom they carry. Yet the motormen object. To what? To the test? Ill-starred, and untutored men that they are, they allow themselves to be placed in the false light of objecting to the test, while that is not their real objection.

The real objection of the motormen is to the miserable wage and long hours that they are forced to toil in order to yield large profits for Countess Anna to build her red marble palace of Chatelane in France and for the Interborough Republican, Fusian, and Democratic lessees to wallow in the affluence of the plunder from Labor. What the motormen really object to is that they have to consume heir eye-sight by long hours, and that their earnings are too trifling to recuperate the tissue consumed. What the motormen really object to is that, held at the pittance they now are held at, they are thrown at the door of starvation if they lose their jobs. In short, what the motormen object to is, not that the motormen should have good evesights, but that they should be punished with discharge for the consequence of the crime committed upon them by the company, the killing of their eye-sight through inhuman hours of work and still more revolting pay. That is the objec-

keep it up. Not workingmen patronize To have a strong sight and strong limbs, and not to starve after old age has worn out the body, Labor must stop the system by which it is plundered. To stop that system it must be struck against at the shop, emphatically voted against at

> the ballot box in step and tread with the Socialist Labor Party. "In hoc signo vincis;" in all other signs,

> there is only defeat in store. The details of Harvester consolidation

by which thousands of clerical, i. e., 'mental" workers, will be set adrift are now at hand. According to a Columbus, O. dis

patch: "The International Harvester Com pany of America plans to dispose of not less than 5,000 employees. The selling agencies of the McCormick, Deering Plane, Champion and Milwaukee Har vesting Machine companies in each State will be under one management, whereas in the past each division has operated its own offices

"By doing this the company contemplates saving \$500,000 annually in salaries and office expenses. Provision has been made to retain 25 per cent. of the 'block' men. About half of the general agents will be retained."

This will give the mental workers mental work of an unusual character: it will enable them to cogitate on the beautiful workings of capitalism and the identity of interests existing between "mental workers" and the heretofore despised "manual workers."

The American Labor Union Journal the organ of the American Labor Union. which endorsed the "Socialist," alias Social Democratic party, an endorsement that was hailed as a tremendous spread of Socialism by that party, is out with a bitter denunciation of Sam Gompers. It accuses him of joining hands with the whom Gompers pretends such hatred) for the purpose of destroying the American Labor Union and the Western Federa tion of Miners.

The Eastern "Socialists," alias Social Democrats, do not relish this attack on Gompers. Being a decoy duck party,rigged out by the capitalist class, they consistently denounce as "union wrecking" any attempt to show Gompers' friendliness for and connection with the capitalist class.

The Western Labor Union Journal had better be careful. The Eastern "Socialists," alias Social Democrats, will get after it as a "union wrecker" if it don't watch out.

Parry is shifting his ground. He is now beginning to define the differences "lawful" and between "unlawful" unions. As the Colorado division of Parry's National Association of Manufacturers has just entered into a combination with Sam Gompers to destroy the American Labor Union and the Western Federation of Miners in that State, Parry is learning the difference in a concrete-way. A "lawful" union, according to this combination, is one that will help the employers. An "unlawful" union, on the contrary, is one that tries to help the employees, while aiming to abolish capitalism.

Apropos of the discussion raised by "Railroader" on the causes leading to the railroad retrenchment, the following from the financial columns of The Independent of Thursday, Oct. 22, will prove interesting: * * * * "And undoubtedly the re-

duction of shop forces is due in part to a desire to reduce expenses in view of expected dullness. Railroad traffic is large now, as we have said, but some railroad officers are looking forward to ditions. a decline and are getting ready for it. Demand has already fallen off in the

iron trade, owing partly to the folly of some labor unions and partly to the embarrassment of investors. The effect is seen at the ore mines and the furnaces, and in the prediction that wages at the Homestead works will be reduced. Continued decline in the iron trade must affect railroad traffic. "It is true that one cause, and probably the most influential of railroad comone.

sight and other powers will be weak. Where Is Capitalism At?

Amid all the conjecture and speculation as to what the economic condition of affairs will be in this country during the next few years, certain salient facts and figures stand out conspicuously. The first set of these facts and figures relate to commerce, industry and transportation. They show a decrease of imports for September, amounting to \$5,-789,200 in merchandise, and a decrease of exports for the same month, amounting to \$102,214. They show that retrenchnent-the reduction of forces and expenses-is the order of the day, and that oursuant to that order, iron and steel mills are suspending operations and reducing wages, while the railroads are discharging men and contemplate a cut in The second set relate, mainly to pay. agriculture. They show favorable October "crop condition" estimates, that promise large crop returns. They promise the largest crop of oats, the second

largest crop of wheat and the second largest crop of corn ever harvested in the history of this country. These are the facts and figures that stand out so con spicuously. What do they mean? When capitalism at, according to them? There can be no doubt that the first

set of facts and figures are dark and foreboding, while the second offer an apparent ray of brightness. The decreased figures on imports denote an end of the great demand for raw material from abroad that characterized the internal development of the mechanism of capitalism in this country. The figures on export indicate an end of the great demand for finished products abroad which attended the external expansion of that development. The facts regarding retrenchment point to a recognition by the capitalist class, of the two-fold reaction of a movement so essential to their interests, and the necessity for preparing for the disastrous conditions that follow in the wake of such a reaction.

The figures on crops show that agriculture will do much to swell trade. But there is great doubt as to the part the crops will play in export trade, where, it was hoped, they would fill so important a role as to stem the receding tide of "prosperity" and save the country from the disaster which now seems un avoidable. A capitalist authority says anent the crops and export trade:

"The matter of chief doubt has been the part they will play in export trade. Thus far, the answer has not been encouraging. In July, our wheat exports were only 46 per cent. of 1902. In August, and again in September, as shown by this week's report, wheat shipments were much the smallest is more than a dozen years, with the single exception of 1895. In both months, export of corn was less than one-fourth what it was in 1896, 1897, 1898, 1899, or 1900.

"A real crop shortage will always em phazise trade reaction, as it did in 1894, and conversely, very large crops with exceptional foreign demand, as in 1891. may check and reverse a movement of reaction already begun. Neither case appears to exist this year. Among the anomalies of the crop question are the facts that the wheat crop of 1884 was the largest on record to that date, notwithstanding which, trade moved adversely; whereas in 1885 the crop was the smallest in nine years-partly a

failure-trade nevertheless reviving." Early in the year much was heard of the large railroad facilities that would be required in "the movement of the fall Judging from the curtailment crops.' of forces on the railroads, the capital ists no longer expect much from this movement. It looks as if they anticipated the decline in cereal exports, and no longer banked on them to steady con-

been dreaming all my born days. UNCLE SAM-Are you making disoveries?

my fellow switchmen in Buffalo to uphold the ten-hour law, Governor Flower, the Democrat, swooped down upon us with the whole militia of the State and gave the victory to the bosses who were grinding us down.

U. S .- So he did.

B. J .-- Then I went to work as a longshoreman on the Eric Lake, and Mark Hanna, the Republican, cut our wages in two; and when we struck he knocked the stuffings out of us with policemen's clubs. U. S .- Too true.

B. J.-And then I got a job as a trainman on the Chicago & Rock Island Road, and when we demanded that our fellow men at Pullman be not treated as beasts of burden, good God, how didn't Cleveland, the Democrat, and Woods, the Republican, knock us into as many cocked hats with their soldiers and their gatling guns on paper, and how didn't the Republican Depews and the Democratic Whitneys approve of these, their trans-

actions! U. S .- Indeed they did. B. J .-- Now from all this I had dra,

my conclusions. U. S .- To what effect?

B. J .- To the effect that these capits ists were a lot of scalawags, who look upon us workers as their legitime, beasts of burden, that had to be whipp blind if they roared or kicked. U. S .- There are no flies on that er

clusion.

B. J .- But here comes the puzzle-U. S. (looking around)-Where? B.J.-Right here; the identical Demo cratic politicians who browbeat us fore are now making speeches in w they say: "There is no conflict bety capital and labor. The interest of

workers are the interest of the employ ers. And it behooves us, who are employees to resist with might and main the lowering of the wages of the working poor.

U. S.—That's very loving. B. J.—And the identical Republican politicians who shot us and helped the bosses suck us dry are holding the same language.

U. S .- The love of these people for the working class seems to bloom like the rose in June.

- B. J .-- Doesn't it ?
- U. S .- Looks like it.
- B. J .--- And aren't you puzzled? U. S .- Where at?

B. J .- At so much love pouring forth from quarters that otherwise only pour down oppression upon us? U. S .- Not a bit.

B. J .- Well, which is which? Are these Republicans and Democrats our Taking it all in all, these two sets of real friends or are they our enemies facts and figures point unerringly to the after all? U. S .- Don't you remember that Scotch terrier that snapped and growled at you yesterday when you called at John Jones'? B. J .- Blast the brute! I could have broken its neck.

UNCLE SAM AND BROTHER

BROTHER JONATHAN-I must have

B. J .--- It almost looks that way to me. Just think of it: When I struck with

them; they relinquish them: they get ready for the "New Jerusalem": they are seized with a fervor, named religious, and drift to the borders of insanity. Tha former, those with whom the animal predominates, surrender the little mind they have: they become ready followers of whomsoever will save them the necessity of thinking-PROVIDED HE AID THEM TO SATISFY IMMEDIATE ANIMAL NEEDS. There is a third category under this general head. It is not a class by and of itself. It is the connecting link of the other two. That category is the sneerer,-the despiser of man as an agency of intelligent salvation. Out of the ranks of these cynics comes the mob that went to take in the "Show af Elijah III.," and OUT OF THOSE VERY RANKS COME THE ELIJAHS III, THEMSELVES. It is no wonder that New York should furnish the mob: its the irony of fate, however, that Elijah III. should travel hundreds of miles to have the mirror held up to him in this city. No wonder he became furious. Possibly he never understood himself so well as when that mob gaped upon him with their cynic leer-the leer that says "man loves to be humbugged." Coxey Armies, Salvation Armies, Volunteers, Sankey and Moody Revivals, and what not, down/to "Zion Restora-tion Hosts,"---lo the dust raised by the appreaching social upheaval, whose in-fantry body, the Socialists of the land,

A LOGICAL CANDIDATE.

From the pen of the veteran political journalist, Murat Halstead, a series of four articles has been published culminat-

is typical of capitalist cruelty. Prostitution is not an incident of capitalist society. It is not a "thorn," unavoidable to the "rose of capitalism." It is not a leakage, such as no vessel, constructed by man, can expect to be free from, man's works being imperfect. Prostitution is not that in capitalist society. In the social system that the Low-McClellan class upholds, prostitution is a buttress, aye, it is more than that, it is a pillar, without which the capitalist superstructure would topple.

gent medical and philosophical authorities of capitalist society agree, their much vaunted "sacrament of marriage" would be a heap of wrecks. Without prostitution, all their intelli-

would not be large enough to accommodate the applicants.

statesmen realize, that the capitalist principle of using woman as a breeder of heirs for the capitalist would be shattered

the capitalist class feeds. To prostitution the capitalists point their female labor as a means to supplement its

Without prostitution, all the intelli-

tion! gent alienists agree, the insane asylums

Without prostitution, all their honest

Prostitution is a capitalist institution to which the Lows and the McClellans owe the very besath in the nostrils of their class. But prostitution, besides being a deliberately raised social institution of capitalist society, is a stream that

meager wage. And, the stream being

Hampered by their pure and simple trades union training, the motormen have failed to place their reliance upon their class and its interests: they have weakly placed their reliance upon "the sympathy of the public." And now the company avails itself of the motormen's false and timid attitude. The company appeals to the public whether it wants safety in travel or not, and it ties up the motormen in their own net.

Rough is the falsehood of the partial truth that the company utters in this contest. Nor can the motorman break through it and reach his rights so long as his attitude thus plays into the hands of his fleecers. God helps them who have sense enough to help themselves. The motormen's issue is:

Labor is the sole producer of all wealth. To Labor alone belongs that wealth proare the architects of a new social system, I ing with one proving that William Ran- I started, it is from the capitalist class | duced. If others plunder Labor, Labor's

panies' forces and of the suspension of improvement work, is not only an expectation of some general depression, but also a few signs of the beginning of it."

This is also the position taken by The People.

A wealthy glass manufacturer of Indianapolis, Ind., named Emil Bauer, blew out his brains. For several months the glass business has been in a chaotic state, and Bauer believed the country is verging on a panic. Acting under this belief, he committed the fatal act. If there are any workingmen who believe the country is on the verge of a panic, we say to them:

Don't blow out your brains. Keep them in your heads, and use them against the damnable system that causes such terrible fears and the awful self-murders that flow from them.

"This is a free country. Any man can do as he pleases, provided he is not unlawful." That is the theory. What is the fact? Read the following from a news despatch and see:

"The Louisville & Nashville has issued an order against its clerical employees joining labor unions, and some fifty employees are now hunting jobs." The "freedom" of this country is the freedom of the capitalist to do as interests demand.

fact that Canitalism in this country is at the brink of an industrial crisis that will endure for several years, once it is in full swing. Mark Hanna has de-clared that public soup houses will dot the country during the next year. And they are likely to remain with us for sometimes, if past crises afford any pre-

cedent of what is likely to occur in this

Crises will remain a feature of society so long as the exploitation of labor by capitalism continues. So long as the workman must give up surplus value to the capitalist, thereby being rendered unable to buy back all that he has produced, crises will occur. It remains for the members of the working class to end this exploitation and to secure the full product of their toil, thus placing themselves in a position to purchase all that they have created such and end the modern contradiction between production and distribution, with its chaos and anarchy, its misery and destitution, and

Twelve thousand copper miners in Montana are out of work owing to the litigation over the properties of the Amalgamated Company in that state. The strife and disorder due to private property in capital will not cease locally, nationally or internationally until private property in capital itself ceases. Until then the working class must put up with the mis-

its awful crises.

ery and hardship attending it What has become of the anti-child

labor agitation in the South? It was taken in hand by certain philanthropic bodies, aided by the trades unions. They have not been heard from in a long while. In the meantime the evils of child labor in the South grow.

U. S .- Did you love him?

B. J .- Not much, I did.

U. S .- And yet I overheard you addressing him in these endearing terms: "Good doggy, sweet doggy; pch, pch; come, come nice doggy!"

B. J .-- What would you have me do! Growl at him and have him tear me all to pieces?

U. S .- Just what you did to John Jones' doggy is what these Republicans and Democrats are now doing to us. They have been treating us as dogs, using workingmen to satisfy their pleas. ures, skinning us, outraging us right and left. Now comes election time. They want to get into office-a sort of John Jones' house-where they will be able to carry on their system of fleecing us, each side of them, though wanting to get there to the exclusion of the other, so as to have our whole hide to itself. But now it so happens that there are one hundred workingmen's votes to those Republican and Democratic capitalists one, and we workingmen are growing in their way, they need our votes to get in; they want to keep us from voting for ourselves and want us to vote for them .- Hence their present love. Hence we are now "good loggy," "sweet doggy," "nice doggy." Catch on ?

The capitalist class is continually extolled for the enormous responsibilities its members assume. The Shipbuilding Trust proceedings show them engaged in dodging this responsibility; in other words, it shows them to be irresponsible.

MORE EVIDENCE OF "SOCIALIST" CORRUPTION.

To The Daily and Weely People. The city of Yonkers is graced or, rather, disgraced, by a publication called "The Labor World." This sheet, which appears weekly, is owned by a corporation. One of its owners is Dr. P. J. Bauberg, Social Democratic candidate for Coroner of Westchester County. He is also an assistant editor. J. S. Garrity, another bogus Socialist, is editor, while G. Lehrner, also of the same tribe, is manager.

"The Labor World" claims to be de voted to the interests of labor and advertises itself as the official organ of the Yonkers Federation of Labor. It, however, appears to be devoted to the in tcrests of the capitalist politicians and is their official organ, for one will find in "The Labor World," advertisements favorable to the enemies of labor and

unfavorable to their friends. For instance, one reads in this fraudulent sheet the following ad:

"Vote for Judge Kellog. He is all right."

Now the fact of the matter is that Kellog, who is a/ Republican, is all During the recent building wrong. trades strike in this city, Kellog held me of the striking carpenters for the Grand Jury on a charge of assault. There was nothing in the case; a jury in the county courts finding the defendant not guilty. Yet "The Labor World" has the cheek to declare Kellog "All Right." Bosh!

Another advertisement reads

"Vote for M. J. Walsh for Mayor." The adv. doesn't declare Walsh "all right," but that makes no difference, as he is worse than Kellog. This is the same Walsh, who was requested to appoint a union man for building inspector, but appointed an employer insteadulder, at that !. boss bu

Walsh is a Democrat. Eight below his advertisement is that of J. J. Sloane. another Democrat and employer!

Thus do the bogus socialists, with their privately owned papers, "devoted to the interests of labor" and "officially" representing "organized labor," pull the legs of both the working and the capialist classes. They are simply in the labor movement for business, and they are ready to ally themselves with the capitalist political parties whether by fusing with them or by advertising their candidates, while ignoring their own party members and principles, not a word about them being found in "The Labor World."

Out on the bunch! They are a gang of frauds and grafters! Peter Jacobson.

Yonkers, N. Y Oct. 17.

THE KANSAS CITY DEBATES. To The Daily and Weekly People .-The agitation of Comrades Vaughan and Knight has accomplished much good here in clearing up the political atmosphere and showing the difference between the S. L. P. and the bogus "Socialist" party. In all, twelve street meetings were held, with good audiences. The answering of questions was especially interesting. On the evening of Sept. 24 members of the "Socialist" party were present in force. Some of them attempted to interrupt Comrade Vaughan as he was showing up the scabby record of the so-called alist" party. They were emphatically sat down on, to the great amusement of the crowd.

The opposition was given an opportunity to attempt to refute the points de by Comrade Vaughan, whereupon

the representatives of the material interests of different classes in society He pointed out that the capitalist par ties represented the interests of different factions of the capitalist class. He then made clear what was necessary to constitute a bona fide 'working class party, and proved conclusively that the S. L. P. fulfilled the requirements of such a party, and that any other party laying claim to be such a party, no matter what its mouthings might be, no matter how much it might parrot the S. L. P., could be nothing but a counterfeit, a de-

coy duck, a bogus "Socialist" party. Lattimer then took the stand for thirty minutes. He said that he did not deny that the S. L. P. is a bona fide working class party, but that it is not the only such party. He then proceeded to attack the S. L. P., its trade union attitude, and what he called its autoc-

rnev His whole effort was ridicule and misepresentation. He lacked the candor of Knoche, and made all kinds of unsupported statements. For instance, he said that Geo. E. Boomer stanted a paper at Seattle called the Class Struggle, and was expelled from the S. L. P. for so doing.

Comrade Vaughan followed with a twenty-minute speech, pointing out Lattimer's inconsistencies, took up the party's trade union position, showed up the crookedness and scabby conduct of the "Socialist" party, especially dwelling on the actions of Tobin and Sievermann in the K. of L. strike in Lynn, Mass. Lattimer, in his rejoinder, said that

he did not approve of Tobin's scabby work, and that Tobin had been expelled from the S. P. in Boston. His further remarks brought out that he had been an A. L. U. organizer, that he was opposed to the Gompers-Mitchell brand of unions, and tried to make it appear that his party was also.

Vaughan had made the point that some crafts, through organization, had succeeded in getting increases in wages. but that the capitalist class, by reason of the perfection of its organization, had the power to add the increased wage to the cost of production, resulting in an increase in the cost of living, and that this was borne by the whole working class, organized and unorganized; that thus the boss could grant the demands of crafts that held a strategic position, as for instance, the bricklavers, without reducing his profits. This was made clear by concrete examples.

Lattimer took up this point and tried to make out that Vaughan was not a Marxian in his economics: that he (Vaughab) claimed that the working class is robbed in consumption; that his position was populistic. He then went into an exposition of how surplus values were produced, citing "Value, Price and Profit," to the effect that commodities could not rise in price above their cost of production. He endeavored to make a great deal of capital out of this, trying to make it appear that Vaughan

etc. Comrade Vaughan, in his closing ten minutes, amplified this point, showing the increased cost of living in recent years in comparison with the few increases in money wages. He pointed out that when Marx wrote "Value, Price and Profit" that capitalism had not reached the trust stage of development; that prices of P. projectiles of logic and fact. commodities were then kept down to the cost of production by reason of competition between different capitalists or different companies, whereas to-day such conditions did not obtain; that compe-

was not in harmony with his party; that

he was ignorant of Marxian economics

quarters and reading room in Room 216. Sterling Building, Eighth street and Grand avenue. Several hundred copies of The Weekly People and leaflets were distributed at these meetings. A considerable number of pamphlets were sold and a few sub-

scriptions taken for the Weekly People. Fraternally, McF. Kansas City, Mo., Oct. 19.

BOGUS SOCIALISM SQUELCHED IN GARDNER, MASS. To The Daily and Weekly People .-Our State organizer, William H. Carroll, of Boston, stopped with us three days last week, and it was an histori-

cal event for Gardner. Carroll's visit gave us the first opportunity to investigate a real bogus socialist or Kangaroo in action. Well, to begin with the beginning, we

held a well attended open air meeting with about 200 attentive listeners last Friday night, distributing literature, etc. Rain prevented our holding forth Saturday night, so we adjourned to what was intended to be a "Socialist" party meeting, called for the purpose of forming a "local" of that party in Gardner, which they did not succeed in doing.

Gibbs and Bokelund, of Worcester, were the socialist speakers. I am sorry for the so-called "Socialist" party, if they are samples of its talent. Gibbs has an oily tongue. As for Bokelund, his tongue needs oiling. I should think it would be full of blisters. I've met barefaced liars before, and some speakers who can talk and say nothing; but this piece of duplicity called an "orator" is the poorest specimen to expound Socialism and answer questions I've yet

met. We asked him why his party did not repudiate Sieverman, one of their mem-bers, for assisting the Boot and Shoe Workers, to get scabs to take the place of the K. of L. strikers? He answered Sieverman did that as a union man, and not as a Socialist. Ye gods! think of that! The party now assumes another new phase, or, a real Dr. Jekyll and Mr.

Hyde impersonation. Comrade Carroll was bursting to get at him, asking ten minutes' use of the floor, saying he had the documents in "his bible," as he calls it, to prove this Bokelund a liar, as well as a fraud and fakir. The questions were showered on the poor fakir's head so swiftly he was nearly choking trying to answer them. It was a sight fit for the gods to witness. It was my first meeting with the bogus socialist or kangaroo. The old buzzsaw was ripping so fast, I folt like ducking my head a dozen times, for fear it might jump the track.

Comrade Carroll is one of the jolliest men I've met; but great Caesar! when the S. L. P. spont takes a hold of him, I would hate to be a labor fakir or kangarco and let him know it. I would prefer to be in jail.

It is unnecessary to state there was no organization of bogus socialists or kangaroos formed in Gardner this trip. And I guess they thought we owned the town by our actions. We questioned them two hours. That meeting did us

good. I hope it will be repeated. Comrade Carroll left here to-day for Adams. He is a past master in agita-tion work. The S. L. P. can't help but knock out the bogus socialist party in quick order, if Gibbs and Bokelund are good sample of its team work. I've not heard a word of praise from any one who heard them, unless it was a bogus socialist or kangaroo. This last name fits them nicely, especially when answering questions. But I doubt if any animal could jump as quick as this specie

does from lie to lie. It is brains they want, and not feet, to equal there quadruped brother. All of Section Gardner's members were on deck to see the fun, and throw S. L. J. Anderson,

Organizer Section Gardner. Gardner, Mass., October 21.

BOSTON S. L. P. HOLDS MEETING IN ITALIAN DISTRICT. To The Daily and Weekly People.

outdoors this campaign by Section Boston was held last night at Roxbury Crossing. Comrade Copnolly was advertised as the principal speaker of the evening. and another meeting, to be held at the same place Nov. 2, was advertised by the same means. Red cards, reading: "Arouse, Workingmen! James Connolly, of Dublin, Ireland, founder of the Irish Socialist Republican Party, will speak Monday, Oct. 19, and Monday, Nov. 2, at Roxbury Crossing, under the auspices of the Socialist Labor Party. Note-Until recently Mr. Connolly was editor of the Workers' Republic, official

organ of the I. S. R. P." Comrade Connolly held the closest attention of the crowd for nearly an hour, pointing out the characteristics of the platforms of the various political parties, and contrasting the entire lack of work ing class interests in all of them, except the Socialist Labor Party's platform.

Comrade Fitzgerald was then introduced, and corroborated the points made by Comrade Connolly.

The chairman, Frank Bombach, also advertised the literature of the party, and called attention to the grand meeting to be held in Paine Memorial Hall, Appleton street, Boston, Sunday, Oct. 25, 2.30 P. M., when Daniel De Leon will deliver an address that is looked forward to as a treat for all comrades and sympathizers who are interested in the subject, namely, "The Burning Question of Unionism."

Connolly was again called to the platform, and spoke for almost another hour. answering questions, eliciting very warm applause from the audience, particularly when he made the "Socialist" Kangaroo comedians who were in the crowd ridiculous by exposing the senility of their questions.

There is no doubt that the S. L. P. in Massachusetts will come out of this campaign with a clean record, as usual, and with an earnest and thorough class-conscious force of workers, such as the party has never before had in this State. Boston, Oct. 20. M. D. F.

WHY?. BECAUSE ANYTHING GOES WITH FRAUDS.

To The Daily and Weeekly People.attended the ratification of the State ticket of the "Socialist" party in Fanuel Hall, Boston, last Wednesday evening. The howls of these bogus Socialists shows how desperate they are getting for votes. "The Boston Elevated R. R. is the greatest source of corruption in this State," declared Weepin' Jim the Armory Eullder.

"I will allow you to pick out the lamppost and will promise I will hang mydi to it if I would not make a better Governor than Bates or Caston," said Cheap John Chase, the man who lied to a Lowell audience when he denied that F. A. Sieverman was a member of his party, or said he did not know. My chief reason for attending the al-

fair was to see my namesake the Attornev-General, W. J. Carroll, of Lowell who was to speak. Facts secon to point, as indicated by

the letter from Lowell and newspaper clippings in last Wednesday's Daily People, that the bogus Socialists were playing cheap politics.

On Wednesday, Aug. 26, I attended a meeting of the Socialist Club in Lowell. As reported in The Daily People at that time, a young man took the floor and stated that he did not agree with some of the "Socialist" speakers and that it was wrong to discuss the difference between the S. L. P. and S. P., and while he favored the "Socialist" party he was not a member, but if they thought he understoood the question, he might join at some future time.

I did not know his name, but recog nized the same chap when he was introduced as W. J. Carroll, of Lowell, "Our Candidate for Attorney-General," at the ratification meeting. The meeting of the "Socialist" Club, of Lowell, after Aug. 26, was Sept. 2, so that, if W. J. Carroll joined on that date, he would have been a member of the "Socialist" party less than four weeeks, when he was nominated in preference to W. Sherman. their one time candidate for Mayor of Boston, and a member of three or four Boston, and a method by typears standing. Why two W. H. Carroll.

that is, it represents the lower strata of the capitalist class, the small merchant, small manufacturer, small farmer, in fewer words, the middle class,

Why even the capitalist parties recognize class distinction in politics. Don't they offer distinctively "working class measures," "labor laws," and capdidates who voted for them? Don't they appeal to us from the standpoint of working class interests and assure us that protection, free trade, government ownership, etc., etc., are measures especially affecting the working class, and accord ing as we vote for or against them, will our economic condition be improved or rendered unsatisfactory?

Finally, we have in politics the Socialist Labor Party, which is born of the conviction that the capitalist parties, whether of the upper or lower strata, give the working class nothing but promises and appeals, and if the working class would be free it must strike the blow itself at the ballot box. No class distinctions in politics, ch? The proletarian class is strong enough

to defeat the combined forces of the Republican and Democratic parties, and establish the Socialist Republic, a republic of the people, by the people, and for the people. The mission of the Socialist Labor Party is to educate the working class in the principles of Socialism to that point where they will march to the ballot box as a class, annihilate the capitalist system of production, with its capitalist classes on the one hand, and its working class on the other, and proclaim the Socialist Republic, a republic in which those who wish to live by their own labor, shall have abundant opportunity to live, while those who wish to live on the labor of others, as the capitalists and their parasites live to-day, shall be given the same option the capitalist now give the working class-the option to go to work or starve.

Every workingman and all honest citizens should support the Socialist Labor Party. Capitalism is tottering to its grave. The banner of Social Revolution is already unfurled. The forces of capitalism and the forces of Socialism are lining up in battle array, and when the time comes for the final test of strength, and the proletriat is educatel, organized and disciplined, nothing can keep them from defeating the army of the capitalist, winning the greatest victory for the wage slave in the history of the world.

Remember the only way to shake off the bonds of wage slavery is to march to the polls on Nov. 3 as a class conscious body and vote for the principles of the Socialist Labor Party. Aibert L. Waterman.

Dorchester, Mass., Cct. 10.

THE NICCER IN THE WOODPILE? To the Daily and Weekly People :-The fact that 20,000 railroad men have peen laid off recently is not, in my opinion, due to any fear of an impending crisis or to any falling off in traffic. The winter season is really the rush time in the railroad business. It will be but a few weeks now until navigation closes for this sector.

As 1 said, the business is heavy now, and the chances are, it will steadily increase during the winter. To-day all the trans-Mississippi roads refuse to let their cars off their lines, owing to car shortage, despite the fact that many thousands of cars have been built since last winter.

In Nebruska the Rock Island is short 200 cars daily in the movement of grain alone. Other roads are almost in as had shape. The C. M. & St. P. and the Illinois Central are piling up grain in elevators along their lines, and must soon refuse to handle grain until they get the roads cleaned up. On the C., B. & Q. cars are being loaded at night, so as to lose no time after being received. In Northern Kansas the Missouri Pacific is congested. The Santa Fe could use 1,500 more cars in Kansas, alone, than are available. The C. & N. W. have in reason. plain view all the business it can han-

S. L. P. in Massachusetts:

and made to understand their plain duty

an impromptu debate was arranged on the question, "Resolved, That the Socialist party has shown itself a traitor to working class," Comrade Vaughan taking the affirmative and F. W. Knoche, of Chicago, the negative, with thirty minutes each.

Knoche did not attempt to refute the arges made against his party, saying that he cared nothing about the actions of individuals. Almost his whole time was taken up with apologies for his party and repeating the usual rot about the "bossism" in the S. L. P.

He charged the S. T. & L. A. with scabhing it on the carriage workers in Chi-cago. Incidentally, he made some dam-aging admissions concerning W. T. Mills. Among other things he said that in Chicago the Socialist party decided that they could get along without Mills. As this is the home of the Mills School of Social Economy, and Mills being the idol of the bogus crowd here, Knoche's admissions had a very frosty effect on the

Mills worshippers. At the conclusion of the meeting Or ganizer Howard challenged the S. P. to debate on the following night the ques-tion, "Resolved, That the S. L. P. is the bona fide representative of the working class in the political arena." Knoche agreed to meet Comrade Vaughan on this proposition. When the time arrived for the debate on the next evening, Knoche stated that his voice had failed him, and offered C. E. Lattimer, of Seattle, Wash., as a substitute. Arements, were then made for a twours' debate, with the usual division of time. Comrade Knight acted as chair-

CONNOLLY AT ROXBURY CROSS-ING.

To The Daily and Weekly People :-

Gardiner, Mass., Oct. 16.

CLASS DISTINCTIONS IN POLITICS. To The Daily and Weekly People-In an editorial of The Boston Post, Sept. 20, it is stated that no political party can be victorious as the representative of a class. To illustrate this statement, the

Post cites the failure of the Knownothing party in the first part of the last century, and the slave-holding class, or the Democratic party of the South. The Post also asserts that there was no class distinction in our political organizations to-day.

The Post is unfortunate in its illustra tions and assertion. The fact of the matter is that the slave-holding class of the South was subdued by the capitalist class of the North, on the issues of free trade and protection of State rights vs. federal government, protection and federal government being favorable to the interests of northern capitalism. as opposed to the free trade and State rights of Southern slavery. The Civil War was a class struggle.

As to there being no class distinc-tion in our political organizations today, this is certainly amusing. It is well known that the Republican party today stands for trusts and gigantic capital-that is, it represents the interests of the upper strata of the capitalist Morgans, Rockefellers, et al.; class, the To The Daily and Weekly People :- while the Democratic party is anti-trust One of the most successful meetings held and the representative of small capital-

IMPORTANT NOTICE

Socialist Labor Party organizations, wherever an election is being held this year, are requested to telegraph the returns of the S. L. P. vote at the earliest possible moment to THE DAILY PEO-PLE, 2-6 New Reade street, New York City. In sending reports the vote of the previous election should also be given. Messages should be prepaid. They will be subject to press rates.

NATIONAL EXECUTIVE COMMITTEE. Regular meeting held Oct. 23, at 2-6 New Reade street, John J. Kinneally in the chair. Absent, J. Hammer and A. Klein. The financial report showed re-

celpts \$164.35; expenditures, \$97.87. munications: From Los Angeles, Cal., reporting Section meeting and steps taken to raise funds toward liquidation of the debt on The People plant; also about the California S. E. C. having sent out special circular to the membership in the State urging action in building up the Party press. From Connecticut S. E. C. sending financial report and asking for Italian speaker; also ordering five prepaid subscription blocks. From Rock-ville, Conn., about German speaker for local election and other matters. From Pennsylvania S. E. C., enclosing circular ed to Sections in the State, with call for a general vote. From Reading, , to the effect that-a meeting will be held shortly, with speakers from Philadelphis, and asking for information on the matter of the Boudjlanoff-Pollock inction. From Los Angeles, Cal., dissing work done for the Party press and inquiring about steps to be taken next year. Consideration of latter point laid over until after election. From Troy, N. Y., reporting expulsion by Sec-Rensselaer County of G. Bleeker for having taken office in pure and simple union. From Detroit, Mich., sending for stamps and upon general Party matters. From Denver, Colo., as to publication of important article in the near future. From Richmond, Va., ordering extra copies of The Weckly People and comnding the work done in reducing the debt on the Party plant. From Illinois

S. E. C., urging that steps be taken to speedily clear up the remainder of the debt on the Party plant and promising that Illinois will do its share. Other communications were received from San Antonio, Tex.; St. Paul, Minn.; Peekakill, N. Y.; Jersey City, N. J.; Peoria, Ill., and other points, dealing with general Party matters, local agita-

tion, etc. The general vote to fill vacancy on the N. E. C. was then canvassed, showing 504 votes for Timothy Walsh and 209 votes for Adam Moren, many Sections having failed to send report. T. Walsh having received the highest number of votes, was declared elected, and the secretary instructed to notify him to at-

tend the meetings of the N. E. C. Edward C. Schmidt, Rec. Sec'y.

CANADIAN N. E. C.

Regular meeting was held on Oct. 16, headquarters, 256 1-2 Dundas street, London, Ont. Absent without excuse, I. P. Courtenay an dH. Wade, J. Pierce elected to the chair, and in absence of the recording secretary D. Ross acted secretary pro tem..

Minutes of both previous meetings were read and adopted.

NEW YORK S. E. C. Regular meeting held at 2-6 New Reade street, Saturday, October 17, 1903, Comrade Moren in the chair. Comrade Ebert acted as secretary pro tem.

Financial report for September showed income, \$82.57; expenses, \$71.57; balance, \$11. The report was accepted. Letters from Peekskill regarding

speaker and from Albany relative to rganization of section, were acted on. Ballot on nominees for State Executive Committee showed that John Scherer re-

ceived 115 votes and Emil F. Wegener 109. The names were ordered sent throughout the state for election. Letter was received from Secretary of

State showing that nomination for Associate Judge of the Court of Appeals had been filed; also letter from Jamestown, N. Y., describing conditions there. Answered. Letter from Comrade Santee offering resignation as secretary of State Executive Committee owing to pressure of business and lack of time through

tion was accepted and Comrade Donald Ferguson was elected to fill vacancy. Adjournment followed.

Donald Ferguson, Secretary.

campaign work, was received. Resigna-

Meeting of the Missouri S. E. C., Poelling in the chair. Absent without excuse, E. C. Hager.

Communication from Comrade Me-Hugh, of St. Charles, Mo.; O. M. How-ard, of Kansas City, Mo.; National Sec-retary; Comrade McFall, of Kansas City; Minden Mines, Mo.; on general party matters, received, filed and secretary instructed to reply. Secretary reports that Organizer Pierson has started on his trip soliciting for party press and that money pledged on State agitation fund is not sufficient to defray expenses of Vaughn and Knight and same would have to be raised.

Thirty-nine dollars is pledged on Pierson fund and \$27 paid. Verbal reports of State Organizer Vaughn and Knight received.

Financial report, previously on hand, \$6.57; receipts, \$1.80; expenses, \$1.65; balance on hand, \$6.72. H. M. Graber, Recording Secretary.

di WESTCHESTER CO. COMMITTEE. Regular meeting of the Westchester County Committee, held on Sunday, Oct.

18, at 14 Getty square, Yonkers. Comrade Patrick J. Troy presided. Roll call showed all members present. Minutes of previous meeting read and approved.

Communications from the National Executive Committee relative to the financial condition of The Daily People plant, setting forth the necessity of, and suggesting ways and means of, clearing off debt on same before the next national convention. The organizer was instructed to lay this proposition before the branches, and urge immediate and persistent action.

From the State Committeee, a notification to take a vote on candidates to fill the vacancy caused by the resignation of George Abelson. The organizer was instructed to refer the matter to the branches for action.

From C. C. Crolly, of Pleasantvile, describing local conditions, etc. From Comrade John F. Van Tassel,

of Valhalla, requesting a speaker for another meeting up there. On motion it was decided that a com-

mittee of two be elected to go to Valhalla to hold a meeting, and to endeavor to organize a branch. J. H. Sweeney and Paul Wegener were elected for the com-

mittee. Agitation Committees reported good meetings held during the past week in Hastings, Tuckahoe and Valhalla.

On motion, it was decided that the amount of 75 cents, being the shortage of cash on hand as compared with actual expense at Valhalla, be ordered paid to the committee.

by Neil McLean, in answer to congratu- Report accepted, and the committee was instructed to have complete report as soon as possible. There being no more business before the committee, the receipts and disburse ments were then announced, after which the meeting adjourned.

ST. LOUIS AGITATION Successful S. L. P. Meetings Sweep the Deck.

campaign of 1902 Section St. Louis Franklin avenue. The Kangs, thinking to steal a march on us, put up their stand at the above mentioned corner an hour before the time set for our meeting, crowd. This move did not phase the militants of Section St. Louis in the least. We set up our stand directly across the street, and began to bombard them. The crowd came over to our meeting, and the Kangs were obliged to move to Twelfth and Olive streets, where, it was reported,

meeting at Thirteenth and Franklin avenue on Saturday, Oct. 10. We were there with our stand at 7 o'clock, but there were no Kangs to be seen. The drubbing they received last fall taught them a lesson to never again try to steal our place of meeting.

man opened the meeting, and with a few well-chosen remarks introduced Comrade Charles Pierson, State organizer of Illinois, as the first speaker. When Pierson stepped on the stand, the fifty people had gathered around soon increased to about three hundred.

part as follows: "The Socialist Labor party wants the machinery of production which is necessary to make a living with to become social property, so that the benefits of the machinery would accrue to those who operate them. This," he said, 'is socialism.

"But you may be opposed to socialism. If you are, it is because you are kept in ignorance as to what socialism really is, and what the S. L. P. really wants. You cannot expect to get correct information about the socialist movement from the capitalist papers, which are owned and controlled by the capitalist class, the class that robs you in the mines, mills and factories. In order to get a correct understanding about the revolutionary socialist movement, you must read the papers and other literature of the S. L. P., of which I will have more to say later on."

After reading the platform of the S. L. P., Pierson gave way to the next speaker, a wage slave by the name of Poelling, who spoke about fifteen minutes, and was then followed by the next speaker, Wm. Billsbarrow, who is also a wage slave.

Billsbarrow told the crowd that the S. L. P., in trying to organize the working class for a revolution to overthrow the capitalist class, has many obstacles thrown in its way. Fights between the various divisions of the capitalist class are made to appear as being in the interest of the working class. These fights do not concern the workingmen.

The capital class are like a pack of wolves, who work as a unit in pursuing their prey, and when they eatch it they fight among themselves over the careass The carcoss that the capitalists fight among themselves for is the profits wrung from the sweat and blood of the working class.

branch of the capitalist class are booming for Governor a man by the name of Folk, who got a reputation by prosecuting the boodlers, and the capitalist papers are trying hard to make you workingmen believe that it is to your interest to elect Folk for Governor. The crowd that is back of Folk are the ones who got the short end of the legislation, which all the capitalists need to rob the working class. Don't be taken in by the cry, "Down with the boodlers," but let your battle cry be, "Down with the capitalist class, who produce nothing but crime, and up with the only useful class in society-the working class.'

When Billsbarrow stepped down, an other wage slave, from the coal mines of Illinois, was hustled on the stump. The speaker, whose name is Cox, pointed out to the crowd that the working class, at an early period in this epoch, organized trades unions to aid them in their struggles against the capitalist class. When production was carried on by small indi vidual capitalists, the unions were fairly successful. The universal weapon of the trade union was the strike and boycott. Industry has made great progress, until to-day we see everything carried on by

a large scale. While this development was going on the capitalist class made it their business to get possession of the Government, in all its branches, and to-day back of every mine, mill and factory stands the law ready to aid the capitalist class on very short notice.

Have the trades unions kept step with the economic development? No. They still use their old, worn-out weapons, the strike and boycott. All these years they have followed the advice of their fake leaders, who told them that the interests of the capitalist class and the working class are identical; as a result, they have voted that class into power that robs them, and whenever they use their weapon, the strike or boycott, the capitalist class calls the machinery of government to his aid in the form of a policeman's club, etc. The trades unions, instead of being a benefit to the workers, have actually developed into an anxiliary

of the capitalist class. Cox made some telling points by illustrating to the crowd (who saw the points) how the bituminous miners cabbed it on the anthracite miners during the late strike.

In answer to a question, "Are you op posed to trades unions?" he said: "No We want the working class to organize in a trades union that recognizes the fact that the interest of the working class, whether they are coal miners, bricklayers or street cleaners, is the same, and op posed to the interest of the capitalist class. We want a trades union that has declaration of principles that stand for the complete overthrow of the capi-

talist system of production. "Such an organization," said he, "is already in existence. It is called the So-ciplist Trades and Labor Alliance, and it, together with its political arm, the Socialist Labor Party, is working hard to organize the working class for a revolution, to overthrow the entire robber class and emancipate the working class from wage slavery by the making the

tools of production public property. Pierson then took the stand, and in a way of his own introduced The People and other party literature. Then all of the members waded into the crowd and began to sell books and get subscriptions to The People. Did we say all the members? Well, now, how could we forget ourselves in such a way? What we mean is that those members present sold books. Some of them were at home, hitting the pipe and dreaming beautiful dreams about the co-operative commonwealth. The comrades from the East Side made a good showing by coming twelve strong. It was the best meeting we held this year, selling forty-four books and getting six subscribers for the Weekly People.

the capitalist class, who forced us into the mines and factories as soon as we were able to throw snowhalls at the man sitting on a passing wagen?

The success of a proletarian revolt does not depend upon grammar, but upon a clear understanding of class interest, and it is the mission of the S. L. P. to show the workers where their interest lies. Once the workers become class-con-

cious, it will be all up with the capitalists. Then all their knowledge about their good grammar that they blow so much about will not save their necks. Press Committee, Section St. Louis.
