SOCIALLY VOTING IN THE UNITED STATES

The election of 1860 divided the Republicans into two factions. The southern wing wanted to protect slavery, while the northern wing wanted to limit its expansion. This division led to the formation of the Democratic party, which nominated Abraham Lincoln. Lincoln's election as President in 1860 led to the secession of the southern states and the outbreak of the Civil War.

The Civil War was a turning point in American history. It ended slavery and set the stage for the Reconstruction era, during which the federal government worked to rebuild the Union and grant citizenship to African Americans.

The Reconstruction era was marked by both progress and controversy. The federal government passed laws to protect the rights of freedmen, but these laws were often ignored or undermined by local authorities. The southern states also resisted integration and struggled to establish a new social order.

Despite these challenges, the Reconstruction era was a time of hope and possibility. It marked a shift in American society and paved the way for future generations to build a more just and equitable nation.
