## (Special Correspondence.)

Schnectady, N. Y., Dec. 4 .- The below clipping from the Schenoctady Daily Union of this evening, will give the readers of The People an idea of the contest that rages in the local Trades Assembly. At the pervious meeting of the Trades Assembly an attempt was made to prevent the seating of the new delegates of the I. W. W., but it failed. The vote was 49 to 19. Since then Leonard, of the Plumbers, came back from the A. F. of L. convention, and with him about a half-dozen international vice-presidents, to crush the I. W. W. One of them openly said to one of the I. W. W. men, "What, if the A. F. of L. will center its fight against the I. W. W. in Schenectady, and will enter in collusion with the G. E. Co. to oust them !"

The answer was that they were scabby enough to do anything. The following vice-presidents are here,

drumming up suspended locals to take a stand ugainst the L. W. W. and to put the others under their "hypnotic influence": Keegan, of the Machinists, Tracy of the Cigarmakers, Wyatt, of the Printers, and Stewart Reeve, of the A. F. of L. On the side of the L W. W. stood the Moulders' Union, Brassworkers, makers, three electrical workers' locals and two painters' delegates, one cigarmaker and a few others.

The A. F. of L. is dying hard here. There are prospects of having at least four more locals in the next month. We in in the Trades Assembly in order that the Companies may not enter the thin edge of disruption into the

movement here. Local 34, at its last meeting, accepted 63 new members. New applicants are received daily by all locals. At present we have 7 locals, with about 900 mem-

A funny incident happened at the meeting of Punch Press Operateors, 728, which was visited by Keegan and Stewart Reave, who tried to hypnotize it into line. Keegan told them that the I. W. W. was nothing else but a Socialistic move, "Look who are at the head of it: De Leon, Debs, Hagerty." Stewart Reeve, at the next meeting, told them, "Anyone that says the I. W. W. is a Socialistic organization lies. I am a So-cialist and ought to know at least," The Punch Press Operators said nothing and applied for a charter of the L. W. W.

paying in. The leaders of the two sides had made as careful canvass as if political leaders and they marshalled their forces with all the determination of an army officer. While these dues were being paid by the delinquents a subdued but intense excitement prevailed in the tions: hall. There was, however, an occasional break between a Federation and Industrial adherent and a few pleasantries of the bitter sort would be exchanged.

New Delegates.

The scrap began at once after the meeting had been opened. The secretary had hardly begun to call the roll when there were objections and points of order thick and fast. A number of unions presented credentials for new delegates to the Assembly and there was a whole lot of trouble over them. Both sides sparred to keep out any they thought that were against them and it was brought out that President Jackson had been suspended from his union because of his affiliation with the Industrial Workers. The Cigarmakers' union attempted to seat a delegate that was supposed not to take office till January 1 and this caused the first real rumpus of the evening.

Delegate Dennis Mahar rose to a point of order and objected to the seating of the delegate and characterized it as a suap game, and Delegate Leonard in very fierce tones wanted to know "what kind of a game is this?"

Many Talking at Once.

Delegate LeClaire of the Cigarmakers' union said that they were not trying to anticipate the question and stated that they did not know how-the "Federationists pulled wires but that the Industrial ists did things open and above board." With four or five people on the floor all trying to talk at once Martin Clune poured oil upon the troubled waters by say-ing that he did not believe that one vote would make any difference in the ultimate result and the meeting was quiet for the time being.

Called Deserters.

After the question of the new delegates had been settled and they had been obligated by Vice President Hanley, Delegate Leonard brought matters to a crisi sometime before they would ordinarily have been by asking for a personal privilege and he began to fire the first real ech of the evening, Mr. Leonard was speech of the evening, and the floor leader of the Federation forces and he lost no time in sailing into the Industrial Workers of the World. Almost in the first sentence he mentioned the name of the organization and the words had hardly left his lips before there was an immense outburst of applause and cheering from the Industrials. This showed that they had many friends

(the "Bund") shouted: "If you don't Dear Mother :- Having just now received your letter of November 9th, and not wishing to leave you long without an answer, I reply at once. I shall endeavor to describe all the incidents of which I have been an eve-witness. On the 20th of October, a general political strike was begun all over the empire. All factories stopped, all railroads, street cars, cabs, offices, banks, water works, gas works, telephones, in short, everything stopped. The workingmen in the water and gas works were replaced by soldiers of the engineer corps. So passed the first week of the strike, comparatively in a quiet way. At last on October 31st was proclaimed the Manifesto of the Constitution, which accorded to the people the inalienable citizenship rights of habeas corpus, freedom of speech and press, and equality

Warsaw, Nov. 21, 1905.

for all-a paper manifesto. The martial law, exclusion laws, manifold reprisals, under which the greater part of the population in the Kingdom (Poland) and the whole empire suffered, all this was not abolished. It was still permitted with impunity to arrest and kill people on the streets. On November 1st, from early morning on, workingmen and general, public began to congregate on the streets, preparing for a demonstration, especially on Marshalkovska street but the soldiers were constantly dispersing them. I was on the street from early morning. All of a sudden, about noon, we were notified by the police captains and army of-

ted, that shouting is allowed to one's heart's content; but that, in case the soldiers are attacked or government property assailed, the masses would be dispersed by armed force. It seemed as if all the city population rushed out into the streets inside of one minute. On Marshalkovska street, about 1 p. m., between ten and twenty thousand people, Socialist workingmen, students and others, gathered together. This multitude, after listening to speeches by several agitators, unfolded red flags and singing "The Red Banner" (Polish Socialist anthem) and shouting: "Down with autocracy!" "Long live liberty!" "Long live the republic!" moved forward. On Bielanska street they were met by the members of the "Bund"

(Jewish Socialist workingmen). One cannot imagine this meeting. The Jews and the gentiles embraced and kissed one another, and taking one another by the hand, all moved toward the Governor-General's palace.

Darkness was fast falling before they reached the palace. The building was perfectly dark and no sound issued therefrom. We stood before the palace, lisand "good conditions" were mere figtening to the speeches, and shouting ments spun from the cunning imagina-

release them, we will storm and destroy the City Mall". All of a sudden from Bielanska and Wierzbowa streets a few hundred cossacks rushed out and began to charge the crowds. But nobody moved. Seeing that one of the officers shouted an order: "Cut them down!" the cossacks took out their sabres, threw themselves upon the crowds, and an awful slaughter began. All began to run. I, luckily, passed through the cossacks' rows unscathed and ran home. There you have an illustration . of our "constitution"! While in some quarters of the city demonstrations were not disturbed, in others the crowds were dispersed with arms. Many persons fell dead, but none of our family or acquaintances suffered. Next day the Governor-general issued an order, that on account of acts of violenve, which occurred the previous day,

members of the Jewish Socialist Party

all gatherings were forbidden. What acts of violence? He must have been probably mistaken; he must have meant acts of violence committed by the cossacks upon unarmed people. The Constitution was revoked. In Russia proper it was worse; there thousands fell. Organized attacks were engineered upon Jews, students, Socialists. A few days later martial law was proclaimed in all-Poland. The army is partly in revolt. There were cases in Warsaw, of soldiers refusing to shoot upon the people. An amnesty was proclaimed. What amnesty, you will find out by reading several manifestos, which I enclose herewith. They tried here also to start a Jewish massacre, but did not succeed. The organization for "self-defence" is very strong here. I shall send you soon daily papers, describing recent events. The general strike was interrupted, but not for long, only until December 17th, and then all will stop. We will see, who will be victorious! Have patience and everything will be all right; we will get all we want; we will mete justice upon those who for so many years have murdered and tortured us. So 'long then. Don't worry. With God's help, nothing will harm us. I kiss you and embrace you a hundred times.

Your Loving Son.

Members Declare that Backbone Trades Assembly is Now Broken.

What their own members declared to be be the first act in the breaking of the backbone of trades unionism was ted in Trades Assembly hall last night amidst most tumultuous and exciting circumstances. The fact that the question of admitting the Industrial Workers of the World into the Assembly was to come before the meeting was sufficient to pack the hall with delegates and members of different unions. The crowd extended into the outer rooms and even to the stairs leading into the street It was beyond all doubt the largest meeting ever held by the Trades Assembly and also the most exciting. For three hours and a half the delegates fired per-sonalities at each other and with almost every utterance brought out to the fullest extent what a bitter feeling existed between the American Federation of La-bor and the Industrial Workers of the World.

The man was also put in irons. The whole affair was a violation of the United States Marine Laws, as William Boughton was hired in San Francisco to go to Hillo and return. Under such circumstances the master must give a month's wages and passage money back to the home port if he wishes to discharge any one. Comrade William Boughton, refused to sign clear, and came to Honolulu to report the matter to the union agent, and the first answer he got was: 'Why didn't you take your money and sign clear?' The case was brought before the meeting on October 16, and I spoke in defence of Boughton and moved that the master of the 'St. Catherine' be notified to re-employ Boughton or withdraw the crew from the vessel, which was seconded and everything went smoothily till the agent, Charles Coldin, protested that shouldn't go into trouble for one man, and said that I was ridiculous in wantmanded the release of all political prising to tie up the vessel. While we were marching, the soldiers gave us the right of way, saluting the red flags and taking off their caps. Seeing that the multitude was orderly, the authorities purposely ordered larger detachments of the military not to permit the people to pass their ranks, but instead of that to break through the through the throngs of the multitude. We let them go through, warning all not to touch any of them, so as not to give them any cause for attack and slaughter. We understood the tricks of the government's agents. The military passing through our throngs, saluted the red banners. Having met several police captains, we shouted: "Down with the police!" "Long live the military!" But the police only took their caps off and answered: "Heretofore we were your enemies, but now we are your brotherst" Yes, "brothers"! But a few hours later they gave orders to shoot at their "brothers"! Later on we returned to the Marsholkovska street, where the multitude began to quietly disperse. The streets were festively illuminated. It was about 8 p. m. I went to the City Hall place, where a vast crowd de

## WEEKLY PEOPLE, SATURDAY, DECEMBER 23, 1905.

# .: The Labor Problem and its Solution .:.

[From the Miners' Magazine, Nov. 30.] Secretary-Treasurer Haywood of the Western Federation of Miners, addressed the Iron Molders at Trades Assembly Hall, Friday night, Nov. 24th. The following is a brief synopsis of Haywood's speech:

Mr. President and Fellow Workers :-The iron molders invited me here this evening to talk on Industrial Unionism, but awing to circumstances over which I have no control. I find myself without a subject. While the American Federation of Labor has been in convention during the last ten days, the labor question has been done up in a neat pack-age, tied with a blue ribbon and filed away in the archives of time. The Pittsburg convention has waded through the address of President Gompers, I use the word advisedly because of the shallowness of ideas. To borrow a simile from urke Cochran, "Mr. Gompers' address is like the Platte river, a thousand miles long and a foot deep." The delegates in ention have settled practically every serious problem confronting organized and unorganized labor in this country. This has all been accomplished by the means of resolutions. That you may better understand what a resolution is, I will define it. A bunch of hot air tied up in a paper sack. An extra large one was sent to the strikers in Russia. With these formidable weapons they have adjusted all questions. Reciprocity with Canada on the north, the Panama Canal on the south, foreign immigration on the east and the Chinese question on the west. The map of the United States has been changed by taking the territories of Oklahoma and Indian Territory out of their respective places, changing them end for end and making them states, thus adding two stars to the constellation of "Old Glory". Every woman in the land has been granted the right of suffrage and the child labor problem has definitely settled. Now that the has been well accomplished, it is meet and fitting that festivities of joy indulged in, the three hundred and fifty delegates will sit down at a ban-uet table, to the viands and wines pur-is the result of the labor of thousands

the blood of Homestead strikers, the ows 'and orphans. The banquet of the Pittsburg delegates is the feast of labor's Belshazzar. Those assembled can see the writing on the wall. It reads,

industrial liberty, class struggle, Industrial workers of the World. The labor leaders to whom the chairman referred will receive their merited rebuke. Such men as Mr. Gompers, Mr. Mitchell, Mr. Mahon and others of national prominence in the labor movement know full well that there is no identity of interest between capital and labor, and notwithstanding the hundreds of resolutions that have been introduced in the great labor convention, there is still a problem to solve and will be as long as one man or one set of men reap a profit from other men's toil. This problem can only be met and overcome by an economic organization of the producers, united in a compact force, recognizing the class struggle, with power sufficient to enforce their demands on the political as well as the industrial field, such an organization as outlined in the plans and formation of the Industrial Workers of the World, which takes into its fold every person that is a wage earner, whether they are brain or muscle workers. The pure and simple craft organization/ has passed its day of usefulness. It has been obselete since the time that the machine took the place of the individual worker and his crude tools. As an illustration I will mention Governor Douglas of Massachusetts. Some years ago he was in the little town of Golden, Colorado, working at his trade as a shoemaker. Do any of you believe that he saved enough money in Golden to build the tremendous factories that he now owns in Brockton, Mass.? From a rejoicing. small beginning and with borrowed capital, or perhaps a legacy from a rich uncle, he established a factory at Brockton, which now employes thousands of people. The building of the factory was not ac-

To me the red wine looks like and cities throughout the country are the distributing points from which Mr. white wine like the tears of their wid- Douglas reaps his profit, the surplus of labor, the difference between that which the producer receives and that which the consumer pays for the finished product. Governor Douglas himself was a shoemaker, but it would be impossible for him to take a place in his own shoe factory, for the reason that there are no shoe makers employed in the factory. Every person there is but an appendage of a machine. Each one is a specialist in his particular line. Children and women and men are employed in the different departments' and none are there but who brings revenue to the Golden shoemaker What is true in this industry is true in every other industry. Trades unions have attempted to meet the encroachments of the machine and the combination of capital by splitting their unions up in as many different crafts as the specialized trades call for, until at this time the metal industry has in the neighborhood of fifteen different international unions all of them aspiring with their employ ers for as many different agreements, expiring on as many different dates. Is it small wonder that organized labor is said to be divided? One of the momentous happenings of

the American Federation of Labor convention was an agreement arrived at for the amalgamation of the wood workers and the carpenters. It is said that the delegates cheered and threw up their hats and that the women in the convention cried with joy. Suppose that the different crafts of the metal workers could be amalgamated into one depart ment and that their department would combine their strength in an industrial organization of all other departments? Then, indeed, there would be cause for

The Western Federation of Miners is an industrial organization and has never been brought to see the advisability of dividing its strength. Among the membership we have blacksmiths, machinists, iron molders, rope makers, stationary and Hoisting engineers, firemen.

bermen, trainmers, muckers, teamsters, chuck tenders, tool nippers, powder monkeys, ore sorters, batterymen, vanner man, amalgamators, tappers, feeders, charge wheelers, roasters, motormen, electrical workers, these and many others, among whom are miners, both coal and metaliferous, and it is because the Western Federation of Miners is organized in a compact body of all men em-

ployed in the mining industry, that made it possible for them to go through a two years' strike, the bitterest that was ever waged in this country, and ome out with more members than when the strike was inaugurated, a record such as would be impossible for any organization affiliated with the American Federa tion of Labor. Not because you have not as good men, but because you are tied up with sacred contracts for which you have a higher regard than you have for the fellow man that is working with you. If you need proof of this assertion, look at the strike of the section men on the Denver and Rio Grande railway system. While the section hands are on strike, representatives of the five great national brotherhoods are in Washington, supplicating with the President not to interfere with railroad rates and giving as their reason that it will cause a reduction in wages, if railroad rates are reduced. We wonder if Messrs. Morrisay, Clark, Stone, Hannahan or Perham have in mind the wages of the section hands.

They are working for \$1.40 a day, having been reduced to that figure during the panic of '03. None of the gentlemen mentioned has ever said a word in favor of or in support of the section men's strike. Why? Because the organizations that they represent have schedules with the Denver and Rio Grande! The engineers and conductors seem entirely ob livious of the fact that their very lives depend upon the character and ability of the men employed on the section. This

is only an instance of the number of times that the railroad organizations have scabbed on each other. The machinists and boiler makers have been on strike on the Sante Fe system for nearly two years. Previous to this time the telegraphers on the same system went

run on scab orders and now they will pull out of a station with a crippled engine and step at the first water tank and scab on the machinists and boiler makers. The strike of the telegraphers on the Northern Pacific is another instance of the sacrifices that have been made on the altar of sacred contracts and schedules.

It is the proud boast of the Western Federation of Miners that there is not an agreement in existence between the organization and any corporation, company or other employer. As an industral organization the doors of its local unions are wide open to any person employed in or around the mines, mills or smelters. A card in good standing from any labor organization will be accepted in lieu of initiation fee. The. only apprenticeship that you need to have served is that of a job hunter. In this respect, the industrial unions extend a hospitality and a degree of fraternity to trades unionists that they do not enjoy among themselves. The system of apprenticeship as established by the printers, painters, plumbers, plasterers, and other trades unions, is nothing less than a form of bondage, serfdom and slavery that has no place in a labor organization or a country believing in free institutions. You take the position that there shall be a certain number of apprentices to a certain number of journeymen, never many of the former as of the latter. You do not even provide for the boys that you are rearing. Forced out into the world, they must take up vocations that are not under the jurisdiction of craft unions or work at a trade as non union men. The pure and simple trades unions are responsible for the deplorable condition of the working class; the walls that you have built around your unions have been of no material bene fit; they are responsible for the open shop. It is the result of the closed union. Open wide your doors so that every person employed in the industry in which you are engaged may join your union. Combine your forces with the industrial unions of other departments and you will be able to carry your entire mem bership to a higher plane of life.

At the public convention which took place on October 31st, 1905, in the carshops of the Vienna Railroad, the railroad workers of the Kingdom of Poland unanimously adopted the following resolution:

The Czar's manifesto of October 30th. 1905, does not give us any guarantee that his promises will not remain empty words; the manifesto may prove to be but one of the manouevres of the blood-thirsty Government, it is but one more effort to crush to the earth the working people's revolution by a concerted action with privileged classes. One real guarantee of the good faith would be the immediate proclamation of complete and universal amnsety to all socalled political prisoners, without any exception; the abolition of matrial law and re-enforced defense, and the crea-

tion of a people's militin. Further steps in this direction should be the convocation of legislative assem blies on the basis of universal, equal, secret and immediate suffrage, without distinctions to sex, nationality and religion, with a separate constitutional assembly for the Kingdom of Poland, together with the assurance to the working people of an eight hour working day and a true labor legislation with an insurance for old age.

## (Continued from page 1.) General Disorder.

The room was in an uproar at ence. There were points of order raised on the ground that Mr. Leonard had spoken the personal privilege and had no ight to make a motion. Finally Delegate Mahar moved for the suspension of the rules and this brought out the first contest of voting strength of the two fac ns. First a vive voce vote was taken but it was utterly impossible to decide by that method as the mighty roar that arose from each side was about even. Then a roll call was decided upon and ring the calling of it there was great confusion. A number of anions were acted to on the ground that they had paid up their dues for the past year and a half and had no right to vote. The chair sustained these objections, but before the decisions were reached the most notic conditions prevailed. Charges of unfairness and trickery were as thick as the smoke that filled the hall. President Jackson nearly wore out his gavel but he could only restore order when the

Delegate Clune secured the floor after awhile and appealed to the delegates to be calm and let both sides be heard. "For God's sake," exclaimed Clune, "let us discuss this question in a reasonable manner. Give us of the Industrial Workers a chance to be heard." The appeal was fruitless for the time being, however, and pandemonium reigned while eight or ten delegates yelled for recog-

nition from the chair. In a moment of quietness Persident Jackson said: "We will give you Federationsts all the leeway you want but we want to be heard.'

The biggest storm of the evening with the exception of the final close of the meeting came when Delegate LeClaire arose to a personal privilege and asked Leonard a few questions. The questions turned the meeting into a laundry and to wash some of the unclean linen of the Plumbers' Union, Among other questions asked by LeClaire was whether Leonard

This new move completely took the Federationists by surprise and when the aves were called for the Industrials let out a tremendous whoop of approval, The Federation people also emitted a vigorous negative vote.

Like a flash President Jackson de clared the question carried and also declared the meeting adjourned though the delegates had not even begun their regular business. When the decision of the president became known every delegate was up in a chair howling like mad. The Federation people were furious with rage. - They ran taward Jackson crying out "dirty trick," "you are a scoundrel." "throw him out" and for a moment or two it looked as if bodily harm would be done. There were one or two scuffles between individuals of the factions but the combatants were separated before any harm was done. President Jackson and other Industrial leaders smiled at the rage of the Federation people who talked of re-organizing the meet "g but finali7 they calmed down and decided to wait till the next meeting for satisfaction.

LINING UP. [From the Faribault, Minn., "Referendum," December 2, 1905d

The dark line just beyond the horizon is giving way to silver-lined clouds; sunshine is breaking through, and the naked eye easily discerns the rays shooting into the heavens.

The fog of fusion, confusion and compromise with capitalism as a means of relief to the working class and of putting an end to the present order of things, is clearing away.

The last National Convention, which was held at Chicago in 1904, called in the name of Socialism, was an educator in matters which, had things not turned out as they did, it might have taken years to

With 136 delegates representing the middle and capitalist classes capturing the convention, and virtually throwing out fifty-two Socialist delegates representing the working, class, this convention was the initial means of melting the dark clouds shrouding the future status of International Socialism in America.

Like a stone wall, just this side of the dark horizon, stood the schooled hunch of stalwarts, the S. L. P., with party owned press, shooting its arrows of experience with disorders, disruptions, treachery, traitors, crooks and thugs, into the loose net-work of the Berger-ized A. F. of L-ized Social Democracy and aggregation of mercenary hunters from the capitalist political state, to such an extent that the power of the misleaders of the working class, great as it seemed at that time, began to crumble as early as July, 1904

But two of the private-owned press the "Referendum" and the Montana "News," dared to bar this mass of lions in charge of the bogus Socialist party in their dens.

But the time has arrived. The launching of the Industrial Workers in 1905. ough crude as yet, has at least roused the INDUSTRIAL workers to the necessity of an organization that will prove to them that solidarity and the knowledge that the injury to one is the injury to all of them, are the right road to class-

consciousness; and no doubt this organization will include ALL the workers. Following all this, the bunch of capitalist gentlemen in charge of the bogus party have thrown from its organization thousands of its workingmen and women, and thousands have left it.

In New Jersey, Massachusetts, Minne-sota, Montana, Nebraska, Colorado, Kentucky, arrangements are being made by the revolutionary element of the Social-ist party and the S. L. P. to join hands on the laid-down plan of International

Socialism, abolishing state autonomy, with the present S. L. P. plan of one platform for all, and one constitution for all. The constitution is to be so framed as to debar all but workers from the organization, and so as to make a TWO-THIRDS vote of the members in good standing to change it, thus preventing the grafters and sky-pilots from getting con-

trol of the organization. Thus the whole fight will be against capitalism, and NOT fighting the capitalist individuals in the organization, trying to line them up or to line them out.

In every state of the union there are hundreds ready for this practical program, and the only possible program. The S. L. P. has the organization, and the tactics, and the fighting qualities. The revolutionary element of the bogus party has had good schooling, to that extent that they are down and out, and

ready to join hands with their weaker -weaker as to numbers-and line up for the onward push to the Socialist Republic.

On October 22, I left Honolulu on the chooner Helene, and while I was at sea charges were brought against me of having brought the union into ill repute by having slandered its officers, etc. The same gang who preferred charges against me tried me and recommended expulsion. I arrived in San Francisco in time to attend the meeting at headquarters on November 20, where the Honolulu trial committee's report was read, and a motion was made to accept it. I immediate ly objected to such injustice and laid proofs before them that I was accused and tried while at sea, and if they were so anxious to expel me they had to abide

by their constitution and grant me a trial committee of five to investigate.

E. Ellison, temporary secretary of the Sailors' Union, who is the right bower of Andrew Furuseth and the rest of the fakirs, ruled that I had already received a trial and as to my being at sea, it was my own fault. The fakirs further admitted that there have been been many members tried the same way, and that I was no better than the rest. Ellison brought forth the article about the Sail-

People, and he stated such was enough to convict me. He was at last urged to read the whole, article before the meeting; and he didn't seem to feel at ease while doing so, either. The fakirs didn't attempt to discuss their own exposure, but simply did their utmost to create personal hatred against me, by howling that I was a scab, and ought to be denounced as a slanderer, and that I was trying to disgrace the union by bringing it before the public in a scab paper. At this point the fakirs were interrupted and challenged to prove the Daily and Weekly People a scab paper, which challenge none of them pretended to hear. The fakirs proceeded by throwing bouquets and praises at Andrew Furuseth, and also a little praise at one another, of what they had done for the

union. They said that I was ignorant in the line of unionism, etc., and that C. Coldin, agent of the Honolulu branch Trades Council, to dominate its affairs, of the Sailors' Union, who used all his influence in denying protection to W Boughton, who was done injustice on the barque St. Catherine, was a good union man. The fakirs thus approved of his treacherous acts as those of a good union

> I then pleaded to the rank and file that the charges against me were no more or less than lese majeste to the officers of the union, that the consti-

fore, a motion was made that I should retract everything which appeared above my name in The People as being false, and to sign an affidavit for the same

within one week. I again protested that there was nothing for me to retract and that they-the fakirs-had no right to bring up any question that had already been dealt with. Ellison then stated that it lay before the union either to swallow what I had put before the public or make me retract and apologize to the union (or the fakirs), as he meant. The motion was railroaded through, anyhow,

and declared carried, and I was denied the appeal of division. Will the officials of the union still deny that whatever they say must be so? For the very purpose of taking advantage of me they violated their constitution and by-laws When they have the privilege of doing such dishonest, barefaced acts, it stands to reason that they are the rulers of the union. If I were to have committed the worst of crime towards the union and had charges brought against me, and fakirs, the only thing that would be re-

quired would be to have the fakirs give ne praise as a "good union man" and the charges would be thrown in the waste basket.

The next meeting, on November 27, was announced how I refused to obey the holy commandment of the fakirs by refusing to call myself a liar, and henceforth a motion was made to expel me. F Anderson, treasurer of the union didn't seem to allow the matter to trouhle him whatsoever. It was his opinion that I had nothing to retract, and that everybody was free to express his opin-The fakirs began to bombard me in

all directions, and enjoyed the advantage their will. of slandering me before their worshipers and men ignorant of the whole truth. The fakirs had the opposition of a few class conscious men, which made it a sort of interesting affair, and therefore there arose all sorts of objections in regard to the imperial rulers of the union trying to expel a member without trial and, furthermore, of trying to kindle the fire which had already been

anenched.

His imperial majesty ruled that I had dready received a trial and wasn't enitled to another hearing. This caused confusion in the meeting and questions were hurled at my opponents, such as 'Has not the trial committee's report been voted upon last meeting and defeated?" After the fakirs got tired I has always complaints to shoot into the stood up to speak for myself and while so doing the previous question was called for and railroaded through. His imperal majesty ruled that I wasn't entitled to speak in the meeting, because I had refused to apologize to the fakirs. This stirred up the troubled waters again, and E. Ellison began to yawp of how I had violated the pledge to the union by having revealed the proceedings of the meetings, and he was baffled by a comrade asking him: "Why were the proceedings of the union published in the Coast Seamen's Journal?" He then continued to assert that I, as a member of the Sailors' Union, was pledged to look upon every other member as my brother (even when wolves in sheep's clothes?) and since I was exposing them and de-

nouncing them as fakirs and misleaders. it was not a brotherly act; and that I was pledged to be faithful to the union until death (he meant faithful to the fakirs until death), and to work for their interests, "Just think of it," he coared. "he has accused us before the public of having assaulted him. That means we are thugs and sluggers," and he gave me a hint by looking directly at me and saying: "I hope there won't be any slugging here to-night." I again stood up to defend myself. The fakirs made a rush for me, but were surprised to find themselves met by a dozen strong men, After a slight commotion the motion to expel me was voted upon and carried by two votes. I was then declared expelled henceforth. A great victory for the fakirs! With all the intelligence they claim to have the fakirs were afraid to let me use my privileges under the constitution of defending myself. The fakirs well knew that had I been permitted to speak that they would not have been able to railroad me out of the union by such dishonest means

railroad me out of the union, and, there- | blacklisted by the fakirs because I protested against the injustice done to W Boughton, and exposed them in the Daily and Weekly People for it.

The fakirs claim that the lamb must feel safe to lay down with the lion, but they don't feel it safe to lie down with those who expose them and ruin or damage their business. The officials of the Sailors' Union claim that the Socialists must change human nature before they can accomplish anything; but they do not feel it incumbent upon themselves to do likewise, for they want to place the lamb in the lion's den and make him feel safe while doing so. Of course, they have only managed to do nothing else than betray and mislead the workers right into the lion's jaws, there to be devoured. The seamens' fakirs also claim that the hell ship is a thing of the past and seamen ought to be satisfied and not kick too much. It is all very well for such leeches to advocate such a doctrine, when they don't have to go to sea themselves; but simply live on the overworked seamens' dues-and what they can make on were I to be on good terms with the the side. The sailors, in fact, have n union whatsoever, but simply a job trust, where he pays seventy-five cents a month for the privilege of hunting a job as long as he is on good terms with the labor fakirs. Were they to be excommunicated by them, they are immediately barred from employment. The officials or rulers of the Sailors'

Union still have worshipers to aid them, but they are getting scarcer every day. The majority of the sailors are so dis gusted with this type of organized scabber that, out of about 1,000 sailors ashore only forty or fifty attend the meetings. They seem to have given up all hopes, and are waiting for something better. They are subdivided amongst themselves and are individually paying dues against

I have been blacklisted by the fakirs for expressing my opinions and telling the truth about them; still, nearly every sailor that read my analysis felt delighted over it and claimed it to be nothing else but fact.

Andrew Furuseth realizes the fact that the sailors are losing confidence in him, for he has not long ago begun to com-

plain and ask "What is the matter with the sailors nowadays? Why don't they attend the meetings?" etc. I will answer Mr. Furuseth by telling him that the sailors are beginning to wake up, and realize the fact that they are being misled. They furthermore realize the bossism in the union, which is run by a few who run it for their interest. Furuseth seaman's ear, such as backing out a vessel and delaying it for a few hours or minutes, getting drunk, etc., etc. If Furuseth was to earn his living before the mast he would very likely have a different opinion. He would perhaps be the first one to turn his back from an old hungry and rotten hulk, whose gear is dangerous, and accommodation and living poor. Still he takes the privilege of standing on the throne and deciding what a sailor should do. He wants the sailors to be his servants, instead of he being a servant to the sailors. The hell ship still exists, and though

the Sailors' Union was organized to have a decent forecastle for sailors to ilve in and be treated decently by those in command, the sailors still live in what can be termed a pig stall and are treated like dogs. The only clause of the Sailors' Union that has been successfully fulfilled is this:

### Translated by Daniel De Leon.

In order to understand our own time it is absolutely necessary that we know something of the times that have gone before. The generations are like links in a chain, all connected. The study, by which we can learn what has been done and thought before us, is history, and this is perhaps the most fascinating of all studies. Many historians fill their books with nothing but battles and the doings of "great" men, but happily this style of writing history is becoming obsolete, and the history of the people is taking its Socialism is more concerned with the history of the people than with the doings of kings and queens; and with a knowledge of the history of the people we can better understand how the great men achieved promi-Eugene Sue has given us in the form of fiction the best universal nence. history extant. ## CLASSICAL LITERATURE.

We are frequently asked for advice as to books that should be read on certain topics, and as to what constitutes good literature. So often are we asked for such advice, that we deem it a need probably widespread among our friends, and in order to help them in the direction of good reading we have made a careful selection of standard works representative of some of the greatest authors. These books are for thinking people. They are not books for a day but for all time. We can supply the books, cloth bound, for 50 cents a volume, which includes postage. Such books make ideal holiday gifts, and if your wife, your sister, or your sweetheart, or anyone else, contemplates giving you a present, tell them you would prefer one of these books to anything else. Orders must be accompanied with eash, no accounts opened. The titles are:

Aristotle's Ethics.	Lessing's Nathan the Wise.
Augustine, St., Confessions of	Marcus Aurelius, Meditations of.
Bacon's Essays.	Mazzini's Essays.
Balzac's Shorter Stories.	Mill's Liberty.

"THE MILWAUKEE IDEA"

Sir :- It affords me great pleasure to | Idea." It is, not right to build up a address to you this open letter. Many and amusing are the mistakes which you nake in your career as demagogue. Frequently have we pointed out these mistakes and glaring contradictions in our party papers, but you continue right along and seem not to be able to break with your old habit. Is it, perchance, that yourself do not understand where "are at," like the old politician, or tand where s it your intention willfully to lead hose who trust in you to evil paths?

Why, for instance, do you tell the readers of the "Herald," in the above ationed issue, that the platform of the Industrial Workers of the World contains contradictions? Why did you not, as if behooves a man, point out these as? But your habit of falalfying about anything that seems to be Milwaukee Idea" teaches that both arms of the body should be active, but both in own. There are, of course, no contradictions in the platform of the I. W. W., and you know it, but you surely think: "The dirt I throw up in the air will always fall on some person." You need more strength. You want to grow like all the political bostes of the old parties. You want to gain a name. You would like to become a powerful dema--your ambitions, how we do ad-them! political machine as you say yourself with money which is derived from sources that hold contrary views. And yet you do it.

To further illustrate your insincerity with "the Milwaukee Idea," it is only necessary to mention the so-called News-paper Writers' Union. This organization, with a total membership of half a dozen members, was formed for the sole and only purpose of gaining entrance into the Trades Council. It was not organized for those reasons which you state in the "Herald" ought to be the underlying basis of a trade union. Not for these reasons was founded that Newspaper Writers' Union, so-called, to which surely no S. L. P. man will ever get admission, but, as said before, to break into the

I promised to prove that every wanted further investigation they could have it by granting me a committee for the same, and give me a fair trial. It made the fakirs sore when I jeered at them for calling C. Coldin a good union man. I concluded my argument by showing that the position the officers or fakirs held against me was as if they were the whole union themselveswhich, nevertheless, they are. It made them look sort of unpleasant when I accused them of avoiding the real question by trying to create personal prejudice against me, by slandering me in all

Ellison then pleaded to the rank and file by spouting: "Just think of it, com-rades! He has defamed this union before the public, and called its officers fakirs and our secretary, Andrew Furuseth, a chief misleader and a scab-herder. Now, comrades, you all know very well that such is all fake." So that he received numerous answers of "yes," but are strong enough and to his misfortune, it was answered with about an hour, a vote was taken to expel me, and it broke some of the fakirs' hearts when the motion was lost. Therefore, as I was unjustly tried, and as the fakirs failed in their dishonesty, they immediately launched another scheme to

The seaman was, in the past, in the grip of one thief, but, at the present day, he is between two of them, that is, the shipowner and the labor fakir. In the past, the shipowner had to take the trouble of looking after the employe and blacklist his so-called unfaithful servants, 24, at Harugari Hall, 10 & Carr streets. but to-day the capitalist is relieved of such a burden because he has the labor in German and English on the Indusfakir to do it for him. Nothing else was needed in order to add loftiness of sentiment, the world over, to the loftiness of purpose that the Russian-Polish Revolution is setting on foot the world round, than the letter, written from Warsaw by a son to his mother in this city, and published elsewhere in this issue under the title "The Revolution in Russia and Poland". together with the documents that accompany it.

The letter and documents are news, not only of the first magnitude as news, but fresh from the living, the palpitating, the active stream-the firing line in the front ranks of the great battle that has but begun in Europe, aye, the world over.

The barriers of race and creed, artfully raised by the despot class in the ranks of the Working Class, have melted away on the field of atcion. In front of the Crar and his henchmen, the Jew and the Gentile workingman have recognized their kinship as common wage slaves. The two streams, long held spart, met-and merged. Race and reed hatred and distinctions evaporated in fraternal embrace, and out of the joint breasts and minds, new cleansed of centuries of prejudices, now flow a series of documents surcharged with more dynamite against the exploiter's oppression than all the guns his class, anywhere, can bring to bear upon the thus reconciled proletariat everywhere.

Of the many hits, made by Eugene V Debs at the recent Sunday great Indus trial Workers of the World meeting at the Grand Central Palace, none hit the nail more squarely on the head than the statement: "It would be better for Lahor if there was no organization such as the present craft organizations; for were there not, they would strike sponsously when they had a grievance; as it is now, they are prevented from loing so by their craft agreements, their contracts'." At the making of this statement and the applause that followed it, he who had cars could hear the skull of the A. F. of L. and its kindred pure and simple crafts crack and Nor could he who had eves fail to see by the grimaces of the score ar so of beneficiaries of the A. F. of L. of the I. W. W., the latter's rallying point is the pirate black flag of the Civic Federation, emblazoned with the skull and cross-bones of Gompers-Mitchell-Stonism.

"SPEAKING THE NOBLER TRUTH."

Republican and Democratic, Protection and Free Trade, capitalist papers, in short, are praising the language held by President Eliot and Carnegie before the Immigration Commission. The gentlemen objected to the exclusion of the immigrant. The reasons they gave for the faith that is in them were numerous. These may be summed up in the senence: "Surely, something foreign counries are unwilling to give us must have ery considerable value." The conclusion that we should take or decoy to our hores that which "foreign countries are unwilling to give us" is upon that ground pronounced to be "Speaking the nobler Truth."

. This "nobler truth" requires probing. What is it that "foreign countries are unwilling to give us," meaning by "foreign countries," of course, their respective ruling class? What they are unwilling to give us is the fruit of the labors of their own "noble" ancestors, to wit, the wholly dispossessed, the proletariat. The proletariat does not grow wild upon trees. It is a fruit the tree of

which requires careful training, and the soil on which it rises needs sweatful plowing. The plow, in this instance, was not the bucolic emblem of peace that the prophets sing about, it was the sword and shot-gun. With this peculiar "plow" the old "nobility" furrowed their titular lands. The furrowing consisted in dispossessing the peasants. It was arduous labor; the only labor the "nobility" ever performed. With the land thus plowed, the proletarian tree was raised. Capitalist development attended to the rest. Today, when the European feudalized capitalist and the capitalized feudal lord have entered into close alliance, they are the joint heirs-by all the laws of inheritance that "safe-guard law, order, religion and the family"- to the fruits of the joint labor of their "noble" and "industrious" ancestors. Among these fruits, the most legitimate and valuable of all is an overstocked labor-market. That overstocked labor-market is the alfar on which is raised the statue of Saint Supply-and-Demand, and at which the Saint worshiped with low wages to correspond. Without an overstocked labormarket the Saint has nothing to stand on. It is, consequently, the acme of religious zeal in the religion of the God Capital to keep that altar in repair and working order. The ruling class of foreign countries may not, without backsliding from all the sacred scientific and canonical tenets of Capitalism, tolerate

Supply-and-Demand. Not only must they prop up and garland the shrine with ever larger supplies of labor thrown into their own labor-market, but they must also not connive at their own labor-market being drained. In short, that which "foreign countries are unwilling to give us" is a large supply of the social victims without which capitalism can not exist and which are the product of the arduous toil of their own illustrious ancestry. In other words, the "nobler thought" spoken by the mouth-pieces of the upstart American Capitalist Class is the thought of pilfering from the lords and masters foreign countries the fruits of the toil of the ancestors of those noble lords and masters. The "nobler

The Nobler Truth can spring up an and utterance only on the lips of the Working Class; on the lips of the Capitalist Class only base bunkum can settle and be spoken.

## SAKHAROFF-BELL.

The telegraphic despatches, that are trickling in roundabout ways out of Russia, occasionally read like-not the press despatches, for that our American telegraphic service is still too thoroughly in the hands of our own Czar Capital-but like the private information that trickled out of Colorado when Roosevelt's nasty, pet, "Gen." Sherman Bell appointed himself the autocrat of all the Colorados. The despatches report that when Sakharoff, the "noble" military deputy of the Czar, appointed to "institute order among the peasants", arrived in the province of Saratoff, "h came with Cossacks and artillery. The peasants were surrounded by Cossacks, and Sakharoff addressed them, demanding that they surrender their leaders. The village elder replied, but gave the general no information. The elder was immediately beaten until he lost con-

sciousness. "Sakharoff then retired to the court house, leaving the peasants at the mercies of the Cossacks, most of whom were drunk, and they began torturing the pensants, pulling out their hair and eards, and even tearing pieces of flesh from their faces. 'Thirty-three peasants were thus maltreated."

Sakharoff's conduct reads like a civilized man's action along side of Bell's. The horrors of the bull-pen eclipse the plucking of peasants' beards; the riotous conduct of Bell's militia eclipses the revelings of drunken Cossacks; while the autocratic deportation of the miners from the State, and the dumping of them upon the contiguous territory, was an act of high-handed brutality that converted the State of Kansas into a Siberia for the temporary Russia of Colorado. Such an act no Czar, drunk with despotism, ever conceived, and no lackey of any Czar ever put into execution. In Russia the process developed slowly; with Bell it leaped suddenly into exist-

It has needed many Sakharoffs, in

to fill the cup full till it now overflows and the people, led by the working class of Russia, have called a halt. It certainly will not need as many Bells, in as many Colorados, during as many centuries to fill the cup full in America till it overflows, and the American Working Class call their halt. The younger the Nation the quicker the development. The unity of the Working Class in a mighty economic organization, reflecting the necessary political party, is at hand. Under its shadow lies the near at hand tomb of American Czarism-Czar Capital.

CAPITALIST BRAVERY.

The sight of the Alexanders, the Mc-Curdies, the Hydes, the Depews, the Perkinses sneakingly resigning their Presidencies, vice-Presidencies and directorships in the insurance companies. and thereby showing the white feather in the fight against them; is a spectacle that recalls 'and confirms the following passage from the Minneapolis address on "The Preamble of the Industrial Workers of the World":

"Look across at Europe. The feudal spirit still prevails there in an important respect, as a consequence of the continued prevalence there of large chunks of feudal institutions. In Europe, even the capitalist class is feudalized, let alone the surviving feudal heads. Though guilset up here an opposition shrine to Saint ty of all the crimes of the decalogue,

his pursuer. Like the blood-stained Queen Brunhild when the royal son of her rival Fredegonde threw at her face the long catalogue of her crimes, he would with mingled contempt and arro-

gance warn his pursuers that in him they are assailing themselves, and placing their own prerogatives in jeopardy Not so the cornered coward capitalist With cogent effect could the Denews, th McCurdies and the rest of the pack have turned upon their pursuers; read 'to these from the book of capitalism the sacrosanct prerogative of the capitalist to cheat;' pointed their finger to the time-honored capitalist principle of ethics regarding the survival of the fittest and distinguishing the most successful outragers of decency; torn the mask from the false pretense of their inquisitors, convicted them of the identical acts and, glorying therein as in the apanage of their class, warned their fellow capital ists not to smirch the royal mantle of Capital in any of its bearers. But no!

The capitalist is trained in cowardice. When caught he sneaks. Let the work ing man take in this spectacle. Before a united Working Class the capitalist will turn tail and fiee.

Dock Commissioner Featherson has lately presented a report to the Sinking Fund Commission on the municipalizing ofe the 39th street ferry. His plans involve an expenditure of \$4.000,000. He would enlarge both the terminals-the one at the Battery as well as that in South Brooklyn-provide two or three large, fast boats and in general establish a service that would "develop the commercial interests and docking system of South Brooklyn by properly accommodating truck traffic particularly." These plans have been condemned on the ground of excessive cost. They have at least one good point, that is, they do not, like most of the plans of the municipal ownershipites, pretend to be "in the interests of labor." They are outspokenly in the interests of the capitalst class. For which much thanks is due Commissioner Featherson.

The "Chicago Examiner" of Dec. 12 says:

"Editor Douglas Wilson of the official journal of the machinists has also been instructed to confine his writings to trade unionism and blue pencil all communications regarding Socialism."

Poor Czar O'Connell such is the effect of the growth of the I. W. W. upon him that his friends had better look to his mental condition. He reveals the same reactionary imbecility as does his great Russian prototype. And he is destined to suffer the same fate. The thought that at this late date, Socialism, which is making a mightier Czar than Czar O'Connell tremble, despite the former's agelong censorship and bloody persecutionthe idea that such an irresistible force can be blue-pencilled out of existence by a 2x4 labor' fakir is enough to make the

Gods roar with merriment and to cause men to say with Puck, "What fools these mortals be." O'Coanell is fit for

appointment of John Burns to the new English cabinet states, "His appointment is a sop to the labor element which is expected to result in the election of many liberals from the various cities throughout Great Britain when the next general election takes place." In other words, John Burns is simply a means to enable the capitalists to climb into power on the backs of the working class!

## "Neutrality In Trades-Union Fights".

In its issue of the 16th of this month The Worker" gives as the reason or excuse for its "not paying more attention to the Industrial Workers of the World", that its duty is "to serve the cause of Socialism" and not "to mix up in trade union fights". Seeing that "The Worker" is the English organ, and private property, and its whole personnel the hired employes of the Volkszeitung Corporation, the conclusion is justified that the declaration of neutrality in "trade union fights", made by "The Worker", is a declaration of the policy

of the Corporation itself. When the K. of L. cigarmakers went on strike in New York and Philadelphia in the early Eightics, and the A. F. of L., or strictly speaking, the Gompers-Strasser · cigarmakers, scabbed it upon the strikers and helped the employers to roll the K. of L. men in dust, the 'Volkszeitung" whooped it up for the Gompers-Strasser Union, and heaped denunciations on the K. of L -- Was that 'neutrality in trade-union fights"? Perhaps that is only "ancient history"

Let us come down to more recent dates. When, in 1898, the A. F. of L. cigarmakers struck against the S. T. and L A. cigarmakers in the Seidenberg shop, and then "composed" 'their differences with the employer with a contract by which the employer agreed to lockout the S. T. and L. A. men and the A. E. of L. Union agreed, AT THAT PRICE, to work at lower wages and worse conditions; and when the rank and file of the A. F. of L. cigarmakers Union, upon returning to work, discovered the sellout and sent their protest to the "Volkszeitung", that paper suppressed their 'letters, while it gave full space to the other side .- Was that neutrality in "trade-union fights"? When the same year the Hebrew

Typographical Union scabbed it upon the S. T. and L. A. pressmen in the Lipshitz shop, and gave as their reason that they had been ordered to do so by the local organizer of the A. F. of L. Big 6, the "Volkszeitung" again suppressed all protest from the aggrieved side .--- Was that neutrality in "trade-un-

ion fights"? When a year later, in 1899; the officials of the A. F. of L. cigarmakers Union endeavored to repeat the Seidenberg shop infamy at the Davies shop, and, in the teeth of an overwhelmingly contrary vote by the shop men, and despite the shop's being an open shop, as their own signatures attest, presumed to declare a strike against the shop and the S. T. and L. A. Union men refused to abide by such autocratie and fraud-contemplating order; when that "trade-union fight" was on, both the "Volkszeitung", and the predecesser of "The Worker"-an English paper that the Corporation had hurriedly set up under the piratical name of "The People" and which, while the fraud lasted, was generally known as "The Bogus" in order to distinguish it from the genuine article, The People-both those organs of the Volkszeitung Corporation echoed the calumnies of the A. F. of L. Union,

and had nothing but abuse for the other Union the S. T. and L. A .- was that 'neutrality in trade-union fights"? Even these instances, though surely

not "ancient history", may be considered old, being "of the last century". Let us come down to this century. In 1901 the S. T. and L. A. machin-

ists had a strike in Bloomfield, N. J. The O'Connell or Warner, that is, the A. F. of L. Union,' sought to interfere. noymous publishers of the A. F. of L. That is exceedingly frank, and we hope, In the course of that "trade-uinon fight", document to make their charges under

was allowed collumn upon column to chloroform the rank and file, the columns of the "The Worker" and the "Volkszcitung" remained hermetically sealed to the poor and victimized Valentine Wagners, who thereupon, as our readers know, turned to the Socialist Labor Party press and there found open forum. Thus matters went on in the "Volkszei tung" until the infamous contract was jammed through, whereupon immediately the "Volkszeitung" appeared in all the glory of nearly two columns of new brewery bosses' advertisements!-Presumably this is a sample of "neutrality in trade-union fights"!

Still more recently in the spring of this very year, a "Irade-union fight" broke out between the conductors and motormen of the Belmont lines in this city, on the one hand, and Belmont, Gompers, Grand-Chief Stone, Su perlative-Something Mahon and Morris Braun, on the other. Such was the neutrality observed by "The Worker" and the "Volkszeitung" in the course of that "trade-union fight", that the reporter for the two papers, was, togeth er with the reporter for Hearst's paper. kicked out of their meeting by the in-

dignant men on strike, the men involved in that "trade-union fight". Still more recently, the I. W. W. having in the meantime sprung into existence, "The Worker" of last August 19 referred editorially to the new Union as "so-called 'industrialists'" and "E. L. P. disrupters" .- Was that "neutrality in trade-union fights"?

Finally, coming down to the freshest date possible, the very "Worker" of this December 16th issue, the very issue that, on one page, makes the declaration of "neutrality in trade-union fights", kicks itself to pieces on another page. An anonymous circular has recently appeared under the vague signature of "General Executive Board of the United Cloth Hat and Cap Makers of North America". emptying upon the I. W. W. organization of that trade a slop-jar of defamatory charges. "The Worker" of this 16th of December sums up these charges in the document, introducing them with this sentence of its own: "a statement against the organization which rather pompously, styles itself the Industrial Workers of the World"; and, not satisfied with this sample of "neutrality" and notwithstanding the fact that in the documents itself the S. T. and L. A. is mentioned only once, and that respectfully, "The Worker" commits virtual forgery by squeezing in, as though part

of the document which it is summing up, this sentence: "It is alleged that the I. W. W. is thus already practicing the same tactics which characterized the old S. T. and L. A., one of its constituent parts"-a sneaky falsification of the document. Nor yet is this all. While "The Worker" thus "summarizes" the assault of the A. F. of L. document;

while it hastens to give publicity to the charges therein contained, together with some fabrication of its own; while it seeks to catch its readers' eye with the catchy headline "Cap Makers Accuse I. W. The Socialist workingman knows that it is folly to attempt to obtain from the class-government of Capitalism real relief, let alone redress, for the Working Class. The Socialist workingman knows that an overstocked and ever more overstocked labor-market is a principle, aye, a necessity, of Capitalism. The Socialist workingman knows, accordingly, that he might as well try to reach the moon with his hands as expect effectively to check a labor-market-overstocking immigration. On the other hand, the Socialist workingman knows that, with less effort than it now would take him to hold the runaway horse of Capitalism back by the

tail with anti-immigration and such like legislation, his class could, by united effort, throw down the run-away, abolish Capitalism, and itself take the reins of government, and that, that being done, the question of immigration ceases to be It ceases to be with the blotting out of the labor-market. Daily experience, confirmed by every investigation that one set of capitalists institutes against another, tells us that they reached their present status of rulers by putting sand into our sugar, by watering their stocks, by putting shoddy into your clothes, by pouring water into your molasses, by breaches of trust, by fraudulent failures and faudulent fires, in short, by swindle. The Rev. Dr. Stelze is trying to remove "the barrier between church and labor." He thinks it can be done by the church fraternizing with labor. Of course he is mistaken. The church is a bulwark of detest it. Fraternal relations formally assumed will not alter that detestation. Nothing but the Church's desertion of Capitalism will do that. To expect that, though is to expect the impossible. The labor has overthrown it. The church esponses progress when progress com pels it to.

To the Daily and Weekly People :--For quite some time I have not heard a pure and simple speaker, but to-night's performance of one Mr. Sonnabend, at an open meeting of Bayonne Lodge of the International Association of machinists, has given me personally and, I believe, some of the lodge members, more encouragement of the success' of the I. W. W. than I have ever had. Sonnabend is the business agent of District 47, 1. A. of M., and was supposed to deliver an agitation speech to show the machinists how to raise the!: wages and shorten their hours by craft organization. As, besides myself, only two nonmembers of the lodge had appeared, one of whom is also an industrial worker, Mr. Sonnabend started a tirade against the I. W. W., especially against the character of the officers of that organization, saying that it was engineerd by capitalists, but offering no proof to that effect. Never was so much venom and abuse uttered in twenty minutes.

I called his bluff and challenged him to a debate before this union. His answer was that he had enough of those challenges, that only last Saturday he had been challenged .by "a dishwasher named Vaughan". I repeated my challenge and gave the lie to all his statements and offered to produce documentary evidence at the next meeting of the lodge, to prove that he is a wilful, contemptible liar; but I could not get him to accept.

If this reaches his eyes he may take notice, that this challenge is still open to him, and that I will prove, 1. That the L. W. W. is a bona fide

/labor organization; 2. That the Socialist Trade and Labor Alliance won the Sprague strike; 3.' That the A. F. of L. is petted by

the capitalist class; 4. That it is a lie, that a nine hour day prevails in 85 per cent. of the machine shops in the United States.

AS TO THE "EDITOR" OF THE "CHICAGO SOCIALIST."

To the Daily and Weekly People :--Since there appeared a report in some of the Socialist Labor Party papers to the effect that the editor of the "Chicago Socialist" failed to bluff an I. W. W. audience, it will be interesting to the I. W. W. comrades to get acquainted with the following facts: The said editor was introduced in one of our meetings as a newspaper man, and, to my surprise, posed as an I. W. W. man. Knowing how he had bluntly attacked the I. W. W. in the "Chicago Socialist," I called his bluff. He at once, without letting me finish, tried to bluff the audience by requesting me to prove my assertions-at the next meeting. He was

WHERE THE I. W. W. IS NEEDED. To the Daily and Weekly People :---I have read De Leon's Address on the Preamble of the Industrial Workers of

the World, and it certainly should start anyone, who reads it, to serious thinking. There are a few men here who are beginning to think. We certainly need the I. W. W. here.

Take myself, for instance. I put in over thirteen hours actual labor, but swings, and coming and going, make it average sixteen to seventeen hours per day. Due to this severe exploitation it is not easy for one like me to give much effort to the work of agitation, but I am firm for the Social Revolution.

A Wage Worker. Camden, N. J., Dec. 11.

THE RUPTURE IN MINNESOTA. To the Daily and Weekly People :-I request the enclosed circular address to my comrades of the Public Ownership (Socialist) party be given publication. F. W. Bosshard. Moorhead, Minn., Dec. 10.

(Enclosure.)

Moorhead, Minn., Dec. 1, 1905. To the Comrades of the Public Ownership (Socialist) Party:

One of the important things that the members of an organization should know and keep posted on is to know what is going on in that organization. That will hold good in a working class party. If the officers of that party do not keep the members posted on all that is done and give all the facts then those officers are not true to that party.

Now, then, Nash has sent out the report that there is no local at Moorhead, Minnesota. The only reason that he gives (that I have seen) is that we have not paid any dues for one year. He did not tell you that. He did not say one word about dues until we sent in \$2.00 in July; then said that our charter had lapsed. I also have two letters from Nash of May 13 and 15, 1905, in which he urged me to have Local Moorhead take action on the proposed amendment to the State Constitution. Now, when not willing to discuss the matter there to ask Nash or Holman; or, if you want did our charter lapse? You will have

terfering in another Stare. Now, Nash has never informed us how we had in terfered in North Dakota or who had interfered, though I have asked him for the information. I have also had a personal talk with at least six comrades of Fargo and not one of them knew of the Moorhead comrades interfering in Fargo. It was news to all of them. Comrades, that is just some more of the contemptible work of Nash, Holman and

Preacher Thompson; it is simply another case of Faribault and Minneapolis. They knew that Local Moorhead was not with autocratic (I will not call it "De Leonhonest and honorable man, and that is more than we can say of that trio above Now Nash and Holman have been At the next meeting a little more evi- legally expelled from the Socialist party

tee, although Nash is not a member of the party, he has violated and upheld Member of Machinist Local 23, I. W. W. the violation of the National and State Constitutions. That Nash has upheld the violation of the National constitution (and knows it) is very plain for the National constitution does not permit fusion.

In this letter you will see that Nash took the same position as Local Minneapolis did. Why did Nash change his position on such an important question? That it is important is plain as he says in the letter quoted, "fusion will be the

death of any Working Class party." Surely the life and death of a Working Class party is important. But perhaps he wrote this letter without consulting 'Holman and Thompson," and was afraid of being called an "S. L. P. disrupter.' Now, Minneapolis local insisted on

upholding the National Constitution and Nash and Holman insisted that the Constitution was not violated, and commenced to circulate slanderous and false statements about members of Local Minneapolis. The local then called for a referendum vote to remove Nash and Holman and Nash was afraid Local Moorhead would endorse it, so they trumped up the charge of interfering in

North Dakota. Is not that so, Nash? Stand up and answer. Yours for uncompromising Socialism, (Signed) F. W. Bosshard.

To the Daily and Weekly People :-The Chicago "Examiner" of this morning contains the following item:

THE SOUTH IN ORGANIZES I. W. W. METAL WORK ERS IN NORFOLK, VA.

Combats Color Prejudice from Working Class Standpoint-the Necessity for Organizing the Negro Workingmen Demonstrated by Strikes Which They Were Used to Break.

## (Special Correspondence).

Portsmouth, " Va., Dec. 11.-Philip Veal has left here for Newport News to work for a week in the interest of the L W. W. in that place. The eight days he has been with us here and in Norfolk have been taken up in street and hall meetings, with the result that we have a local of the I. W. W. about ready to launch the latter part of this week, composed of machinists from the Navy Yard -whatever the name may be of the inand Seaboard Railroad shops and a few blacksmiths. The application for a charter will be sent to headquarters in a

few days. The conditions down here are somewhat different from those that obtain in the north, and that is the color line. The white workers cannot understand why we should bother with the Negro and it devolves on the clear men of the I. W. W. to point out the absolute necessity of having that great body of the industrial army in this section of the country, organized in the I. W. W. In the past they have been used as a club by the master class, to heat down the efforts of white labor to beter their

condition with the weapons of the pure and simple union. The teamsters' strike in Chicago is the latest case in point.

) This locality is the key to the whole southern seaboard, with four cities within a radius of 15 miles, all situated on or near the historic James River and Hampton Roads. There are thousands of colored men who should be organized and the organization that controls here will govern the south Atlantic seaboard. But there will have to be some hard work done to bring that about; and it must be the southern white men that will do it. But first they will have to be clarified on the question of the class struggle and I think that by the time that the Ter-Centenary Exposition is over, the vast changes that even will bring about, will open the eyes of many a southern workman to his true condition.

I have hopes of seeing a colored local of the I. W. W. established here before very long and also one in Newport News. I understand that in that place the Socialist party local and the Socialist Labor Party Section are both in the I. W. W. Norfolk City has nothing as yet, but there is material there and we will get after it. I will have something to

say by and by about the pure and simple unions; things have not developed far enough yet. I wish to say in conclusion that Philip

Veal worked hard and faithfully to break up the old feudal evil around here and we wish there were thousands like him. The revolution would then he on for fair. We hope that the readers of The People and others who sympathize with the I. W. W. in this locality, who have had no previous knowledge of what we

have been doing, will come and join hands with us, and help unfurl the Banner of Industrial Unionism in the Old Dominion, the State that is called the mother of Presidents, the State that was the first to throw off the voke of the to. divine right of Kings, and, let us hope, it will be among the first to break the yoke of Industrial Slavery. That is impossible if the paper is an incorporated body

corporation. J. S. W., NEW YORK-Your whole argument is pivoted upon the assumption that the "row between The People and the Volkszeitung Corporation" is a personal one. It is not. It is grounded upon principle. "Personalities" only result from the fight. The People held that the economic organization of the Working Class must be class-conscious, and, if not, it becomes a hand-maid to capitalism. The Corporation held that that was "a new-fangled Marxism," and under cover of that false pretense it acted as a gouger for the labor fakirs who were selling out the workingmen right and left. That was the issue. Guess it is being settled, and settled right.

T. P., NEW YORK-The Volkszeitung Corporation has not "changed its tone" regarding the I. W. W. What its publications have done is to stop lying about and vilifying the I. W. W. openly. T. M. M., ST. CHARLES, MO .- The Trust does not alter the Marxian law of exchange value. What the Trust does is to furnish a special manifestation of the law. Exchange value depends upon the amount of labor SO-CIALLY required for the production of an article. This SOCIALLY required labor depends upon both the natural bountifulness of Nature, and the perfection of the tool able to operate upon Nature. Nature may be niggardly in a vein of coal, but the tool, socially available, may be so far perfected as to press out of the niggard vein more coal than an inferior tool formerly pressed out of

a more bountiful vein. Again, the exhaustion of Natural forces in a certain line may, at a later date, cause improved machinery to draw from Nature less wealth than inferior machinery did at a former period. In short, the degree of Nature's bounty is an inseparable factor in the productivity of the tool. The value-imparting "labor socially required" for the production of a commodity is, accordingly the joint resultant of natural opportunity and social capacity. Now, then, a point is reached in capitalist development where the social capacity, machinery, virtually steps into the shoes of what once was strictly natural opportunity. . There is no practical difference between a much exhausted vein of coal (no better yeins being available) on the one hand, and, on the other, so mammoth a plant of production that the tool socially needed, and in the hands of one set of men, is reproducible only at a

tremendous expense of labor, the Trust, in short. In either instance-exhausted coal vein and Trust-is the only channel available to reach the desired wealth. Net result-the social labor required to produce the commodity is larger. Consequently, the phenomenon of increased

productivity, together with increased prices, is quite a possible accompaniment of the Trust, and no way vitiates the law of exchange value.

L. W. A., PUEBLO, COLO .- Just take a look at the German Social Democracy. It bears out the contention regarding the absolute and relative smallness of the number of organized members in a political party compared to its voting "strength." The German Social Democracy has about 3,300,000 votes. It has barely a hundredth part of that number organized. The result is impotence. The further result is the party's now turning its eves in the direction where the masses are organizeable and where they ARE organized in larger numbers-the eco-

nomic organization. W. W., CHICAGO, ILL .- The argument would be right that "society could not exist if, indeed, the share of Labor was only 17 per cent. of its product" if its product had first to be bought back by Labor, or squandered by the capiist. But the latter supposition is wrong. For instance, not less than \$9,813,834,390 was the value of the capital alone turned to production in 1900. This serves as a pointer. A large amount without having carefully and in detail looked into the figures, but making a rough estimate, fully one-half of the manufactured wealth produced does not fall into the cat of the necessaries of life for the working man. That portion falls under the cate gory of machinery, plants, palatial residences together with the equipment of these, etc., etc. Labor need not first buy these back before production is started anew.

of the preamble of the I. W. W. which reads as follows: "Between these two classes a struggle must go on until all the toilers come together on the political as well as on the economic field, and take and hold that which their labor produces through an economic organizatio nwithout affiliation with any political party." Whereupon, I told the audience that the editor of the "Chicago Socialist" had declared in said paper that that paragraph was meaningless.

The "Chicago Socialist" of July 8 contained the following: "How the toilers are going to come together on the political as well as on the economic field and take and hold that which their labor produces without affiliation with any political party, the intellectual Moses who framed this meaningless paragraph did not inform the delegates. The prospects for industrial unionism as the outcome of the convention now being held in Chicago are anything but promising. From all present appearances when the convention now in session finishes its works the real workers represented there will have just what they had when they started: The Western Federation of Miners and A. L. U. plus an absurd and ridiculous name and one of the utopian wheels from the head of Delegate T. J. Ifagerty, to which will be added the dead weight of De Leon's scab organization, the S. T. & L. A."

Of course, the editor of the "Chicago Socialist" could not deny that he had

written all that in said paper, and told I says that the Moorhead comrades vio-

Dear Comrade-Yours received, and in reply will say that the attention of the plying competent lasters to fill the committee called to the alleged statement that H. E. Boen has been elected to office on a capitalist ticket which is practical fusion, and they instructed me to write to the Secretary of Fergus Falls and ascertain the facts. I have not received the reply, but have one of Boen's

papers which some one has just sent me. and must say that I don't think that we require any further evidence, and at the next meeting of the committee they will without doubt make an effort to have Local Fergus Falls take up the matter and either expel Boen or make him resign his office

I don't see how they can help doing the first as fusion will be the death of any Working Class Party.

This question has got to be decided, that is certain, and I think like you do the sooner the better.

THE FARMER AND THE FARM HAND.

To the Daily and Weekly People :-In your last Letter Box (December 9) you make the strong point that the property holding small farmer is of no use in the movement, as a class. Right you are. Of course, this does not apply to the farm laborer. We are wage slaves all right. Twelve to fifteen hours a day at hard labor, is no half-way slavery. On the big farms of the West there should be a chance for the I. W. W. The price of wheat may go up or down, but like other wage workers that kind of thing means nothing to us.

### OUTRAGE ON LABOR.

Railroad Agents, Short of Help, Arrest Men to Work for Them.

Knoxville, Tenn., Dec. 17 .-- More than one hundred Negroes were arrested by sheriffs and police in The Bowery here yesterday on the trumped up charge of vagrancy. Railroad labor agents anxious to get men accompanied the officers and prosecuted the cases. The Negroes received the option of working for the railroads or for the county.

F. S., MILWAUKEE, WIS .- Where political activity is, a higher social development is implied. In such countries the political movement of Labor is indispensible. The higher social development, implied in the opportunity for political activity, does not, however, wipe out the center of gravity of the Labor Movement. That center of gravity is the class-conscious economic, industrial Union. The economic movement may get along without the political, as is going on in Russia. . The political, however, where the social development allows it, as in America, can never get along without the economic. In America, a party of Socialism that is not banked upon and backed by an economic movement to match is moonshine-except for scheming političians.

teacher renders services to society; he does not produce. Nevertheless, the line ticles as "lies." between "services" and "production" is I not always a sharp one. For instance: A shoemaker produces shoes; but, if he has children their education has to be attended to. If he attends to that himself, it means so much time taken from directly productive labor in shoemaking. If he hires a teacher, he (the shoemaker) has more time to produce shoes. Thus the teacher co-operates with the shoemaker, and indirectly is aiding in the production of shoes. It is a case of sub-

AC. CHICAGO CIGAR WORKERS BEGIN SERIES OF MASS MEETINGS.

Speakers Show How A. F. of L. Makes Scale and Incurs Defeat-the Power of

A Revolutionary Organization to Secure Reforms, While Marching to Its Final Goal, Explained.

Chicago, Ill., Dec. 10 .- The first of the series of three mass meetings arranged by Cigarmakers' Local Union 158, I. W. W., was held Friday evening, Dec. 8, at Pritiken's Hall, corner Maxwell and Halsted streets, with fair success. Sister L. Forberg kas asked to speak until Brother W. E. Trautmann came, which

she did. At first the speaker showed how the A. F. of L. is making scabs of workingmen by the high initiation fees that many unions have. She cited the case of the European glass worker, who came to this country and wanted to join the union of his craft, but could not on account of the \$500 initiation the union demanded of him. Also the case of the Flint Glass workers' strike: how the fifth vice-president of the A. F. of L. organized scabs in one part of the country and shipped them to New York to take the places of the striking fiint glass

workers. The next phase of the A. F. of L. was shown up in good style, i. e., the traitorous way they conduct strikes, by calling a single craft at a time on strike. When the one is defeated they will call another. When that one is defeated they might call out another, and so on.

By so doing the A. F. of L. accomplishes two things. Fist, it discourages the working class of the hope of ever gaining anything from the capitalist class. Second, the capitalists, thoroughly aroused to their class interest, take every advantage of the workers' weakness and subject them to their will.

The speaker continuing said: "The Industrial Workers will concenrate the working class in such a way as to make them a power when arrayed against the capitalist class."

Brother W. E. Trautmann next spoke. The speaker explained how the Cigarmakers' International Union everywhere barred the tobacco strippers, the machine workers and in most places the rollers and hunchmakers from the union. He proved that the old Cigarmakers' Union is an organization for the small "buckeyes" as against the large factories; and that the workers in such a union could

not expect anything favorable to their interests, because the "buckeye" owners control the union. The class struggle was ably presented by Trautmann. It was during this part

of his speech that he said: "The discontent which is felt by the workers is a powerful force when organized right. The I. W. W. is here to organize that discontent and make it a benefit to the whole working class.

"We are living under the capitalist system. The capitalist system is like the stears boiler. The revolutionary workers furnish the fuel. The larger the revolutionary force, the hotter the fire. When the fire is hot the steam in the boiler gets congested and is at a point of exploding. The safety valve is suddenly opened and the steam in the shape of reforms is let out. What I wish to show is that when the workers are

and I could see many a head nod in approval when he brought his point home. Trautmann has a way of putting it up to you that is very easy to understand. Had I the time I would give a detailed account of the speech, but let it be said that it was up-to-date.

## BOSTON CITY VOTE.

Tremendous Drop in Poll of the "Socialist" Party.

Boston; Mass., Dec. 13 .- The city campaign has come to a close with the elec tion of John F. Fitzgerald, Democrat, as Mayor. The "Socialist" party vote dropped from 5,000 two years ago to 700 this year for Mayor, this, too, in view of the fact that the Socialist Labor

Party had no ticket in the field. We nominated Michael D. Fitzgerald The Democrats, fearing the similarity of names, were determined to have our name off the ballot. It was doubly hard to get signatures this year owing to the fact that there were four other sets of nomination papers in the field, and when we filed our papers we had only 4 names to spare. The Democrats went to work and, taking the names of all city em ployes and others whom they could in fluence, got them to appear before the election commissioners, where they swore to all sorts of statements, some claiming they did not know what the paper was for, others that they did not sign at all, when we have positive proof that they did sign.

However, we will be the gainer in some ways, as we have many who tell us they were approached and offered "expenses" if they would have their names taken off. We have had the expression from many "We'll sign for you next year all righ. They can't buy us."

## SOCIALIST UNITY.

## To Be Made A Subject of Mutual Discussion In Massachusetts.

Holyoke, Mass., Dec. 13.-Under the auspices of the Chicopee Socialist party, there is to be held a public meeting of Socialists and Socialist sympathizers to see if a union of Socialists into one party cannot be accomplished. The meeting will be held Sunday afternoon at the Fairview Turn Hall, and all prominent Socialists irrespective of party are to be publicly and by special invitation requested to attend. The subject of debate will be :- "What Standpoint Should Socialists Take Towards the Trade Union Movement?

At the recent election in Chicopee the Socialist party polled 282 votes for mayor and elected one Alderman, J. J. Kelly.

There is a strong leaning towards the I. W. W. and no doubt much good will be accomplished by this meeting.

PONENTS OF INDUSTRIALISM.

Awakening Workingmen Display the Interest Born of Disgust with Pure and Simpledom-Debs Makes Scathing Indictment of Old Trades Unionism, and Predicts Brilliant Future for I. W. W.

Another most successful mass meeting was held by the Industrial Workers of the World at Muller's Bronx Ca. sino, 2990 Third avenue last night, with Rudolph Katz as chairman and Eugene V. Debs, Daniel De Leon and Charles O. Sherman as the speakers. Long before the meeting was called to order, the number of awakening wage slaves who desired knowledge on the subject of Industrial Unionism was much too great for comfortable accommodation in "the hall. However, the big audience packed itself in somehow, and listened to the several speakers with a breathless attention which was broken only by fre-

quent and hearty bursts of applause at the keen thrusts dealt A. F. of L.-ism and Organized Scabbery.

Debs was greeted with prolonged applause, and immediately launched out on a stirring speech.

"The history of the human race." he said, "has been the history of the class struggle. On one side have stood the exploiters, on the other the exploited. The latter have always striven against the former, and will continue to do so .until their final triumph, as foreshadowed in the Industrial Workers of the World. when they step into possession of their long stolen property, the tools of pro-

duction. "The old form of union has outlived whatever usefulness it once had; to speak of it now as a union is the height of sarcasm. Its sole purpose now is to hold back the tidal wave of labor's emancipation, which however is growing too strong to be withstood.

The next to speak was President Sher man, who spoke on child labor, calling particular attention to the conditions in the Tremont Silk Mill, which is now being struck by the I. W. W. where children of school age are employed for the sum of \$2 a week.

After Sherman, De Leon made a short address in which he showed the impossibility, under Industrial Unionism of importing men from Chicago to break a New York strike, men from New York to break a Chicago strike, and men from both to break a San Francisco strike.

He drew attention to the magnificent solidarity of the Russian working class now being evidenced by their complete tie up of all production, transportation and communication.

When the collection was announced, the audience went into its pockets with a generosity that boded ill for A. F. of L. due books, raising \$35, which will be ap plied to paying the expenses of the meeting. Two hundred copies of the Aldress on the Preamble were bought, and put carefully into safe pockets for future 1

study.

At the Debs meetings were sold 826

copies of the pamphlet containing De

Leon's Address on the Preamble of the

The I. W. W. Convention Report book

is now in the hands of the binder, and

here we meet with another unavoidable

deley. The rush of heliday work has put

the bookbinders behind on their regular

business, and we could not find a reliable

concern that could tackle the job at once.

We feel pretty sure, however, that the

book will be ready for delivery by Jan-

uary 1st. We need more orders for it.

TO HAT AND CAP MAKERS. The printed charges against the Industrial Workers of the World, which are at present being issued surreptitiously by the General Executive Board, Unit-

America, are hereby branded as a tissue of falsehoods, and we have the officers of the General Executive Board of the U. C. H. and C. M. of N. A., to make sworn affidavits over their signatures, to the charges they are now circulating underhandedly and without

one iots of proof being given. Sold out by their leadesr, the rank and file were defeated in a recent strike. Their leaders and Samuel Gompers declard it a great victory won, but the facts came out through a paper that stands by the I. W. W. This accounts for the present hysterical effort to deflect the rage of the rank and file away

from themselves and against the I. W.

But it will not stead them; whether or not they meet this challenge, the I. W. W. will issue a sworn statement giving the facts, W. Shurtleff, National Organizer,

CARRIAGE MAKERS ORGANIZE Cincinnati, O., Dec. 11 .- At a large enthusiastic meeting of I. W. W. Recruiting Union, No. 6, last night, the carriage workers organized and sent in an application for a charter. Comrade Fox, our local organizer, who has had his shoulder to the wheel but two weeks deserves praise, not only for his splendid speech last night, but for this evidence of his hard work, and unquestioned talent for organization. The carriage workers promise to be the thing, soon Judging from the determined manner of these comrades, they will soon be an

important factor in the local I. W. W. TRAUTMANN AT EVANSVILLE. Evansville, Ind., Dec. 13 .- The I. W. W. mass meeting held here with Secre-

tary-Treasurer Trautmann as speaker, was a great success. The hall was filled and the interest shown by the workers proves that they are ready to embrace the principles of the I. W. W.

The meeting was opened by the chairman, E, J. Dillon, who, after a short address introduced W. E. Trautmann General Secretary-Treasurer of the I. W. W. Trautmann was in fine form. The

trial Workers of the World, spoke here last night, on the subject "Industrial Unionism," to a large audience, which received his telling points against A. F. of L. craft unionism, and in favor of Industrial Unionism, with ringing applause. Debs' address sparkled with wit and epigram and roused a high degree of enthusiasm among his hearers. Copies of De Leon's Address on the Preamble of the I. W. W. were bought eagerly and it is expected that the I. W. W. organization in this city will receive an enormous impetus from last night's meeting Y., fine framed picture; William Henger, city, fine ladies brooch; Mrs. J. E. Hoboken, N.
