SLAVES OF THE SWEATSHOP

LONDON'S RAPID EXPANSION OF SWEAT-SHOP PRODUCTS AND SWEAT-SHOP LIFE—MINIMUM WAGE RULE.

There are few industries which to a greater degree reveal the movement of the times as much as the ready-made shirt, cheap shoes, cheap hats, etc., which are to be found in London. They are the products of sweat shops, where the workers are held in virtual slavery. The minimum wage rule, as it is called, is the only protection afforded to these workers. It is a rule which has been in operation for a number of years, but it has not been effective. The sweat shops are still in operation and the workers are still being exploited.

The workers have no protection and they are forced to work long hours for starvation wages. The minimum wage rule is not enforced and the workers are still being exploited.

There have been many attempts to organize the workers and to establish unions. However, these attempts have been met with resistance and the workers are still being exploited. The sweat shops are still in operation and the workers are still being forced to work long hours for starvation wages. The minimum wage rule is not enforced and the workers are still being exploited.

OUR SIXTH ANNIVERSARY

[Page: 1]

THE INTERSTATE Commerce Commission, at a meeting of its board last week, approved, for twenty-five years, a certificate of convenience and necessity for a railroad between Chicago and St. Louis, with numerous branches. The railroad will be the first of its kind in the United States, and is expected to be of great benefit to the commerce of the region. It is also expected to provide employment for thousands of workers, and to stimulate economic growth in the area. The approval of the certificate was met with enthusiasm by local officials and business leaders, who see it as a significant step forward for the region. There were no objections to the proposed railroad, and it is expected to become a reality in the near future.
