Work proceeded easily with a and yet again in a difficult way: asily in regard to the occasional e, whose facts and reflections would appear at the first impulse be-fore his intellectual eye; but this fullness made the complete demonstration of Vico said: "The thing is only e for God, who knows all; for who recognizes only external apa, it is merely a surface." ended things in the manner of the God of Vico. He did not iv see the surface, but he pene into the interior! he investied all the parts in their actions and ractions upon each other; he iso the history of its development the went or r from the thing to gs and observed the ac ad upon the first, and a; he went back to the origin t to the varia s which it has

see a single thing for itself, by itself out of connection with its surroundings, but the whole complicated world in its continuous motion. Marx intended to represent the totality of life of this world in its manifold and uninterupted, changing actions and counteractions. The belleslettrists of the school of Flaubert and Goncourt complained of how difficult it was to describe exactly what one had seen; and yet, the very thing they try to represent is merely the surface of which Vice speaks the impression

which they received; their literary work is play compared with that of Marx. It required an extraordinary power of meditation to comprehend skill to describe what one has seen or pretends to have seen. Marx was never satisfied with his work; again and again he altered it and always found that the presentation remained behind the conception. A psychological study of Balzac's, which Zola had lamentably purloined "Le Chef d'Ocuvre Inconnu." (The Unknown Masterpiece) had made a deep impression upon him, because it partly described feelings which he had experienced himself: An ingenious painter is so tormented by the impulse to reproduce things exactly as they are reflected in his fancy. that he insists on polishing and retouching his picture until he has created finally nothing , but a formless mass of paint, which however, is in his

encompassed eyes the most complete rendition of reality. Marx united both the attributes of an ingénious scholar. He understood in a matchless way how to analyze an object, and was a master in the task of restoring the analyzed object in all its details and its various forms of development, and of discovering their "Capital." innermost connections. His demonstration was not aimed at abstractions, as momists who are incapable of thinking have declared: he did not use the method of geometricians, who, after having taken their definitions from the surrounding world, totally ignore the actuality in drawing the con Tences One will find in "Capital" not a single definition, not a single formula, but a number of analyses of the greatest fineness, to set off the most fleeting shade and the least distinguishable grade of differences. He starts with stating the obvious fact, that the wealth of society, in which the capitalist mode of production prevails, appears as an immense mass of commodities: the commodity, is a concrete something, and not a mathematical abstraction: it is also the elemental cell unit of capitalist wealth. Marx now takes hold of the commodity, turns it over on all sides, turns it inside out, and thus elicits one after the other of its secrets, of which the official economists had not even a presenti-

Translated from the Stuttgart "Neue to its remotest actions. He did not given expression to an idea, or by whom it was expressed in the most eract form. His literary conscience was just as

strict as his scientific one. He never would refer to a fact of which he was not perfectly certain, he would not even allow himself to speak about a topic before he had thoroughly studied it. He did not publish anything which he had not worked over again and again until he had found the form of expression most satisfactory to him. He could not suffer the thought of appearing incomplete before the public. It would have been a torture to him to show his manuscripts before the last stroke was done on them. So strong was this impression with him, he told me one day, that he would rather burn his manuscripts than leave them be-

hind incomplete. His method of working burdened him often with tasks whose magnitude the reader of his works will hardly comprehend. In order to write about twenty pages in "Capital" about the English Factory Acts, he had to work through an entire library of Bluebooks which contained the reports of the commission of investigation and the factory inspectors of England and Scotland. He read them from beginning to end. as the numerous pencil marks which he put there, testify. He counted these reports the most weighty and important documnts for the study of the capitalist mode of production and entertained such a high opinion of the men who had been trusted with the work, that he doubted whether it would be possible to find in any other nation of Europe men as expert, impartial, and unbiased as the factory inspectors of England had proved to be This splendid acknowledgment he bestowed upon them in the preface of his

Marx derived an aboundance of material facts from these Bluebooks. Many members of the lower house, as well as the house of Lords, where these Bluebooks were distributed, used them merely as targets to shoot at, and according to the number of pages which the projectile pierced the power of percussion was measured. The others sold them by weight; this was the most sensible thing they could do; because this enabled Marx to buy them cheap ly of a dealer in old paper on Long Acre, to whom he went from time to time to inspect his books and papers. Professor Beesly declared, Marx was the man who had made the most extensive use of the official investigations carried on in England, yea, who had made them known to the world at large, Professor Beesly however, did not know that before 1845 Engels had extracted from the Bluebooks numerous documents which he used in the composition of his book on the condition of the working class in England.

Good Audience Present To Listen To Address on Labor Mevement.

San Jose, Cal., April 4 .-- We held good to its production and the historical

TACTICS FOR/SOCIALISTS

[By V. H. Kopald, New York City.] A Socialist should always remember first of all, that his quarrel is with the Capitalist Class. Every proletarian is our comrade and brother, no matter how backward, degraded or miserable. Lift him up if you can, and don't give him up; but if you cannot, harbor no bitter-

ness or resentment; do not start to think that Socialism is hundreds of years away; that the Working Class will never emancipate itself, and similar pessimistic rot. No matter how poor the soil, time, patience and labor will grow a crop, and if you cannot do it, leave him to others, without bitterness and resentment on both sides.

The principal recruiting ground of a Socialist ought to be his shop, factory or mine. The street corner, the meeting hall the social intercourse have their uses, but they need talent and leisure; the shop needs nothing but a bit of courage, right class feeling, and elementary knowledge. The shop knows no race or sex questions. You night be working right next to a negro, woman

or child. It matters not to you whether you slave for a negro, or Chinaman or others, and let it not matter to you what color or religion your brother slave is. Treat your fellow workers with Socialist, Get acquainted first, then teach you will find as a rule fertile ground and will have a light road to travel. And it is not the man who makes scientific speeches, or writes essays but the man who makes Socialists that counts.

Do not try to make Socialists out of apitalists, lawyers, prosperous middleclass men or intellectuals, and other similar professionals. Before you put any effort in these directions, be sure first that there are no more workingmen left that need converting.

Do not wait for an election to' start your best efforts. The workman will listen to you all right in the shop, after being abused by the boss, urged to hurry, up when he hardly can move any more.

or fined 50 cents for doing 5 cents damage. It needs no special leffort then to him the way of emancipation. A man who learned Socialism during a campaign may forget it before the next one. but the man you teach now in the shop will never forget it. Then do it now. Teach the workingmen industrial unonism and get them to read The People. You cannot be at them all the time, the press will. And it is not the old Socialists but, the new ones that become most valuable to the movement. They ecome the enthusiasts and fanatics. And it is enthusiasts and fanatics that the movement needs. But they should be educated and know what they are talking about. You cannot very well do it, but the press will. So never finish with a convert till you get him to read The People every day. Then your duty is done and you can leave him for new fields

I have finished. Once more I wish you to remember that we have a great quarrel with a mighty foe, the Capitalist Class. Our aim and ideal is greater than humanity ever had. Let us not be looking for petty quarrels; let our temper not be affected by small tribulations of daily life. Socialism is grand and is inevitable. Let us work to bring it on

PLASTERERS' LABORERS

to-morrow.

THE DOUKHOBORS, COMMUNISTS **OF CANADA**

A FLOURISHING BROTHERHOOD

The Doukhobors in Canada, or Uni- | come some of the most productive in | in the evening. This makes one shift versal Community of Christian Broth- the Northwest. That he is capable of do ten hours work, while the other does erhood-as their leader, Peter Verigin, handling the six thousand peasants, while still in Siberia, suggested that they be called-have now forty-four separate villages, with one to two hundred people in a village, and represent a prosperous form of community life. When they came to America they had nothing. To-day, they have land, horses, food laid up for emergencies, twenty threshing outfits, six flour mills and five lumber mils. They also have a blacksmith and carpenter shop in every village, and run a large brick

vard. Fifteen steam plows break up the land quickly.

The presession of these lator saving devices is said by those wt. know Peter Verigin, to be an etangole of his adroitness. One of the tenets of the American. They treat you the same as Licukhobors is to care for paimals, and when they suggested it was wrong to work lerses in this way, their leader instantly improved the opportunity courtesy, and dignity. Do not think you by advising the use of steam plows. are better than he because you are a 7 ere people are natural thiers of the soil. They like village life, have been industrial unionism and Socialism, and for centuries accustomed to agriculturai pursuits, and are indefatigable workers. Their only holidays are the Sabbath and Christmas. Easter Day is not observed, "for Christ is ever resurrected in every man's "heart."

. The growth of the Canadian Doukhobors is amazing to any one who has known their history from the start. Five years ago six thousand of these people came to this country with nothing but strong hearts and willing hands. They were poor, not one in five thousands could speak English; your agitation and education, or put out hthey knew nothing of Canadian customs, and for two centuries had been oppressed; their property had been renestedly confiscated, their women illtreated and their leaders condemned to Siberian mines. To-day they are one of the most interesting communities teach him the class struggle and show | existing in the world. They do business on modern and approved methods. they issue financial statements, have co-operative stores, buy necessities at wholesale, and are rapidly taking advantage of those usages and customs of civilization which do not conflict with their religious belief.

Without doubt this change of attltude is largely due to Verigin, who is a veritable captain of industry, well calculated to be a leader, and tactful in persuading his people to adopt new labor saving devices and progressive measures. Non one can see Verigin without being impressed by the man's capabilities and the conviction that he is a remarkable character. He is an active manager, a worker as well as director, and though it is impossible outside the sect to discover his tribal or hereditary right to lead, or to understand their belief in his divine originwhich many of his followers affirmevery one who sees Verigin is convinced of his power and his influence among the Doukhobors. ,

Verigin reached Canada, after his release from Siberia, at a critical time. It was just after "The Pilgrimage," when the Doukhobors had left home. methods, and among other things, the stock, and all belongings behind and repayment of a loan by the Bank of started toward Winnipeg. The results British North America, amounting to of this, to others, crazy movement are well known. The Canadian government was obliged to interfere, the mounted police saved the horses and cattle from starvation, and by persuasion and force the deluded people were sent back to their villages. At the time, they accounted for the hegira by saying they Christ say to take no thought for the They, men, in daily life are moving took the Bible literally, and "did not morrow and that material things were of no account?" Whatever the cause of this peculiar psychic-religious mania, whether it was sincere, or as some affirm an effort to meet Verigin, who they heard would reach them about that time, the fact remains that since the advent of their leader these Russian peasants have made only one similar attempt at a pligrimage, and

many of whom do not read or write, is shown by the fact that, in spite of the confusion and waste that greeted him on his arrival in the face of discouragements, such as neglected cattle and the destruction of food and elothing, in one year after assuming the helm he was able to present a report far from discouraging, and systematic in every detail.

When Verigin reached his fanatical countrymen, he persuaded them to choose capable men for a community ment, and to select a certain number of men besides himself to be head of affairs. In this way he obtained the advice of those familiar with conditions, and was able to appoint a complete corps of assistants. Each man does his share toward the property getting, and even the children earn money by digging roots and herbs, and turn it into the exchequer. Verigin is custodian of the public trust, and by his practical methods, high ideals and understanding of his people's peculiaritles, has so far proven himself more than worthy. As there are so many Doukhobors, it is evident they can provide largely for themselves without grind their own flour, and in every them instead of to other parties. In tending to the community funds, they in pure communism that has ever been

Nothing can be more convincing of the present success of this community life than a glance at one of the reports handed in at the general meeting. Two men and one woman delegate are alwys sent from each village, as well as the men who hold offices in the srettle-

attempted.

ment. The meeting is opened with the Lord's Prayer, and ends with the singing of psalms, but the business questions are discussed thoroughly, and all items of expenditure, from small incidentals up, are accounted for . The reports of these meetings, which are in quaint, archaic English, would make a modern book-keeper wonder at their accuracy. For instance, at the last meeting, held in February, 1906, at the village of Nadeshda, the account shows that the Doukhobors purchased over six thousand dollars worth of goods, but by buying at wholesale effected a saving of two hundred thousand dollars. The report then goes on to state that sauce pans that retailed for one dollar were obtained for sixty cents, twelve cent prints were bought for

eight cents, etc. The cash account is interesting as showing a satisfactory statement, for the income of the community for the past year amounted to one hundred and ninety thousand dollars, and their expenditures to half a million. The sundries account shows modern up to date

five, but the heavy and light shares art taken alternately every other day.

Many Doukhobors are employed in building gailroads, and the recent impetus in railroad construction throughout Canada has afforded favorable opportunities. Every summer they take large railroad contracts and the executive committee provides scrapers, wheel-barrows, shovels, and other equipment for the purpose. In work-

ing on railroads the men live in camps, and are accompanied by enough women to do the sewing and washing. The council, to continue their self-govern- | camps are pitched in a convenient spot and are well equipped with sleeping tents, store tents, kitchens, blacksmith shops and stables. All cooking is done by men in primitive brack ovens after the fire has been removed. Coke is largely used and is made by burning Balm of Gilead poles in holes dug in the ground. As a matter of fact, the Doukhobor's domestic methods are crude, but they serve the purpose as well as more modern applances. Their method of community life makes work on the railroads comparatively easy. This was especially true when they first arrived in Canada. They were without means, and it was necessary that the men should leave their land outside help. They buy at wholesale, and earn enough money to purchase the necessities of life. It was difficult possible way conduct business so that for one man to go any distance and financial returns will come back to leave an unprotected family in an unsettled country. In a large community. this way and with a committee at- a division could be made whereby a thousand men or so could be away on have developed the largest experiment railroad construction and as large a number stay at home to work the land. put in crops, and build houses. Those who were away earned money for communal supplies and eatables, and the work and profits were thus about

> equally divided. The Doukhobors built their own mud or log houses, and the communal stables, of which there are one or more in each village for the horses, cattle. and hens. Early in their Canadian life. they were joined by the wives and children of two hundred men who had been exiled in Siberia. These were well taken care of by the community until the men were liberated, when dividualism had been practiced, it is difficult to say what might have become of these fugitives. So far, this religious sect, has not made much advance in education. Verigin gives as a reason that "the first duty of the Doukhobors when they arived was not to teach their children to read, but to get food for them." 'Money has been offered them to assist in this work, and the Quakers of Pennsylvania, who have been attracted toward them by many similarities in their beliefs have sev-

eral times suggested sending teachers. Such proffers have been refused on the ground that, "It is against our principles to accept charity, and we do not wish to accept a sum for the purpose of building schools without seeing our way clear to repay it."

Quaker nurses have been among these people for some time, and recently Verigin has announced that he thought they were in a financial condition where it would be best to start

rious forms of appearance and points the "Labor Movement" and pictured the out how it is converted from one form construction of New Trades Unionism into another, and how of necessity the one begets the other. The logical se- uses that must follow the craft union ries of the development of the phenomenon is represented with such a izations. He also pointed out the failure complete skill, that one could believe Marx was the very inventor of it; and fallacy in believing that it could bring yet it is deduced from reality and is a reproduction of the data of dialec-

ment, and which are more numerous

tigated the commodity from all sides,

observes it in its relation with

tics of the commodity. Marx always worked with the utmost conscientiousness; he gave no fact or

figure, which could not be verified by the best authorities. He was not satisfied . with second hand information, he always went for the best authority, no matter how troublesome this occasionally proved to be; for the sake of a minor fact he would go to the British Museum to ascertain for himself its accuracy in the books there. His critics. therefore, have never been able to entrap him in any inattention or prove to him that his arguments rested upon facts which could not stand a rigid examination. This habit of going directly to the sources is the explanation of the fact that he had read even the least known authors, whom he alone quotes. "Capital" contains such a mass of quotations from unknown authors, that one is inclined to believe it all is done to boast of extensive reading. Marx, however, thought different of it: the plot." "I exercise historic justice;" I give

MAY DAY MEETING NOTES. Lazarus Abelson, Organizer of Section New York has been informed that, in all probability, Covington Hall of New Orleans, will be in this city on May 1, and address the Cooper Union May Day Meeting of the Socialist Labor Party. Covington Hall is a prominent member of the Socialist Party, and one of its candidates for the office of national secretary. It was Covington Hall who declared, when reviewing in a recent article to The People the conduct of certain Socialist Party luminaries: "When the history of the Haywood, Moyer, Pettibone iniquity of the party and the working class as will have laid bare the full facts in the found to be not the blackest villians in

The other speakers who have accepted the invitation to speak are. Frank Bohn, James Connolly, John T Vaugh

Protest Against Roosevelt's Attack Moyer, and Haywood.

The Plasterer Laborers' Union, Local 6, of the City and County of New York, with a membership of 1,300, in meeting assembled, condemned, Monday night, the utterances of President Roosevelt, in his letter to Representative James T. Sherman, on the labor-leaders Mover and Haywood, denouncing them as undesirable citizens, and thereby poisoning the mind of the general public and possibly the jury in their coming trial; and, furthermore, as these men never have been tried for any crime the union sees in President Roosevelt's action a blow against organized labor.

IGNATZ AUER DEAD.

Famous German Social-Democra Breathes His Last.

Berlin, April 10 .- Ignatz Auer, the well known Social-Democrat, who since 1877 has almost consecutively been a member of the Reichstag, died here today at the age of 61. He was National Secretary and one of the best known members of the party, and had devoted his life to arduous toil in the interests

a whole. Auer was born in Bavaria in case, Orchard and McParland will be 1846, and was by occupation a harnessmaker.

> Watch the label on your paper. It will tell you when your subscription ex-pires. First number indicates the month, second, the day, third the year.

fifty thousand dollars. The meeting ended with an appeal to the women present to tell the women in the villages, "to be imbued with the sentiment of high duties as mothers of manhood; to commence in future to ennoble man, as by nature itself women in character are much softer than men. amid rougher surroundings, doing hard work, hauling timber, and suffering from winter cold, and there is no wonder that the character of men is much ruder than that of women. It is very desirable that when men will return from their outdoor work, women should give them solace and good comfort in their homes." This, after the meaning of community life had been expressed as first, "spiritual fellowship and that was promptly stopped by Verigin. meekness between men, in which peo-On reaching Canada, Verigin orple are understanding great gentleganized the disrupted communities, put ness," and second, "material profit." them on a paying basis, acting with

The working day of the Doukhobors follow his advice. There is no doubt is from five in the morning until eight but his task in Canada has been a hard one, and it is fortunate that he in the evening, but this is divided into three shifts of five hours each. One has approached it tactfully. Canadian set of men and korses go to work at lands are rich, well adapted to agrifive, stopping at ten for five hours rest, culture, and the Doukhobors own fine tracts. Since their leader has succeeded while another shift continues the work. At three in the afternoon the first shift in centralizing their labor and holding the men together, their lands have be- resumes work and continues until eight ers. Buy a copy and pass it around.

buildings which could be used either for school or church, and to engage teachers.

Growing out of the religious tenet that they must not eat flesh, is the desire to care well for animals. The horses used in connection with railroad construction are kept in the best of condition. Their coats are glossy, and one man is constantly employed to chop and prepare their food.

The life of the Doukhobors is of the simplest. When they work on the railroad they have no "boss" or section man, and they work so incessantly that they resemble a hive of bees. They show great capacity for road building, bridge making, and handling large cuts and grades so that their railroad work is accurate and lasting.

This, with the wonderful fertility of Canadian soil, has enabled them to pay off loans and to get a good start. Some of the sect are separated from the main blony and are living in Prince Albert district, but Verigin hopes to obtain land so that all the Doukhobors in Canada will be in one section .- Katherine Louise Smith in "The Craftsman" for April.

effective in impelling social revolution.

In criticism we must be obdurate.

Just one more error in the pamphlet

lectual world.

of the solution of the social problem.

BY HENRY LAURENS CALL.

A 2EVIEW BY FRANK BOHN. Rapidly changing social conditon make it essential for Socialist writers to constantly reproduce a large portion

of the literature of the Socialist movement. Statistics, useful for propaganda blished, are "back numbers" in ort a time as five years. Bold sions, of which the validity is at first questioned, soon become ineffective for agitation, by reason of the continual publication of more striking and rearkable information. When the first ed lackey drove a cab down way a generation since, he was oted off the street by American cititens who stood aghast at such effrontery to their customs. To-day, the presence of probably 75,000 of such social hermaphrodites parading the liveries of masters attracts no attention

whatever. "The Concentration of Wealth," by Henry Laurens Call, clothes in more uring form the remarkable statistics of present day wealth concen-tration. All of us have had intimation of the facts as we read the newspapers during the past two years. Still, in public speaking and writing, the methods of science prevented us from saying more than is contained in the well-worn phrase-"one per cent. of the American people own as much as nine ty-nine per cent., or, "The working class of the nation possess but four per cent. of its wealth?

Call states boldly, and proves to our satisfaction, that one per cent, of our population own ninety per cent. of the ion's wealth. The statement startles even the best informed. The first question is: where is that "bulwark of our titutions", the middle-class? Statistics, which might fittingly be chiseled on its tombstone, answer mournfully. The echoes of its dying groans may still serve to float presidential booms among the addled heads of both urban workers and the agricultural serfs of the coun-But the one-time middle class, so far as the real possession of property and political and social ideals " which spring therefrom, is concerned, is no

"In 1854 there were just twenty-five aires in New York City with for tunes ranging from \$1,000,000 to \$6,-000,000 each. The combined fortunes of the twenty-five aggregated, in fact, but \$43,000,000."

"A careful analysis of the census of 1990 shows that, as classified according to occupations, 250,251 persons pessed \$67,000,000,000 ont of a total of sp5.060.000.000 as our then national 000,000,000; while the remainder of 'ocealth; 8,429,845 persons poss persons possessed but \$4,000.000." this grouping, it is shown, is ing. The number, 250,251, refers als, not families. Increase it to 800,000 and it will include all in dent circumstances and to say that they own ninety per cent. of the national wealth is probably an under-

CODDINGTON.

"The Concentration of Wealth

BY HENRY LAURENS CALL

Read before the American Association for the Advancement of Science at Columbia College, New York. December 27, 1906.

In this noted contribution to economic science, Mr. Call has shown not only the startling degree and growth of wealth concentration in the United States, but also the means by which this wealth concentration has been brought about. He has further demonstrated the justice as well as the necessity of society reclaiming all the instruments of production precisely as are "confiscated" the burglar's loot, the counterfeiter's coin, or the pirate's ship.

Some of the subjects treated are indicated by the following chapter headings;

- z. A Half Century of Wealth Concentration.
- a. The Growing Poverty of Industrial Society.
- 3. A Reign of Corruption and Plunder.
- 4. Industrial Society Sold Into Bondage. 5. The Modern Corporation a Monstrosity.
- 6. The Corporation Should Be Social, Cooperative.
- 7. Nature and Justice of the Required Remedy.

In this pamphlet Mr. Call has, in short, laid bare the whole industrial, financial and political situation. In the words of the New York World (applied to a former work of Mr. Call's) it is "a scientific, cold-blooded, mathematical analysis of modern industrial society, in which the tangled web of economic falsities. inconsistencies and anomalies is shown with the clearness of demonstration of a professor of anatomy."

WOMAN'S FIELD SOMETHING DOING IN BUFFALO I. W. W. THAT SHOULD INTEREST PROLETARIAN WIVES Wage-workers of Buffalo have had a faithful I, W. W. man. All of this g sleep notwithstanding the fast that there are many slave pens, and that it

foreign,

is a city looked upon as a paradise for manufacturers, owing to the possibility of seeuring cheap labor. The working men and women have been so husy selling their hides, they have not had enough vigor left to properly size ap the situation and come to an understanding that there is a way to lift themselves out of same, if not at all, of the bondage that has been indefinitely worse than any

chattel slavery ever was. But now things are taking a turn. There has come an awakening and something is doing to prove that there is enough manhood and womanhood left for breaking away and establishing a new era for wage-slaves of the Bison City. For the past three weeks an unwonted activity has been going on in I. W. W. circles, and a few determined spirits swore that there should be new life breathed into the organization which could and would mean better conditions | er in this world. All are standing over for all wage-workers here. A call was the crater of a volcano which may drown

points to the fact that Buffalo is about to cast off the nightmare of bondage and awake to the real sense that the working man, so largely in the majority, can and must fight his own battles and that he can surely win out if he will stand upon the foundation of Industrial Unionism and not let the fakirs and pieeaters exploit him and create him an unwilling philanthropist to feed the rich, while he, himself, is half starved.

To the women of the country, a word s said. Do not believe if your husbands fathers and men folk in general, or you, yourselves, have a "good paying job" to-day, you are safe from the economic dangers that all must suffer under. The "good paying joh" may be here to-day, but to-morrow it may be a thing of the past, if the employer sees fit to put in t cheaper hand to do the work he is not paying what he considers "too much" for As long as the capitalist class is in power, there is no safety for any wage-work

Money represents labor; but whose labor? In modern society it is but rarely that money represents the labor of those who possess it. It usually represents the labor of others. -COUNT LEO TOLSTOI.

CARNEGIEAN POETRY VS. FACT. The gossamer vell of poetry often hides many an ugly fact. Class interests tend to mask the real with the ideal; making it most deceptive and illusive. The English lords rallied their retainers, by poetical appeals of devotion to crown and church, when it was their ground rents over which they actually enthused. The ideal of the American slave-oligarchy was the preservation of the American constitution; the real was a society of "mudsills"-of negro chattels-to be exploited for the benefit of an 'arrogant and incompetent agricultural aristorney; And so other 'historic instances may be cited demonstrating the misleading uses to which the Muses are put in the world of reality. But we are not so much concerned with the

past as with the present. This brings us up to Andrew Carnegle. Carnegie uttered a very poetic sentiment when he said he "didn't even have to rub an Aladdin's lamp" to give \$23,000,000 to the Pittsburg institute bearing his name. He merely gave "a slip of paper"-a check-for the amount. Such has been the development of money under capitalism that a Carnegie needs only to sign "a slip of paper" and parasitic generosity finds expression so easily that the poesy of the Arabian nights is sursed. Wonderful; but is it wholly The answer is one that brushes aside the poetry of the magic paper slip and discloses the hideous realitya veritable reign of class exploitation. robbery, fraud, corruption and crime, in the savage turmoil and bloody conflict of which hundreds of workers have been slaughtered, and the wealth which gives the "little slip of paper" its value has been acquired.

Real poetic sentiment will be missing in the Carnegican adaptation of Arabian Night's poesy, to those who have read of the theft of John Brislin's rolling mill invention by the Carnegie Co.; or have poured over Hamlin Garland's realistic descriptions of the Inferno at Homestead; or are familiar with Chas Spahr's chapters on the ness. on of trades-unionism in the Carnegie mills; or recall the blow-hole armor scandals in which the Carriegie nany was the principal; or have nbed James H. Bridge's "History of the Carnegie Steel Company," esad haitle of Homestead"; or have listened to the tales of incineration and injury from the lips of the wage slaves employed by "The Steel King." "The Cargie Company," says a recent eulogist, ras a Napoleonic republic": and then paid pleader adds: "Each man held place just as long as he could do the work better than any one else, and no longer. . . He pitted them one against the other and incessantly goaded them on." The result is an appalling list of killed and injured, not to mention the nervous and moral wrecks of which Pittsburg can boast ciety-of the hungry, naked, homeless so many. Contrast Carneglean poetry with Carnegican fact! Philanthropic magic then gives way to capitalist foulness. The gossamer vell of poetry once more hides the ugly facts of exploitation, competition, theft, brutality, fraud, corruption, immorality and murderof class interests.

Such a course for the farmer by means of a corner. is illogical, absurd; and a palpable Millions may starve for the lack of fraud. It presupposes a charlatan de vold of sufficient ingenuity to cover his surplus wheat, others in the cities may traces; and a lot of brainless dupes, in-capable of either reason or honesty. It pay exorbitant prices for the foodstuffs of which wheat is the main ingredient; is an insult to,"Der Volkszeitung's" inbut the "equitists" aim to put \$150,telligent readers; and should be repu-

000,000 into the wheat growers' pocketdiated by them. The words attributed to both Ida books in the event of success. They Crouch Hazlett and Haywood are not point to the profits realized by cotton only absent from her account of the and tobacco growers through "con interview, but those that do appear trolled marketing" and predict that tell an entirely different story from cattle and other growers will follow that which "Der Volkszeitung" fain would convey. The real story is one which shatters the hopes of "Der Volks-

Who, among the supporters of the zeltung:" as that story represents Haypresent system, will have the hardiwood in opposition to all that it reprenood to condemn the wheat growers' Rockefeller corners oil: Carnegie, steel; sents. Haywood, according to it, shown acute interest in the strikes at Portland Harriman, railroads; Baer, coal; Frick, and Goldfield, both of which are being coke; and so all around the vicious circonducted by the I. W. W., as reprecle of capitalism. The object of capsented by the socalled Trautmann-De italist production is profit. To insure Leon faction: and are opposed by "Der profit, combination and regulation take Volkszeitung's" pet the American Fedthe places of competition and planless-The production of nature and eration of Labor, which is acting in combination with the Citizens' Alliance labor is dwarfed to promote private in the interests of the canitalist class and class interests. Society cries for This interest certainly does not reflect bread, and is given a stone, as long "an open and unmistakable declaration" as there is no profit in providing the commodity desired." It is "held up" so of hostility "to the so-called revolutionthat the few owners of the natural and ary element in the L W. W." On the ontrary, Haywood's reference nd canital) may grow rich and arrogant at the exwonderful advances along industrial lines in cities like Portland," is strongly pense of the propertiless many, indicative of delight and joy at I. W. W. In the face of the capitalist law re success; while his commentary on stricting nature and labor to profit Goldfield, is not very complimentary to much is said about there being "more mouths than food," etc. Obviously, this the forces of which "Der Wolkszeitis a fallacy. The drawback consists ung" and its A. F. of L. form a dis reputable part. not in limited productivity but in the Then, too, Haywood is shown as being existence of a system which makes such productivity a necessity. Where 'particularly pleased that the Montana profit is the aim of production, both News was making such a strenuous stand ip constructive organization in the Sonatural and social forces will be subcialist movement." ordinated to it, regardless of social needs. Only where the needs of so-

solar plexus blow for. "Der Volkszeitung." The latter demands opposition to such ownership and heaps anathema on all who do not manifest the same.

Finally, take Haywood's observations on the political and economic policy of "The Montana News"-observations that plainly reveal Haywood at war with the ossified craft-divided, nonebut-capitalist-politics of American Federation of Labor unionism, which "Der Volkszeitung" alds in return for pecuniary favors received. To claim that "Labor in its economic interests

is in a formative state in America at present," is to war with the leading doctrines of "Der Volkszeitung" which insists that Labor is organized on well defined historical lines; and any attempt to form or reform it, as must necessarily happen in a formative state. is "union-wrecking" and "scabbing!" Haywood is too broad a statesman to meet with encouraging sympathies from "Der Volkszeitung's" private Civic Federationized and Citizens' Alliance ized A. F. of L. interests. This will account for its dishonesty in at tributing to Haywood utterances that are mere fabrications; and in endeav-

oring to utilize the same to attack the men and the movement in which he is manifestly interested. It is an ignoble attempt to turn defeat into victory; another one of the many efforts to put a spoke in the wheel of true Socialist progress, so characteristic of the A. F. of L.-ized, "New Yorker Volkszeitung."

AN INVITATION-WHAT CAME OF IT.

Two weeks ago the acting editor of the Daily and Weekly People issued an invitation to comrades and friends to contribute articles of various kinds. The invitation has been widely read. One response came from Michigan. It is as follows:---

Detroit, April 2, 1907. Acting Editor:

Your editorial, "An Invitation" in The People of April 1, noticed. Say, we get that issue on April 2, in this part of the country, hence, too late to consider it as a first of April joke. Therefore, remember next year that you have to issue that "invitation" a whole week in advance, at least to reach the various readers on the first of April, or "quit your kiddin'."

For constructive articles facts must be presented. You don't care to publish them, hence you don't want rea constructive Socialist articles written at all. All fool's day is past now, you know. M. Meyer.

The acting editor owes the writer a debt of gratitude for making it clear that all fool's day is confined to the first of the month in Detroit. The date of the above letter and its conclusions would otherwise incline him to believe it is perennial there. Any man familiar with the pages of constructive Socialist discussion published in The People, who alleges that articles of that character are not wanted, is simply hanging such signs as "Kick Me" on his back; and otherwise indulging in foolish witticisms at his own expense. Of course, under such circumstances, the acting editor has no intention o doing what is implied in the injunction "to stop kiddin'." He is perverse enough to go right ahead, despite the

antics of people who believe they know when all fool's day leaves off and other days begin. And he has every reason for indulging his perversity. Other letters, asking advice and promising to "th contributions, have been received and UTOPIAN INTERNATIONALISM. answered. Personal offers have been Wm, Stead spoke in favor of "The extended and accepted. In addition some three hundred copies of the Weekly People have been sent to comrades and friends throughout the United States and Canada. The acting editor, in going over the names and addresses at hand, was agreeably suprised to note that, since issuing a similar invitation some half-dozer years ago, there has been a great addition to the number of intelligent proletarians who contribute to the Soference. cialist Labor Party press. Old friends disarmament at the coming conference. have remained; new ones have been The men who are to participate in it added. The task in hand is to get are committed up to the hilt. We can them to contribute more regularly and only try to get a reduction of a modoftener. The result, while requiring eration of armaments. No hig Power but little effort, will, in the aggregate, will propose reduction. We have been amount to considerable. All who have notified of that. What we shall ask for received marked copies, should not fail is that the Powers do not increase to respond. Address, at once,

interested in the Montana News, is a **REFORM'S LATEST FAILURE.** The Newsboys' law is the latest admitted failure of reform. The law cannot be enforced. Now efforts are being made to make it enforceable. The police having failed, truant, officers, teachers and principals are also to be given police powers, and penalties are to be increased. How this increase in the complex machinery of administration will give the law greater effect is not apparent. Police powers and penalties have been increased in the matter of child labor; yet child labor grows

The trouble with the Newsboys' law is that it leaves the real evils untouched., It is admitted by the New York Child Labor Committee, that often the newsboy's carnings are an essential help to his family. It was found that, in an investigation of 450 families, 116, or 25 per cent., were in actual need. creasing numbers of workmen realize This 25 per cent. is held to be small; that the necessity for controlling forbut small as it is alleged to be, the law makes no provision for the exsystem. The wages system robs labor tinction of this need for the newsboy's of the greatest part of its products and earnings; and, to that extent, the law thus makes international commerce contributes to its own undoing. Poand war unavoidable. licemen, teachers and principals are class, so realizing, aims to abolish war but human, when necessity is concernby abolishing the wages system. It ed; they are likely to wink at or evade refuses to prepetuate the wages system a law that takes the bread out of a by refusing to fight the wars of the family's mouth; and to put all newswealth takers-the capitalist class. The workingmen and women are turnboys in the same category.

Other circumstances tend to perpet ing to anti-militarism and anti-patriotuate this state of affairs. There is, ism-in fact, against all the isms, for instance, a perpetual shortage, of which perpetuate the wages system In school sittings in the large cities. Thou-France, their influence is pronounced; sands of children are unable to attend even Japan feels it. They are organizing industrially, politically and interclasses for lack of accommodations. Where this condition of affairs prevails, nationally; and are aided by capitalist the need for pulling newsboys off of the evolution in so doing. The execution street and into schools, is not likely to of Labor's decision to abolish the cause appeal to teachers as being especially of war, and to refuse to prosecute the urgent. If a lack of pupils, instead of latter, will make "The United States of schools, prevailed, a more effective the World" a reality. All else is utopian. in the worst sense. stimulus would exist, in favor of the law's enforcement.

Another important, perhaps the most important factor, operating to the detriment of the Newsboys' law, is the newsboy's economic relation to the newspaper The newspapers clamor for strict enforcement of the anti-trust hws; while they deliver academic discourses on the non-enforcement of the Newsboys' law. The reason is apparent. The newsboy is necessary to the success of the newspaper. Newspapers must be sold at such a small profit, and under such circumstances, as to make the newsboy most desirable. In Brooklyn, during a boycott on its leading newspaper, an attempt was made to introduce young men and women as vendors. The prominent streets were cluttered with them, at first; but with the return to the normal condition of affairs, they disappeared-faded away like snow before the sun. They were economically unfit; and could not compete successfully with the dare-devil youngsters, who had no skirts to keep in tow while jumping on a car; and who felt that an ear-splitting disregard for conventionality was just so much extra fun injected into the game. The dependence of the newspaper on the newsboy is illustrated in this typical instance.

When parents are assured a family living, schools are so numerous as to be in need of pupils, and production for profit is abolished, laws for the protection of the newsboy will not be needed. for then the newsboy will have disappeared. Such conditions will only be possible under Socialism. Socialism is the only complete hope for the solution of child labor.

factor making for international war. It is no accident that the Czar of Russia was compelled to repudiate the principle underlying the first Hague conference, which he called, by going to war with Japan. Nor is it purely coincidental that Germany, whose capitalist class is very aggressive in the exploitation of Turkey and China, should act in a manner directly opposed to the spirit which the peace advocates would like to see dominant in the coming conference. Further, considering the strained relations existing between the capitalist classes of this country and Japan, and the unpreparedness of the former, as contrasted with the formidable aggressiveness of the latter, the spectacle of strenuous Roosevelt in the role of an olive-branch

bearer, is not at all an inexplicable one. Peace is dependent on labor, for labor is the greatest economic factor. In-

All that could ever be to us the littleness of what is known, said about slavery being un-Christian compared to that which is unknown and a sin in the eyes of God can be ap-The limitations of the human mind make plied with tripled and quadrupled force it impossible to know all there is to to the present industrial system. It also know in any one field. Let us approach will have to go. "Getting together" and our problems in the spirit of Lincoln, compromising will prove just as devoid with a sober recognition of their proof help for the wage slave as they did fundity and a determination to right for the chattel slave. The working class of the land is fast waking up to this fact, and by organizing in the Industrial Workers of the World and the Socialist Labor Party, is drilling itself to take possession of the means of production and istribution, and run them for" the benefit of the whole people, and not of the parasites. And if the parasites dare to oppose armed force to the will of the people, (which, as they are a coward class, they probably won't do), force on the part of the people will then become every whit as justifiable-if not more so-as it did for the Abolitionists. B. J .- So it will; and may I be there to help! / Opportunistic Socialism received another set-back in Chicago on April 2. It. was caught between two movements to which it had catered, with the result that it suffered from both. One was the movement in favor of municipal ownership. This was taken up by the Democrats so much more affectively, that the work of the opportunists was so much wind wherewith to fill out their sails. The other movement was the pure and simple trade union movement. The Sheas, who led the movement, converted Dunne's conduct during the teamster's strike into political capital. The result was increased "union votes" to Busse; the same "union votes" which the opportunistic Socialsts always cater to. even to the extent of upholding the capitalist form of this unionism. Another drop like that one from 23,000 to 13,000 in Chicago, on April 2, and opportunistic Socialism will be compelled to join

the down and out club.

BROTHER JONATHAN.

B. J.-Yes; you say that if the cap-

ROGERS HAS THE FLOOR.

This is the day of the big man. Mr. H. H. Rogers, actual head of the Standard Oil Co., has the floor. He is seeing and saying things about the country through the "Manufacturers' Record." First he says:

"I believe in providential happenings in all the affairs of men."

This truly plous declaration will impress the oil trust's competitors. They ill rejoice to know that the rebate is "a providential happening." The blowing up of a refinery will appeal to "'It is what we have got to have,' he said."

WHAT SAYS SECTION HARTFORD To the Daily and Weekly People :---I agree with the writer of the letter "Worth Trying For," in the Daily People Correspondence of the 5th. If Section Hartford would bring in one sub per month per member it would mean 40 subs per month or 480 per year; and I think I could get or would try to get the balance to make an even six

hundred. So if they get a wiggle on them in a short time, this one horse town would be stirred up a little. U.

Hartford, Conn., April 5.

UNION WRECKING IN PITTSBURG. To the Daily and Weekly People:-Union wrecking is having its innings here, with one Tim Healy, as chief smasher. This Healy is one of Gompers's emergency men, and is the president of the Stationary Firemen. The Teamsters' president is also here, so is the head of the Stationary Engineers' Union, all with the single purpose of breaking up the Brewery Workers' Union, the one industrial union of the A. F. of L. that strikes like a union should strike. All the men went out together, responded to the call of their union like one man. Then they found out what we have been telling them, viz., that the A. F. of L. was nothing but organized scabbery.

I think that some of the leaders are highly tainted with the same disorder. The working man into whose hands this might fall, from what he can see self, may ask, regarding those men of the A. F. of L. who are getting paid for organizing the working class, why do mon like Healy and his lik, make scabs of engineers, firemen, ollers, and teamsters, that are now and have been for years, in organizations? Why do those labor fakirs lend their aid to the employers against those union men on strike? Is it not scabbing? I answer. Yes it is the worst kind of scabbing; and after trying to find out what the bartenders and other men are going set is, "well the other unions are fightto do about it, the only answer I can the Brewery Mens' Union," and there you have it. It is a fight between the unions of the A. F. of L., in the interests of the capitalists.

Right here let me say that only two union bartenders struck; and those two were not A. F. of L.-ites, but I. W. W. men. In both cases those men were out against scab beer of the brewers, where the strike is on.

What the Volkszeitung Says: took place in this town, an interesting and lively meeting of the Italian Silk Weavers' Union. For months past the writer, alded by others has made an extensive agitation among these weavers, giving out literature of the L W W., At every meeting I would be at the "Montana News" thereon, are altheir door waiting for them to come and hand them literature. Finally one Sunday I asked for admission and was allowed to go in. There were some | On this head, "Der Volkszeitung" says: members who were talking of joining the I. W. W. Comrade Delof the World, led by De Leon and lavia ripped the argument (if such it Trautmann, comes just at the right could be called), to pieces. When the time as De Leon is for the last four vote was to be taken Meunier stated weeks on an agitation tour through the that he wanted a secret ballot. He got West which was undertaken from the it. When the result was announced it beginning to influence the members of was found that 44 voted in favor of joining and 37 against. We got a majority of 7 votes, but they have a the Western Federation of Miners against their present national officers,

clause in their constitution which has not been observed heretgfore," which says that any motion can not be put into effect unless it has two-thirds of the vote cast at any meeting. We will be again on deck at the next meeting and give these pure and

comrades in the battle, in the Executive Board of the Western Federation simplers a hot time. It was also deof Miners. cided to expel one of its members named Martino for scabbing in the strike against the firm of C. Stochn

A DEADLY PARALLEL, SHOWING "DER NEW YORKER VOLKS

ZEITUNG'S" ALLEGED QUOTATION FROM IDA CROUCH HAZLETT'S INTERVIEW WITH HAYWOOD ON THE I. W. W., TO BE A BASE FABRICATION.

LYING, AS USUAL

What Ida Crouch Hazlett Says:

In its April 7th issue, "Der New The "Montana News" of Thursday Yorker Volkszeitung," Socialist Party April 4th contains the following, over and A. F. of L. organ, prints an article the signature of Ida Crouch Hazlett: on the Moyer-Haywood case, in which "The Ada County jail occupies the Ida Crouch Hazlett's letters to main floor of the court house. It is all above ground. The large room where leged to be quoted. Especially is much I talked with Haywood is used as a made of an alleged interview by Ida sitting room by day for our men. Petti-Hazlett, with Haywood on the L W. W. bone was sick the morning I called. and Moyer was taking his exercise. Haywood was sitting at the table writ-

ing. A work on the criminal law lay beside him. I have noted before that he is using his enforced idleness in the study of law, looking toward a legal career.

"Each of the men has a cell where they sleep at night.

Haywood talked with me about an I improved the time very pleasantly hour. I asked him if he got nervous in a conversation with Haywood on the and worried, and experienced the menmovement, and his work while in pristal anxiety and real suffering, which on. We spoke also of the split in the one might naturally expect to be the Industrial Workers, and the defections fate of men whose necks are being of several Socialists. I asked him what clayed for in so intense and tragic a he thought of the situation as it now zame.

"He smiled bright-heartedly as he ""We are guiding the ship now in its unswered. 'Do I show any outward eviproper course," he answered. "We have dences of it?" cast off the undesirable element. The "I assured him that he certainly did

"He then went on to say that the work

of the Western Federation was moving forward just as well as if he were not there in prison; and that the fact of his being there made it go better. The exigencies of the class struggle had placed him where he was, and he was fully prepared to bear whatever inconvenience might be involved in the fight.

"Haywood went on to talk of the onditions of creanizations among the working clais at present. He spoke of the wonderful advance along industrial lines in cities like Portland where even the wharfmen maye been organized into the Industrial Workers of the World, and where the whole city is practically at the mercy of the working class. He spoke of the conflict in the ranks of organized labor at Goldfield, but gave it as the result of the mine owners, the employing class, spreading dissention among the workers in order to divide them and keep them from forming a coalition that would mean

lisaster to the capitalist rule. "He seemed particularly pleased that the Montana News was making such a strenuous stand for constructive organization in the Socialist movement. "It is what we have got to have,'

he said.

"Through a hitch somewhere the News has not been received regularly at the jail and he had not been aware before that it was owned and published by the Socialist Party of the state, the only one such in the United States. and he said that he was more than ever interested in it because of that. As I told him of its ten thousand readers, er and the other old tried and true of Local Butte taking 3,000 copies for distribution to get an immediate and accurate account of the defense side

"For that purpose, that old enemy of plant, motor, press, type, stock, and the Socialist movement in a letter to, a linotype about to be installed, all

UNIONISM AND POLITICS

(By John Francis, Du Quoin, Ill.) In the matter of "Unionism and Politics," I would like to say that the question I asked indirectly in a former discussion, has never been answered by the opponents of political action, viz., if the capitalists count in whom as we know they do, why do they go through the farce of election once every one or four years? Can you not guess?

UNITED WOMEN OF AMERICA-

The Daily and Weekly People are the

the writer, during the past twelve years felt the need of such friendly acts. Comrade Quinlan's article of recent date is therefore most timely as it opens up a question of vital importance to us poor "sinners" of the "soap box." Namely: How are we to mind our own business, taking charge of issues purely political, leaving economics in the care of the economic organization?

of the S. L. P. is always welcome. Most

valuable is that criticism which is ac-

complished by suggestions. Often has

The S. L. P. will enter the next national campaign with a single demand which will probably read like this: We demand the unconditional surrender of

| <text><text><text><text><text><text><text></text></text></text></text></text></text></text> | of this firm are members of the L. W. W., your humble servant being one of them. Ernest Alazzone. West Hoboken, N. J., April S. FORTLAND WORKMAN NAILS GRAM. Portland, April 5, 1907. Editor Weekly People, 2, 4, 6 New Reade Street, New York. Dear Sir: In looking at the various papers of this dity. I happened to find paragraphs to the effect that the head of our labor leaders, President C. H. Gram, of the good, old, true and tried union, the A. F. of L., is a liar, labor fakir and a man untrue. If I might express my opinion of these papers, he is a true traiter to unionism. Shall we, as men, wearing union but- tons on our breasts, and carrying union cards in our pockets, allow ourselves to be exposed to the world without making some effort to defend ourselves? We are | his mouthpiece, dated March 20, from Nevada, is not ashamed to put into def- inite form certain rumors which have before now, been often hinted at. Namely: "That Orchard and McParland are not the meanest comrades in the conspiracy against Moyer, Haywood and Pettibone, but, as he has been in- formed in Denver, the kidnapping of the three men is a part of an attempt to put the Western Federation of Min- ers in the hands of men like Mahoney, O'Neill and Kirwan, and through them use the same as a weapon in the inter- ests of the American Federation of La- bor against the Industrial Workers of the World." Of course, the Mine Own- ers' Association is behind that conspir- acy, and by this inference O'Neill, editor of the Miners Magazine, Ma- honey the Acting President, and Kir- wan, the Acting Secretary Treasurer of the Western Federation of Miners have allowed themselves to be bought by the Mine Owners to deliver Moyer, Haywood and Pettibone to the galfows, and the Western Federation of Miners to the American Federation of Miners | seemed delighted, and said that was the way to go about it. "He asked particularly if the Mill and Smeltermen's Union of Butte were taking bundles of the News: said that was such a fine militant organization, and was so persistent in spreading edu- cation and economic literature, that they took advantage of every opportun- ity to inform and develop the intelli- gence of the workers. "When I told him of the policy the News had taken as an organ of the Socialist Party, not to participate in any of the dissentions among the un- ions, but to stand for organization on political and economic lines whenever, it was helpful, and continually point the workers to their class interests, and that in union alone there is strength, he said we were undeniably right. La- bor in its economic interests was in a formative state in America at present— an experimental state, as it were, and no one could tell exactly the direction its evolution would take. But the So- | o'clock, when there will be a num- ber of other women here who are also interested in a greater activity for So- cialist' women. I also will be very much interested to know how the prize essay develops. I am extremely apologetic that this matter should have met with so little courtesy on our part, but trust that you will forgive us now that the explanation has been made. With fraternal greetings, Faithfully yours, Mary Wilshire. The above is very gratifying. It an- swers the questions raised and gives hope that the call for the prize essey will appear in one of the following issues of "Wilshire's Magazine"; thus completing the circle of Socialist publications favor- able to the objects of the Socialist Wo- men of Greater New York. | Now, if I am not intruding I would fike, to answer this question myself. They (the capitalists) go through elec- tion farces, only to make the people think that the majority of the people sanctions in full what is done by them; or in other words, the election farce licenses them to do as they wish; and the people bow to Government. Now, when the Industrial Workers of the World and Socialist Labor Party are strong enough to "take and hold," the ballot box included, they can allow every body to vote and if we win only by one vote we can take and hold the capitalist burgs because we will be thoroughly organized in the I. W. W. as well as the S. L. P. or the reflex of the I. W. W. what ever it may be. The Opposition will be divided between the Republicans, Democrats, Prohi- bitionists, Populists, etc., etc., and they all will bow to the Socialist or Indus- trial Government, I am sure. If not we will be in a position to make them, as we have to do now; and we also will not allow them to set up a rival gov- ernment a la Versailles or Richmond; or organize a counter Revolution. | which will probably read like this: We demand the unconditional surrender of all the means of production and ex- change to the organized working class. That being the only demand it is hard to understand how the agitator can en- tertain any other idea. Comrade Quin- lan seems to think that there is some other idea but has failed to explain. Perhaps after all, we have not the men- tal grasp. Strange as it may seem, new that the I. W. W. is fairly launched the optim- ism of the agitators of the S. L. P. shall surely win, but we cannot picture our candidates sitting in a capitalist con- gress participating as any part of a capitalist law-making, or law repealing body. Indeed our enthuslasm knows no bounds when we contemplate the es- tablishing of the Socialist Republic by the duly elected and accredited dele- gates of the I. W. W. Politics within the capitalist state is but a struggle for economic and political supremacy between the classes, and we of the S. L. P. enter the conflict in the bohalf of our own class organized in the I. W. W., know- ing that if we win the common consent of the voters that the mission of the S. |

PATERSON L. W. W.

IN LOS ANGELES

GROUNDLESS PREJUDICE.

Accepts Offer of Socialist Party Platform, Which He Holds to Intense Delight of Fairminded Members of That Party-Narrow Minded Heathens May Rage, but No Matter.

Los Angelos, April 10 .-... The current issue of "Common Sense," a Socialist party organ published here, contains, besides a six-column report of Daniel De Leon's several meetings in this city, the following editorial:

1.00

Clear, logical, scientific were the able addresses delivered in Los Angelos last week by one of America's foremost Socialist scholars, Daniel De Leon, editor of the New York Daily and Weekly People, official organ of the Socialist Labor Party of America. There is probably no individual connected with the Socialist movement of this country who has been more bitterly criticized and attacked, more warmly hated on second

and third hand testimony, and perhaps 2.10 more misunderstood, than Daniel De Leon.

So rabid and unreasonable is this prejudice in some directions that more than one local comrade was heard to remark that any Socialist Party man that would go to hear De Leon was a traitor to the party. If so, why, so much the 2.00 worse for the party, of course. But at least one of these individuals was seen present when De Leon spoke from the 1.25 Socialist Party platform! The building

did not catch on fire, but it is to be hop-.25 ed the byains of that Socialist Party member did.

1.50 It will remain a lasting tribute to the liberality, fairness and strength of the local movement that De Leon, after being heard twice in this city, was offered the party platform, which he so ably and gracefully filled. And it was

certainly a tribute to the methods of 17.50 this man, born to fight, when he hesitated to criticize the Socialist party position even in answer to a question, as

foreign to the subject of the evening, until it was manifested that such was 1.00 the will of the meeting.

Without regard to the merits or demerits of the various controversies over Socialist principles and policies in which De Leon is at all times engaged, the Los Angeles comrades showed, by the numbers in which they turned out to listen to him, their appreciation of the opportunity to hear him speak for himself, also for the chance of learning something from him, which, no doubt, most of them could and did. Of course, narrow-minded heathen in the Socialist Party will rage, but no

matter. While there are no fundamental differences between the principles for which the Socialist Party and the Socialist Labor Party stand, still there have ever been since the birth of the former party, radical differences in policy and tactics to be pursued in fulfilling the mission of the working class.

According to De Leon the conditions exist in capitalistically-developed Americt, as in no other country, which justify and require the existence of a clearlyseparated working class political party, particular as to the economic interests of its individual members and particular and pronounced in its endorsement of an economic class organization that shall be as revolutionary as the political; and shall evolve so as to supply the industrial formation and org anization, as well

as physical power, to fulfill and com-

ownership and management of the industries, rather than their re-organization, until the fabric of the industrial republic is completed.

On the other hand, the De Leon and S. L. P. faction claim that in the first place a political victory, completely revolutionary, is impossible without

the organized physical force of an equally revolutionary economic organization to back it up; that otherwise the bomb becomes necessary and industrial chaos ensues, instead of the industrial organization, which from its nature would be capable of becoming and would become the Socialist gov-

ernment, an industrial government by and of the workers in the industries. Undoubtedly the party's attitude in the matter of its endorsement of or neutrality towards, economically organized labor, on craft or class lines, will

be one of the principal contentions at the next national convention of the Bocialist party. It is a burning question, and one that will have to be settled right if the Socialist movement in America is to continue to progress. In answer to a question, De Leon gave the reason why in his judgment it was necessary for the working class political party to endorse the workingclass economic organization while the economic organization might consistently remain neutral towards capital-

ist or revolutional political parties. The political party is, he says, the reflex of the economic organization of the working class, hence could not consistently do anything else than endorse and support it, while on the other hand, the industrial organization is in itself the working class movement, revolutionary in its character, the industrial basis of the new order, for the attainment of which the political party is simply a weapon, of use only under capitalism. In itself it représents no vital part of the working class organization. Standing on the ground he does to-day, and on which he has stood for years, De Leon has ever severely and relentlessly criticized and exposed whatever has seemed to him a departure from, or betrayal of, true Socialist revolutionary principles on the part of the Socialrist party. Naturally this has won for him not much kindly regard from the individuals and newspapers that were the objects of his shafts. That De Leon has not always been just and fair in these criticisms and armiments is perhaps true. We are certain it is true of Socialist Party individuals

and press on their side. Nor does it, seem altogether strange that mudslinging and vituperation should have sometimes been mistaken for argument in the storm and stress of the struggle for principle under the hellish conditions which pit man against man in every field of work. Even Socialists at times must rub off a little of the mud, being nothing less than human.

We think that the attitudes of both camps are becoming fairer towards each otherwand that in the future Socialists will unite their efforts, consistently with the policies they endorse. against a common enemy instead of doing what they can to cut each other's throats.

Certain it is that intelligent consideration of Socialist policies has received considerable stimulus from the De Leon addresses, from which we hope there will be definite and lasting results.

LABOR'S PROTEST

STILL GOES UP AGAINST PRESI-DENTIAL SLANDER.

Yonkers, N. Y., April 11 .-- Last Saturday night the Yonkers Moyer-Haywood Defense Conference held a very well-attended meeting. The Finance Committee was ordered to call in all subscription lists outstanding.

The Conference decided to hold a large mass meeting on or about the First of May in Getty Square.

The Conference also adopted the fellowing resolution, which has been forwarded to President Roosevelt:

To the Hon. Theodore Roosevelt. President of the United States, Washington, D. C.

Dear Sir :- At a regular meeting of the Moyer-Haywood Defense Conference of the city of Yonkers, N. Y., held Saturday evening, April 6, 1907, the following Preamble and Resolution were adonted:

Whereas, It having been stated in the public press that you have declared Messrs. Moyer and Haywood, two citizens of the State of Colorado, now under indictment on a charge of murder, to be "undesirable citizens":

Whereas: Such statement, coming as it does from a Nation's Chief Executive. is calculated to prejudice the case of these indicted men, and make impossible a fair and impartial trial; now, therefore, we, citizens of the City of Yonkers, N. Y., organized as a Moyer-Haywood Defense Conference, and representing a majority of organized crafts. fraternal and beneficial organizations in

the said city of Yonkers, hereby Resolve, That, in view of your positive statement that these men are "undesirable citizens," you furnish satisfactory proof of their undesirability or retract the unjust statement.

COOPER UNION MAY DAY MEETING. The County Executive Committee of Section New York County, S. L. P., at its regular meeting Friday night, took in hand the arrangements for the monster mass meeting to be held on Wednesday evening, May 1, at Cooper Union for the purpose of celebrating International Labor Day.

The organizer reported having sent invitations to the following speakers to address the meeting: Frank Bohn, National Secretary, James Connolly, John T Vauchan and James T. Hunter. They have all replied, accepting the invitation. He is also endeavoring to secure some out-of-town speaker for this meeting.

The committee decided to print 10,000 hand-bills announcing the meeting and the organizer was instructed to call upon the sub-divisions of the Section, through the Party Press, to distribute the same as soon as they are ready.
