THE WEEKLY PEOPLE

PRICE TWO CENTS ONE DOLLAR PER YEAR

AGENTS SENDING IN SUBSCRIPTIONS TO THE WEEKLY PEOPLE AGENTS ARE GENERALLY CHARGED WITH THE SALE OF THE NEWSPAPER AND THE DELIVERY OF THE CIRCULATION AND ARE NOT REWARDED FOR ANY INCREASED CIRCULATION ABOVE THEIR 60 PER CENT.

XX

GENERAL RESUME AS THE SOCIALIZER SEES IT

"Perhaps the severest loss caused by the Week of Famine was the loss of the bird of hope. Some of the birds that were formerly held have now died. The birds that were formerly loved have now flown. The birds that were formerly cherished have now perished in the flames of famine. The birds that were formerly preserved have now been destroyed by the gluttony of the people of the United States.

**MINES EXPLOSIONS**

**THE ELECTRICAL WORKERS**

FALSE AND RUINOUS IDEAS STILL RULE WITH THESE—REVOLUTIONARY ACTIVITIES

The electrical workers employed in the power stations held the key in every city of America to the success of the industrial establishments deriving their power from the stations. Their noisy demands, their constant threats, their time losing strikes, their constant threats, their time losing strikes, have long been a source of anxiety and worry to the public. They are not only a menace to the safety of the public, but they are also proving expensive to the public. They are not only a menace to the safety of the public, but they are also proving expensive to the public.

The workers who are employed in the power stations are not only a menace to the safety of the public, but they are also proving expensive to the public. They are not only a menace to the safety of the public, but they are also proving expensive to the public. They are not only a menace to the safety of the public, but they are also proving expensive to the public. They are not only a menace to the safety of the public, but they are also proving expensive to the public. They are not only a menace to the safety of the public, but they are also proving expensive to the public.

They are not only a menace to the safety of the public, but they are also proving expensive to the public.
Socialism in France

One of the fundamental questions in the struggle of the working classes is the question of property. Property is the lifeblood of exploitation, the source of all forms of oppression and misery. It is the foundation of the capitalist system, and it is through the abolition of property that the working class can achieve its freedom and equality.

The French Revolution of 1848 was a revolutionary wave that swept across France. It was a period of immense social and political upheaval, which ultimately led to the establishment of the Second Republic. The revolution was marked by a struggle between the working class and the bourgeoisie, and the question of property was at the center of this struggle.

In the wake of the revolution, socialism and communism became major political movements in France. The Marxian theory of communism spread rapidly, and by the end of the 19th century, a number of socialist parties had been established. These parties worked to advance the interests of the working class and the poor, and they sought to build a society that was free from the exploitation of wealth and power.

The Paris Commune of 1871 was another significant event in the history of socialism in France. The Commune was a revolutionary government that was set up by the working class in response to the failure of the Second Republic. The Commune was an experiment in the organization of society, and it sought to establish a socialist system based on the principles of liberty, equality, and fraternity.

In the 20th century, the socialist movement continued to grow in France, and it played a significant role in the development of the French state. The Socialists Party, for example, has been a major political force in France for many years, and it has been a prominent player in the country's political life.

The socialist movement in France continues to be a dynamic and influential force today. It is a movement that is dedicated to the pursuit of social justice and equality, and it is a movement that is committed to the建设 of a society that is free from exploitation and oppression.
