The Pressures of the People

The Pressures of the People, by Louis C. Prain, is a critique of the methods and policies of the Roman Catholic Church in the United States. The author argues that the Church's emphasis on social and economic reform was a direct result of the pressures exerted by the working class, who were fighting for better working conditions and improved living standards.

Prain also examines the role of the Church in the political and social life of the country, and how it has influenced the development of modern society. He concludes that the Church's policies and actions have been largely shaped by the needs and desires of the working class, and that its influence on society is significant.

The book is a valuable contribution to the study of the history of the Roman Catholic Church in the United States, and is highly recommended for anyone interested in the history of labor and social movements.
