SOCIALLY LABOR PARTY OF THE UNITED STATES OF AMERICA.

PLATFORM.

The Socialist Labor Party of the United States, in convention assembled, resolves itself infallibly true to its life, liberty, and in a century of demonstrations.

In the present crisis, we hold that the true test of politics is that the machinery of government must be controlled by the people, and that the people must be provided with the means of production and distribution.

In order to achieve these objectives, we propose the following measures:

1. An immediate program of land reform to give the people control of the land.
2. A program of industrial democracy to give workers control of their industries.
3. A program of social insurance to protect the people against the hazards of life, old age, sickness, and accidents.

The principles of our program are:

- Insurrection and rebellion form the only method by which the working class can achieve its ends.
- The workers must demand and fight for their rights.
- The state must be overthrown and the workers' councils must take power.

Regardless of their differences in method of procedure, all members of the labor movement should unite in the struggle for the abolition of the state and the establishment of a classless society.
