THE ISSUE IN GREATER NEW YORK.

Republican, Tammany, Henry George and Seth Low Capitalist Platforms as Compared with the Municipal Programme of the Socialist Labor Party.

A Special Delivery by Copper Talon, Oct. 12, by Louis Harris, Socialist candidate for Mayor.

The nature of Government necessarily depends on the nature of the Economic Institutions upon which the Social Structure is built, for Government is a mere agency of the economic institutions. The greater the power of economic institutions, the greater the power of government. Under Capitalism, Government is of the capitalists, by the capitalists, and for the capitalists. Under Socialism, Government is of the people, by the people, and for the people.

From the earliest days of man's economic history, there has been a struggle between the interests of the few and the interests of the many. In the case of the conflict between the capitalist and the worker, the worker is the democratic victim. He is the victim of the economic institutions that are based on the ownership of capital.

The Socialists believe that the solution of this conflict is the abolition of private property. They believe that the solution is the establishment of a Social Republic, a Republic in which the government is of the people, by the people, and for the people.

The Republican platform is that of the capitalist class. It is based on the belief that the individual is the unit of society. It is based on the belief that the individual should be free to do as he chooses, so long as he does not interfere with the rights of others.

The Tammany platform is that of the political bosses. It is based on the belief that the government should be controlled by a small group of men, who can be trusted to do what is best for the people.

The Henry George platform is that of the small landlord. It is based on the belief that the government should be controlled by the owners of land, who can be trusted to do what is best for the people.

The Seth Low platform is that of the small manufacturer. It is based on the belief that the government should be controlled by the owners of small businesses, who can be trusted to do what is best for the people.

The Socialist Labor Party platform is that of the working class. It is based on the belief that the government should be controlled by the working class, who can be trusted to do what is best for the people.

The Socialists believe that the solution of this conflict is the establishment of a Social Republic, a Republic in which the government is of the people, by the people, and for the people.

OPEN LETTER

TO THE HIGHER WAGE STANDARDS MEN

Chairman Workers,

We have some considerable doubt within the labor movement as to the value of organizing the workingmen. Is the strike the best thing to do in all the cases? In the case of strikers, we are not able to get a fair hearing. The employers say that strikes are a menace to society, and that the strikers are not willing to work on other terms than those offered by the management. We believe that strikes are a menace to society, and that the strikers are not willing to work on other terms than those offered by the management. We believe that strikes are a menace to society, and that the strikers are not willing to work on other terms than those offered by the management.

The more we study the matter, the more convinced we are that the strike is the only solution. The strike is the only solution. The strike is the only solution.

Yours truly,
