THE REVOLUTION.

War in West China, and the Russian Interventions.

The cause of the recent disturbances in West China, it is now apparent, is the intervention of Russia. The Chinese government, in its attempt to suppress the insurrection, was unable to defeat the rebels, and was forced to seek the aid of foreign powers. The Chinese government then appealed to Russia, which, in turn, sent an army to the scene of the insurrection. The Russian forces then occupied the territory of West China, and thus became involved in the conflict.

The Russian intervention has been highly criticized by the Chinese government and the Chinese people, who regard it as an act of aggression. The Chinese government has expressed its determination to resist the Russian forces and to regain its lost territory. The Chinese people have also shown their support to the government's efforts by participating in various demonstrations and strikes.

The situation is highly tense, and there is a possibility of further escalation. The Chinese government is now appealing to the international community for support in its efforts to maintain its sovereignty and territorial integrity.
