#### IN ILLINOIS.

BELLEVILLE, fil., July 19—Here in Belleville and East St. Louis, Ill., the prospects of us poiling a large vote are far more favorable than at any other period. For the last few weeks Com-rade C. R. Davis has been devoting more priot to one of more the more increevery night to open air meetings. Though he has been daring and un-reserved, still at every meeting the proreserved, still at every meeting the pro-letariat gave close attention through-out, and we never failed to get sig-natures to our nomination papers from persons entire strangers to us and our principles. Another favorable sign of the times: many of the middle class are ins giving close attention, while the also giving close attention, while the rest of this class have ceased vilifying our cause, probably, though, from a big jump sticking in their throats. As a further illustration of this sign, the fol-lowing from Comrade Davis was reted in one of the middle-class

"In our country, organized Socialism, with political tactics and objects, known as the Socialist Labor party, was organized by the working class not only for immediate relief but with an only for immediate relief but with an undeviating aim to substitute public ownership of all the instruments of pro-duction for that of present private ownership, which has finally resulted in more misery than was ever contained in any other period of the world's his-tory. As it is the duty of a bona-fide Socialist to give his whole attention to the working class, it is often thought we have an antipathy against a cap-italist. He is not to blame for being a capitalist any more than a man is to capitalist any more than a man is to blame for being born with red hair. Just as with the tramp, criminal and pauper, he is the bitter fruit of our present arrangement of producing and distributing wealth. He is an abnormal growth that will rapidly disappear in economic evolution. But this time I will step aside from our accustomed course, and address the so-called upper

We often hear the expression of little capitalist and big capitalist. A capital-ist in its scientific use is one whose possession and control of the instruments of production are so extensive that he is able to compete with others. But as soon as his instruments are but as soon as his instruments are overtowered by vaster and more per-fectly ones, and consequently he is no longer able to compete with his superi-ors, then he is no longer a capitalist. If he does not fall at once, he can only struggle, as it were, in the death throes and a grave in the ranks of the ware and a grave in the ranks of the wage workers awaits him. This rule holds good with the middle class man, the smaller dealer.

"Not only is the middle class or small Not only is the middle class or small capitalist suffering intenser hardships, and foreshadow its utter downfall, but they are swelling the numbers of the property-less-class. As much as we may not like confiscation, nevertheless all the property of the middle class is going to swall the coeffers of the capitalist to swell the coffers of the capitalist. Hence the middle class is startling us with their tragedy of three acts:

(1) "Increasing the financial strength of the capitalist.

(2) "Increasing the numerical strength of the property-less class.

(3) "Becoming extinct themselves. From the above it would seem a waste of time to address this class. As they are an ingenious sort of people they seem to think they can invent some kind of economic mustard plaster to prolong their existence. They have nted and are still inventing, many

The capitalists proper do not need any of these mustard plasters, as they are 'monarchs of all they survey.' Except at the approach of an election, the capitalist totally ignores these panaceas. As he is in possession of the government, he knows that to continue his class power he must hold to politi-cal power. This political power can only be retained by the votes of the majority, and to give them an oppor-tunity to vote there must be an issue. They do not particularly care what the issue is, but they prefer one that makes some showing of prolonging the life of the middle class, knowing, of course, their death is inevitable. "One thing is certain, they do not want any issue that looks to the workingman's getting the whole of his prodwhat will become of the capitalist when the middle class is extinct, and there can be no other issue but that between e propertyless class and the capitalist? Will not the capitalists then be playing their tragedy of one act—that of exterminating themselves. I am norry I can't offer you something more consoling, but really, after diligent search, this is the very best I can find in your market."

# THE FAMILY.

The Capitalist System Pulls it up by the Roots.

The Development of the Capitalist of Wage Slavery System Rips up the Family, Degrades the Mother, Pros-

titutes Womanhood, and Nips Infancy in the Bud-The Socialist Bevolution Alone Can Beinstate the Purity of the Family and Make the Home What it Should be. The labor of woman in productive pursuits betokens the total destruction of the family life of the workingman, without substituting for it a higher form of family relationship. The capitalist system of production does not yet generally destroy the single household of the workingman, but robs it of all its bright, and leaves only its dark.

sides. The activity of woman 'to-day in industrial pursuits does not mean to her freedom from household duties; it means to her an increase of her former burdens by a new one. But we cannot serve two masters: The household of the workingman suffers whenever his wife must help to earn the daily bread. What present society puts in the place of the individual household and family which it destroys, are miserable substitutes: soup-houses and day nurseries, where the offals of the physical and menual sustenance of the rich are cast to the lower classes.

Socialists are charged with an intent to abolish the family. We do know that every system of production has had a special form of household, to which corresponds a special system of relationship. We do not consider the existing form of the family the highest possible nor the last utterance upon the subject; and we do expect that a new and improved social system may yet develop a new and higher form of family relationship. But to hold this view is a very different thing from striving to dissolve all family bonds. They who do desiroy the family bonds -who not only mean to but who in factdo destroy them right under our own eyes-they are, not the Socialists, but the Capitalists themselves. Many a slave-holder has before this torn husband from wife, and parents from grown-up children; but the capialists grown-up children; but the capitalists have improved upon the abominations of slavery: they tear the suckling from the breast of its mother, and compel her to intrust it to strangers' hands. And yet a society in which hundreds of thousands of such instances are of ally compressed a society whose lumidaily occurrence, a society whose lumi-naries promote "benevolent" institunaries promote "benevolent," institu-tions for the purpose of making easy the separation of the mothers from their babes, such a society has the effrontery to accuse the Socialists of contemplating the abolition of the family simply because they, basing their opinion upon the fact that the "family" has ever been one of the re-flexes of the system of production, fore-see that further changes in that system see that further changes in that system must also result in a more perfect sys-

tem of family relationship. Hand in hand with the accusation on the subject of the family bonds goes the accusation that Socialists aim at a community of wifes. This charge is as false as the other. Socialists, on the contrary, maintain that just the reverse of a community in wives, and of all sexual oppression and license, to wit, ideal love, will be the foundation of matrimonial connections in a Socialist commonwealth, and that pure love can social system. What, on the other hand, do we see to-day? The irrational system of modern production tears the sexes apart. It builds up she-towns in New England and hetowns in the mining districts of Penntowns in the mining districts of Penn-sylvania, Illinois, Ohio and the further West, thereby directly promoting and inciting prostitution as a natural re-sult. Furthermore, helpless women, forced to earn their living in the fac-tories, shops and mines, fall a prey to capitalist cupidity; the capitalist takes advantage of their inexperience, offers them wages too slight for their support them wages too slight for their support, and hints at, or even brazenly refers them to, prostitution as a means of supplementing their, income. Everysupplementing their income. Every-where, the increase of female labor in industry is accompanied by an increase of prostitution. In the modern State, where Christianity is preached and piousness is at a premium, many a "thriving" branch of industry is found there is a construction of industry is found whose working women are paid so poorly that they would be compelled to starve unless they prostituted them-selves; and wonderful to say, in such instances the capitalist will ever be heard to protest that these small wages are indispensable to enable him to compete successfully in the market, and to maintain his establishment in a "thriv-' condition. Prostitution is as old as the contrast between rich and poor. At one time, however, prostitutes constituted a mid-In weight prostitutes constituted a mid-die class between beggars and thieves; they were then an article of luxury, which society indulged in, but the loss of which would in no way have en-dangered its existence. To-day, how-ever, it is no longer the females of the slums alone, but working women who slums alone, but working women who are compelled to sell their bodies for are compened to sent their bodies tor money. This latter sale is no longer simply a matter of luxury, it has be-come one of the foundations upon which production is carried on. Under the capitalist system of production,

# STARVED TO DEATH.

The Ulcer of Wage Slavery, that our Capitalist Government Seeks to Hide by the War with Spain, Breaks Through, and Again Calls Attention to the Inhumanity and Imbecility of the Capitalist System and its Dodgings -Thure are Wrongs to be Redressed -There are Wrongs to be Redressed at Home that Must be Redressed Now

ST. LOUIS, July 15-While our capitalist government is pretentiously cleaning the outside of our platter, and, 'midst the war of cannon, is going out of its way to clean, or pretend to clean, the platter of other nations, that is happening at home that shows how much more needed is a thorough housecleaning here, and that helps to justify the claim that this whole war is but an unhallowed scheme to cover up and conceal home ulcers under the smoke and dust and noise of victorious battles abroad.

Yesterday's "Post-Dispatch," of this city, was a pictorial reproduction of these views. On the front page was the picture of Gen. Miles; American flags were profusely scattered about; and 'cross-page two-inch headlines told of our glorious capture of Santiago, with many other enthusiasm-provoking tidbits;-that was on the front page. Now, then, just back of all that, on the very second page;-just back of Gen. Miles, and the flags, and the turgid headlines on victories in Cuba, this gruesome story of the distress of an American at home is told:

'STARVED TO DEATH IN THIS GREAT CITY.

'KATE M'DONALD LAY FIVE DAYS DYING ON A VACANT LOT, WITH NO HELPING HAND AND NOT A MORSEL OF NOURISHMENT.

HOSPITAL HISTORY" OF ONE WHO STARVED TO DEATH.

"Kate McDonald, 38; born Wisconsin; housewife; single; residence, 2337 Division street; most pronounced disease, starvation; admitted July 13, 11:15 a. m.; died July 13, 8:10 p. m.

"Habits, negative; family history, not known; personal history, says she became partially paralyzed some years ago. Present troubles-Has been ill for the past six months. Is entirely alone in the world and had no nursing. At times would go for days without a nurse or food. Last Saturday was turned out of her room and deposited in a vacant lot, whereashe remained until yesterday, exposed both day and night. JOHN GREEN, JR., M. D.

"For five days Kate McDonald lay

"For five days Kate McDonald lay dying on a vacant lot near the corner of Twenty-third and Division streets. "Wednesday night she died, and the brief history of her case, as penned by a City Hospital physician, tells as add a story of poverty, destitution and mis-fortune as ever came under the observa-tion of the charitable St. Louis public. For five days she sat in a dilapidated

For five days she sat in a dilapidated easy chair, or lay on a worn mattress, or flat on the ground, with no shelter above her, save that of a blue July sky. "In the daytime the sun beat pitiless-ly down on her. In the night there was nothing to protect her from the chill.

"When the dew formed it settled on r clothing and the cold night air chilled her to the bone.

"Providence did not quite desert this hapless woman, and the floodgates of

other paralytic stroke and the machine stood idle in the corner. The dust col-lected on it, and it was soon out of repair.

pair. "The only food she had was con-tributed by the neighbors, who knew how destitute she was. It is not a wealthy neighborhood, and the inhab-itants had all they could do to care for themselves. They gave willingly from their meager store, but she grew weaker and meager. "She got behind with her rent, She

had not a penny. Mrs. Ryan, from whom she rented, wanted the pay. She could only promise to pay when she got it. Promises were not what Mrs. Ryan wanted. She instituted eviction pro-ceedings in Justice Hennessy's court. There was no defense, and last Friday Constable Miles and his deputy went to There obey the mandate of the court.

"They found Kate McDonald sick in bed in her miserable hovel. The sun-light was struggling to enter the room through the begrimed windows. On the pallet was the sick woman. She was wofully emaciated, and her big black eyes stared from the sockets with an unnatural light.

"She was starving then. Privation had affected her intellect and dulled it somewhat. Yet she realized the object of their visit. She told the officers that she was sick and would not live long anyway. She implored them to allow her to remain. They were inexorable. They had their duty to perform and must do it.

The woman dragged herself from her couch and staggered outside. There is a vacant lot on the east adjoining the place where Kate McDonald lives. She leaned against the side of the wall that for more than a year had sheltered her, and watched the officers, with tears in her eyes, as they carried out her old and valueless possessions and deposited them on the vacant lot.

"A crowd of children watched the proceedings and insisted on helping the officers. They thought it great sport. Older persons saw the pathetic side of the scene and shook their heads. Their own homes were overcrowded and they could not offer the evicted tenant the resting place they would have been glad to give her. They suggested that she go to the City Hospital, but she gave a despairing heartbroken cry, and stag-gered to her old easy chair that sat in the shadow of the house from which she had been driven. She burled her face in her hands, and her emaciated frame shook with sobs that escaped her.

"Day and night she sat in her easy "Day and night she sat in her easy chair. Wednesday morning she grew so weak that her head sunk on her breast. Neighbors put her mattress on the ground in the shade of Mrs. Shee-han's house and placed her on it. Then the police were notified. An ambulance was called, and Kate McDonald, un-conscious, and with the stamp of death on her brow, was carted away. "The City Hospital doctors saw at a

"The City Hospital doctors saw glance she must die. They did all they could for her, but without avail, and at a few minutes past 8 o'clock Wednesday night she died."

Vainly will our capitalist government seek to hide this black spot, which is typical of many others. All the glories of Cervera's annihilation and the taking of Santiago will not wash out this stain. On the contrary:

Legislated out of the means to earn a living at home, thousands of men have volunteered to the war; thus our capitalist class profits by its own misdeeds. It needs Cuba, with her mines, and plantations, and cheaper labor; and it gets all that with the valor of the workingmen whom it has thrown out of work at home. For a time the intoxi-cation of war and victories will cause the sufferings of this patient nation to be dulled; but the reaction will set in; the class of which Kate McDonald is a type, however extreme, will then wake up to a realization of the situation. Woe then to the Pharisee! Victories will then no longer partake, as they do now, of the nature of a "big drunk": they will partake of the nature of sober for to distant shores: they will be won right here by administering crushing defeats to the capitalist class at the ballot box, by hammering into splinters, and pounding into pulp, the Democratic and Republican, Free Trade and Pro-tection, Gold and Silver platforms of the labor-skinning class with the ballot of the Socialist Labor party.

MANIFESTO Of the French Socialist Delegation in

Parliament. Finding Itself Within Parliament, but as yet not Numerous Enough to Dic-tate Legislation and Enforce its Full

Revolutionary Programme, the Group of Socialist Deputies Announces to its Constituents the Course it Will Adopt in Shaping Legislation Revolutionward.

To the Workers:

The confidence placed upon us of the Socialist party calls us to perform our mandate in circumstances pecultarly critical. But, in spite of the confusion that the agents of the reaction, coalesced behind an equivocation of circumstances, have attempted to create; notwithstanding the incitements of a bragging Jingoism, which has nothing in common with the patriotism of citizens, resolved to preserve for their country the place of honor that it must occupy in the world;-notwithstanding all this, the frankness and the clearness with which we have affirmed our principles of justice, as well as our means and our aim of Social Emancipation, will give us the courage and the strength to accomplish a duty of which we have in advance determined the nature and measured the extent.

We are and we want to remain the direct collaborators of the toiling democracy of agriculture, industry, commerce and education, who, by a million of suffrages, have manifested their double desire to put an end to the policy of reaction and to inaugurate the era of reforms, which, by ameliorating im-mediately the conditions of the working class, will prepare the ushering in of

the new society. The enemies of the people have been able to mislead and dominate it so far able to mislead and dominate it so far by opposing rural France to industrial France. In uniting, by accepting a voluntary discipline, the people will be the artisan of its own liberation; and we have no other desire, we must have no other ambition than to contribute to the realization of the fundamental principle of the Socialist party which is to conguest of nublic powers by the

to conquest of public powers by the organized proletariat. Faithful to the doctrine of the French

Faithful to the doctrine of the French revolution, we want to assure to all the free disposition of the means to labor and the fruits of their efforts; we want to palitate the murdersus effects of competition ending with sup-pression of capitalist monopolies; we want to demounce the manonurses of want to denounce the manœuvres of spollation of the high finance; we want to put an end to the abuse of taxation. And we will prepare the transformation in social property of the means of pro-duction, transportation, communication and credit, already torn from their in dividual proprietors by the feudality of capital.

To historical Right, created by Force, we oppose the Right of nations founded on a fraternal peace between peoples disposing freely of themselves; to cap-italism, organized internationally for the domination of the universal market and the crushing of proletarian aspira-tions, it is necessary to oppose the in-ternational understanding of the work-

Pledged solely to our constituents, resolved not to use and render sterile our efforts in lobby combinations, we will work for the realization of the reforms which tend to our aim of integral forms which tend to our aim of integral emancipation, and notably to the re-duction of military service, henceforth equal for all; to the constitution of a pension for the aged and invalids of industry and agriculture, to the regula-tion of the duration and the condition of labor; to the replacement of taxes unjustly assessed by the income tax unjustly assessed by the income tax and tax on inheritance. We will equallend a loyal and absolute co-operation to any proposition wherever it may come however insufficient and howeve incomplete it may be, which will present a character of economic, political or social amelioration, or that will tend to consolidate the rare conquests ma by the Democracy in the twenty-eight years of our republic. Our activity will have no other limits than that of our forces to hasten the moment when replacing war by peace. moment when replacing war by peace. competition by co-operation, individ-ualism by solidarity, humanity, at last freed, will employ its efforts solely to aggrandize and embellish its domain by science and liberty. THE CAMPAIGN COMMITTEE.

SCRANTON, Pa., July 17.-The So-clalist Labor party of Lackawana county met in convention on the 15th Instant at the Ancient Order of United orkmen's Hall to nominate a local Workn ticket.

It first adopted the following

#### DECLARATIONS.

We, the committee on resolutions, present the following for your con-sideration:

We, the Socialist Labor party, of Lackawanna county, in convention as-membled, finding the old time parties in-adequate to batter the conditions of the laboring classes by martial reforms and aboring classes by partial reforms and their sense of justice and equity.

Therefore, we the workers, have de-termined to separate ourselves and take independent political action for our own rment and, in the end, our political sconomic emancipation under the

and more ridiculous as a "popular" affair; and the more frantic the efforts of the Government are to make the loan appear "popular," the more strongly stands out its real "unpopularity."

The "popular loan" is becoming more

sig-

We are now told, as an evidence of the tremendous "popularity" of the loan, that there are 108,000 individual subscribers "for denominations of \$500 down." The effort to keep secret how very few are for denominations of \$20 puts one in mind of the statistics on child labor intended to conceal the fact that large numbers of children under 10 years are at work. These statistics always speak of "children of 18 years and under." As the few "18-year-olds" are there made to cover the many 10year-olds, so now the many \$500 individual subscribers are made to cover up the very few small \$20 subscribers. The loan is certainly "popular" among the class that has money. That class is, however, not the popular class; the popular class is the working class; that class has no money to invest in bonds, it barely has money to invest in bread. But even the large number of \$500 individual subscribers, ostentatiously paraded about, is misleading. It is meant to appear as if large numbers of small property holders had invested. The fact is that the bulk of these \$500 individual subscribers are strawmen and women of large capitalists and

their concerns. Born in fraud and for fraud the "popular loan" is a monumental fraud.

"No confiscation!" so runs McKinley's proclamation of laws for Cuba.

### Of course!

The "patriot insurgents" who had been robbed by the Spanish capitalists will now find out that "original accumulation" is sacred. They will find out that the class that makes "original accumulations" here in America is bound to have a soft spot for the class that does the same thing in Cuba. They will find out that, when the war was declared, the purpose was, not to aid the Cubans to come by their own, but to protect the Spanish robber class against the just demands of the Cuban people; and that if the robber class of Cuba had to be despoiled the spoiling was to be done by our own American "original accumulators."

McKinley's proclamation is correct.

# GODDESS OF LIBERTY. ANSWER!

[From the "Chap-Book," July 1, 1898.]

Goddess of Liberty, listen! Listen, I say, and look To the sounds and sights of sorrow This side of Sandy Hook! This side of Sandy Hook! Your eye is searching the distance, 'You are holding your torch too high To see the slaves who are fettered, Though close at your feet they lie. And the cry of the suffering stranger Has reached your ear and your breast, But you do not heed the wall That comes from the haunts of your eyr concreased ewn oppressed.

Goddess of Liberty, follow, Follow me where I lead; Come down into the sweat-shop And look on the work of greed! Look on the faces of children, Old before they were born! Ldok on the haggard women, Of all sex-graces shorn! Look on the men-God help us! If this is what it means To be men in the Land of Freedom

And live like mere machines!

Goddess of Liberty, answer! How can the slaves of Spain Find freedom under your banner, While your own still wear the chain? Loud is the screech of your eagle And boastful the voice of your drums, But they do not silence the wall of

but they do not shence the wall of despair. That rises out of your slums. What will you do with your conquests, And how shall your hosts be fed. While your streets are filled with desperate throngs, Crying for work or bread?

### THEIR INTERESTS.

We are an indepedent country, are we? England sues for our friendship, does she? The reverse is true. We are ruled by the English ruling class. Parliament may not, and does not, in as many words legislate for America; but the English ruling class, that rules England, rules also America, and does so by virtue of the same circumstance, to wit, its ownership of the capital of both countries.

The war now on has furnished occasion to realize the fact. It was an incldent of the war that a war loan, socalled popular loan, together with a war tax was ordered. The attitude of the British ruling class on the latter is of deep economic and social significance.

Among the "interests" taxed are railroad interests. These, the popular superstition has it, belong to our "American 'Plutocrats." Not so. To whom they belong the growl from the British capitalists against taxing railroad interests may give an inkling. The British papers and British interviewers protest. They do not only argue against the tax as "a detriment to the best interests of America" (meaning thereby

home to our people a series of connected facts: the arch tyrant Capitalism will stand bare ;--- and to stand bare is synonymous with being smitten hip and thigh, and cast into the lumber room.

FITS,-AS DE BAPPER ON DE VALL. We notice that Mr. Adolf Hepner of St. Louis has been nominated for a place on the Non-Partisan Labor Commission just created by Congress. We are constrained to admit that the nomination is eminently fit.

This "Labor Commission" was created for the express purpose of trying to bamboozle the workers; it is an attempt to cover up the irrepressible conflict there exists between the Capitalist Class and the Working Class; indeed, when nearly two years ago as the plan for this Commission was first introduced in Congress, Senator White argued in its favor by reading the platform of the Socialist Trade and Labor Alliance: he argued that such revolutionary thought and language would not be possible, could be done away with, if only the plan for the Commission was caried out. The fishy, or ignorant, or complaisant laborites, who would get jobs on the Commission; the Senator justly thought would aid in making the Commission what it was intended to be.

Now, then, few lines of argument can more completely tend to promote the Commission's purpose than a line of argument that breaks through and upsets the solidarity of the Working Class. That done, the workers' unity of interests once destroyed in their minds, the rest of the way is easy sailing. In this particular line of activity Mr. Hepner has earned his spurs, to wit:

It is now only a little over a year ago that Coopers' Union No. 1 of Chicago had some difficulties with a vicious brewery boss; in the midst of its conflict with its capitalist exploiter, the Coopers' Union turned for support to the brewery organization with which it was connected in Chicago; this brewery organization applied for instructions in the matter to its national headquarters in St, Louis, and the answer was given in a leading editorial of the St. Louis "Tageblatt," of which Mr. Hepner was at that time editor. Here is that answer:

"To-day the coopers are in conflict with the brewer bosses; to-morrow the carpenters have a grievance against a brewery building; an other day the compositors may give notice that a cer-tain brewery orders its printing in a rat-office; later it turns out that the factory which furnishes a browery with an ice-machine is a non-union shop; and so on. In this way (were the union brewers to take up all these fights) the union brewers would be to the end of their lives involved in strikes for other people."

We have commented extensively upon this significant utterance in our issue of April 11, 1897; further commentary is here unnecessary, except to call attention to the capitalistic sophistry with which the openess of Labor's interests and the oneness of Labor's tactics are here assailed and undermined." This passage, not to mention anything else, is enough to attest Mr. Hepner's fitness for a place on the Commission. But for this very reason, duty impells us to protest emphatically against his nomination as a Socialist. What qualifies him for the place is his anti-Socialism. If he understands Socialism, as is claimed for him, and he pretends to be a Socialist, yet can, for an editor's crumb of bread, so far stultify his principles as to sin against a fundamental principle of Socialist science and tactics, as he stands convicted of, then, indeed, he is all the fitter for that particular place, but, therefore also, all the less worthy of being held up as a Socialist, or trusted as such.

nite Cutters' Journal," that Mr. Gompers had endorsed as a "friend of labor" one Jacob Cantor, a New York Senator, who applauded Gov. Flower for his sending the militia to Buffalo to help the railroad magnates break the 10hour law and commit murder on the working class, the "Granite Cutters' Journal" asked Mr. Gompers to explain and got the following answer:

"The assertion is malicious and false an invention of our enemies, and re-peated in an unfair manner without an effort to ascertain the truth. In the legislature of the State of New York there was a Senator Cantor. You will know of him by reason of the valuable assistance he rendered the granite cut-ters of New York State in their re-cent contest against the unfair combination of employers. During his entire career in the legislature he always sup-ported by word, action and vote every labor measure. There is not a bona-fide trade union in the State of New York which will not bear out this statement. Some years ago some one, ignorant of the facts, or desirous of wilfully dis-torting them, charged him with being torting them, charged him with being an enemy to labor. He wrote me a let-ter asking whether. from my knowledge of him, he ought to be regarded as an 'enemy to labor.' I wrote him a short letter saying substantially, 'any one who says that you are an enemy to la-bor says that which is wrong.' I can bor, says that which is untrue.' If any man says that when I wrote that letter to Senator Cantor he had applauded the shooting down of men who are engaged in a strike, he says that which is untrue. I do not know whether Senator Cantor ever commended work of this character at all; but, if he did, I am sure that he did not do so at the time when I wrote the letter."

The "Granite Cutters' Journal" declares itself "satisfied";-so are we, decidedly; a completer admission of the truth of the charge, rendered all the more significant by the vain and contradictory attempt to twist away from it, can't well be imagined.

It was in the summer of 1892 when Gov. Flower sent into Buffalo the whole militia of the State to break the law which he himself had signed and which the switchmen had struck to uphold; the strike was broken and with it the law; shots were fired; the switchmen were intimidated and a boy, Broderick, was murdered by the militia. The militia's high-handed action, under orders from Gov. Flower, created a sensation in Labor's ranks,-and also in the ranks of the capitalist class. Jacob Cantor, a Democratic Senator at the time, took up the cudgels for the Governor, and, referring to the Buffalo strike, upheld the Governor's action as a vindication of "Law and Order."

Mr. Gompers was then a resident of this State and City at that time; three years later, in the midst of a campaign, this Cantor being a candidate for reelection, and being justly charged on the above ground with being an enemy of labor, an autograph letter of Mr. Gompers appeared in the "Daily News," a paper supporting Cantor, in which Gompers says to him:

"If any one says you are an enemy to labor, he says what is not true.'

Gompers' excuse that he "did not know"; that, if Cantor did applaud, it surely was not "at the time when I (Gompers) wrote the letter"; his admission that he did write the letter charged, and his suppression of both the time when the letter was written, and of the charges against Cantor that the letter was intended to refute;-all that constitutes an autograph picture that we could not ourselves have represented Gompers in more accurately; a caught swindler, caught red-handed and wriggling in the hands of his captors, does not wriggle more self-condemnatorily.

The blood of the boy Broderick, that bespatters Flower's and Cantor's face, bespatters 'also Gompers'; the crime against the working class, committed by Flower and applauded by his lapdog Cantor, who followed him into the gold-bug camp, weighs on the shoulders of Gompers, the endorser, as heavily as it weighs upon the perpetrator and his applauden themselves.

# THE SECOND-STORY WORKER.

[Being the Posthumous works of Walter Anne Whycough, Custodian of Nonentities at Princeton University. Edited by, and de-dicated to himself.]

IN THE ARMY OF THE BADLY EMPLOYED.

It was always one of my eccentrici-es to know everything. I know, ties to know everything. I know, among other things, that every indus-trious man may be rich if he only has money enough, and saves it. If a man wants work he can find work, "For still Satan findeth work for idle hands to do." To doubt this is heretical-nay, learnering the blasphemous. Now, work being the source of wealth, and wealth being the foundation of riches, it follows that a man who works is rich, and I have just shown that he can work if he wishes to do so.

There is, however, one great law which must be taken into consideration. It is the innate and invariable propensity of money to attract unto itself money which is without the legitimate channels of circulation. This natural weakness of money has caused several people to have more in their channels than they can use. I had heard that millionaires existed, but could find no proof of it, until J. Beerpot Morgan and I determined to settle the question once for all to our satisfaction. I cheated my venerable grandfather out of all he had and was at once admitted

into the best society. It is the purpose of these few papers to set forth what I am, and as I took notes whenever I could lay my hands on them, there will be no difficulty in reproducing the scenes of mental squalor. Anything that is selfevident will receive the highest proof: anything that is doubtful, or impossible, must be accepted in faith.

In the cool grey haze of the early morning Morgan and I set out. He leaned heavily on my shoulder and whispered: "We'll feed, partner, we'll feed

"But," said I, "who will pay for it?" He looked at me reproachfully and said: "Do you not know that you have been admitted to the best society? The free-lunch system was invented for useh as you and me. Your motto now such as you and me. Your motto now is "Ich fresse". Let those about you take the piebeian "Ich dien". But come, time and free-lunch wait for no man

He led me into a gorgeous apartment presided over by the friends of human-ity. A corps of colored waiters were hurrying through the narrow passages between the tables bearing aloft various men who were without hall-They had evidently tried marks get something to eat because they needed it, and not because they could get it. On all sides of the tables other men, who were to the bad manners born, worked valiantly. "Mr. hock's boarders," explained

Morgan shortly. The one at the table who was held in

the highest regard was an Irish-American of average age and of great re-serve. He was, however, so short of arm that when he tried to reach the ham I learnd from Morgan that his name was Dennis.

Morgan had worked his way up to the table where he kindly allowed me to feed from under his arm. He was like a plethoric squid: all his tentacles working at once; now into the pickles, again into the olives, anon he cleaned all the sandwiches from the table. Friend and foe were alike forgotten. He knew nothing, cared for nothing,

"Who pays?" I asked fearfully. "Jones may pay freight, but I don't," said Morgan. "That man," he con-tinued, indicating a 'red, whiskered "gent" who was nibbling a graham wafer, "possesses more worthless prop-erty than any other man in Boston I'll take it away from him and sell it to the government. In these days of his country's trials every patriot should get all he can and all he can get for

I blushed to the roots of my nose as we left the place and stepped into the chilly Boston afternoon. We watched the school children running past with little bean-pots on their heads, a picture to make the heart glad, for our children will draw their sustenance from them. I lost Morgan for a moment, but he soon returned breath-

a moment, but he soon returned oreath-ing heavily. "See," he exclaimed holding up a cent. "I acquired it from a little boy. A penny saved is a penny earned, and if you save some one eker penny you honestly earn it. He would have squandered it in the interests of the sugar trust. Come along, Whycaugh, we'll spend the night in the Home for

The only furniture of each cell was a most unkempt and delapitated man or woman covered with a peculiar ter-restrial matter which Morgan said was probably one of the most original accumulations in existence.

mulations in existence. "What are they?" I asked. "O, we keep them to look at. I have spent whole days walking along here while my heart bled at the sight of so much suffering, such degradation brought on by themselves." "But why not let them out?" "Let them out! Why, we have a duty to perform and would be guilty in the sight of God and our church if we were remis. Their degraded in-stincts would not respect law and or-der, besides it is only right that each man should keep the place to which man should keep the place to which natural capacity has assigned him." I approached one of the cells in which

was a simple good natured man, or at least I thought so, but I soon found he was a most dangerous person

he was a most dangerous person. "There is a lot of suffering in the world," he said; "why, Mr. Whycaugh, I have seen men go without a dinner. The rich rot in luxury, and the poor rot in squalor and want. There is a great injustice somewhere, but let the guilty look out. They go among the poor and regard them as so many strange animals. I have heard of a college professor who spent several months among the out-of-workers, and months among the out-of-workers, and the only thing he learned was that God was very wise in not having made him one of them. Some time the rich and

I stopped him impatiently. "The rich and poor? Nonsense! Hunger and poverty! Why, man, it is impracticable, an irridescent dream. Your talk about hunger and poverty is nothing but a utopian vision. Each man possesses more wealth per capita than there is in the country. You sociallists-"

"But I am not a socialist," he protested.

'Then you are an anarchist."

"No. sir. I am not." "Then." I exclaimed triumphantly, you are both."

My hard common sense and constant reiteration of dry facts made no impression on him, so I turned and after calling him a few Christian names, left the cell.

In the mean time Morgan had not been idle. He had gone from cell to cell and by slicing here and squeezing there he had obtained enough for a supper.

We entered the richly illuminated banquet hall and were soon gorging ourselves to satiety. The tables groaned under the weight, of delicacies, and soon we groaned under the table. Our sufferings were of short duration, for nature, even under the most adverse circumstances, is recuperative. For an hour we enjoyed the inane chatter of brilliantly undressed women, and of men who resembled white-bellied spiders and tried to look like ostrichlegged Gibson men.

The morning was fair spent when the social function known as "bringing out" was commenced. Grave Englishaccented valets entered the now silent hall and each selected his owner, whom he carefully and reverently rolled into a baggage truck, and with the aid of another valet carried away. That was the first night I was ever brought out, but now it occurs often. I awoke at about six o'clock the next

evening and at once got out of bed for I was always an early riser. Dur-ing all my college life I had suffered more or less from hypertrophy of the self esteem, but that was nothing to what I now endured. I was inclined to give up the whole affair, but a physical admonition soon warned me that if I wished to suffer I must again eat too much. So ended my first day

UNCLE SAM & BROTHER JONATHAN.

Brother Jonathan-Thanks heaves ve'll now have peace soon! Uncle Sam-On what do you base the

prediction? B. J.-On McKinley's own statement.

U. S.—And what did hesay? B. J.—He said: "I hope for a speedy peace now.

U. S.-Is that all you got to bank on? B. J.-Isn't that enough, when the President himself says so? U. S.-Didn't he say two years ago that, if elected, prosperity would forth-

with follow? B. J.-He did.

U. S.—And did it follow? B. J.—Cant say it did.

U. S .- You have no more reason to take stock in his present prophecy, or

hope.

B. J.-Well, don't you see-U. S.-Yes, I do see; but you don't. Let me help you to see

The southern port of Cuba that sup-plies Havana with provisions is left unblockaded; in the meantime we are spending \$600-a-shot pounding sand banks where it does no good. Now, then, if you have eyes to see you will realize what these two facts mean. They mean that the stock-holders of powder and other such factories have not yet made 'money enough; it means that, while holding the appearance of want-ing peace, our capitalists who are running the war have an interest in carry-

ing it on--B. J.-Then you don't believe that their purpose was the humane one of

liberating the Cubans-U.S.-"Liberating the Cubans"! What a back number joke that is! B. J.—A joke?! U. S.—Yes, a joke. Don't you read the

papers of these capitalists themselves? B. J.- I do. U. S.-When Santiago fell, did they

put it in the hands of the Cuban insurgents

B. J .-- I don't think they did

B. J.-1 don't think they did. U. S.-Guess not. General Garcia was sent to the right about, despite the de-mand of the "Cuban patriots.". And that's not all. The papers begin to beam with an abuse of the insurgents whom only the other day they were praising to the skies. These insurgents then were "noble patriots sacrificing their lives for freedom's cause," they were "valiant champions of liberty," now they are "valiant eaters of Amer-ican provisions"; then they were "dar-ing patriots, braving death for their island's liberation from Spanish cru-elty," now they are "daring skulkers behind the American lines, patriotic-ally protecting themselves from Span-ish Mauser bullets." These are facts. The "liberation" is a joke, a stale joke on the next of our capitalists who set on the part of our capitalists who set it afloat, altho', as far as the deluded masses of our liberty-loving and generous working class are concerned, it was taken seriously.

B. J.—This is pretty tough! U. S.—And likewise a joke, tho' not yet stale, is this other about peace being at hand and desired by McKinley. He and his mill do all they can to protract war and thus lengthen the period when the capitalists "in the ring" can make money. Put that in your pipe and smoke it.

The men who bled in the Philippines and on the sun-porched beaches of Santiago, neither bled nor died in vain. True, they imagined they sacrificed themselves on the altars of the Goddess of Liberty to free other peoples, and in that they were in error; yet the blood they spilt and the lives they lost were well spent. They were sacrificed on the altar of Knowledge: they gave occasion to ascertain the fact as to who our real rulers are.

Nor is the fact a barren one. The nation whose magnanimous sons will lay down their lives that others may be free, is certain to have enough sons, and daughters too, equally magnanimous to lay down their lives that they themselves be free. the Baltimore, Md., "Granite Cutters" Journal" for this month prints a letter from Mr. Samuel Gompers that it is our delight to reproduce in full. The charge having been made, and repeated in a correspondence from Ver-

But Gompers' "explanation" brings to mind some other incidents of that campaign.

Cantor was not the only candidate running that year for the Senate. He was, however, the only capitalist candidate. Against him were two other candidates, and what is more, both of these were workingmen; and what is still more, both of them were members of Mr. Gompers' Cigarmakers International Union. One of these was Aaron Henry, Socialist candidate, the other was Mokey Cohen, Republican candidate. If a workingman, and cigarmaker at that, becomes bad in Mr. Gompers' eyes the moment that workingman stands upon the International Labor platform, and, consequently, he could not endorse Aaron Henry, why did Mr. Gompers turn his shoulders on Mokey, the Republican, and, passing him by, endorse a capitalist who applauded Flower's crime against Labor? Here we have "Gompers, the Trade Unionist," snubbing trade unionists in favor of one who had shortly before gloried at an outrage against a trade union!

The thanks of the New Trade Unionists or Alliance men of the land are due the "Granite Cutters' Journal" for having proven so unwise a friend to Labor Fakir Samuel Gompers as to get him to nail himself in plain view, and to afford us an opportunity to turn the light fully on this black page of the mont, in that same issue of the "Gra- Labor Movement in America.

# THE CLASS WAR.

# Its Appearance and Forecast in England and Continental Europe.

The remarkable success of our Comrades at the polls, first in France and then in Germany, has passed comparatively without notice in the English capitalist press. Such trifling sets-back as the defeat of Jaures and the narrow victories of all the combined factions over the Socialists in two districts of Berlin, at Solingen and Stettin, have peen made the occasion here and there for isrced and almost hysterical jubilation; but the hard facts that we have polled 500,000 more votes in France and nearly the like number in Germany nearly the like number in Germany than at the last elections, are passed over in silence. That is quite nature t is not pleasant for the organs That is quite natural. It is not pleasant for the organs of capitalism in Great Britain, whether they call themselves Tory, Unionist, Liberal, or Radical, to be obliged to admit that in the two most civilized countries of the continent we Social Democrats are more than holding our our assignst all the other parties nut own against all the other parties put together. Neither does it give these mpions of the meanest form of slave driving that the world ever saw much gratification to make out that the Soclaimst vote only represents growing discontent with things as they are, allke in the French republic and the German empire. For that discontent, even if in empire. For that discontent, even if in part not fully educated and disciplined to-day, must crystallize round some-thing to-morrow; and that something, as our enemies know just as well as we do, must be the hard nucleus of revo-vition. Sache Democracy. Nither lutionary Social Democracy. Neither exceptional laws, nor official tyranny, nor free press and free speech, can head our movement when once it seriously begins to move, and it is no such very long step, after all, across the English Channel and the North Sea from France and Germany to England. It is the uneasy consciousness of this truth, taken in conjunction with the manifest growth of our party in this island, which impels the "able editors" f our capitalist-advertisement press to conspiracy of silence as to what is

coing on so close to our shores. For, be it remembered, if we were repre-sented in the German Reichstag in proortion even to the numbers who actually voted for the Socialist candidates in spite of all restrictions, we should be considerably the strongest party there; and if we reckon our fair proportion of adults all round, quite two out of every five men in that German army on which the Kaiser has just declared he places implicit reliance are Social Democrats This last, and the great increase of the perhaps the most important features to be noted in the 2,100,000 votes just ast for our Social Democracy in Germany.

Make what deductions we please for local circumstances, attach what im-portance we may choose to temporary drawbacks or temporary advantages, and these elections, alike in the republic and in the empire, give the clearest possible evidence that the comprehen-sion of what the class war means, and the determination to use political forces az a class weapon in order to gain all that can be gained in that way, are be-coming the strongest factors in the development of the French and German peoples. The class war. That is the main point. The wage slaves who do not recognize this, be they skilled artisans or mere town and agricultural la-borers, be they clerks or counter-jumpers, State employees or domestic servants; the wage slaves who do not recognize this class war. I say, between those who hold all the property and means of production and those who sell themselves daily or weekly as food for the profit mongers and landlords; the wage slaves who do not comprehend this and make ready in every possible way to sweep aside their exploiters and despollers and murderers at the first opportunity that offers-these wage slaves are slaves and curs indeed. It

is the object, almost the sole object, of the upper and middle classes of this as of other nations, to keep their toiling countrymen in a state of Their safety, personal and proprieto-rial, depends on their doing so, and they will shrink from no rescality, will stick at no fraud to prevent Englishmen and English women from learning the truth as their fellow men and fellow women in France and Germany are learning it. The capitalist is the enemy of mankind, and the landlord is his.

sleeping partner in villainy. Mr. Jo-seph Chamberlain thought at one time that he could lead a successful cam-paign against the landlord without depaign against the landlord without de-stroying the capitalist, by the way. We all remember his reference to Foulon and the "ransom" which the nefarious landlords would have to pay. No sooner, however, did he discover that the capitalists themselves would be the first to fall in the conflict with a justly incensed people than he culctly aban incensed people than he quickly aban-doned his democratic principles, and went a-belly-dancing before the duch-That he should now warn his' Brummagem lieges against the growth of class antagonism, and the danger of cialistic teaching such as found acceptance abroad, is only what we might expect. But what a man like Chamberlain fears is surely the very thing which working people should cling to. When, therefore, Radicals or Radical Democrats suggest that we Social Dem-ocrats should make common cause with them in an organized effort against the privileged classes, aristocratic and plutocratic, who dominate both sides of want to put the question: "Do you rec-ognize the class war as inevitable? Are you ready to do battle against the cap-People" is not enough for us at this time of day. For what have these Radior Radical Democrats been doing r the past thirty years or more? Have by not been acting all the time as are hewers of wood and drawers of water for the scurvy Whigs and still scurvier Liberals whom they now denounce? nounce? What great measures, politi-cal or social, have they carried or so much as tried to carry for the people? I have have been a more or less active politi-cal publicist for five-and-thirty years and I must honestly say I know of no such means such measure. They have setually left it to the Tories to carry Free Education and Compensation for Accidents. Nay,

they positively declined to democratize rate refused to denounce those who be-trayed the people on this purely politi-cal issue even so lately as 1892, when they could have done so easily. Worse still, it is useless to disguise the fact that many who call themselves Radicals are at this very moment appealing to the very man, Joseph Chamberlain, who has been attacking us at Birmingham, and whom they themselves a few months ago stigmatized as "Judas," to come over and help them.

come over and help thom. Let us take care, therefore, that, with every desire to be reasonable, and to work with those who are prepared to work with us, we do not run the risk of being deliberately sold as our Comrades in Belgium were sold at the second ballots by the Radicals in that country. The time has undoubtedly arrived for an energetic forward movement. But are the Radicals ready for such a move-ment themselves, with or without the Social Democrats? That remains to be seen. At present, notwithstanding the Social Democrats? That remains to be seen. At present, notwithstanding the laudable effort of "Reynold's News-paper," we can detect little evidence of vigor or determination or even knowl-edge in their ranks. We know, of course, that capitalism was inevitable in the progress of the social develop-ment of the human race. We are well aware also that everyone, as Robert Owen said, must be either a slave driver or a slave under existing social condi-tions; and that all the most Social Demtions: and that all the most Social Demtions; and that all the most Social Democratic of slave drivers or the most So-cial Democratic of wage slaves can do is to work steadily on to control and dominate the means of production, the powers of which are increasing all the time in consequence of a social growth which no individual nor any number of individuals can be reckoned responsible for. But this is no excuse for slave driving on the one hand, or for servility on the other. Capitalists and landlords, as well as workers, can lend their aid in the struggle onwards and upwards by education and combination to a better period for all. Those who are ready to do this are our friends, and we are prepared to co-operate with them; those who are not, are our enemies, and we hope to be able to crush them so soon as the class war takes a more definite shape than peaceful bloodshed' and mutilation of the people by the capital-ists when they are slavishly at work or desp "Justice." desperately on strike.-London

# UNION WRECKERS.

Condition they Mave Put the M. P., B., P., and Brass Workers' Int. Union In.

DETROIT, Mich., July 14-Thieves and crooks will squeeze themselves into the best organization. That one of these should have been found in a union, pure and simple or otherwise, is not in itself anything to write about, or much of a point to make against the labor fakir. The feature of the discovery of crookedness in a pure and simple union, just made in this city, is how these labor fakirs do it, who their pals are, and how pure and simple leadership means necessarily corruption and union wreckage

"Sammy Went"-this time it was Samuel G. Garter, the secretary-treasurer of the Metal Polishers, Buffers, Platers, and Brass Workers' International Union, who absconded with \$2,500 of the union's money. He went so far that no one knows his destination; if found it will be Jackson, unless his political friends can save him from the State prison; and it does look now as if the political push will protect him: Justice Whelan has refused to issue a warrant for Carter's arrest, "because he is a partner in the company," is the last report circulated among the mem-bers of the trade in this city, and there is this justification for it. Bob Tullen, of the union, has admittedly more than once interceded successfully with the judge.

This Bob Thullen is a deputy sheriff. a good friend of Carter's and plugged for him at the last convention of the M. B. P. & B. W. International Union. Now, it seems to me, everybody should see the point. One who is not entirely see the point. One who is not entirely blind to what goes on, sees that the capitalist party machines are like chains, one link is solidly interlinked with another; you cannot pull a link without you pull the chain. Thence, protection for the chain requires that no link be touched; thus Judge Whelan protects Carter. protects' Carter.

But the most important feature of the Carter episode is the history of what occurred and led up to his fall.

At the nomination for candidates for the convention of the union, the Detroit union nominated a Socialist, and it so happened that the proposer for this Comrade was this very Thullen. Dur-ing a debate on a political proposition of the Detroit union, a fakir Elckhoff and this Carter, who were on the com-mittee with our Comrade, found out that he stubbornly stuck to principle; he wiped the floor with them in debate, and was, therefore, dangerous to their schemes. Consequently some other person had to attend the convention if their interests were to be represented. At the next meeting another candidate, At the next meeting another Gus Schultz, was proposed. On the mindess of the previous meeting there was no trace that the Comrade's name had ever been proposed for the candidacy. It seems that, after Schultz was elected, neither he was considered alto-gether reliable, and an alternate was gether reliable, and an alternate was elected, who, although the actual dele-gate attended the convention in person, attended too, unauthorized by the union. Bob Thullen was the substitute in question. At the convention every-thing went lovely for Carter & Co. Lynch, of Brooklyn, and Carter, of Detroit, were elected president and secretary-treasurer respectively. One thousand dollars salary were voted for thousand dollars salary were voted for each office. But dues seemed to become too scarce to satisfy Lynch and Carter; they became afraid that they would be left unprovided for in the future; and then a great scheme was launched, which, had it gone through, would have given them "glory hallelujah" for a

The scheme was to raise a \$25.00 per capita fund," as they called it, so that "the union should have something to fail back on in case of great trouble." When the question came before the De-troit union and although Derdient troit union, and although President Lynch, Secretary Carter, and all of their satellites were present to defend it, our Comrade, the one cheated out of the delegation, tore the mask off their scheme, and although he was hooted at, and although they tried to yell him down, he showed to the satisfaction of down, he showed to the satisfaction of those who would have to pony up, but who would receive nothing, that the scheme was intended for the purpose that "we," not the union but the fakirs, 14. The capitalist has two tongues in his mouth; he uses the one at buying, the other at selling. 15. To rob everybody means to rob enormous majority by the Detroit union, and this killed the scheme and also their chances. Lynch announced right then that they would get money one way or another; he said. "something must be done." he said, "something must be done." They thought then that if they proposed They thought then that if they proposed a (as they called it) "co-operative com-monwealth," a colony in Florida, they then might get their fingers on some money, but they found soon that when their great scheme had been knocked out by the determined stand of a lone Sociality the grant was knocked out Socialist, the gang was knocked out, and their hold had been broken there-They had to allow a vote upon by. convention, and, as their actions had been brought into discredit, the financial reports were freely criticized. They tried to prevent the knowledge of these criticisms by suppressing articles to our journal, and when finally the hour for the convention approached, and it was foreseen by them that no gang would foreseen by them that no gang we be there strong enough to cover former malfeasances, and when a cir-cular letter sent by the Detroit union foreshadowed the woe to come still more clearly, and they saw no chance to cover up deficiencies and shortages then, Carter fell, decamped. This gives "breaks up unions evidence of who But the fakirs will not succeed. Out of chaos and deceit new trades unionism, purified unionism, will arise with a vigor that will take capitalism and its fakir brigade by surprise.

He is a partner in Oliver's iron works that have always been non-union ever since Magee be-came a partner. Magee is rated at 316,000,000, made as a fraction magnate along with Elkins & Widener of Philadelphia. He owns the city councils here, and of course gets fran-chises for nothing. "THE HAPPY LABOR WORLD. "The labor world should be entirely happy just at this time. Whether it be the war, the weather or the wisdom of those in charge of the affairs of the wage-samers of the coun-itry is not a matter of much moment in the face of the existing conditions. Year in and year out at this season. Pittbuigh and West-ern Pennsylvania for a long time have been convulsed and disturbed by conflicts and con-tentions over the adjustment of wage scales. These contentions have regularly led to in-sinustions if not open charges against the labor leaders on one side and the employers on the other, engendering an ugly and un-satisfactory feeling between the wage-payer and the wage-earner.

satisfactory feeling between the wage-payer and the wage-earner. "But things are happily different this sea-son. The Amalgamated Association of Iron, Steel and Tin Workers, without even a sign of friction, has promptly and apparently pro-fiably arranged a scale of wages for the great industries of the country in which they are recognized. The glass workers, by no means an unimportant element in the world of labor, have, through their officials, reached a point where they can practically see a settement of their wages disputes without shorifice on the part of the workmen or imposition upon the where they can practically see a settlement of their wages disputes without sharifice on the part of the workmen or imposition upon the manufacturers. Even the miners are not with-out hepe and prospects. Of course the miners have some little trouble, generally resulting from the policy of operators in the struggle to secure trade; but the only real trouble is in the Third pool where an effort at least is being made to continue a strike against un-satisfactory conditions, and is not likely to involve the miners generally. "An attempt is making among the laders of the miners to break away from one.organi-tation and unite with auother, but the con-tention is not likely to interfere with the wage-earning capacity of the miners as a body, and as they enjoy a fight the battle between the organizations will supply them with re-creation without costing them their daily

# DOWN WITH THE SOCIALISTS!

"Down with the Socialists!" This cry has been often raised; not improbably you have heard it before now, dear reader; possibly you have joined in it yourself, or at least it may have hung upon your lips-so general is the belief that Socialism and wickedness are identical. I can well imagine your transport of indignation at the deed of the fiend Norcrots, who, in the insane pursuit of his own selfish ends, was ready to sacrifice the lives of scores of human beings; I can imagine your readiness to tear him to pieces, to im-pale him as a horrible example, to bury pale him as a horrible example, to bury him alive, to consign him to the flames, or to wreak any other act of vengeance upon him. No punishment inflicted upon so wreckless a criminal would seem excessive. Now, then, are not the Secialists criminals of the same stripe with Norcross? And we are told they propose to do away with everything that is secred-property, wedlock the is sacred-property, widlock, the family? Have they not been charged with arson and murder? Are they not, at bottom, more damnable even than a Norcross? Is it not their purpose to inflict their pestiferous ideas upon the whole of humanity, while Norcross' deed could at worst destroy the lives of one or two hundred people only?

These and such like thoughts have probably some time crossed your mind, dear reader; and if you yourself did not think so, some neighbor of yours, some-one or other whom you have met, has certainly felt this way and given vent to

his feelings. If, indeed, you have ever indulged in If, indeed, you have ever induged in such thoughts such have put to yourself the honest question, "What, after all, do I actually know about the Socialists?" you must have admitted to yourself that your knowledge on the subject was next your knowledge on the subject was next to nothing; that you have been in-fluenced, not so much by a clear knowl-edge of the wickedness of the aims of Socialists, as by an ill-defined prejudice against them. But an intelligent man must KNOW what he does; he must be blast executive birgsalf for bis acts: able to account to himself for his acts; when he hates and persecutes others he must be certain that his conduct is just. No good and intelligent man will be willing to hate and persecute people whose aims are sensible and whose motive is justice.

Let us, then, dear reader, look into these Socialists, and ascertain what it is they want. At the close of our investi-gation you may then with a clear con-science and deliberately, either set your face against all Socialist aspirations with redoubled force, should you have become convinced of their wickedness; should you have discovered that their aims are good and just, add your efforts to theirs. Whosever you may be, dear reader, I wish to believe that you are not inclined to hug wrong and

reject right. "The Socialists want to divide," so we

are told with positiveness. People will have it that the Socialists want to plunder every one who owns property; that they will then divide up this plunder equally among all; and that, as soon as inequality in property shall have again asserted itself, a new di-vision will be undertaken, and so on. Above all, we are told, are money and

land to be the subject of division. Now, pray tell me, dear reader, have you ever met any one who actually pro-poses such a plan? Never! Such a person you cannot have met; there is none such. Such a plan of a general division would be the craziest the human brain ever conceived. To whom would a railroad, for instance, be al-lotted? Who is to receive the rails, who is to receive the locomotive, who is to receive a coach or car? As everyone would be entitled to as much as any one else, there would be no method of equal distribution other than to smash up every thing, and let one man carry off the spokes of a wheel, another the splinter of a door, a third a couplingpin, a fourth a section of the boiler, and so forth. Such things, assuredly, are not thought of even in a lunatic asylum.

As to a division of the money and soil of the country, the thing does not, at first blush, seem so ridiculous; no physical impossibility stands in its way; and, accordingly, the charge may have a color of truth. But let us see

In the first place, the money and soll of a country constitute only a part of the total wealth, while the money alone is a very small fraction thereof. Even if Socialists did contemplate the division

used for industrial purposes, has long ago experienced. Capitalism has in-vaded the fields as it has the cities. The day of small production is gone by never to return, only production upon a large scale, carried on co-operatively and im-pelled by powerful machinery, can be successful. This is a fact of which none re than the Socialists are penetrated. more than the Socialists are penetrated, and which they preach at all times. The division of the land would, accordingly, imply the division of forces. Socialists stand for just the reverse. Again, with regard to the division of

money, an anecdote, invented years ago for the purpose of 1 diculing the aspirafor the purpose of i diculing the aspira-tions of the people, may be here quoted with contrary effect. The YARN is that a rich New York hanker was once ac-costed by two workingmen with these words: "Sir, you are a rich man; we want to divide with you!" The banker was no wise disconcerted, but calmly pulling out his purse, said: "With all my heart; the thing can be done on the spot; if needs no complicated, arithmy heart; the thing can be done on the spot; it needs no complicated arith-metic; I am worth fifty millions'-great glee on the countenances of the would-be dividers-"there are to-day fifty mil-lion inhabitants in the United States; each one is, accordingly, entitled to \$1 from me; here is your share." saying which he handed the two workingmen the place and waked off smiling in his which he handed the two workingmen \$1 a piece, and walked off, smiling in his sleeves, while the two fellows stood looking at each other with long faces. This anecdote is a boomerang. The charge that the Socialists would divide

the land, investigation shows to be a lie of the whole cloth; the charge that they would divide even so divisible a thing as money is self-evidently ridiculous. The whole charge about "division" is a fabrication to deceive the people; it is an insult to the intelligence of masses. But this insult will be of our with nursery tales and bugaboo stories. They cannot fail to realize that the increasing numbers of Socialists cannot be animated by insane objects. There are crazy people enough in the world, but the 18,000 citizens who cast last No-vember their ballot for the candidates of the Socialist Labor party; in the State of New York, and the 23,000 who voted for the Socialist Presidential ticket last year in the States of New York, Massachusetts, Connecticut, New Jersey and Pennsylvania cannot pos-sibly be all crazy! Behind and at the bottom of such a movement there must be something else than insanity.

<sup>1</sup> If you attend the public meetings held by the Sections of the Socialist Labor party, if you look into their papers, their literature, all their publications, will arrive at the conviction that vou Socialists, so far from proposing the in-troduction, aim at the abolition of "division." This may sound strange to you; yet it is the fact.

The Socialists hold that it is now under the present system, that "division" is practised upon other peoples' property. But it is by no means the Socialists who first discovered the secret that "division" is practised to-day and in most unjust manner at that. The fact is attested even by people who rank among the adversaries of Socialrank among the adversaries of socialism. You have surely heard of an Englishman named John Stuart Mill; he is considered one of the greatest intel-lects among the foes of Socialism, and his class has heralded his fame every-where. Now, then, this great political economist of the capitalist class has this to say upon the subject:

"As we now witness, the proceeds of labor are being distributed in almost inverse proportion to labor so that the largest shares thereof fall to the lot of those who never work at all, the next largest is harvested by those whose labor is nominal only, and so down-wards, the reward of labor shrinking in the same proportion as labor becomes harder and more disagreeable, until the most exhausting and repulsive kind of labor cannot count with certainty on earning the most indispensable support of life."

This sounds shocking; nevertheless, if you look around, if you draw your own experience, do you not, dear reader, find the statement confirmed? Those into whose laps new riches flow day by day, those who can tumble from one enjoy<sup>1</sup> ment into another have not, probably, ment into another have not, probably, done during their whole lives a single stroke of useful work; WITHOUT THEMSELVES WORKING, THEY SPONGE UP THE FRUITS OF THE LABORS OF OTHERS. On the other hand, look at these who eat their daily bread in the sweat of their brows; look at the workingman-at him who is constrained to work for wages. If he is skilled, diligent and strong and withal is not left in the lurch by bad luck, he may possibly succeed in laying by a few savings; the large majority of the wage workers do not, however, despite all their skill, industry and strength, suc-ceed in doing even that little; when they breathe the last breath they are as poor as they were on the first day they started in to work; and how many are not those who, despite all their industry are unable to shield themselves and their families from hunger! Just go, dear reader, among the weavers of New England; the coal and iron miners of England; the coal and iron miners of Ohio, Pennsylvania, Michigan, Wash-ington; the cigarmakers and all other manufacturing hands in all our large cities; look, in fact, into every corner of our country; what will you see?--in-dustrious human beings, men, women and children, working, if they at all have a chance to work, at starvation wages during inhumanily long hours. Do they ever get the full proceeds of their labor?--No, never!--Do they ever get one-half thereof?--Hardly ever!--Do they get enough for their almost ceaseless, hard work, to live as man should live?--In very exceptional cises only! Look at the clerks, salesmen and saleswomen in our grocevies, dry goods and other shops, who must be decently and even neatly clad and can rarely sit down, and enjoy a regular meal, at and even neatly clad and can rarely su down, and enjoy a regular meal, at wages that can scarcely keep body and soul together! Look at our car-drivers and conductors, who are engaged for 10 hours a day in all sorts of weather and in very responsible occupations at scanty wages. Look at our agricultural scanty wages. Look at our agricultural laborers, whose wages, according to the United States Census, amount to little United States Census, amount to little more than \$200 a year without boarding and lodging, but to much less with full board—and to about half as much all over the South! Look at our tenement-house cigarmakers, tailors and shoe-makers, who in company with their wives and one or more children are hud-dled together in miserable dens, at work for 14, 16, 18 hours a day at wages that are a disgrase to civilization. are a disgrace to civilisation.

# REPORT

Of Martha M. Avery, National S. L. P. Delegate to Buffalo Convention, S. T. & L. A.

Comrades-In my election to the S. T. & L. A. convention, held at Buffalo on July 4 to 7 inclusive, you conferred an honor upon me for which I thank you, also a trust in my ability to represent our noble cause; I did my best to deserve it.

For a detailed account of the convention, I would refer you to the issue of THE PEOPLE on July 17.

Something may be said in addition of the forces that necessarily played on that important occasion, the S. T. & L. A., an organization of no less a purpose than that of centering the industrial and political power of the working class in a body which shall correctly represent the knowledge that all wealth is, to-day, produced by social labor power and must consequently unite wage workers, skilled and unskilled, educated and ignorant, of all crafts and of no craft to work for advancement

The S. T. & L. A. has lived three ears—it was organized none too soon. After the crisis of 1873, Socialists, few vearswhom were clear of perception of whom were clear of perception, thinking the labor movement was, in America, correspondingly intelligent with that of Germany, united with men of all shades and grades of intelligence who were discontended with conditions prevailing to build up the trade union; clear we know the result they have not alas! you know the result, they have not been schools for Socialist education but nurseries for the labor fakirs who have grown strong and waxed fat by the betrayal of the innocent trust reposed in them by the rank and file who did not take the trouble to discover for themselves the necessary measures for their advance and emancipation. Nor could the leaders, without political or-ganization and action on strict class lines, have prevented a decline of wages or lack of employment under the rapid development of capitalism during these

past twenty-five years. With enthusiasm, harassed but not broken, with knowledge augmented by severe experience. Socialists again take up the colossal task of recognizing the trades, this time upon the fundamental principle of economic and political unity.-Now, however, old trades union methods with their clustering preju-dices are added to the natural and nec-essary hostility of the capitalist class. So, too, is added to the natural burden the opposition of that Anarchistic ele-ment of German trades who once formed part and parcel of the Socialist movement in the days when every mal-content and discontent of society was welcomed to the heterogeneous mass called Socialists. In a word, Socialists having passed through the stage of sentimentalism now unite moral enthusiasm to scientific knowledge and are ready for action.

To look upon men simply as repre-sentatives of forces, it was easy to see who stood in the fore front for ad-vanced and democratic action both because of their clear vision and also be-cause upon them was centered the fiercest and least intelligent opposition. It must be said that the voting strength of the convention, as constituted-the large majority of the S. T. & L. A. was not represented-was in favor of inferior management and backward action.

If the S. T. & L. A. is to put the labor movement of America on the standing that the times demand by the rapidly increasing development of capitalism, aggravated and augmented by the new banking measures and the Cuban war, it must come under the direction of the most conscious and aggressive element of the S. L. P. itself rather than the least conscious and retrogressive fac-tors of the trades that make up the S. T. & L. A. In a word, the fight is on, inside, to put and hold the organi-zation to revolutionary tactics: this may be done by the use of the refer-endum vote. A proposed constitutional amendment on the basis of representa-tion which will give one delegate to tion which will give one delegate to each D. A. and one additional delegate for every 500 members affiliated with it will prevent a repetition of local con-trol such as the Buffalo convention witnessed. Another important propo-sition to secure democracy of con-trol is "that a quarterly milage assess-ment of one cent per capita of the membership shall be levied for the purpos of equalizing the railroad expenses of the delegates to the S. T. & L. A. conventions." Still another affecting very greatly the growth of the organization is a proposed change from annual to biennial conventions. The law here is plain. The capitalist class spend money to make money. The political wing of the capitalist class know the advantage, to them, of infrequent elec-tions, the workmen are educated to their rights and how to use them by frequent elections, hence it is the con-stant endeavor of capitalists to change stant endeavor of capitalists to change from annual to biennial elections; in obedience to this law the S. T. & L. A. should meet annually. These amend-ments, together with other necessary changes owing to the growth of the Al-liance, were by fighting every inch of the ground carried to a referendum vote vote vote. Resolutions were passed urging inter-national Socialist bodies to honor only union cards from the S. T. & L. A. The establishment of an official bureau of communication and information among Socialists, throughout the civilized communication and information among Socialists throughout the civilized world will be of great value in gaining for our party foreign-born workmen who for a time, at least, are confused in seeking their bona fide Socialist home. The reports of the delegates brought out the fact clearly that our party vote increased in greatest pro-portion in localities where we have or-ganized S. T. & L. A.'s. Special empha-sis was put upon urging party members to give great attention to building up the economic side of our party. Every attempt to keep the scope of action within local or trades boundaries was met by the broader policy that recaction within local or trades boundaries was met by the broader policy that rec-ognized the fact that one day the work-ing class must become the ruling class, and that the S. T. & L. A. must so con-duct itself that at the required time it take control of and reorganize the in-dustrial forces of the nation into the Socialist commonwealth. So the third annual convention closed, as the first annual convention

of these, the charge that they want to divide ALL property would fall, and would have to be limited to the smaller portion of the nation's wealth. But even this amended charge will prove upon closer inspection as essentially silly as the other. In the second place, with regard to

the soil, there would have to be as many barns and homesteads, or factories and other improvements as there are allotother improvements as there are allot-ments of land; each proprietor would have to be equipped with all the means requisite to cultivate the soil or produce upon it; without these the land itself would be of no use whatever to him. To, understand this, while keeping, in wind the necessity of medication mind the necessity of production upon a large scale, is to understand the utter futility of a division of the land. History has taught that such a procedure can bring no help. During the great French Revolution of 1789—a revolution initiated and carried through by the class that has now become dominant, namely, the capitalist class-it was believed that the French agriculturalists could be made happy by dividing among them the large landed estates. And what was the result? The French farmers are so poor to-day that millions of them live in hovels that hardly de-serve the name of houses. And are our own American small farmers, who con-stitute the bulk of our farming popula-tion, much better off? Only the large bonanza farm or plantation proprietors thrive; as to the small farmer, despite the advantages of a young country, his labors are often more arduous than those of any one else; he is driven to work himself to a bone to keep his prop-erty free from debt, and even then he does not asually succeed. His distress comes from the circumstance that, under existing economic conditions, agriculture can not be carried on profit-ably unless large tracts of land are worked with the most improved agri-cultural machinery. What agricultural of them live in hovels that hardly de-
