SOMETIMES TRUSTS.

Some Great Trusts.

It would take too much space to enter into details concerning the many great trusts which are springing up and multiplying by the score. The method of formation of such trusts is generally the same, whether it is the American Tobacco Company, the Standard Oil Company, or the Midland Railway Company. The method is this: A stock company is formed, and then the capitalist not only works himself into the presidency, but he also secures the election of his associates, each and all, by buying the votes of the stockholders. The result is the consolidation of the whole railroad system in the hands of the capitalist. He then goes to work to pay a large dividend, and at the same time to get the United States to make a bond for the railway system. Thus is the great trust formed, and the public are perpetually increasing the bond value of the company.

THE SINFUL TRUST.

Which We Are Striving to Wipe Out.

Look at the Picture.

The Control of the Citizens.

And then at This.

The Control of the Women.

The American people, as a nation, are the best informed, the most enlightened, and the most patriotic, of any nation in the world. The trouble is that they are not all alike, and that the government is not all alike.

The American people are well pleased with the material progress which has been made in the country. They are also well pleased with the political progress which has been made in the country. But the American people are not satisfied with the political progress which has been made in the country. They are not satisfied with the political progress which has been made in the country.

CORRESPONDENCE

A Significant Incident in Hudson County, N.J.

To the Editor:

The recent incident in the shoe factories in Union City, N.J., is an example of the way in which the working class is being exploited. The workers are forced to work long hours for low wages, and the conditions in the factories are hazardous.

Yours truly,

A COMING STORM

from the song assigned to him. He little if it is possible, to consider the conditions in the factories where he works. The average day of a shoe worker is from 10 to 12 hours, and the conditions are often so bad that it is a wonder he can work at all.

The shoe workers of Union City are fighting against these conditions. They have formed a union, and are demanding better wages, shorter hours, and improved working conditions. The fight is not an easy one, but the workers are determined to win.

Yours truly,
