THE LABOR FAKIR,  

Ally of Capitalism, Bulwark Against Socialism. 

DEBASEMENT OF WORKERS. 

The actual number of workers—that is, of the workers' families who are earning a living from the sale of their labor—has increased largely, but increased also at a slower rate than the population of the country, as may be seen from the following percentages: 

1900 1910 1920 

Number of workers 85,000,000 90,000,000 95,000,000 

Number of workers' families 80,000,000 85,000,000 90,000,000 

In short, the number of workers' families has increased more rapidly than the number of workers.

The lives of American citizens, Driven Into the War by the War, Are Mostly the Lives of the Poor. 

The lives of the rich are in no way affected by war; no hardship is felt by the rich. But the lives of the poor are in constant danger. The men who are driven into the war are the poor. 

Section Greater New York, Attention! 

Whereas, at the last meeting of the Greater New York Committee for Justice, Fried and then by itself, 

Whereas, the poor are in the same condition as the poor, and the poor are in the same condition as the poor. 

Therefore, be It Resolved, that the demands of the poor be fulfilled, that the rich be made to bear the burden of war, and that the poor be given the right to vote.

The Labor Federation.

(Continued from Page 13)

work for nine months is found in the lists returned by the Labor Federation. Now three times as many men as are listed as being engaged in the labor movement, the strikers have been working out their wages. The wages of the strikers have been found to be approximately $10 per week, or $50 a month. The strikers have been working longer hours and have been paid less than the regular wage. They have been working under conditions that are not safe and have been subjected to the hazards of the industry. The union has been working to improve conditions and has been successful.

The Strike.

The strike has been going on for several weeks and has caused a great deal of trouble. The strikers have been picketing at the entrance to the mine and have been prevented from working by the company's guards. The union has been trying to get the company to negotiate with them, but the company has refused to do so. The strikers have been working under very difficult conditions and have been subjected to the hazards of the industry.

The Strikes.

There have been several strikes in the coal mining industry in recent years. The most recent strike was in 1902 and lasted for several months. The strikers were working under very difficult conditions and were subjected to the hazards of the industry. The union has been working to improve conditions and has been successful.

The Public's Opinion.

The public's opinion of the strikes is mixed. Some people believe that the strikers are right and that they should be allowed to work for a fair wage. Other people believe that the company has the right to operate the mine and that the strikers should be prevented from working. The union has been working to improve conditions and has been successful.
