The Snake in the Grass

A Challenge We Won't Accept

QUERY OF WHERE IS JOHN REED ANSWERED

LONDON—George Lansbury, alias of Velsawatnik, now in Moscow, but who recently belonged to the London Borough, has come to Moscow with his family and is in his hotel in conference with the Bolchisch-Chinese "community in Moscow."

The Moscow students raided this house during the revolution. Now the Chicago students want to visit it because of its importance to the Russian revolution.

The Bolchisch-Chinese community in Moscow is led by a group of revolutionists who have lived in Moscow for many years. The community is composed of people who have lived in Moscow for many years and who are committed to the revolutionary cause.

Bolshevik Policy in the East

Bolsheviks naturally support China, but in England they have been met with opposition. In Moscow, however, there is little opposition.

In Moscow, the Bolsheviks are looking for opportunities to gain control of the government. They are interested in gaining control of the government because it will allow them to implement their revolutionary policies. They believe that control of the government will allow them to implement their revolutionary policies and make changes that will benefit the working class.

A White Collar Revolt

We gather from a period of the paper that there is a rise of "unrest and dissatisfaction" among the women workers in the white-collar or "white-collar" category, the "white-collar" barricades. The Conference of the National Educational Association is under way, and all that makes for the further plight of the conditions and circumstances in which this conflict of interest is taking place.

It means that the teachers of our great-American public school system are becoming discontented to the utmost. This is a general phenomenon as far as the standard of human labor is concerned that we are in what they call their great depression and deep economic condition to look for some better days.

Of course we know that the wearing of a collar or tie is a well-known characteristic of the white-collar worker, but we must remember that every act of effort and desire has been largely considered as part paragon in other classes. The class job was the only one with which he was concerned. But in and out, we are confronted with the desire to be better.
