First Account of Brazil Uprising

ARMY PURGE FORCES ACTION

People's Front in Heroic Struggle

Because of the iron-fisted censorship over all news from Brazil, it has been extremely difficult to get a truthful picture of the recent uprising there. By special messenger the following report was delivered beyond the borders of Brazil, and by fastest air mail sent to the Daily Worker in New York. It is interesting to compare this report with recent charges made by the Uruguayan Government that the Brazilian revolt was "Moscow inspired."

RIO DE JANEIRO-The up-**IMPERIAL VALLEY** rising began in the province of Rio Grande del Norte. Pernambuco rose up first. It is not yet known exactly why the North East precipitated the movement. But from all information reaching Rio de Janeiro it appears as if the hand of the anti-Fascist people's front was forced.

A double threat was aimed at them. They were not only faced with terrorist reaction, but the army was about to undergo a "cleansing" to wipe out the "mutinous" elements. There was no choice of time. A "cleansing" would mean the execution of scores in the army. With more time, better preliminary agitation could have been organized on a wider scale; but it was a matter of hours before the terrorist regime would strike at the army groups. The soldiers were faced with the only alterative of the

EAST COAST FACES FIGHT ON PROPOSED NEW **AGREEMENT**

SAN FRANCISCO, Jan. 3.in amazing contradiction has apparently risen within the ranks of the Pacific Coast shipowners over the tying up of 46 steamschooner's in answer to the sailors' demand for a six-hour day or steamschooners.

Elisha Hansen, shipowners' attorney at Washington, D. C., issued a virtual "challenge" to the federal government and union labor which, although at first mildly "repudiated" by the Waterfront Employers' Association, was later quoted as being in accord with the statement of Hansen. '

Said Hansen to Assistant Secretary of Labor E. nations is the growing fear of revolution which is causing them to move with great uncertainty in the present international crisis. A wave of revolutionary unrest has been particularly noted in all colonial countries. Within the borders of Italy a

situation prevails which is moré tense than the highly censored news despatches from Rome will admit. The Communist Party of Italy has been waging an intensive propaganda drive ever since the beginning of the Africa invasion. Recently, hundreds of small balloons were released over Northern Italian towns carrying copies of the Communist manifesto against

REVOLT STIRS IN RANKS

Reports of dissension in the ranks of the Italian invading army in Africa are received with growing frequency.

The existence of strong united fronts of all anti-capitalist elements in most of the capitalist nations is a stumbling block to the maneuvers of imperialist powers.

Italian forces in Ethiopia have been on the defensive for many weeks. Unable to cope with the land forces of the Ethiopians, the invaders have been waging constant air attacks, but have not succeeded in weakening the Ethiopian counter-attack.

CHINA REVOLT LOOMS

Third Greek Ship Held As Crew Refused

Island Quarantine Station officials are puzzled by the disappearance of the captain with 34 of his crew of 40 from the Greek ship, Marpessa, while awaiting quarantine in-

The captain and his seamen left the ship on Sunday last and have not been heard from since. Maritime workers offer as a solution one of two possibilities. Either the crew have quit with their captain rather than load war material for Fascist Italy, or, as a result of the new and strict compulsory army service decreed by the Greek Government.

This makes the third Greek ship that is tied up on the East Coast. One is tied up at Baltimore with the crew refusing to take the vessel out loaded with war goods. At Portland, Me., another Greek vessel lies minus a crew and a radio operator, who deserted, when war goods were put aboard.

Dies Launches "Alien" Attack

WASHINGTON, D. C., Jan. 3. -Deportation of "6,000,000" aliens to "solve" the unemployment problem in the United States is the slogan put forward by Congressman Martin Dies of Texas, who is back in Washington this week.

Dies is the author of an alien deportation bill which failed to pass last year because of pressure against it from liberals and the working classes. He now is circulating a petition among fellow Congressmen to force an early vote when Congress meets January 3.

The N. Y. Chamber of Commerce has bitterly attacked the mild resolution by Mrs. O'Day to stay deportation in 2600 cases of those of "good moral character," pending action by Congress. If these 2600 are deported they will leave approximately 7000 dependents in this country.

The American Committee for the Protection of Foreign Born calls upon all the forces opposed to the methods of the infamous Palmer raids and wholesale deportation drives such as those of William N. CENTRAL BODY REFUSES TO REPUDIATE YOUTH **ENDORSEMENT**

SAN DIEGO, Calif., Jan. 3.-William Green, red-baiting president of the American Federation of Labor, received a technical slap in the face at the Federated Trades Council meeting here this week when a motion to withdraw endorsement of the American League Against War and Fascism was decisively defeated.

The motion was made after a etter had been read in which William Green, following the lead of Hearst, charged the League with being Communistic.

The Council officially protested the vigilante terror being used against the agricultural workers in Imperial Valley by the sheriff and other wealthy growers. Another motion protesting the Florida terror, resulting in the death of Joseph Shoemaker, was carried. The motion requested that the 1936 A. F. of L. convention be

held elsewhere. A reactionary move to close the Council meetings to the public was defeated and there was considerable criticism voiced against the recent attack on the progressives by the Labor Leader. The majority of the delegates clerly, were angered by the antics of the reactionary editor of the paper.

A brief review of the work showed that a number of successful shop strikes had been carried on, that several attempts to open contracting shops were smashed, and that the unemployment insurance fund enjoyed by the furriers of Los Angeles had reached the highest total in its existence.

While a good deal of progress was shown by the activity carried on for the past few months, nevertheless both locals had not achieved the measure of success antici pated three months ago. Particularly was emphasized the necessity for carrying on educational work and enlightenment on trade union problems among our membership.

BENIOFF STRIKE

The discussion at the conference centered around the demand upon our International office to provide a subsidy for a field organizer, and the strike now being carried on against Fred Benioff, stubborn open shopper in San Francisco. At the present time, this employer is attempting to set a party," Nye points out that "tol a dangerous precedent by instituting injunction proceedings against Local 79 of San Francisco. A campaign must be instituted to secure the support of the local unions in fighting this attempt on the part of Rred Benioff to maintain an and through the method of injunction to restrain the union

from organizational activities. As to the subsidy, the conference realized that with the assistance of a field organizer, the unorganized centers of the Pacific Coast would be unionized in a very short time. It was decided to appeal more strongly to the General Clergyman Refutes Executive Board for such a subsidy in behalf of the fur workers on the Pacific Coast.

PROGRESSIVE ACTION

A number of resolutions were passed at the conference, among sational newspaper stories telling which were included a resolution against the Italian invasion of Ethiopia, a resolution in support of the Committee for Industrial Organization, headed by John L. Lewis, a resolution in support of a Labor Party based on the trade unions, which would be a real political weapon in combatting fascism and in fighting for the needs of the working people. A fourth resolution was passed protesting the revocation of the charter of the Fish Cannery Workers' Union. Local 18656, and requesting Pres. Green of the A. EASTERN SEAMEN URGE STRIKE

NEW YORK.—East Coast seanen face a two-edge fight as a result of the shipowners' flat rejection of the proposed changes offered to the expired 1935 agreement by the District Committee of the ISU.

Instead the operators have offered the renewal of the old agreement intact. The District Committee. has agreed to continue the contract for thirty days while conducting a referendum vote. Rank and file scamen are de-

nanding the rejection of this ofer and re-indorsed their original demands, to be backed up by strike vote on Jan. 30. They are also insisting that the negotiations committee be enlarged to give proper representation.

As an amendment to the old agreement the District Committee asked for the establishment of a oint hiring hall and a small increase in wages.

Rank and file seamen have repudiated this demand and are insisting that the union control hiring similar to West Coast co.. ditions. To gain this point and the question of a satisfactory arrangement for overtime, militant leaders are urging the taking of strike vote on January 30.

APPEAL TO THE NATION

Declaring it to be the beginning of the national liberation revolution against imperialism, the People's government was proclaimed. Its program of struggle was that of the National Liberation Alliance, under the leadership of Luis Carlos Prestes.

This first National Revolutionary People's Government of Latin America immediately appealed to the rest of the country to join it in struggle against imperialism and for the national liberation of Brazil.

On the morning of Nov. 27, four days after the Northeastern uprising, a large part of the 27th Regiment in Rio rebelled. Their barracks are situated in the worst strategic position in the city. They are located in Pranha Vermelha, at an extreme point of the city and at the bottom of the funicular which travels to the top of the strategic Sugarloaf mountain. Since the whole regiment did not join the uprising, with some officers and their followers remaining "loyal," an internal fight took place.

Promises Instead Of Checks Given

LIBERAL NEWS DEFENDS ROOSEVELT RELIEF WITH SLY RED-BAITING

"I am almost starved, my landlady is about to throw me out, and my 'dogs' are worn out from walking to 901 Potrero ave., where three times they promised me my check would be ready." This is the pitiful statement from a man of 65, one of the three hundred WPA workers who have been promised pay checks since Christmas and are still waiting for them. This man explained that he had been a mate on a ship until his age had forced him to go on relief. He had suffered an injury to his arm while at work on a WPA project. Since Friday he had been unable to go to the Marine hospital to receive treatment because he lacked the necessary car fare. He had no money to buy food or pay his rent and he stated that he had tried to get an emergency SERA order but added, ". . . I am ineligible because I have already received one WPA check-three weeks ago.'

This is but one of the cases of desperate need faced by these workers, who have been handed promise after promise by Bayley Hipkin, local WPA director, in lieu of the money that is rightfully theirs.

The above is the story told to News reporter. Finishing with denunciation of the Rooseveltian Relief Administration's bureaucratic methods of handling this case the News, in conclusion, adds a backhanded slap at the Communists by quoting the same worker who is described as a "normal loyal American" and is "humbly grateful for what he receives," as saying, ". . . But when your stomach's empty and you don't know when you'll get the money they owe you . . . you sometimes feel like listening to those Reds, and, maybe throwing a brick through a

> LOS ANGELES, Dec. 27.—The murderous neglect by WPA projects supervisors of the safe-guarding of the workers took a toll of another life here yesterday, when Frank Brodigan, 40-yearold Mexican worker, was killed in the collapse of a section of the Westlake storm drain at 21st street and Orange drive.

Approximately 400 pounds of earth fell on Brodigan's back in the cave-in, but his death was not caused by this but by the fact that he was operating a "jack hammer," or automatic clay spade, driven by compressed air.

Inexperienced at operating the "jack hammer," Brodigan lost control of the handle and it drove right straight up into his stom-

By B. Gannett.

From the tribune of the Seventh World Congress of the Communist International the earnest voice of Georgi Dimitroff, general secretary of the Communist International, called upon the Communist Parties to strengthen their own ranks to ensure the winning of the broadest sections of the people for the struggle against war and fas-

"If we Communists exert every effort to establish a united front, we do this not for the narrow purpose of recruiting new members for the Communist Parties. But we must strengthen the Communist Parties in every way and increase their membership for the very reason that we seriously want to strengthen the united front. The strengthening of the Communist Parties is not a narrow Party concern, but the concern of the entire working class."

It is in the spirit of these words of Comrade Dimitroff that our Central Committee at its recent meeting in November, while discussing the tasks before us-the struggle for peace, the building of a Farmer-Labor Party and trade union unityseriously took up the need of strengthening our Party as one of the main organizational tasks of

STRUGGLE FOR UNITY

the day.

The Party in the California district has made some headway in establishing its influence among Union now occupies first place in large numbers of workers and professionals. It the world in area sown to wheat, has untiringly worked in every locality to unite this area in 1935 amounting to 92 the trade union movement, winning the workers million acres, an article by the for a class struggle policy, and developing united actions around immediate issues. It has withstood A further large extension the vigilante fascist terror and succeeded in rewheat area is contemplated organizing its work so as to maintain closer conby extending the belt under cultil tact with the workers in industry and trade unions. But the Party has grown too slowly. It has not as yet succeeded to stop the outflow of good elements from our ranks, because they have not found an answer to their problems in our units. It has not systematically recruited large numbers of active trade unionists, of active supporters of the united front-from among those elements who work together with us and recognize in our Party the initiator and organizer of the united actions of the workers.

500 NEW MEMBERS

There are today about 2800 Party members in California. We can with the slightest effort double the membership. The District Committee, therefore, places the question before the entire membership—the Party in this district can and must be built. In the coming two months-January and February—we have the task of winning 500 new members into the Party and assuring our Central Committee that we will at the same time see that by March 1 we can record 3200 active members in our ranks. This will be the first stepping stone in doubling the membership of our Party in the nearest future.

Is it an impossible task for us to recruit 500 new members in two months? We are confident that the entire Party membership will feel as we do, that it can be accomplished. If every member of the Party, if every worker, while not yet in the Party, sees in it the outstanding champion of the interest of the working people, will help in this job-500 new members can be won. All around our Party there are splendid elements, who with serious attention on our part, will join the Party.

THE TRADE UNIONS

Our main emphasis in carrying through this drive for new members should be among those rank and file workers and leaders in the trade unions who during the past period have proven their devotion to the working class, fought for improved conditions and against the class collaboration policies of the Vandeleurs and Scharrenbergs. These people belong in our Party; they can be brought in, if we patiently show them the position of the Party on every issue which they face in the union, discuss with them the reason for the Hearst slanders against the Party and the working class, explain popularly the program and tactics of the Party, bringing them regularly our Party literature. A very important means of convincing these elements that the policy of our

Party is correct, is by proving to them in our day to day work that Communists work actively in building the trade unions into powerful organizations of the workers.

In every section of the district Communists are participating in united front actions. These united front actions make it possible for us not only to more effectively defend the every-day needs of the workers and toiling people, but enable us to reach larger numbers with the program of our Party. The united front gives us the opportunity of proving by our work in the united front the correctness of the stand of the Party. It is in these united front actions that we must win over the best and most loyal elements for the Party by proving to them that being a member of the Party will improve their own work.

CONCENTRATION

Many of us work in factories—important points of concentration-yet recruiting from the factories is given least attention. The building of our Party in the factories remains the most important task in connection with our recruiting drive and has to be given careful and systematic attention by the leading comrades. Comrades working in factories shall be called in, their work in the shops discussed, and possible contacts for the Party visited. These workers shall be approached with the Western Worker, with our Party literature and especially through individual discussions so as to bring

them into the Party or closer to the Party. As part of the drive to recruit 500 new members, we should give serious attention to improving the work and life of our units. Our members will not be able to carry out this work unless we cut down the many inner meetings we have at the present time, and organize our units in such a manner that they can react to the issues in the neighborhood shops and trade unions. Without improving the life of our units we cannot hope to keep the new members that are coming in.

PERSONAL APPROACH

While the main method of winning new members shall be through personal approach, at the

same time we shall widely popularize the role and program of the Party. In every united front action, in every struggle, we shall explain the position of the Party to the workers. The workers want to know what the Party thinks about the Farmer-Labor Party, on the struggle for peace. on issues facing the workers in the factories, the unemployed, etc. Such a well organized campaign has been reformed by Chiang Kaiof agitation will help to strengthen our influence among the workers and bring many of them into ments and cooperate more effecour Party. Of special importance in the drive is tively with Japan, which is seeking the Western Worker. The Western Worker, to annex North China in the form, which speaks to the masses twice a week on these vital problems is one of the best instruments lilar to Manchukuo. through which to reach them during the recruiting

FOR A DECENT LIFE .

There can be no delay in carrying out these tasks. A stronger Communist Party in California will mean a stronger weapon against vigilantism and reaction. A stronger Party in California is the main safeguard against every suppression of democratic rights and the right to organize. A much. stronger Party in California means a more effective struggle for peace, for a Farmer-Labor Germans to pay no attention to Party, for decent living conditions.

Jones tried to smile this time. But Big Bill wouldn't argue any farther. So finally Jones had to cave in.

Modern armaments are built upon a new type of swivel which can shoot in any direction; either at the workers of a foreign land, or at workers in the homeland. Take note of the recent book of strikebreaking instructions issued by the War Department to the military. The following is a paragraph therefrom:

"In some cases it will be necessary to make a houseto-house search for arms, or for the purpose of arresting the male inhabitants.

"Mopping-up or searching parties will be sent through the houses on each side of the street, and it may be necessary for such parties to enter some of these houses through breaches made in connecting walls.

"If houses are not connected, it may be best for parties to approach rapidly from different directions at the same time, while fire is being brought to bear on windows."

The Next Step in the Fight For the Six-Hour Day

The situation in the present steamschooner affair, which has resulted in the crews of 48 vessels being laid off by the shipowners in answer to the sailors' demands for a six-hour day, has begun to

Further steps must be taken to try and gain the six-hour day, either through the present form of job action or the abandonment of this form in favor of some other sort of job action.

The "job action" on the steamschooners was definitely not accomplished in the spirit of the resolution accepted unanimously at the recent Rederation emergency convention.

The action was not carried out in compliance with the convention, but was instituted upon the adopton of a resolution passed at a meeting at the San Francisco branch, which called for "job action" to gain the six-hour day.

The policy laid down by the convention clearly defines job action and the correct way to put it into practice, thereby insuring the unity of all the crafts in the Federation.

It was with the assurance of full safeguarding of this unity that the convention adopted the program outlined.

Any further action must be taken in accordance with this resolution which reads as follows:

"Resolved, that a committee of all maritime groups affected on the job be formed on the job to consolidate the action and prevent misunderstandings; such committee's authority not to exceed the Constitution of the Maritime Federation, and be it further,

Resolved, that when job action reaches a point in the opinion of the majority of the maritime groups affected by having their members pulled off the job, and that to go further may jeopardize the Maritime Federation as a whole, the matter shall be referred where and when possible to the District Council for further action or adjustment."

In line with this Resolution then the individual crews should vote whether to abandon the present job action for some other form.

If the crews of the various ships which this present action has taken place on, vote to contheir actions, then the question should be Thed to the District Council for further comération and assistance.

Periodical Depressions And Returning Prosperity

Capitalism is feeling very jovial in America for the moment. The majority of millionaires feel 'we have turned the corner.

As a matter of fact they have. They have turned many corners. And when they turn one more, they will have gone completely around the block and be back where they started.

The capitalist theory of periodic booms and depressions is the same theory by which a drunk gropes his way home. He staggers to his feet, sings a few notes, stumbles a few steps, then flops again.

It is to be noted that most drunks in this condition, however far they may progress, never get home, but end up sound asleep in the gutter.

The present tidal wave of prosperity which has swept the nation could be picked up in a teaspoon. Let us scoop up the precious flood, put it in a test tube and hold it up to the light.

Profits have risen incredibly—well over 40 per cent. Prices of commodities have soared with

Wages have increased a slight six per cent. In the face of rising prices, this ends up by being a wage cut. You get a little more and can buy a devil of a lot less.

The amount of commodities sold IS CON-SIDERABLY LESS. This in the face of the fact that America was already consuming far less goods than was necessary to the health and welfare of its inhabitants.

Now you can go right out and rejoice over

you sober up and face the facts, you'll feel somewhat of an ass

Another point to consider is that the unemployed remain the same vast, grim, unwanted army they have always been. Take yourself, for example. You were unemployed a year ago. Today you are still unemployed. If it isn't true in your case, then take the case of your brother-in-law.

Here is a lesson in home economics. If prosperity ever returns under 'capitalism (it won't) you'will notice it in your own kitchen. You won't have to read about it in the papers. Until then don't get excited about it.

The present "avalanche of plenty" may hang another jowl on Mr. Hearst, but it won't put new shoes on your kids.

Imperial Valley Workers On Your Guard

In a brazen incitement to vigilante terror, reeking with typical Hearstian invectives and splattered across the pages of Southern California newspapers, Sheriff Bob Ware of Imperial Valley this week opened war on the Fruit and Vegetable Workers' Union, an A. F. of L. affiliate, organized in and around El Centro.

Sheriff Ware is a wealthy pea grower. He is in league with other rich growers, among whom are the lettuce farmers. The harvesting of lettuce soon will begin in Imperial Valley.

Last year, after two strikers had been murdered by gunmen and scores more had been beaten, gassed and jailed, the lettuce growers cleared enormous profits from the sale of their blood-stained product on the Eastern markets.

Sheriff Ware now attempts to blame the socalled "Reds" for the violence during last year's strike. In Imperial Valley anyone who believes in the constitution, who fights for a better life, anyone who threatens to cut by one iota the immense profits of the wealthy growers, is a "Red."

And as often is done on the San Francisco waterfront and elsewhere, the employers raise the "Red scare" as a possible means of splitting the organizations of the working class.

Imperial Valley agricultural workers should be on their guard. Sheriff Ware has tipped his hand. Waterfront workers long have been labeled "Reds" but they have stuck together and they have won higher wages and better working con-

A rank and file controlled union, strongly entrenched among the agricultural workers, is the most effective weapon against terror and sell-outs. Build the union in Imperial Valley.

Mark Twain on Loyalty

"My kind of loyalty is to one's country, not to its institutions or its office-holders. I was from Connecticut, whose constitution declares 'that all political power is inherent in the people, and all free governments are founded on their authority and instituted for their benefit; and that they have at all times an undeniable and indefeasible right to siter their form of government in such manner as they think expedient.

"Under that gospel the citizen who thinks he sees that the commonwealth's political clothes are worn out, and yet holds his peace and does not agitate for a new suit, is disloyal; he is a TRAITOR."-Mark Twain.

Can anyone doubt that the Soviet Union is the chief bulwark for peace in the world, not because it is weak, but precisely because it has grown strong and powerful, and demonstrates that Socialism means peace, in contrast with fascism, which is the chief threat of war?

Our task . . . is not to stand passively by and wait until Negro toilers become ready for revolution. No. Our task is to join with them in the organization for their immediate struggle and strengthen their position nominally and politically, toilers, and in this way create the transition to the revolutionary struggle which will make possible the realization of the right of the Negro masses in the Black Belt to self-determina-

Movie Censorship In America Grows

The banning of pro-labor and pro-Soviet films has had a sudden mpetus in the last few months. "The Youth of Maxim" and "Peasants", although shown in many large cities, have been banned by the Detroit chief of police and the The former is extremely anti-Soviet and refuses to release any Soviet films.

The American Legion, because of its anti-Soviet stand, stopped the showing of the "Road to Life" in Zanesville, Ohio, without giving any reasons. In Columbus, Ohio, the safety director seized this film and refused to release it. In Florida, this same picture was barred through the activities of the Nazi consul. During a recent strike at Bellington, Wash., the picture "Soviets on Parade" was banned on he ground that it would be unwise to show it at that time.

WIDE UNREST

The workers and peons were restless and dissatisfied. A left influence began to assert itself in the unions which were again becoming militant while the Cuban Revolution fired the people.

Until his election, Cardenas was a Callista. Once in office, he threw off the Calles shackles and proclaimed a return to liberty. To Cardenas rallied all the progressive forces who sought an end to political clique rule.

Calles struck back with Fascist provocation. On the day after the press carried his statements, the Syndicate of Electricians issued a call to which 70 per cent of Mexico's unions and the leading agrarian organizations responded. From this beginning, the anti-imperialist people's front was born.

Why Japan Has to Use Natives in China Conquest

Taking a page from the book of British imperialist policy, Japan is using to a far greater degree than formerly, other people to do her fighting.

When she first went into Manchuria four years ago, it was almost completely Japanese troops who did the dirty work. The sai held true of the attack on Shans

Today it is vastly different. Not only did they find, as Mussolini. has found in Ethiopia, that it is heaper to get deluded natives and paid misleaders of a country to do the fighting for them. But it provided an admirable cloak behind which to hide-the pretense that this was a movement not of conquest but of aiding a people to gain freedom and civilization which they desired. The more subtle method these days is needed, what of imperialist rivalries being so sharpened by the years of crisis that have sent all major industrial capitalist nations to seeking a new redivision of the world.

First it was the Manchurians. Now it is the Northern Chinese. And the main reason, even more. important than those above stated, lies at home.

When the first forced "enthusasm" in support of the war wore off the working classes of Japan eaw no immediate benefit. The slightly fewer unemployed created by the war stimulus and recruiting, has long since gone back to and surpassed former figures. The ballyhooed program of economic aidjobs and lower taxes-which was to result from the wars of conquest did not develop. Instead every bit of development of Manchuria brought, that much stronger, a new competitor into the Japanese home market, resulting in

mass layoffs in too many cases. Attempts to suppress the Communist Party failed, and despite terrific reign of terror age militants in the trade union more ment, strikes, particularly among the marine workers reached greater proportions than ever before. News, of the defeats of the "invincible soldiers of the Emperor" at the hands of ill-equipped peasant and worker partisan troops on the plains of Manchuria did not help

keeping up the war spirit. In-

stead they inspired the Japanese

workers to renewed fight-on the

economic field-at home.

It is now generally acknowledged in official Tokyo that the people want no more of the The People's Front is the strong-drains of war. Rumbles of growworkers and peons are alert and the country and a wave of widecism. They demand a better life, when making their decisions. They ready taxed and suppressed the population too close to the breaking point and that further adventures in China must be mainly supported and fought with other troops. This lay behind the infamous pact between Tokyo and Chiang Kai-shek a year ago when he five Northern provinces were bought and sold; it is the keystone at present when the Japanese are attempting to make good their claims on this territorv today.

> The last news of 1935 was of the secret consummation of a pact whereby the vague situations in Hopei and Chahar provinces are cleaned up and direct Japane control is granted—both throu, direct Japanese administration, through "cooperation" of Japanese troops with Kuomintang or other Chinese police, and through the latter, where used, being "subject

o Japanese influence." The military clique, faced with he growing undercurrent of discontent throughout the home country-which had a nasty habit of breaking out at times-is able to maintain itself largely through not putting too much of an increased strain on the people at home but using Chinese traitors and Manchukuán troops to do their battling abroad.

Therein, in part, lies its w ness. The Chiang Kai-shek ? in and spreading the fight.
