AN EVENT IN PARIS

TOLD BY CHICAGO COMRADES.

The 40,000 Parisian workers went on strike on February 28th, 1900, in protest against the sepulchral, heart-stopping monotony of the French working day. The struggle was initiated by the French workers themselves, who responded to an appeal from the Federation of French Workers to take up the strike in protest against the long hours and low wages they were forced to labor for. The strike was successful in demanding shorter working hours and higher wages.

SOCIALIST SIGNIFICANCE OF THE THREE BRASS BELL

In the establishment of a new national socialist system, the three brass bells will play a central role. The bells symbolize the unity and strength of the socialist movement, and as such, they serve as a powerful symbol of the collective effort required to build a better future. The bells are also a reminder of the importance of solidarity and collective action in achieving socialist goals.

A SPECTACULAR MILESTONE

The socialist movement is reaching a significant milestone, with the establishment of a new national socialist system. This is a momentous occasion, and the socialist movement will continue to build on this foundation to create a better world for all.

The Socialist Vote

A MACHINERY CRUSHING

Last week an event was recorded in the history of labor, one of the greatest questions being answered in the movement of the last 15 years, the election in the history of the country which was decided in favor of the public, the question of whether the nation should be controlled by a capitalist class or by a working class, and the question of whether the nation should be governed by a few or by the many.

The WORKERS’ STRUGGLE

Workers’ organizations are in a position to work for what they want, to work for the establishment of a workers’ state, to work for the overthrow of the capitalist class, to work for the establishment of a workers’ government.

SNAP SHOTS BY THE WATSON

The attempt now being made in China to establish a workers’ state by a workers’ government, to establish a workers’ state by the workers themselves, is a significant fact in the history of labor.
