DIFFERENCES IN WAGES.

How One Man Was Promoted Making Over $5,000

How does a man make $5,000 a year when he works from 6 a.m. to 6 p.m.? This is the question asked by many people who are not in the working class. The answer is that a man can make $5,000 a year by working from 6 a.m. to 6 p.m. if he works in a business where the wages are high. This is the case in many large cities where the wages are higher than in the country.

PUBLIC OWNERSHIP

We believe in public ownership of all the means of production, distribution, and exchange. This means that the government should own all the land, the factories, the mines, the railroads, the utilities, and all the other means of production. This will enable the government to control the economy and prevent large corporations from taking over the economy.
