Three Principles of Socialist Philosophy

Extracts from a Paper Read Before the Women's Auxiliary of the Socialist Party by Mrs. May Walden Kerr.

The modern process of industrialization has had a profound effect on the way we live and work. In the past, people had a clear understanding of their environment and the world around them. However, with the advent of modern technology, the way we interact with the world has changed. This has led to a new set of principles that are being explored in the modern world.

1. The Principle of Co-operation: This principle stresses the importance of working together as a community. In the modern world, this means that individuals must work together to achieve common goals. This principle is essential for the success of any society.

2. The Principle of Equality: This principle emphasizes the importance of equality among all individuals. In the modern world, this means that everyone should have equal access to resources and opportunities.

3. The Principle of Responsibility: This principle stresses the importance of taking responsibility for one's actions. In the modern world, this means that individuals must be responsible for their own actions and the actions of others.

These principles are essential for the success of any society and are being explored in the modern world. It is important that we continue to explore these principles and find new ways to apply them in our daily lives.
WEST SIDE

Socialist Party
Platform

The Socialist Party of America is a national
organization of working men and women who
believe in the democratic control of capital and
who are fighting for the achievement of a
socialist society.

Our program is based on the following prin-
ciples

1. The immediate and complete abolition of
private ownership of the means of produc-
tion.

2. The transfer of these means of produc-
tion to the government, and the operation
of this government-owned industry by
voluntary labor in accordance with the
democratic will of the workers.

3. The withdrawal of all the profits of indus-
trial and commercial enterprise from
private capital and the distribution of the
proceeds to the workers in the form of
wages.

4. The establishment of a system of social
insurance to provide for the needs of
every class of the working class.

5. The establishment of a system of public
education to provide for the needs of
every class of the working class.

6. The establishment of a system of
socialism to provide for the needs of
every class of the working class.
