A REAL LIVE JOKE.

In the early days of the Socialists' campaign, they were criticized for lacking a coherent message. The following text is from the Chicago Socialist, January 2, 1904, highlighting the difficulties faced by the Socialist Party in gaining public recognition.

SOCIETY EVOLUTION

The Class-Struggle Is the Means of the Progress of Society.

EVOLUTION AND REVOLUTION ARE NOT OPPOSITES.

Revolution Is One of the Steps of Evolution. It is the culmination of a period of Social Evolution. The finishing system of Society is an illustration of the Theory of the Class-Struggle.

By F. A. M. SHUTTLE.

1. It is a common practice in political evolution and revolution as if they were synonymous, that is, that Socialism is a mere "new system" at the expense of the old one. The reality, however, is that the Social Movement has been long in the making and will continue to make progress. It is a "new system" that is the result of a long and slow process and is thus not synonymous with the old one.

2. Evolution and revolution are not opposites. Evolution is a gradual process of development and change, while revolution is a sudden and dramatic change. Evolution is the process by which societies and individuals develop and change over time, while revolution is a sudden and dramatic change that occurs in a short period of time.

3. The class-struggle is the means of the progress of society. The class-struggle is a conflict between different classes in society, and it is the means by which societies evolve and change. The class-struggle is the means by which societies move from one stage to another and from one system to another.

4. Evolution and revolution are not opposites, but are complementary processes. Evolution is the gradual process by which societies develop and change, while revolution is the sudden and dramatic change that occurs in a short period of time. Evolution and revolution are complementary processes, and it is the combination of both that results in the progress of society.

5. The class-struggle is the means of the progress of society. The class-struggle is a conflict between different classes in society, and it is the means by which societies evolve and change. The class-struggle is the means by which societies move from one stage to another and from one system to another.

6. Evolution and revolution are not opposites, but are complementary processes. Evolution is the gradual process by which societies develop and change, while revolution is the sudden and dramatic change that occurs in a short period of time. Evolution and revolution are complementary processes, and it is the combination of both that results in the progress of society.
