SOCIALIST PARTY
State Organizer Council: The Work is the City.

In the course of our work here in Potosi I find that never before was the need for a socialist organization so urgent. I think that the time has come to assume the responsibility of organizing the masses in all parts of the world and to build a new party that will be strong and powerful.

Conditions were never as favorable for socialist agitation as at the present time. With the coming of capitalism, the labor movement has become more widespread, and the working class is becoming more conscious of its needs and aspirations.

We are calling on all honest workers to join our ranks and help us build a strong socialist movement that will be able to fight for the rights of the working class and for a better future for all.

The campaign committee meets every Monday night at the Socialists' Hall. Everyone is welcome to join us.

WHAT PACKINGTON IS STRIKING AGAINST

A. M. Simons, from Personal Observations, Graphically Describes the Conditions at the Yards—Life, Health, Morals, Decency and All That Makes Life Worth Living Sacrificed for Profits.

The following graphic description of the conditions prevailing in and around Packington, a little-known city in the heart of the country, will make the reader wonder at the ignorance of the public in respect to the situation existing in the yards. It is a fact that the conditions described are those of Packington, but they are applicable to other yards in the country also.

The railroad is operated by a large corporation, which has a history of more than 50 years. The company has always been noted for its efficiency and its ability to operate on a large scale. The corporation has always been able to make a profit, and the stockholders have always received a satisfactory return on their investment.

The railroad is operated by a number of workers, who live in the yards themselves. The workers are paid a low wage, and they are required to work long hours. They are frequently ill, and they have no opportunity to see a doctor.

The living conditions of the workers are terrible. They live in shacks, which are crowded and filthy. The workers are frequently ill, and they are not able to obtain medical care. They are frequently exposed to accidents, and they are not able to receive proper care.

The corporation is not interested in the welfare of its workers. It is only interested in making a profit, and it is willing to sacrifice the lives and health of its workers in order to do so.
