FROM NATIONAL HEADQUARTERS

THE EYE OPENER

is the name of a new campaign paper that will be published weekly. It is aimed at the workers in the United States for the purpose of informing them of the activities of the Socialist Party in their own communities. The first issue of THE EYE OPENER was published on October 22, 1904, and it contained an article on "The Working Classes." The paper was edited by a group of workers who were members of the Socialist Party. It was intended to be a tool for the Socialist Party to educate the working classes about the issues of the day and to动员 workers to join the party. The paper was published in various formats, including newspapers and pamphlets, and was distributed through the Socialist Party's outreach efforts. Over time, the paper evolved and changed its name to "The Socialist." The Socialist Party was a major political force in the United States in the early 20th century, and played a role in shaping the political landscape of the time.
Collins Stirs Up Kewanee!
Holds a Rousing Meeting

Socialists Rouse the Workers and Force Republicans to Import Speakers to Stem the Tide.

On Sunday night, in the First Church ten miles west of Kewanee, Illinois, about 180 people attended a meeting called by the Kewanee Socialist Club. The speaker was J. P. Collins, who recently took a position in the United States Labor Department.

The event was a success, and the manifestation of interest was the first indication that the Socialists had in the county. The meeting was held in a hall provided by the church, and the audience was seated under the direction of the chairman, who introduced the speaker.

Collins spoke for about an hour, and the meeting was adjourned at 11:30 p.m. The Socialists will hold another meeting in the county within the next few weeks.

The Socialist Party in the United States

Writing on this subject in the World, Beltadu, M. Th. W., says that the Socialist party in the United States is on the way to becoming a mass movement. The party has been growing rapidly, and there is no reason to believe that it will lose its momentum.

The Socialist party is based on the principles of social justice and economic democracy. The party advocates the abolition of private ownership of the means of production and distribution, and the establishment of a cooperative society in which all members of society participate equally in the ownership and control of the means of production.

The Socialist party has been active in the United States for a number of years, and has gained a substantial following. The party has been successful in many local elections, and has had a number of candidates elected to public office.

The Socialist party is committed to the principles of social justice and economic democracy, and is working to create a society in which all members of society participate equally in the ownership and control of the means of production.
