PROPOSED PLATFORM OF THE SOCIALIST PARTY OF CHICAGO, ILLINOIS.

(The following is the report of the commission elected by the County Convention for the writing the platforms. The work was ordered to be published in The Chicago Socialist Jan. 3, 1905. It contains the report of the commission and proposes a platform for the city convention—Ed.)

The Socialist party of Chicago recommends to the convention the adoption of the following platform:

**TELEGRAPHERS HIT.**

Investment by workingmen Makes Millions for Masters—Morse Operators May Retire.

INVENTOR MAKES NOT A CENT.

All the Product of the Workers' Brain Belongs to the Idler. The Incidence of Capitalism.

The news column of the Chicago Tribune this week contained an item which appeared to be of some importance. It was to the effect that the Supreme Court of the United States had decided that a certain man had no right to claim the invention of a process which he had perfected. The court held that the man who had perfected the process was entitled to the profits from its use, and that he was not entitled to any future share of the profits.

This decision is a blow to the working-class movement. It is a blow to the movement for the control of the means of production and distribution. It is a blow to the movement for the control of the government, and it is a blow to the movement for the control of the union. It is a blow to the movement for the control of the newspaper, and it is a blow to the movement for the control of the public school. It is a blow to the movement for the control of the church, and it is a blow to the movement for the control of the police. It is a blow to the movement for the control of the army, and it is a blow to the movement for the control of the navy. It is a blow to the movement for the control of the railway, and it is a blow to the movement for the control of the telegraph. It is a blow to the movement for the control of the telephone, and it is a blow to the movement for the control of the telephone company. It is a blow to the movement for the control of the telephone company, and it is a blow to the movement for the control of the telephone company.

The Socialist party, then, is opposed to this decision. It is opposed to the idea that any man, however great his talent or however great his skill, can invent a process and then sit back and enjoy the profits from its use. It is opposed to the idea that any man, however great his talent or however great his skill, can invent a process and then sit back and enjoy the profits from its use. **STATE COMMITTEE MEETS.**

Work of the Year Reviewed—Plans Made Out for the Future—Prospects Bright—State Keeps Pace with City.

A meeting of the State Committee of the Socialist party of Illinois was held at the State Capitol in Springfield, Jan. 3, 1905. The meeting was called to order by Hon. H. M. H. C. Smith, chairman of the committee, and was attended by the officers and members of the committee. The proceedings of the meeting were as follows:

The committee agreed that the work of the year had been successful. They said that they had made arrangements for the future, and that they expected the prospects to be bright. They said that the State committee had kept pace with the city committee.

I want your patronage to the extent of my ability to sell you and cordially recommend to the competitor who is more about an injury. My "help" is a letterhead, but you will find your prices right on anything in the jewelry or sewing-machine line. My expenses are lower than the average competitors. I buy my goods right. I get all cash discounts. I pay my expenses in nearly 14 years of my life in that business. Likewise, I feel I must back the deeds of customers.
