BANK FAILURES, THEIR CAUSE AND CURE.

Lessons the Working Class Should Learn from the Milwaukee Moratorium

No such thing as 'Miracle Cure' for disease of capitalism.

If a big bank fails on the East Coast, the entire financial system of the nation can suddenly become paralytic.

Let us look at the matter and see if we can't understand the weaknesses and the danger signals that have been ignored by the leaders of the nation.

The working classes, when faced with a crisis, are not equipped to understand the complex system of finance and industry that we are. But the leaders of the world of finance and industry are equipped to understand it, and they are equipped to use it. And they will use it to the fullest extent that they can.

The working classes should understand that there is no such thing as a 'miracle cure' for the disease of capitalism. It is a disease that will not go away. It will only be made worse by the efforts of the leaders of the world of finance and industry to cover up its existence.

We do not mean to say that the working classes should not try to protect themselves from the effects of the crisis. They should. But they should not expect that the crisis can be solved by any kind of 'miracle cure.'

We must understand the cause of the crisis and work to solve it. And we must understand that the cause of the crisis is the disease of capitalism. It is not the fault of the working classes. It is the fault of the system. And the system must be changed.

The Crisis of the Economic System

The crisis of the economic system is not a crisis of the working classes. It is a crisis of the system. And the system must be changed. The system must be changed to a system that works for the benefit of all the people. not just a few.

We must understand that the system is not working for the benefit of all the people. It is working for the benefit of a few. And the few are getting richer and richer, while the many are getting poorer and poorer.

The workers must learn to take control of their own lives.

The workers must learn to take control of their own lives. They must learn to control the system. They must learn to control the working conditions. They must learn to control the wages.

The workers must learn to take control of their own lives.

The workers must learn to take control of their own lives. They must learn to control the system. They must learn to control the working conditions. They must learn to control the wages.

The workers must learn to take control of their own lives.

The workers must learn to take control of their own lives. They must learn to control the system. They must learn to control the working conditions. They must learn to control the wages.

The workers must learn to take control of their own lives.

The workers must learn to take control of their own lives. They must learn to control the system. They must learn to control the working conditions. They must learn to control the wages.
