A DANISH LOCK-OUT
The Struggle for Liberty Being Made in Denmark.

A CLEAR-CUT CLASS STRUGGLE
International Solidarity of Class Struggle
By International Solidarity of Labor—A Call for Aid

For the last few weeks the little kingdom of Denmark has been on the verge of revolution, and the outcome of one of the fiercest battles between the capitalists and the laboring classes has reached its climax this century. For several years lock-outs have been in the ascendant. After two years there has been a series of crippling lock-outs, particularly in the textile and the iron and steel industries. The workers have been driven to the verge of starvation, but they have been determined to maintain their demands for better wages. The government has tried to intervene, but the workers have refused to accept the terms offered. The struggle has been a clear-cut class struggle, with the workers demanding higher wages and better working conditions, and the employers demanding lower wages and longer hours.
