WHAT IS LABOR DAY

The Significance of This Holiday to American Workers.

JULY 6, 1882. Dear Mr. Secretary:

I would not have you suppose that the celebration of Labor Day is the only event of importance that may take place at this season. There are many other events that should be noted. Among them, perhaps, I should mention the Bitterman Labor Day, which is celebrated in the same manner as the Labor Day, but is not as well known. It is celebrated on the first Tuesday of every August, and is marked by the distribution of beans and rice to the workers. This is done in order to remind the workers of the hardship they endure, and to thank them for their hard work. If you have the opportunity, I would strongly suggest that you attend this event. You will be able to see the true spirit of Labor Day in action, and you will be able to appreciate the efforts of the workers in a much more profound way.

Sincerely,

DIVIDING UP Capitalist vs. Socialist Way

Those who understand the nature of the coming economic struggle, and who realize that the class interests have already started to set in motion the forces which will inevitable energy in the two great political parties, know that the outcome will be determined by the answer to the question: "Who is to divide up the wealth and the power?"

The Socialist formula is: "One worker-For one worker.

The capitalist formula is: "One worker-For the Capitalist class.

way by which the less capable workers in the smoke and steam and the industrial plants that form the back bone of this nation make it possible to divide up the wealth and the power in the manner that the capitalist class desires. It is not for me to say the way in which the labor movement has been the mainspring of the industrial development of this country. But it is for me to say that it is one of the most important factors in determining the outcome of the struggle that is now going on in the country. It is not for me to say how long or how much of the labor movement has been successful in accomplishing its objects. But it is for me to say that the labor movement has been the mainspring of the industrial development of this country.

WHAT SOCIALISM SEES.

Socialist Labor Party of the United States.

PLATUEM.

Socialism, as the fundamental and essential aspect of the social and economic order, asserts the complete and unconditional ownership of the means of production and distribution, as the means to the production and distribution of the wealth of the world, by the people who produce that wealth, and the denial to any individual, or corporation, of the power to control the means of production, to set the rates of wages, or to operate for personal gain.
